342. *Wardha Coal.*—The excess here was entirely in a transfer to Capital of about 27,1, which had been charged to Revenue on account of additions and improvements to the Colliery works. The principal expenditure during the year has been sinking and fitting up No. 5 pit.

343. *Rangoon-Irrawadi.*—The figures have been drawn up so as to shew separately the transfer of suspense balance from this to the Rangoon-Sittang Line. The open length of the line was 161 miles throughout the year, and the main work has been replacement of timber bridges by iron-girder ones.

344. *Rangoon-Sittang.*—Rangoon to Pegu, 46 miles, was opened on 26th February 1884; further 41 miles were nearly ready and to be opened in July 1884. The expenditure, except for the suspense accounts above noted, followed the Budget Estimate very closely.

345. *Tirhoot* (including extensions).—The work done is nearly equal in amount to that anticipated in the Budget Estimates. The chief works were—

Western Extension.—Remaining 27 miles to Bettiah opened on 20th December 1883. Station buildings and staff quarters finished. Ballasting well in hand.

Mokameh Extension.—24 miles; opened in May 1, 1883, as soon as East Indian Railway Company were ready with their ghât line.

Hajipur Extension.—Commenced March 1883, and about three-quarters completed during 1883. Rails laid to near Hajipur; expected to be opened by September 1884.

Gunduk Bridge.—Preliminary works begun.

Section N.—EXPENDITURE ON PRODUCTIVE PUBLIC WORKS (CAPITAL ACCOUNTS)—*continued.*

346. *Dacca-Mymensing.*—Scarcity of labourers and frequent desertions have much delayed the work upon this line, and only three-fourths of the estimate were spent. The line is 86 miles from Narainganj through Dacca to Mymensing.

347. *Assam-Behar* (*Dinajpur-Purneah and Tirhoot Section*).—Sanction was received during the year, and 43,4 were spent.

348. *Northern Bengal* (*and Dinajpur Extension*).—The work of the year slightly fell short of estimate. Of the Dinajpur extension 9 miles were opened on 1st July 1883, and the remaining 10 on 16th May 1884. On the south side of the Ganges an extension of six miles was necessitated by the alteration of the river, and the crossing point was in December removed from Damukdea to a point nearly opposite Sara.

349. *Calcutta and South-Eastern* (including Diamond Harbour Extension).—This extension was opened on May 1, 1883, from Mugrahât to Diamond Harbour, 12½ miles. The road was put into good running order and bricks burnt to complete the ballasting.

350. *Cawnpore-Achneyra.*—This name now includes the following continuous line:—

1. Cawnpore-Farukhabad	. . 86½	miles open.
2. Farukhabad to Hattras	. . 101	„ opened in April and July 1884.
3. Hattras to Muttra	. . . 29	„ open.
4. Jumna Bridge	 1	mile opened July 1884.
5. Muttra-Achneyra	. . . 23	miles open.
6. A Branch to Soron	. . . 9½	„ is under construction.

On the first section the work done has been the improvement of the Cawnpore passenger station and other minor improvements.

On the second, the railway was completed so far as to be nearly ready for opening, and rolling-stock got ready. Workshops only begun.

The third was entirely re-laid with steel rails, and several miles re-aligned.

On the Jumna Bridge, all the wells had been during 1883 sunk full depth; stone superstructure nearly complete; girders ready for lifting into place.

The Soron Branch was ready to receive the rails which would be brought from Hattras on the opening of the line between Hattras and Kashgunj.

351. *Bareilly-Pilibhit.*—The outlay fell behind estimate. The earthwork had been practically completed and all the major bridges ready to receive girders, except the bridge over the Deoha (13 spans of 60 feet) where the wells were still being sunk.

352. *Indus Valley.*—The serious damage done by floods in 1882 was repaired by improving and heightening embankments and providing more water-way between miles 342 and 360. The progress on the Sukkur bridge has been—approaches on both sides put in hand, piers and abutments of the Sukkur channel built up to 25 feet above high-water mark; and of the bridge over the Rohri channel, the blocks on which the pillars stand have been finished up to bottom of bed-stones. Quarters have been built at various places.

353. *Punjab Northern, Southern Section*—

The increase in expenditure over Budget Estimate is due to sanction received, after the beginning of the year for the construction of the Wazirabad-Sialkote Branch.

This Branch, 26 miles, was opened on January 1st, 1884, though not quite complete in respect of station buildings and ballasting. At Wazirabad, the junction station, considerable additions were made.

The most important works during the year were station works, workshops, and buildings at Rawalpindi.

354. *Amritsar-Pathankote.*—Sixty-six miles were opened on 1st January 1884, and the remaining 15 on 17th June.

East Indian and Eastern Bengal Railways.

1882-83. Accounts.		Budget.	1883-84. Revised.	Accounts.
	EAST INDIAN RAILWAY—			
480,3	Redemption of annuity (sterling) . . .	...	504,0	510,3
148,2	Other capital transactions	424,0	238,0	233,3
628,5	TOTAL .	424,0	742,0	743,6

Section N.—EXPENDITURE ON PRODUCTIVE PUBLIC WORKS (CAPITAL ACCOUNTS)—*continued.*

355. The first of these is merely an operation in the nature of transfer of existing debt, and as it does not affect the cash account, no entry was made on account of it in the estimates. The nature of the operation is set forth in para. 273.

The principal works in connection with the railway in India are the Hooghly Bridge and the works at Howrah Station. The doubling of the line from Buxar to Mogulserai was completed within the year. The short expenditure, compared with estimate, was mainly due to delay in receiving stores from England for the work on the Hooghly Bridge.

356. The Eastern Bengal Railway reverts to the State from 1st July 1884 and in anticipation of this transaction, part of the debentures of the Company have been redeemed by issue of 3½ per cent. stock.

51.—Irrigation and Navigation.

1882-83. Accounts.		Budget.	1883-84. Revised.	Accounts.
	BENGAL—			
37,2	Soane project	70,0	57,7	59,0
36,5	Orissa project	70,0	75,1	63,9
12,2	Midnapur series	20,0	17,2	17,4
	NORTH-WESTERN PROVINCES—			
88,9	Lower Ganges Canal	95,1	81,8	75,3
37,4	Other works	54,9	41,8	48,9
	PUNJAB—			
201,6	Sirhind Canal	121,6	99,2	100,3
—63,8	Less contribution			
53,4	Other works	158,4	140,2	132,4
99,1	MADRAS	150,0	162,7	149,0
	BOMBAY—			
15,8	Deccan	60,0	64,6	20,2
43,4	Sind			43,3
...	Reserve	162,1	...	...
1,762,6	Purchase of Madras Irrigation Company's undertaking	16,0	12,8	12,8
2,324,3		978,1	753,1	722,5

357. There have been delays, of one kind or another, in the case of nearly all these works, but excluding the main difference in the amount held in reserve not being wanted during the year, the expenditure altogether came to 722,5 against an estimate of 816,0, and it was distributed for the most part nearly according to estimate.

52.—Miscellaneous Public Improvements.

1882-83 Accounts.		Budget.	1883-84. Revised.	Accounts.
49,8	Madras Harbour	23,0	—533,1	—533,1

358. This head now disappears from the account of productive expenditure. The expenditure up to 1882-83 inclusive has been written back under ordinary heads, and the new expenditure is taken under a special advance head.

Section O.—PERMANENT DEBT.

	Budget.	1883-84. Revised.	Accounts.
INDIA—			
Incurred	2,600,0	2,526,2	2,524,8
Discharged	30,0	26,0	12,8
NET	2,570,0	2,500,2	2,512,0
ENGLAND—			
Redemption of East Indian Railway Annuity and Debenture Stock	...	524,0	535,1
Redemption of Eastern Bengal Railway	...	...	55,9
Total incurred	...	524,0	591,0
Discharged	510,0	43,0	40,0
NET	—510,0	+481,0	+551,0
NET	+2,060,0	+2,981,2	+3,063,0

359. In India provision was made for a loan at 4 per cent. of 2,500,0. This Loan was advertized on 13th July 1883, tendered for on 14th August 1883 and taken up at an average price of ₹98-10. 100,0 was provided for stock-notes, but a very small quantity, 24,7 only was taken up.

360. In England it was intended to buy up debentures to the extent of 500,0, but the operation was not carried out, the money received in respect of the Afghan war contribution being appropriated as explained in paragraph 314 to payment of arrear War Office claims. The raising of stock in redemption of East India Railway and Eastern Bengal Railway has been noticed under Productive Public Works, paragraph 355.

Section P.—UNFUNDED DEBT.

	Budget.	1883-84. Revised.	Accounts.
Special Loans	...	...	—144,0
Treasury Notes and Service Funds, India	+240,2	+207,9	+219,9
Do. Do. England	+3,4	+3,6	+3,5
Savings Bank Deposits	+350,8	+425,9	+273,1
	+594,4	+637,4	+352,5

361. The payment entered in the first of these lines is the "principal sum proportionate to the pension of Taj Mahal," which is referred to in Section 17 of Act I of 1881, and which was withdrawn for investment under that Section, at the end of the year.

362. Under "Savings Bank Deposits," one of the special accounts is that of the "General Family Pension Fund" in Calcutta. At the end of the year, the Directors, adopting a suggestion made by the Government, withdrew 100,0 of their book-balance for investment in Government Securities. But for this withdrawal the revised estimate would have been more nearly maintained. The excess over Budget is due to the increase of deposits in the New Postal Savings Bank, which was estimated at Net 202,0, but shewed in the accounts 470,3. This increase was in part at the expense of the ordinary Presidency and District Banks.

Section Q.—DEPOSITS AND ADVANCES.

	1883-84.					
	Budget.		Revised.		Accounts.	
INDIA—						
Provincial Balances (net)	.....	−1,499,3	.....	−1,106,2	.....	−464,7
Commission for Reduction of Debt (Indian Account) .	131,7—0=	+131,7	573,3 −746,7=	−173,4	581,2 −756,1=	−174,9
(English Account)	.....	...	.....	−1,001,4		−1,001,4
Other Deposits and Advances . .	18,391,8—18,109,4	= +282,4	22,057,8— 22,330,3=	−272,5	21,755,3—21,814,5=	−59,2
England . .	.....	+ 500,0		+ 506,6		+1,010.0
	TOTAL .	− 585,2		−2,046,9		−690,2

363. The first of these heads has been noticed in paragraph 324; it represents the deposit account on which the Provincial Governments have drawn for their excess expenditure.

364. The account of the Commission for reduction of debt received a much larger credit than estimated for in the Budget as explained in paragraph 225. The payments in the Indian account are for the most part payments against the drawings of the Secretary of State; they were provided for in the Estimates of 1882-83; that is, they were assumed to take place in March 1883, whereas a considerable portion came in course of payment only in April. The English part of the account was not entered in the estimates, as the arrangements giving rise to it were determined on only at the very end of the year 1882-83, and it was regarded as an operation outside the accounts, being a receipt of a million in 1882-83 and the disbursement of the same in 1883-84.

365. The India Office estimated to receive a further instalment of half a million of the Imperial Contribution towards the war in Afghanistan, which, as explained in former reports, passes to a suspense account. It suited the English Government to pay a whole million instead.

Section R.—LOANS TO MUNICIPALITIES, NATIVE STATES, &c.

	Budget.	1883-84. Revised.	Accounts.
India	195,5—140,7	271,1—97,0	278,7—106,7
	54,8	174,1	172,0

366 The provinces generally estimated for larger advances than were made, and obtained larger repayments than they anticipated.

Section S.—CAPITAL OF GUARANTEED AND SUBSIDIZED COMPANIES.

	1883-84. Budget.		Revised.		Accounts.	
INDIA—	India.	England.	India.	England.	India.	England.
Bombay, Baroda and Central India	20,6	—90,0	27,6	—166,7	37,9	—167,0
Eastern Bengal	18,4	—27,7	37,6	—70,0	39,1	—60,2
Great Indian Peninsula	300,2	—514,0	275,0	—90,2	272,8	—81,8
Madras	68,7	—158,1	46,8	—66,1	71,8	—64,6
Oudh and Rohilkund	—375,0	+155,3	—364,0	+160,9	—398,3	+114,8
Sind, Punjab and Delhi	105,4	—170,0	377,7	—152,1	55,3	—156,5
South Indian	21,6	+30,0	45,5	+43,8	56,7	+31,2
	159,9	—774,5	446,2	—340,4	135,3	—384,1
Madras Irrigation and Canal	...	...	..	...	—7,0	...
	159,9	—774,5	446,2	—340,4	128,3	—384,1
SUBSIDIZED COMPANIES—						
Central Bengal	—164,6	+110,5	—130,0	+107,0	—129,9	+99,0
Rohilkund-Kumaun	...	—56,0	...	—40,0	...	—40,0
Southern Mahratta	—400,0	—112,0	—387,2	—123,4	—407,8	—83,7
Western Deccan	...	...	—25,0	...	—25,4	...
Various	...	...	..	—78,0	...	...
	—564,6	—57,5	—542,2	—134,4	—563,1	—24,7
TOTAL	—404,7	—832,0	—96,0	—474,8	—434,8	—408,8

367. A revised and much clearer form has been used in the Finance and Revenue Accounts for exhibiting the transactions of these Companies' Capital Accounts.

368. The Indian figures of the Guaranteed Companies, which are for the most part repayment to Capital of Stores appropriated for Revenue purposes, do not greatly vary from the estimates. The Revised Estimate under Sind, Punjab and Delhi Railway, includes the credit on account of 325,0 charged to Revenue, which, as mentioned in paragraph 258, was disallowed by the Secretary of State. The Oudh and Rohilkhund Railway is the only one which shews any net capital outlay in India.

369. The English figures shew some considerable alterations arising mostly from the Companies not adhering to their programmes. The chief differences are in the receipt of 496,2 from the Great Indian Peninsula Railway for additional capital, and on the Bombay-Baroda Company not raising 100,0—as proposed—within the year.

Section T.—REMITTANCES.

	1883-84. Budget.	Revised.	Accounts.
Money Order (net)	+17,5	...	+24,4
Other Local Remittances (net)	—59,5	+19,9	—26,4
Other Departmental Accounts (net)	—3,5	+472,7	—17,3
Accounts between Civil and other Departments (net)—			
Post Office	...	...	—5,5
Telegraph	...	...	—1,5
Guaranteed Railways	...	...	...
Marine	...	...	—2,3
Military	...	...	+7,6
Public Works	...	...	—23,6
Remittance Account between England and India (net)	—345,5	+139,5	+54,7
TOTAL	—391,0	+632,1	+10,1

370. The scale of money order transactions increases, *viz.*—

	Issued.	Paid.
1881-82	5,733,5	5,714,1
1882-83	6,468,4	6,454,2
1883-84	7,313,4	7,289,0

the increase involving an increase in the balance under Remittance at the end of the year.

371. Under "Other Departmental Accounts" the 472,7 of the Revised Estimates represents the amount by which the estimates, based upon the state of Cash Balances at the end of the year, brought out a better result than the detailed estimates of Revenue and Expenditure. It is, in fact, the entry of the expected improvement of actuals over revised estimates, and necessarily disappears when in the actual accounts it is dispersed over the numerous heads of Receipts and Outgoings.

372. The various departments worked very closely to the receipts and issues from the Civil Department. The Public Works figure is necessarily large, as it is considerably affected by large drawings of cheques in March, which are paid only in April. The amount of these cheques often comes to fifty or sixty lakhs, and the figure in the accounts probably indicates that the amount was rather less on March 31, 1884, than on March 31, 1883.

373. In the Remittance Account with England, the main difference between the two sides of the accounts was that England estimated to pay 540,0 on account of family remittances, while India estimated to receive only 207,6, giving a net difference of 332,4. The real figure was between the two.

Section U.—SECRETARY OF STATE'S BILLS.

	Budget.	1883-84. Revised.	Accounts.
Drawings	16,300,0	17,800,0	17,599,8
Payments	16,300,0	18,051,9	17,997,2

374. The state of the market, in the first three months of 1884, proved very favourable for drawings, and the balances in India being strong, the Secretary of State took advantage of it to increase his drawings considerably beyond the requirements of the year.

375. The bills drawn during the year are thus arranged by month of allotment:—

	£	₹	Rate in Pence.
Part of March 1883	271,9	33,46	19·50
April „	1,505,0	1,85,84	19·43
May „	1,494,7	1,85,10	19·38
June „	1,364,6	1,68,68	19·41
July „	1,087,8	1,34,29	19·44
August „	1,295,1	1,59,55	19·48
September „	953,8	1,17,01	19·56
October „	1,072,3	1,31,23	19·61
November „	879,3	1,08,32	19·48
December „	1,391,6	1,71,13	19·51
January 1884	3,179,5	3,89,60	19·58
February „	1,464,8	1,77,91	19·76
March „	1,639,4	2,00,04	19·67
	17,599,8	21,62,16	19·53

376. And the payment account is as follows:—

	£	₹
Bills outstanding on 1st April 1883	572,6	70,44
Drawn in 1883-84	17,599,8	21,62,16
Total for payment	18,172,4	22,32,60
Paid in 1883-84	17,997,2	22,11,17
Outstanding 1st April 1884	175,2	21,43

Section V.—CASH BALANCE.

	Budget.	1883-84. Revised.	Accounts.
Opening Balance	16,877,1	18,251,4	18,251,4
Closing Balance	14,010,3	16,046,2	17,313,1

377. The estimates and accounts may also be stated thus—

Increase of Balance—

	Budget.	1883-84. Revised.	Accounts.
India	—2,143,3	—2,381,5	—1,621,6
England	—723,5	+176,3	+683,3
TOTAL	—2,866,8	—2,205,2	—938,3

Remarks by Executive Engineer

Northern Division, Ganges Canal—There has been a great deal of rain in January which has caused all demand to cease. All distributaries are now closed and save any fluctuations due to measurements, the 37,926 acres already irrigated will be the area irrigated.

Meerut Division, Ganges Canal—During the first week in January there was a good demand for water for irrigation, but this ceased after the rain on the 8th and 9th. Heavy rain fell on the 27th and 28th averaging 2·4 inches over the Division.

Bulandshahr Division Ganges Canal—Unusually heavy cold weather rain and consequently very little demand during month.

Aligarh Division, Ganges Canal—74,008 acres were irrigated this month against 22,332 in January, 1884. The demand was fluctuating owing to cloudy weather. Supply in canal was ample.

Narora Division, Lower Ganges Canal—Cloudy weather during whole of January and part of December, heavy dews and some rain prevented irrigation being done, large quantities of spare water being escaped at Narora during month.

Mainpuri Division, Lower Ganges Canal—The area irrigated this year is only about 40 per cent. of the area irrigated up to the same date of last year. The demand for water during the month was very slack. The weather was generally cloudy with occasional showers.

Cawnpore Division, Lower Ganges Canal—The decrease in area is due to—

1st—The alteration from old irrigation to remodelled; the season being favourable, cultivators did not complete their guls for the remodelled arrangement.

2nd—Owing to jhils and tanks being full of water, a good deal of rabi was irrigated without assistance from canal.

3rd—Owing to canal water being late in reaching the Division, water could have been taken on the 16th November, but canal-water did not reach here till the 18th December.

Etawah Division, Lower Ganges Canal—Decrease due to the nature of season, which was unfavourable to canal irrigation.

Bhognipur Division, Lower Ganges Canal—Weather cloudy throughout the month.

Eastern Jumna Canal—The canal was running only 9 days in the month. Sky clouded over from the 21st December. An average rainfall of 1·5 inches on the 4th and 8th; light showers on 14th and 15th; a rainfall of from 3 to over 6 inches on 25th to 28th all over the Doab. No new irrigation can be expected: and the total area may rise to one-half of last year's, but not more. Crops are looking very well, but red rust has begun to show itself in places.

ra Canal—Demand throughout the month was very slack; bajhar and gram will not as a rule take water this rabi; the decrease as compared with last year is due to heavy rain in September, 1884, and failure of the monsoon in 1883.
hilkand Canals—For the first week water was in great demand for rabi first watering. There was about half an inch of rain on the 8th which eased the demand; from half to three-fourths of an inch of rain on 26th and the same on 28th, stopping all demand, and is nearly nt for sugar "paleo." Most of the crops irrigated; this month look unhealthy owing to the cloudy weather and excess of moisture. There has been hail in places.
ecutive Engineer, Jumna Canals, reports—Rain fell on the 8th, after which all demand ceased.
remarks from the other Divisions.

REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th MARCH 1885.

GENERAL REMARKS.—There has been slight rain during the week in some districts in the Punjab, the North-Western Provinces and Oudh, the Central Provinces, Bengal, and Assam. Some rain has fallen also in Madura, North Coorg, and Karachi.

Harvesting continues in Madras and, except in Bellary and Anantapur, the standing crops are generally good. In Mysore there is a scarcity of water both for rice sowings and for cattle. Fodder is also becoming scarce.

The *rabi* harvest is in progress in the Bombay Presidency, in the Central Provinces, and in the Berars, and has begun in the North-Western Provinces and Oudh, where it promises well. In the Punjab *rabi* prospects are generally very good. In the Central India and Rajputana States the crops are in fair condition. In Bengal the *rabi* crops are expected to yield a good outturn. *Boro* paddy promises well; tobacco is being cut and sugarcane-pressing continues. Ploughing for next season's crops is in progress in some districts. In Assam ploughing operations are well in hand. Sugarcane is being cut and pressed in the Gauhati and Dibrugarh districts.

The public health is generally good. Prices are as a rule steady, but show an upward tendency in parts of the Punjab.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Mar. 11th)		
Bellary	*Nil*	Standing crops, dry crops generally, and wet crops in parts, withering from want of rain; harvest paddy and dry grains, yield below average; smallpox exists; 25 deaths from cholera.
Kurnool	,,	Standing crops good, except in one division, and in parts of 3 taluks, where they have withered from want of rain; harvest *cholum*, outturn below average; smallpox and cattle-disease prevalent.
Ganjam	,,	Fever prevalent; cholera and smallpox slight.
Kistna	,,	Standing crops good; smallpox, fever, and cattle-disease exist; 7 deaths from cholera.
Chingleput (Madras)	,,	Standing crops in parts of 3 taluks have withered and are affected by insects; harvest paddy, outturn below half the average; smallpox and cattle-disease exist; 28 deaths from cholera.
Coimbatore	,,	Standing crops, wet good, except in parts of 2 taluks, where they require rain; dry crops withering in 2 taluks; harvest wet and dry grains, outturn wet about average, dry below average; fever exists 32 deaths from cholera.
Tanjore	,,	Standing crops generally good; harvest wet and dry crops, outturn below average; 109 deaths from cholera.
Madura	Average ·02	Outturn of harvest unsatisfactory; fever prevalent; 11 deaths from cholera.
Malabar	*Nil*	Third rice crop cultivation progressing; fever exists; smallpox and cattle-disease slight; 55 deaths from cholera.
Travancore	,,	Smallpox and fever exist; cholera abating, 1 death at Trevandrum. *General Remarks.*—General prospects fair, except in parts of Bellary and Anantapur.
Bombay—(Mar. 11th)		
Karachi	·20 in Karachi	River at Kotri on 8th 5 feet 10 inches against 3 feet 4 inches on same date last year; fever in six talukas; cattle-disease in 7 talukas, loss of 74 cows, bullocks, and buffaloes; cholera cases in Sakro 19 cases, 6 deaths, 31 remaining, in Ghorabari 40 cases, 25 deaths, 14 remaining, and in Shahbandar 3 cases, 2 deaths; no fresh case of smallpox in Karachi, 3 remaining; disease in 35 villages in the district, 123 fresh cases, 19 deaths, 82 remaining; prices—wheat, red rice, and *bajri* in Karachi 26, 28, and 36, in Ghorabari 22, 40, and 40, in Dadu 40, 32, and 40, and in Jati 26, 40, and 46 lbs. per rupee respectively.
Hyderabad	*Nil*	*Rabi* good; oil-seed harvest commenced in Dero, Mohbat, and Hali; river at Kotri on 4th 6 feet against 3 feet 4 inches on same date last year; measles in 2, fever in 5, smallpox in 4, and cattle-disease in 3 talukas; high winds prevail; prices steady.
Ahmedabad	,,	Reaping of *rabi* crops continues; wheat 33 and *bajri* 36 lbs. per rupee.
Baroda	,,	Public health good; crops in good condition; harvesting of wheat commenced; *bajri* 34 and common rice 24 lbs. per rupee.
Surat	,,	*Rabi* harvesting and cotton-picking continue; cholera in Surat and Bardoli, 11 cases, 4 deaths; fever in Bardoli, Pardi, and Mandvi; *jowari* 38 and *nagli* 45 lbs. per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Násik	*Nil*	*Rabi* crops good; slight injury to crops by mildew in Sinnar, Niphad, Chandor, Yeola, Malegaon, and Kalvan; reaping of *rabi* crops in progress in parts of Dindori, Sinnar, Satara, Kalvan, and Peint; public health generally good; cholera in parts of Nasik, Sinnar, Dindori, Niphad, and Malegaon talukas; wheat 37, *bajri* 36½, and rice 24 lbs. per rupee.
Colaba (Bombay) . .	,,	Abnormal temperature rose from 3° cool on 4th to *nil* on 6th, and then fell to 2° cool by the 10th; vapour in air normal; abnormal wind northerly on 6th.
Poona	,,	Reaping of *rabi* nearly completed; 29 cholera cases in Haveli, Khed, Junta, and Maval talukas, 15 fatal; *bajri* 33 and *jowari* 41, in Poona *bajri* 32 and *jowari* 35 lbs. per rupee.
Ahmednagar . .	,,	Reaping of *rabi* generally continues; fever in Jagkhed.
Sholapore . . .	,,	Reaping of *rabi* crops still in progress throughout the district; *jowari* 47 lbs. 7 tolas and *bajri* 39 lbs. 9 tolas per rupee.
Dharwar . . .	,,	Harvesting of late *jowari* commenced in 4 talukas; cotton-picking in progress; scarcity of fodder in 3 and that of drinking water in 5 talukas; public health good; rice 23 to 34 and *jowari* 38 to 59 lbs. per rupee.
Kanara . . .	,,	Common rice in Karwar 14, district average 15 seers per rupee; sugarcane harvest continues; rice plants healthy; fever in Honore, Haliyal, and Yellapur; smallpox—4 deaths in Siddapur, 1 in Supa, and 4 in Mundgod; cholera—3 deaths in Supapetha; cattle-disease in Supat.
Rajkot		General health good; weather warm; *bajri* 33 and *jowari* 44 lbs. per rupee.
		General Remarks.—Rabi harvest nearly completed in parts of Poona, Satara, and Belgaum, in progress in other districts; standing crops injured by mildew in parts of Nasik and by rust in parts of Shikarpur; scarcity of fodder in 3 talukas of Dharwar and of drinking water in 5 talukas of Dharwar and one of Kaladgi; cholera and smallpox in parts of nine districts; cattle-disease in parts of 6, and fever in parts of 12 districts.
Bengal—(March 11th)		
Chittagong . . .	*Nil*	Weather seasonable; prospects of crops good; prices of food-grains stationary; cholera still reported.
Dacca	,,	Pulses are being gathered; ploughing is going on; prospects of crops good; a good deal of smallpox in the district.
24-Pergunnahs . .	,,	Harvesting of *rabi* crops finished with an average outturn of 12 annas; lands are being prepared for next season's crops; price of common rice varies from 15½ to 17½ seers per rupee; public health generally good, though isolated cases of cholera are reported from the Joynogore, Barripore and Barrackpore thanas.
Moorshedabad . .	·39	Weather, days hot and nights cool; prospects of standing crops are moderate, and there are complaints of want of rain in some places; public health good.
Burdwan . . .	*Nil*	*Rabi* crops are being harvested and sugarcane is being pressed, with good results; public health good.
Rungpore . . .	·05	*Aus* crops are being sown; wheat is almost ripe for the sickle; tobacco is being cut; price of common rice is rising; public health good.
Bhagalpore . . .	*Nil*	Harvesting of *rabi* crops has commenced with the exception of peas, mustard, linseed, and gram in the Banka and Sudder sub-divisions, where the crops have suffered from insects; elsewhere prospects are good; price of rice almost stationary.
Purneah . . .	,,	*Rabi* crops have been much injured in the south of the district by caterpillars; wheat is doing well in places, elsewhere damaged by drought; ploughing continues; tobacco is being cut; common rice is selling at 16 seers per rupee; public health is fair; rivers are low.
Durbhanga . . .	,,	Harvesting of spring crops is going on; opium is being extracted; prices stationary; public health good.
Hazaribagh . .	,,	Weather cloudy, cutting of *rabi* crops continues; prospects of *mahua* crop are gloomy; the early crop has been nearly destroyed by the cloudy and rainy weather, which has prevailed for the last two weeks; considerable damage is being also done to poppy crop by hailstorms which passed over the northern part of the district; general health good.
Cuttack . . .	,,	Weather warm, cloudy on the 10th instant; *dalua* is in ear; ploughing is progressing; price of rice stationary; sporadic cases of cholera prevail thoroughout and somewhat badly in the Jagatsingpore and Tritol thanas.
Midnapore . . .	·41	Weather seasonable; no crops on the ground except a little *boro* paddy; public health fair.
Khulna . . .	*Nil*	Weather cool at nights; *boro* paddy is being damaged by insects; prospects however are generally good; lands are being ploughed for *til* and sown with it; prices of food-grains stationary; health generally good, except a few cases of cholera.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Dinagepore . . .	. . . . .	Slight rain fell on two days of the week; prospects of *rabi* crops fair; ploughing is going on; rice is selling at 18 seers per rupee; public health good.
Pubna (Serajgunge) .	*Nil*	Weather hazy and warm; rain wanted for sowings of early crops; price of rice stationary; public health good,
Patna . . .	·25	Harvesting of *rabi* crops is going on; prospects of opium good; a few cases of smallpox are reported from the Behar sub-division, otherwise public health good.
Gya	·13	Weather cloudy with slight rain; some damage has been done to opium and *rabi* crops; prices of food-grains stationary; smallpox still reported.
Chumparun . . .	·21	Prospects of *rabi* and poppy crops continue good; prices stationary; a few cases of smallpox are reported, otherwise public health good.
Mozufferpore . .	. . . . .	Poppy crop is generally doing well, and the collection is in progress.
Shahabad . . .	. . . . .	A somewhat heavy shower of rain on the 4th instant damaged the opium in capsules; weather since settled.
Sarun . . .	. . . . .	Opium is being collected, with fair outturn; weather now favourable.
Monghyr . . .	. . . . .	Prospects of poppy continue favourable.
		General Remarks.—Slight rain fell in several districts; it has facilitated ploughing operations for next season's crops; harvesting of *rabi* crops continues, and a good outturn is on the whole expected; *boro* paddy is doing well; pressing of sugarcane is still going on, and tobacco is being cut; price of rice is almost stationary; cholera and smallpox prevail in some districts, otherwise public health good.
N.-W. Provinces and Oudh— (Mar. 12th)		
Benares (Mar. 10th)	No rain	Sugarcane planting continues; *rabi* crops being cut and threshed; in some places the outturn promises to be a fair average crop; opium collection going on; bazars well supplied; prices nearly stationary; no sickness of men or cattle.
Gorakhpur („ 9th)	Slight rain on the 5th instant.	Crops ripening well and harvesting begun; wheat excellent, gram and peas have suffered somewhat from insects; poppy yield plentiful; prices stationary.
Fyzabad („ 10th)	*Nil*	Weather getting hot; strong west wind; peas being cut in places; opium-extracting in progress; prices steady; supplies abundant; general health good.
Lucknow („ 9th)	Slight fall of hail in tahsil Maliabad.	Weather getting hot; west wind; no damage done by hail; peas and *masur* being cut; opium collection going on; markets well supplied; prices stationary; condition both of men and cattle good.
Rai Barelli („ „)	*Nil*	Weather generally clear, at times cloudy, high west wind; prospects of *rabi* and opium crops good; markets well stocked; prices almost unchanged.
Partabgarh („ 10th)	„	Weather fine; peas, barley, and *sarson* being cut; *Sawan* sowing progressing; reports of smallpox in Sangipur and Sangramgurh thanas.
Allahabad („ „)	No rain	*Rabi* crops being harvested, all in the most satisfactory condition; prospects excellent; prices nearly stationary; health good.
Cawnpore („ 9th)	„	Weather warm; crops ripening, and in places being cut; opium collections generally in hand, and yield good; prices steady; smallpox in one pargana, and slight fever reported from two others; cattle in good condition.
Banda . (Mar. 11th)	*Nil*	Weather clear; wheat and gram at places being cut; no distress.
Ballia . („ 9th)	Slight rain on the 5th	Wind westerly; harvesting continues; sugarcane planting commenced, some damage reported by blight, otherwise crops very good; market well supplied; condition of men and cattle good.
Farakhabad („ 10th)	*Nil*	Barley being cut; crops in all tahsils except one injured through *girna*; harvest not yet begun; general condition of the people normal
Sitapur . („ „)	„	Weather clear during week with west wind, occasionally strong; prospects favourable; health good.
Bareilly . („ 9th)	„	Crops and condition of people and cattle good.
Kumaon . („ „)	More rain	Fair weather; crops doing well; operations for *kharif* commenced; prices unchanged; reports about fever continue; few cases of smallpox; general health good; cattle-disease continues.
Agra . („ 10th)	·10 in 3 parganas	Crops ripening; heat increasing; prices steady; health good.
Jhansi . („ „)	*Nil*	Some damage done to wheat crop by blight; the season is a very favourable one for poppy; prices fluctuating; health of people and cattle good.
Meerut . („ 9th)	Slight fall of rain and a storm.	Weather getting hotter; crops flourishing and ripening; supplies sufficient; prices steady; health good; one case of smallpox.
		General Remarks.—Harvesting has begun, outturn promises well; markets well stocked; prices steady.
Punjab—(Mar. 11th)		
Delhi . . .	*Nil*	*Rabi* prospects and health good; prices almost stationary.
Hissar . . .	„	*Rabi* prospects fair; health good; prices nearly stationary.
Umballa . . .	„	*Rabi* crops flourishing; health and prospects good; prices stationary.
Jullundur . . .	·50	Health and prospects good; prices stationary.
Amritsar . . .	No rain	Health and state of crops good; prices almost stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*contd.*		
Sialkot . . .	·10	Health and harvest prospects good; prices stationary.
Ferozepore . . .	·30 at Moga	Health and state of crops good; prices slightly rising.
Lahore . . .	No rain	Health good; state of crops fair; prices slightly rising.
Rawalpindi . . .	·10	Health and *rabi* prospects good; prices rising.
Shahpur . . .	No rain	Health good; *rabi* prospects fair; prices stationary.
Mooltan . . .	·10 at Sadar	Health and prospects good; prices almost stationary.
Dera Ismail Khan .	·17	Health and prospects good.
Peshawar . . .	·10	Health and *rabi* prospects good; prices rising.
		General Remarks.—Slight rain in some of the districts; health and prospects good; prices rising in Ferozepore, Lahore, Rawalpindi, and Peshawar, and stationary in other districts.
Central Provinces—(Mar. 11th)		
Nagpur . . .	·04	Weather cloudy and warm; prospects good; *rabi* being harvested smallpox and cattle-disease continue; prices stationary
Jubbulpore . . .	·08	Weather changeable but cool; reaping commenced; wheat suffered from *girwa* in places, loss of 3 annas in rupee anticipated; health good; wheat 26 and rice 17 seers per rupee.
Saugor (Mar. 10th)	*Nil*	Weather slightly cloudy; days getting warm, mornings and evenings pleasant; crops progressing favourably; health good; prices easy.
Seoni	·64 Heavy shower with hailstorm on 9th.	Slight damage reported from mildew; cattle-disease and smallpox continue; prices slightly fallen.
Hoshangabad . .	*Nil*	Days hot, nights cool; harvesting of *rabi* in progress; fever slightly prevalent; prices steady.
Khandwa . . .	„	Weather clear and warm; *rabi* reaping continues; cholera—4 cases, 1 death; rice 16, wheat 20, and *jwar* 32 seers per rupee.
Sambalpur (Mar. 7th)	„	Weather cloudy and warm; sugarcane sowings retarded by late showers; cholera in places; common rice 36¾ seers per rupee.
		General Remarks.—Wheat harvesting is in full swing, linseed having been all reaped; prospects continue favourable; price of wheat in Raipur is now 40 seers per rupee.
British Burma—(March 11th)		
Akyab (Mar. 7th)	*Nil*	Cholera in Naaf township, otherwise public health good; some cattle-disease in Rathedoung township, elsewhere cattle healthy; price of paddy rupees 21 to 28 per 100 baskets.
Bassein („ „)	„	Public health good; slight cattle-disease in parts of district; price of paddy rupees 76 per 100 baskets.
Rangoon („ „)	„	Public health good; price of paddy rupees 70 to 72 per 100 baskets
Amherst („ „) (Moulmein).	„	Public health and health of cattle good; prices of paddy rupees 65 per 100 baskets.
Tavoy („ „)	„	Public health and health of cattle good; price of paddy rupees 55 per 100 baskets.
Pegu („ „)	„	Public health and health of cattle good; price of paddy rupees 58 to 66 per 100 baskets.
Henzada („ „)	„	Smallpox prevalent in Henzada town, otherwise public health good; cattle healthy; price of paddy rupees 65 per 100 baskets.
Prome („ „)	„	Slight cholera in Prome town and in parts of district; cattle healthy; price of paddy rupees 66 per 100 baskets.
Toungoo („ „)	„	A few cases of smallpox in district, otherwise public health good; cattle healthy; price of paddy rupees 65 per 100 baskets.
Thayetmayo („ „)	„	Smallpox prevalent; price of paddy falling.
		General Remarks.—A little cholera in Akyab, Prome, and Thongwa districts; smallpox prevalent in 2 towns, Henzada and Thayetmayo; sporadic in 2 or 3 other quarters; a little cattle-disease in Akyab, Bassein, and Thongwa districts, otherwise health of province satisfactory.
Assam—(March 11th)		
Gauhati . . .	No rain during the week ending 10th instant.	Mornings and nights still cold; days becoming perceptibly warm; sugarcane being cut and pressed; ploughing operations for *aus* in progress, but rain wanted to facilitate ploughing operations; public health fair.
Cachar . . .	·06	Weather warm during the day, but cool at night; outturn of mustard crops about ⅛ less than that of last year for want of rain; common rice 17½ seers per rupee; health good.
Dibrugarh . . .	0·35	Weather seasonable; ploughing for *ahu dhan* still going on; sugarcane being crushed; public health good.
Mysore and Coorg—(March 11th)		
Bangalore . . .	No rain	No water in tanks for rice sowing; water and fodder for cattle becoming scarce; public health fair; prices rising slightly in parts.
Mercara . . .	Showers, especially in north Coorg, continue.	Paddy nearly threshed out; grain light; rain needed for coffee blossom; fall in price of coffee and cardamoms in local markets.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Berar & Hyderabad— (March 11th)		
Amraoti . . .	. . . .	Weather getting hot; *rabi* harvest continues; prospects favourable; wheat 22 and *jowari* 26 seers per rupee.

83. Principle on which compensation is to be estimated.

Acquisition of land for building and other purposes.

84. Acquisition of land for building and other purposes.

Sub-letting.

85. Restrictions on sub-letting.

Surrender and abandonment.

86. Surrender.
87. Abandonment.

Sub-division of tenancy.

88. Division of tenancy not binding on landlord without his consent.

Ejectment.

89. No ejectment except in execution of decree.

Measurements.

SECTIONS.

90. Landlord's right to measure land.
91. Power for Court to order tenant to attend and point out boundaries.
92. Standard of measurement.

Managers.

93. Power to call upon co-owners to show cause why they should not appoint a common manager.
94. Power to order them to appoint a manager if cause is not shown.
95. Power to appoint manager if order is not obeyed.
96. Power to nominate person to act in all cases under clause (*b*) of last section.
97. The Court of Wards Act, 1879, applicable to management by Court of Wards.
98. Provisions applicable to manager.
99. Power to restore management to co-owners.
100. Power to make rules.

CHAPTER X.

RECORD-OF-RIGHTS AND SETTLEMENT OF RENTS.

101. Power to order survey and preparation of record-of-rights.
102. Particulars to be recorded.
103. Power for Revenue-officer to record particulars on application of proprietor or tenure-holder.
104. Procedure as to recording or settling rents.
105. Publication of record.
106. Procedure in case of dispute as to entries in record.
107. Procedure to be adopted by Revenue-officer.
108. Appeals from decisions of Revenue-officers.
109. Undisputed entries in record to be presumptive evidence.
110. Time at which settlement of rent is to take effect.
111. Stay of proceedings in Civil Court during preparation of record.
112. Power to authorize a special settlement in special cases.
113. Period for which rents as settled are to remain unaltered.
114. Expenses of proceedings under chapter.
115. Presumption as to fixity of rent not to apply where record has been prepared.

CHAPTER XI.

RECORD OF PROPRIETORS' PRIVATE LANDS.

116. Saving as to khámár land.
117. Power for Government to order survey and record of proprietor's private lands.
118. Power for Revenue-officer to record private land on application of proprietor or tenant.
119. Procedure for recording private land.
120. Rules for determination of proprietor's private land.

CHAPTER XII.

DISTRAINT.

SECTIONS.

121. Cases in which an application for distraint may be made.
122. Form of application.
123. Procedure on receipt of application.
124. Execution of order for distraint.
125. Service of demand and account.
126. Right to reap, &c., produce.
127. Sale proclamation to be issued unless demand is satisfied.
128. Place of sale.
129. When produce may be sold standing.
130. Manner of sale.
131. Postponement of sale.
132. Payment of purchase-money.
133. Certificate to be given to purchaser.
134. Proceeds of sale how to be applied.
135. Certain persons may not purchase.
136. Procedure where demand is paid before the sale.
137. Amount paid by under-tenant for his lessor may be deducted from rent.
138. Conflict between rights of superior and inferior landlords.
139. Distraint of property which is under attachment.
140. Suit for compensation for wrongful distraint.
141. Power for Local Government to authorize distraint in certain cases.
142. Power for High Court to make rules.

CHAPTER XIII.

JUDICIAL PROCEDURE.

143. Power to modify Civil Procedure Code in its application to landlord and tenant suits.
144. Jurisdiction in proceedings under Act.
145. Náibs or gumáshtas to be recognized agents.
146. Special register of suits.
147. Successive rent-suits.
148. Procedure in rent-suits.
149. Payment into Court of money admitted to be due to third person.
150. Payment into Court of money admitted to be due to landlord.
151. Provision as to payment of portion of money.
152. Court to grant receipt.
153. Appeals in rent-suits.
154. Date from which decree for enhancement takes effect.
155. Relief against forfeitures.
156. Rights of ejected raiyats in respect of crops and land prepared for sowing.
157. Power for Court to fix fair rent as alternative to ejectment.
158. Application to determine incidents of tenancy.

CHAPTER XIV.

SALE FOR ARREARS UNDER DECREE.

159. General powers of purchaser as to avoidance of incumbrances.

SECTIONS.

160. Protected interests.
161. Meaning of "incumbrance" and "registered and notified incumbrance".
162. Application for sale of tenure or holding.
163. Order of attachment and proclamation of sale to be issued simultaneously.
164. Sale of tenure or holding subject to registered and notified incumbrances, and effect thereof.
165. Sale of tenure or holding with power to avoid all incumbrances, and effect thereof.
166. Sale of occupancy-holding with power to avoid all incumbrances, and effect thereof.
167. Procedure for annulling incumbrances under the foregoing sections.
168. Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.
169. Rules for disposal of the sale-proceeds.
170. Tenure or holding to be released from attachment only on payment into Court of amount of decree with costs, or on confession of satisfaction by decree-holder.
171. Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the tenure or holding.
172. Inferior tenant paying into Court may deduct from rent.
173. Decree-holder may bid at sale; judgment-debtor may not.
174. Application by judgment-debtor to set aside sale.
175. Registration of certain instruments creating incumbrances.
176. Notification of incumbrances to landlord.
177. Power to create incumbrances not extended.

CHAPTER XV.

CONTRACT AND CUSTOM.

178. Restrictions on exclusion of Act by agreement.
179. Permanent mukarrarí leases.
180. Útbandi, chur and dearah lands.
181. Saving as to service-tenures.
182. Homesteads.
183. Saving of custom.

CHAPTER XVI.

LIMITATION.

184. Limitation in suits, appeals and applications in Schedule III.
185. Portions of the Indian Limitation Act not applicable to such suits, &c.

CHAPTER XVII.

SUPPLEMENTAL.

Penalties.

SECTIONS.

186. Penalties for illegal interference with produce.

Agents and representatives of landlords.

187. Power for landlord to act through agent.
188. Joint landlords to act collectively or by common agent.

Rules under Act.

189. Power to make rules regarding procedure, powers of officers and service of notices.
190. Procedure for making, publication and confirmation of rules.

Provisions as to temporarily-settled districts.

191. Saving as to land held in a district not permanently settled.
192. Power to alter rent in case of new assessment of revenue.

Rights of pasturage, &c.

193. Rights of pasturage, forest-rights, &c.

Saving for conditions binding on landlords.

194. Tenant not enabled by Act to violate conditions binding on landlord.

Savings for special enactments.

195. Savings for special enactments.

Construction of Act.

196. Act to be read subject to Acts hereafter passed by Lieutenant-Governor of Bengal in Council.

SCHEDULE I.—REPEAL OF ENACTMENTS.

SCHEDULE II.—FORMS OF RECEIPT AND ACCOUNT.

SCHEDULE III.—LIMITATION.

An Act to amend and consolidate certain enactments relating to the Law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal.

WHEREAS it is expedient to amend and consolidate certain enactments relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. (*1*) This Act may be called the Bengal Tenancy Act, 1885.

Commencement.

(*2*) It shall come into force on such date (hereinafter called the commencement of this Act) as the Local Government, with the previous sanction of the Governor General in Council, may, by notification in the local official Gazette, appoint in this behalf.

Local extent.

(*3*) It shall extend by its own operation to all the territories for the time being under the administration of the Lieutenant-Governor of Bengal, except the Town of Calcutta, the Division of Orissa, and the Scheduled Districts specified in the third Part of the First Schedule of the Scheduled Dis- [1874. tricts Act, 1874; and the Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, extend the whole or any portion of this Act to the Division of Orissa or any part thereof.

Repeal.

2. (*1*) The enactments specified in Schedule I hereto annexed are repealed in the territories to which this Act extends by its own operation.

(*2*) When this Act is extended to the Division of Orissa or any part thereof, such of those enactments as are in force in that Division or part, or, where a portion only of this Act is so extended, so much of them as is inconsistent with that portion, shall be repealed in that Division or part.

(*3*) Any enactment or document referring to any enactment hereby repealed shall be construed to refer to this Act or to the corresponding portion thereof.

(*4*) The repeal of any enactment by this Act shall not revive any right, privilege, matter or thing not in force or existing at the commencement of this Act.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context:—

(*1*) "Estate" means land included under one entry in any of the general registers of revenue-paying lands and revenue-free lands, prepared and maintained under the law for the time being in force by the Collector of a district, and includes Government khás maháls and revenue-free lands not entered in any register.

(*2*) "Proprietor" means a person owning, whether in trust or for his own benefit, an estate or a part of an estate.

(*3*) "Tenant" means a person who holds land under another person, and is, or but for a special contract would be, liable to pay rent for that land to that person.

(*4*) "Landlord" means a person immediately under whom a tenant holds, and includes the Government.

(*5*) "Rent" means whatever is lawfully payable or deliverable in money or kind by a tenant to his landlord on account of the use or occupation of the land held by the tenant:

In sections 53 to 68, both inclusive, sections 72 to 75, both inclusive, Chapter XII and Schedule III of this Act, "rent" includes also money recoverable under any enactment for the time being in force as if it was rent.

(*6*) "Pay," "payable" and "payment," used with reference to rent, include "deliver," "deliverable" and "delivery."

(*7*) "Tenure" means the interest of a tenure-holder or an under-tenure-holder.

(*8*) "Permanent tenure" means a tenure which is heritable and which is not held for a limited time.

(*9*) "Holding" means a parcel or parcels of land held by a raiyat and forming the subject of a separate tenancy.

(*10*) "Village" means an area included in a village map of the revenue-survey within the same exterior boundary, or, where no such maps have been prepared, such area as any officer appointed by the Local Government in this behalf may determine after local inquiry held on such notice as the Local Government considers sufficient for giving information to all persons interested.

(*11*) "Agricultural year" means, where the Bengalí year prevails, the year commencing on the first day of Bysák, where the Faslí or Amlí year

prevails, the year commencing on the first day of Asin, and, where any other year prevails for agricultural purposes, that year.

(*12*) "Permanent Settlement" means the Permanent Settlement of Bengal, Behar and Orissa, made in the year 1793.

(*13*) "Succession" includes both intestate and testamentary succession.

(*14*) "Signed" includes "marked" when the person making the mark is unable to write his name; it also includes "stamped" with the name of the person referred to.

(*15*) "Prescribed" means prescribed from time to time by the Local Government by notification in the official Gazette.

(*16*) "Collector" means the Collector of a district or any other officer appointed by the Local Government to discharge any of the functions of a Collector under this Act.

(*17*) "Revenue-officer" in any provision of this Act includes any officer whom the Local Government may appoint by name or by virtue of his office to discharge any of the functions of a Revenue-officer under that provision.

(*18*) "Registered" means registered under any Act for the time being in force for the registration of documents.

CHAPTER II.

CLASSES OF TENANTS.

Classes of tenants.

4. There shall be, for the purposes of this Act, the following classes of tenants, (namely) :—

(1) tenure-holders, including under-tenure-holders,

(2) raiyats, and

(3) under-raiyats, that is to say, tenants holding whether immediately or mediately under raiyats;

and the following classes of raiyats, (namely) :—

(*a*) raiyats holding at fixed rates, which expression means raiyats holding either at a rent fixed in perpetuity or at a rate of rent fixed in perpetuity,

(*b*) occupancy-raiyats, that is to say, raiyats having a right of occupancy in the land held by them, and

(*c*) non-occupancy-raiyats, that is to say, raiyats not having such a right of occupancy.

Meaning of "tenure-holder" and "raiyat".

5. (*1*) "Tenure-holder" means primarily a person who has acquired from a proprietor or from another tenure-holder a right to hold land for the purpose of collecting rents or bringing it under cultivation by establishing tenants on it, and includes also the successors in interest of persons who have acquired such a right.

(*2*) "Raiyat" means primarily a person who has acquired a right to hold land for the purpose of cultivating it by himself, or by members of his family, or by hired servants, or with the aid of partners, and includes also the successors in interest of persons who have acquired such a right.

Explanation.—Where a tenant of land has the right to bring it under cultivation, he shall be deemed to have acquired a right to hold it for the purpose of cultivation notwithstanding that he uses it for the purpose of gathering the produce of it or of grazing cattle on it.

(*3*) A person shall not be deemed to be a raiyat unless he holds land either immediately under a proprietor or immediately under a tenure-holder.

(*4*) In determining whether a tenant is a tenure-holder or a raiyat, the Court shall have regard to—

(*a*) local custom; and

(*b*) the purpose for which the right of tenancy was originally acquired.

(*5*) Where the area held by a tenant exceeds one hundred standard bíghás, the tenant shall be presumed to be a tenure-holder until the contrary is shewn.

CHAPTER III.

TENURE-HOLDERS.

Enhancement of rent.

Enhancement of rent.

Tenure held since Permanent Settlement liable to enhancement only in certain cases.

6. Where a tenure has been held from the time of the Permanent Settlement, its rent shall not be liable to enhancement except on proof—

(*a*) that the landlord under whom it is held is entitled to enhance the rent thereof either by local custom or by the conditions under which the tenure is held, or

(*b*) that the tenure-holder, by receiving reductions of his rent, otherwise than on account of a diminution of the area of the tenure, has subjected himself to the payment of the increase demanded, and that the lands are capable of affording it.

Limits of enhancement of rent of tenures.

7. (*1*) Where the rent of a tenure-holder is liable to enhancement, it may, subject to any contract between the parties, be enhanced up to the limit of the customary rate payable by persons holding similar tenures in the vicinity.

(*2*) Where no such customary rate exists, it may, subject as aforesaid, be enhanced up to such limit as the Court thinks fair and equitable.

Bengal Tenancy Act.

(*Chapter III.—Tenure-holders.—Secs. 8-15.*)

hancement ent.

(*3*) In determining what is fair and equitable, the Court shall not leave to the tenure-holder as profit less than ten per centum of the balance which remains after deducting from the gross rents payable to him the expenses of collecting them, and shall have regard to—

(*a*) the circumstances under which the tenure was created, for instance, whether the land comprised in the tenure, or a great portion of it, was first brought under cultivation by the agency or at the expense of the tenure-holder or his predecessors in interest, whether any fine or premium was paid on the creation of the tenure, and whether the tenure was originally created at a specially low rent for the purpose of reclamation; and

(*b*) the improvements, if any, made by the tenure-holder or his predecessors in interest.

(*4*) If the tenure-holder himself occupies any portion of the land included in the area of his tenure, or has made a grant of any portion of the land either rent-free or at a beneficial rent, a fair and equitable rent shall be calculated for that portion and included in the gross rents aforesaid.

Power to order gradual enhancement.

8. The Court may, if it thinks that an immediate increase of rent would produce hardship, direct that the enhancement shall be gradual; that is to say, that the rent shall increase yearly by degrees, for any number of years not exceeding five, until the limit of the enhancement allowed has been reached.

Rent once enhanced may not be altered for fifteen years.

9. When the rent of a tenure-holder has been enhanced by the Court or by contract, it shall not be again enhanced by the Court during the fifteen years next following the date on which it has been so enhanced.

Other incidents of tenures.

ts of s.

Permanent tenure-holder not liable to ejectment.

10. A holder of a permanent tenure shall not be ejected by his landlord except on the ground that he has broken a condition on breach of which he is, under the terms of a contract between him and his landlord, liable to be ejected:

Provided that where the contract is made after the commencement of this Act, the condition is consistent with the provisions of this Act.

Transfer and transmission of permanent tenure.

11. Every permanent tenure shall, subject to the provisions of this Act, be capable of being transferred and bequeathed in the same manner and to the same extent as other immoveable property.

Other incidents of tenures.

Voluntary transfer of permanent tenure.

12. (*1*) A transfer of a permanent tenure by sale, gift or mortgage (other than a transfer by sale in execution of a decree or by summary sale under any law relating to patní or other tenures) can be made only by a registered instrument.

(*2*) A registering officer shall not register any instrument purporting or operating to transfer by sale, gift or mortgage a permanent tenure unless there is paid to him, in addition to any fees payable under the Act for the time being in force for the registration of documents, a process-fee of the prescribed amount and a fee (hereinafter called "the landlord's fee") of the following amount, namely:—

(*a*) when rent is payable in respect of the tenure, a fee of two per centum on the annual rent of the tenure: provided that no such fee shall be less than one rupee or more than one hundred rupees; and

(*b*) when rent is not payable in respect of the tenure, a fee of two rupees.

(*3*) When the registration of any such instrument is complete, the registering officer shall send to the Collector the landlord's fee and a notice of the transfer and registration in the prescribed form, and the Collector shall cause the fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Transfer of permanent tenure by sale in execution of decree other than decree for rent.

13. (*1*) When a permanent tenure is sold in execution of a decree other than a decree for arrears of rent due in respect thereof, the Court shall, before confirming the sale under section 312 of the Code of Civil Procedure, require the purchaser to pay into Court the landlord's fee prescribed by the last foregoing section and such further fee for service of notice of the sale on the landlord as may be prescribed. XIV of 1882

(*2*) When the sale has been confirmed, the Court shall send to the Collector the landlord's fee and a notice of the sale in the prescribed form, and the Collector shall cause the fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Transfer of permanent tenure by sale in execution of decree for rent.

14. When a permanent tenure is transferred by sale in execution of a decree for arrears of rent due in respect thereof, the Court shall send to the Collector a notice of the sale in the prescribed form.

Succession to permanent tenure.

15. When a succession to a permanent tenure takes place, the person succeeding shall give notice of the succession to the Collector in the prescribed form, and shall pay to the Collector the prescribed fee for the service of the notice on the landlord and the landlord's fee

Other incidents of tenures.

prescribed by section 12, and the Collector shall cause the landlord's fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Bar to recovery of rent pending notice of succession.

16. A person becoming entitled to a permanent tenure by succession shall not be entitled to recover by suit, distraint or other proceeding any rent payable to him as the holder of the tenure, until the Collector has received the notice and fees referred to in the last foregoing section.

Transfer of, and succession to, share in permanent tenure.

17. Subject to the provisions of section 88, the foregoing sections shall apply to the transfer of, or succession to, a share in a permanent tenure.

CHAPTER IV.

RAIYATS HOLDING AT FIXED RATES.

Incidents of holding at fixed rates.

18. A raiyat holding at a rent, or rate of rent, fixed in perpetuity—

(*a*) shall be subject to the same provisions with respect to the transfer of, and succession to, his holding as the holder of a permanent tenure, and

(*b*) shall not be ejected by his landlord except on the ground that he has broken a condition consistent with this Act, and on breach of which he is, under the terms of a contract between him and his landlord, liable to be ejected.

CHAPTER V.

OCCUPANCY-RAIYATS.

General.

General.

Continuance of existing occupancy-rights.

19. Every raiyat who immediately before the commencement of this Act has, by the operation of any enactment, by custom or otherwise, a right of occupancy in any land shall, when this Act comes into force, have a right of occupancy in that land.

Definition of "settled raiyat".

20. (*1*) Every person who for a period of twelve years, whether wholly or partly before or after the commencement of this Act, has continuously held as a raiyat land situate in any village, whether under a lease or otherwise, shall be deemed to have become, on the expiration of that period, a settled raiyat of that village.

(*2*) A person shall be deemed for the purposes of this section to have continuously held land in a village notwithstanding that the particular land held by him has been different at different times. *General.*

(*3*) A person shall be deemed, for the purposes of this section, to have held as a raiyat any land held as a raiyat by a person whose heir he is.

(*4*) Land held by two or more co-sharers as a raiyatí holding shall be deemed, for the purposes of this section, to have been held as a raiyat by each such co-sharer.

(*5*) A person shall continue to be a settled raiyat of a village as long as he holds any land as a raiyat in that village and for one year thereafter.

(*6*) If a raiyat recovers possession of land under section 87, he shall be deemed to have continued to be a settled raiyat notwithstanding his having been out of possession more than a year.

(*7*) If, in any proceeding under this Act, it is proved or admitted that a person holds any land as a raiyat, it shall, as between him and the landlord under whom he holds the land, be presumed for the purposes of this section, until the contrary is proved or admitted, that he has for twelve years continuously held that land or some part of it as a raiyat.

Settled raiyats to have occupancy-rights.

21. (*1*) Every person who is a settled raiyat of a village within the meaning of the last foregoing section shall have a right of occupancy in all land for the time being held by him as a raiyat in that village.

(*2*) Every person who, being a settled raiyat of a village within the meaning of the last foregoing section, held land as a raiyat in that village at any time between the second day of March 1883, and the commencement of this Act, shall be deemed to have acquired a right of occupancy in that land under the law then in force; but nothing in this sub-section shall affect any decree or order passed by a Court before the commencement of this Act.

Effect of acquisition of occupancy-right by landlord.

22. (*1*) When the immediate landlord of an occupancy-holding is a proprietor or permanent tenure-holder, and the entire interests of the landlord and the raiyat in the holding become united in the same person by transfer, succession or otherwise, the occupancy-right shall cease to exist; but nothing in this sub-section shall prejudicially affect the rights of any third person.

(*2*) If the occupancy-right in land is transferred to a person jointly interested in the land as proprietor or permanent tenure-holder, it shall cease to exist; but nothing in this sub-section shall prejudicially affect the rights of any third person.

(*3*) A person holding land as an ijárádár or farmer of rents shall not, while so holding, acquire a right of occupancy in any land comprised in his ijárá or farm.

Bengal Tenancy Act.

(*Chapter V.—Occupancy-raiyats.—Secs. 23-30.*)

Explanation.—A person having a right of occupancy in land does not lose it by subsequently becoming jointly interested in the land as proprietor or permanent tenure-holder, or by subsequently holding the land in ijárá or farm.

Incidents of occupancy-right.

Rights of raiyat in respect of use of land.

23. When a raiyat has a right of occupancy in respect of any land, he may use the land in any manner which does not materially impair the value of the land or render it unfit for the purposes of the tenancy; but shall not be entitled to cut down trees in contravention of any local custom.

Obligation of raiyat to pay rent.

24. An occupancy-raiyat shall pay rent for his holding at fair and equitable rates.

Protection from eviction except on specified grounds.

25. An occupancy-raiyat shall not be ejected by his landlord from his holding, except in execution of a decree for ejectment passed on the ground—

(*a*) that he has used the land comprised in his holding in a manner which renders it unfit for the purposes of the tenancy, or

(*b*) that he has broken a condition consistent with the provisions of this Act, and on breach of which he is, under the terms of a contract between himself and his landlord, liable to be ejected.

Devolution of occupancy-right on death.

26. If a raiyat dies intestate in respect of a right of occupancy, it shall, subject to any custom to the contrary, descend in the same manner as other immoveable property: provided that, in any case in which under the law of inheritance to which the raiyat is subject his other property goes to the Crown, his right of occupancy shall be extinguished.

Enhancement of rent.

Presumption as to fair and equitable rent.

27. The rent for the time being payable by an occupancy-raiyat shall be presumed to be fair and equitable until the contrary is proved.

Restriction on enhancement of money-rents.

28. Where an occupancy-raiyat pays his rent in money, his rent shall not be enhanced except as provided by this Act.

Enhancement of rent by contract.

29. The money-rent of an occupancy-raiyat may be enhanced by contract, subject to the following conditions:—

(*a*) the contract must be in writing and registered;

(*b*) the rent must not be enhanced so as to exceed by more than two annas in the rupee the rent previously payable by the raiyat;

(*c*) the rent fixed by the contract shall not be liable to enhancement during a term of fifteen years from the date of the contract; *Enhancement of rent.*

Provided as follows—

(i) Nothing in clause (*a*) shall prevent a landlord from recovering rent at the rate at which it has been actually paid for a continuous period of not less than three years immediately preceding the period for which the rent is claimed.

(ii) Nothing in clause (*b*) shall apply to a contract by which a raiyat binds himself to pay an enhanced rent in consideration of an improvement which has been or is to be effected in respect of the holding by, or at the expense of, his landlord, and to the benefit of which the raiyat is not otherwise entitled; but an enhanced rent fixed by such a contract shall be payable only when the improvement has been effected, and, except when the raiyat is chargeable with default in respect of the improvement, only so long as the improvement exists and substantially produces its estimated effect in respect of the holding.

(iii) When a raiyat has held his land at a specially low rate of rent in consideration of cultivating a particular crop for the convenience of the landlord, nothing in clause (*b*) shall prevent the raiyat from agreeing, in consideration of his being released from the obligation of cultivating that crop, to pay such rent as he may deem fair and equitable.

Enhancement of rent by suit.

30. The landlord of a holding held at a money-rent by an occupancy-raiyat may, subject to the provisions of this Act, institute a suit to enhance the rent on one or more of the following grounds, (namely):—

(*a*) that the rate of rent paid by the raiyat is below the prevailing rate paid by occupancy-raiyats for land of a similar description and with similar advantages in the same village, and that there is no sufficient reason for his holding at so low a rate;

(*b*) that there has been a rise in the average local prices of staple food-crops during the currency of the present rent;

(*c*) that the productive powers of the land held by the raiyat have been increased by an improvement effected by, or at the expense of, the landlord during the currency of the present rent;

Enhancement of rent.

(*d*) that the productive powers of the land held by the raiyat have been increased by fluvial action.

Explanation.—"Fluvial action" includes a change in the course of a river rendering irrigation from the river practicable when it was not previously practicable.

Rules as to enhancement on ground of prevailing rate.

31. Where an enhancement is claimed on the ground that the rate of rent paid is below the prevailing rate—

(*a*) in determining what is the prevailing rate the Court shall have regard to the rates generally paid during a period of not less than three years before the institution of the suit, and shall not decree an enhancement unless there is a substantial difference between the rate paid by the raiyat and the prevailing rate found by the Court;

(*b*) if in the opinion of the Court the prevailing rate of rent cannot be satisfactorily ascertained without a local inquiry, the Court may direct that a local inquiry be held under Chapter XXV of the Code of Civil Procedure by such Revenue-officer as the Local Government may authorize in that behalf by rules made under section 392 of the said Code;

XIV of 1882.

(*c*) in determining under this section the rate of rent payable by a raiyat his caste shall not be taken into consideration, unless it is proved that by local custom caste is taken into account in determining the rate; and whenever it is found that by local custom any description of raiyats hold land at favourable rates of rent, the rate shall be determined in accordance with that custom;

(*d*) in ascertaining the prevailing rate of rent the amount of any enhancement authorized on account of a landlord's improvement shall not be taken into consideration.

Rules as to enhancement on ground of rise in prices.

32. Where an enhancement is claimed on the ground of a rise in prices—

(*a*) the Court shall compare the average prices during the decennial period immediately preceding the institution of the suit with the average prices during such other decennial period as it may appear equitable and practicable to take for comparison;

(*b*) the enhanced rent shall bear to the previous rent the same proportion as the average prices during the last decennial period bear to the average prices during the previous decennial period taken for purposes of comparison: provided that, in calculating this proportion, the average prices during the later period shall be reduced by one-third of their excess over the average prices during the earlier period;

Enh of re

(*c*) if in the opinion of the Court it is not practicable to take the decennial periods prescribed in clause (*a*), the Court may, in its discretion, substitute any shorter periods therefor.

Rules as to enhancement on ground of landlord's improvement.

33. (*1*) Where an enhancement is claimed on the ground of a landlord's improvement—

(*a*) the Court shall not grant an enhancement unless the improvement has been registered in accordance with this Act;

(*b*) in determining the amount of enhancement the Court shall have regard to—

(i) the increase in the productive powers of the land caused or likely to be caused by the improvement,

(ii) the cost of the improvement,

(iii) the cost of the cultivation required for utilizing the improvement, and

(iv) the existing rent and the ability of the land to bear a higher rent.

(*2*) A decree under this section shall, on the application of the tenant or his successor in interest, be subject to re-consideration in the event of the improvement not producing or ceasing to produce the estimated effect.

Rules as to enhancement on ground of increase in productive powers due to fluvial action.

34. Where an enhancement is claimed on the ground of an increase in productive powers due to fluvial action—

(*a*) the Court shall not take into account any increase which is merely temporary or casual;

(*b*) the Court may enhance the rent to such an amount as it may deem fair and equitable, but not so as to give the landlord more than one-half of the value of the net increase in the produce of the land.

Enhancement by suit to be fair and equitable.

35. Notwithstanding anything in the foregoing sections, the Court shall not in any case decree any enhancement which is under the circumstances of the case unfair or inequitable.

Power to order progressive enhancement.

36. If the Court passing a decree for enhancement considers that the immediate enforcement of the decree in its full extent will be attended with hardship to the raiyat, it may direct that the enhancement shall be gradual; that is to say, that the rent shall increase

nt yearly by degrees for any number of years not exceeding five until the limit of the enhancement decreed has been reached.

37. (*1*) A suit instituted for the enhancement of the rent of a holding on the ground that the rate of rent paid is below the prevailing rate, or on the ground of a rise in prices, shall not be entertained if within the fifteen years next preceding its institution the rent of the holding has been enhanced by a contract made after the second day of March, 1883, or if within the said period of fifteen years the rent has been commuted under section 40, or a decree has been passed under this Act or any enactment repealed by this Act enhancing the rent on either of the grounds aforesaid or on any ground corresponding thereto or dismissing the suit on the merits.

Limitation of right to bring successive enhancement suits.

(*2*) Nothing in this section shall affect the
32. provisions of section 373 of the Code of Civil Procedure.

Reduction of rent.

of **38.** (*1*) An occupancy-raiyat holding at a money-rent may institute a suit for the reduction of his rent on the following grounds, and, except as hereinafter provided in the case of a diminution of the area of the holding, not otherwise, (namely) :—

Reduction of rent.

(*a*) on the ground that the soil of the holding has without the fault of the raiyat become permanently deteriorated by a deposit of sand or other specific cause, sudden or gradual, or

(*b*) on the ground that there has been a fall, not due to a temporary cause, in the average local prices of staple food-crops during the currency of the present rent.

(*2*) In any suit instituted under this section, the Court may direct such reduction of the rent as it thinks fair and equitable.

Price-lists.

39. (*1*) The Collector of every district shall prepare, monthly, or at shorter intervals, periodical lists of the market-prices of staple food-crops grown in such local areas as the Local Government may from time to time direct, and shall submit them to the Board of Revenue for approval or revision.

Price-lists of staple food-crops.

(*2*) The Collector may, if so directed by the Local Government, prepare for any local area like price-lists relating to such past times as the Local Government thinks fit, and shall submit the lists so prepared to the Board of Revenue for approval or revision.

(*3*) The Collector shall, one month before submitting a price-list to the Board of Revenue under this section, publish it in the prescribed manner within the local area to which it relates, and if any landlord or tenant of land within the local area, within the said period of one month, presents to him in writing any objection to the list, he shall submit the same to the Board of Revenue with the list. *Price-lists.*

(*4*) The price-lists shall, when approved or revised by the Board of Revenue, be published in the official Gazette; and any manifest error in any such list discovered after its publication may be corrected by the Collector with the sanction of the Board of Revenue.

(*5*) The Local Government shall cause to be compiled from the periodical lists prepared under this section lists of the average prices prevailing throughout each year, and shall cause them to be published annually in the official Gazette.

(*6*) In any proceedings under this chapter for an enhancement or reduction of rent on the ground of a rise or fall in prices, the Court shall refer to the lists published under this section, and shall presume that the prices shown in the lists prepared for any year subsequent to the passing of this Act are correct, unless and until it is proved that they are incorrect.

(*7*) The Local Government, subject to the control of the Governor General in Council, shall make rules for determining what are to be deemed staple food-crops in any local area and for the guidance of officers preparing price-lists under this section.

Commutation.

40. (*1*) Where an occupancy-raiyat pays for a holding rent in kind, or on the estimated value of a portion of the crop, or at rates varying with the crop, or partly in one of those ways and partly in another, either the raiyat or his landlord may apply to have the rent commuted to a money-rent. *Commutation.*

Commutation of rent payable in kind.

(*2*) The application may be made to the Collector or Sub-divisional Officer, or to an officer making a settlement of rents under Chapter X, or to any other officer specially authorized in this behalf by the Local Government.

(*3*) On the receipt of the application the officer may determine the sum to be paid as money-rent, and may order that the raiyat shall, in lieu of paying his rent in kind, or otherwise as aforesaid, pay the sum so determined.

(*4*) In making the determination the officer shall have regard to—

(*a*) the average money-rent payable by occupancy-raiyats for land of a similar description and with similar advantages in the vicinity ;

Commutation.

(*b*) the average value of the rent actually received by the landlord during the preceding ten years or during any shorter period for which evidence may be available; and

(*c*) the charges incurred by the landlord in respect of irrigation under the system of rent in kind, and the arrangements made on commutation for continuing those charges.

(*5*) The order shall be in writing, shall state the grounds on which it is made, and the time from which it is to take effect, and shall be subject to appeal in like manner as if it were an order made in an ordinary revenue proceeding.

(*6*) If the application is opposed, the officer shall consider whether under all the circumstances of the case it is reasonable to grant it, and shall grant or refuse it accordingly. If he refuses it, he shall record in writing the reasons for the refusal.

CHAPTER VI.

NON-OCCUPANCY-RAIYATS.

Application of chapter.

41. This chapter shall apply to raiyats not having a right of occupancy, who are in this Act referred to as non-occupancy-raiyats.

Initial rent of non-occupancy-raiyat.

42. When a non-occupancy-raiyat is admitted to the occupation of land, he shall become liable to pay such rent as may be agreed on between himself and his landlord at the time of his admission.

Conditions of enhancement of rent.

43. The rent of a non-occupancy-raiyat shall not be enhanced except by registered agreement or by agreement under section 46:

Provided that nothing in this section shall prevent a landlord from recovering rent at the rate at which it has been actually paid for a continuous period of not less than three years immediately preceding the period for which the rent is claimed.

Grounds on which non-occupancy raiyat may be ejected.

44. A non-occupancy-raiyat shall, subject to the provisions of this Act, be liable to ejectment on one or more of the following grounds, and not otherwise (namely):—

(*a*) on the ground that he has failed to pay an arrear of rent;

(*b*) on the ground that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or that he has broken a condition consistent with this Act and on breach of which he is, under the terms of a contract between himself and his landlord, liable to be ejected;

(*c*) where he has been admitted to occupation of the land under a registered lease, on the ground that the term of the lease has expired;

(*d*) on the ground that he has refused to agree to pay a fair and equitable rent determined under section 46, or that the term for which he is entitled to hold at such a rent has expired.

Conditions of ejectment on ground of expiration of lease.

45. A suit for ejectment on the ground of the expiration of the term of a lease shall not be instituted against a non-occupancy-raiyat unless notice to quit has been served on the raiyat not less than six months before the expiration of the term, and shall not be instituted after six months from the expiration of the term.

Conditions of ejectment on ground of refusal to agree to enhancement.

46. (*1*) A suit for ejectment on the ground of refusal to agree to an enhancement of rent shall not be instituted against a non-occupancy-raiyat unless the landlord has tendered to the raiyat an agreement to pay the enhanced rent, and the raiyat has within three months before the institution of the suit refused to execute the agreement.

(*2*) A landlord desiring to tender an agreement to a raiyat under this section may file it in the office of such Court or officer as the Local Government appoints in this behalf for service on the raiyat. The Court or officer shall forthwith cause it to be served on the raiyat in the prescribed manner, and when it has been so served it shall for the purposes of this section be deemed to have been tendered.

(*3*) If a raiyat on whom an agreement has been served under sub-section (*2*) executes it, and within one month from the date of service files it in the office from which it issued, it shall take effect from the commencement of the agricultural year next following.

(*4*) When an agreement has been executed and filed by a raiyat under sub-section (*3*), the Court or officer in whose office it is so filed shall forthwith cause a notice of its being so executed and filed to be served on the landlord in the prescribed manner.

(*5*) If the raiyat does not execute the agreement and file it under sub-section (*3*), he shall be deemed for the purposes of this section to have refused to execute it.

(*6*) If a raiyat refuses to execute an agreement tendered to him under this section, and the landlord thereupon institutes a suit to eject him, the Court shall determine what rent is fair and equitable for the holding.

(*7*) If the raiyat agrees to pay the rent so determined, he shall be entitled to remain in occupation of his holding at that rent for a term of five years from the date of the agreement, but on the expiration of that term shall be liable to ejectment under the conditions mentioned in the last foregoing section, unless he has acquired a right of occupancy.

(*8*) If the raiyat does not agree to pay the rent so determined, the Court shall pass a decree for ejectment.

(*9*) In determining what rent is fair and equitable, the Court shall have regard to the rents generally paid by raiyats for land of a similar description and with like advantages in the same village.

(*10*) A decree for ejectment passed under this section shall take effect from the end of the agricultural year in which it is passed.

Explanation of "admitted to occupation."

47. Where a raiyat has been in occupation of land and a lease is executed with a view to a continuance of his occupation, he is not to be deemed to be admitted to occupation by that lease for the purposes of this chapter, notwithstanding that the lease may purport to admit him to occupation.

CHAPTER VII.

UNDER-RAIYATS.

Limit of rent recoverable from under raiyats.

48. The landlord of an under-raiyat holding at a money-rent shall not be entitled to recover rent exceeding the rent which he himself pays by more than the following percentage of the same, (namely) :—

(*a*) when the rent payable by the under-raiyat is payable under a registered lease or agreement—fifty per cent.; and

(*b*) in any other case—twenty-five per cent.

Restriction on ejectment of under-raiyats.

49. An under-raiyat shall not be liable to be ejected by his landlord, except—

(*a*) on the expiration of the term of a written lease;

(*b*) when holding otherwise than under a written lease, at the end of the agricultural year next following the year in which a notice to quit is served upon him by his landlord.

CHAPTER VIII.

GENERAL PROVISIONS AS TO RENT.

Rules and presumptions as to amount of rent.

Rules and presumptions as to fixity of rent.

50. (*1*) Where a tenure-holder or raiyat and his predecessors in interest have held at a rent or rate of rent which has not been changed from the time of the Permanent Settlement, the rent or rate of rent shall not be liable to be increased except on the ground of an alteration in the area of the tenure or holding.

Rules and presumptions as to amount of rent.

(*2*) If it is proved in any suit or other proceeding under this Act that either a tenure-holder or raiyat and his predecessors in interest have held at a rent or rate of rent which has not been changed during the twenty years immediately before the institution of the suit or proceeding, it shall be presumed, until the contrary is shown, that they have held at that rent or rate of rent from the time of the Permanent Settlement:

Provided that if it is required by or under any enactment that in any local area tenancies, or any classes of tenancies, at fixed rents or rates of rent shall be registered as such on, or before, a date specified by or under the enactment, the foregoing presumption shall not after that date apply to any tenancy or, as the case may be, to any tenancy of that class in that local area unless the tenancy has been so registered.

(*3*) The operation of this section, so far as it relates to land held by a raiyat, shall not be affected by the fact of the land having been separated from other land which formed with it a single holding, or amalgamated with other land into one holding.

(*4*) Nothing in this section shall apply to a tenure held for a term of years or determinable at the will of the landlord.

Presumption as to amount of rent and conditions of holding.

51. If a question arises as to the amount of a tenant's rent or the conditions under which he holds in any agricultural year, he shall be presumed, until the contrary is shown, to hold at the same rent and under the same conditions as in the last preceding agricultural year.

Alteration of rent on alteration of area.

Alteration of rent in respect of alteration in area.

52. (*1*) Every tenant shall— *Alteration of rent on alteration of area.*

(*a*) be liable to pay additional rent for all land proved by measurement to be in excess of the area for which rent has been previously paid by him, unless it is proved that the excess is due to the addition to the tenure or holding of land which having previously belonged to the tenure or holding was lost by diluvion or otherwise without any reduction of the rent being made, and

(*b*) be entitled to a reduction of rent in respect of any deficiency proved by measurement to exist in the area of his tenure or holding as compared with the area for which rent has been previously paid by him, unless it is proved that the deficiency is due to the loss of land which was added to the area of the tenure or holding by alluvion or otherwise, and that an addition has not been made to the rent in respect of the addition to the area.

Alteration of rent on alteration of area.

(2) In determining the area for which rent has been previously paid, the Court shall, if so required by any party to the suit, have regard to—

(*a*) the origin and conditions of the tenancy, for instance, whether the rent was a consolidated rent for the entire tenure or holding;

(*b*) whether the tenant has been allowed to hold additional land in consideration of an addition to his total rent or otherwise with the knowledge and consent of the landlord;

(*c*) the length of time during which the tenancy has lasted without dispute as to rent or area; and

(*d*) the length of the measure used or in local use at the time of the origin of the tenancy as compared with that used or in local use at the time of the institution of the suit.

(3) In determining the amount to be added to the rent, the Court shall have regard to the rates payable by tenants of the same class for lands of a similar description and with similar advantages in the vicinity, and, in the case of a tenure-holder, to the profits to which he is entitled in respect of the rent of his tenure, and shall not in any case fix any rent which under the circumstances of the case is unfair or inequitable.

(4) The amount abated from the rent shall bear the same proportion to the rent previously payable as the diminution of the total yearly value of the tenure or holding bears to the previous total yearly value thereof, or, in default of satisfactory proof of the yearly value of the land lost, shall bear to the rent previously payable the same proportion as the diminution of area bears to the previous area of the tenure or holding.

Payment of rent.

Payment of rent.

53. Subject to agreement or established usage, a money-rent payable by a tenant shall be paid in four equal instalments falling due on the last day of each quarter of the agricultural year.

Instalments of rent.

54. (1) Every tenant shall pay each instalment of rent before sunset of the day on which it falls due.

Time and place for payment of rent.

(2) The payment shall, except in cases where a tenant is allowed under this Act to deposit his rent, be made at the landlord's village-office, or at such other convenient place as may be appointed in that behalf by the landlord:

Provided that the Local Government may from time to time make rules, either generally or for any specified local area, authorizing a tenant to pay his rent by postal money-order.

(3) Any instalment or part of an instalment of rent not duly paid at or before the time when it falls due shall be deemed an arrear.

Pay rent

55. (1) When a tenant makes a payment on account of rent, he may declare the year or the year and instalment to which he wishes the payment to be credited, and the payment shall be credited accordingly.

Appropriation of payments.

(2) If he does not make any such declaration, the payment may be credited to the account of such year and instalment as the landlord thinks fit.

Receipts and accounts.

56. (1) Every tenant who makes a payment on account of rent to his landlord shall be entitled to obtain forthwith from the landlord a written receipt for the amount paid by him, signed by the landlord.

Rec acco

Tenant making payment to his landlord entitled to a receipt.

(2) The landlord shall prepare and retain a counterfoil of the receipt.

(3) The receipt and counterfoil shall specify such of the several particulars shown in the form of receipt given in Schedule II to this Act as can be specified by the landlord at the time of payment:

Provided that the Local Government may, from time to time, prescribe or sanction a modified form either generally or for any particular local area or class of cases.

(4) If a receipt does not contain substantially the particulars required by this section, it shall be presumed, until the contrary is shown, to be an acquittance in full of all demands for rent up to the date on which the receipt was given.

57. (1) Where a landlord admits that all rent payable by a tenant to the end of the agricultural year has been paid, the tenant shall be entitled to receive from the landlord, free of charge, within three months after the end of the year, a receipt in full discharge of all rent falling due to the end of the year, signed by the landlord.

Tenant entitled to full discharge or statement of account at close of year.

(2) Where the landlord does not so admit, the tenant shall be entitled, on paying a fee of four annas, to receive within three months after the end of the year a statement of account specifying the several particulars shown in the form of account given in Schedule II to this Act, or in such other form as may from time to time be prescribed by the Local Government either generally or for any particular local area or class of cases.

(3) The landlord shall prepare and retain a copy of the statement containing similar particulars.

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 58—63.*)

ts and ts.

Penalties and fine for withholding receipts and statements of account and failing to keep counterparts.

58. (*1*) If a landlord without reasonable cause refuses or neglects to deliver to a tenant a receipt containing the particulars prescribed by section 56 for any rent paid by the tenant, the tenant may, within three months from the date of payment, institute a suit to recover from him such penalty, not exceeding double the amount or value of that rent, as the Court thinks fit.

(*2*) If a landlord without reasonable cause refuses or neglects to deliver to a tenant demanding the same either the receipt in full discharge or, if the tenant is not entitled to such a receipt, the statement of account for any year prescribed in section 57, the tenant may, within the next ensuing agricultural year, institute a suit to recover from him such penalty as the Court thinks fit, not exceeding double the aggregate amount or value of all rent paid by the tenant to the landlord during the year for which the receipt or account should have been delivered.

(*3*) If a landlord without reasonable cause fails to prepare and retain a counterfoil or copy of a receipt or statement as required by either of the said sections, he shall be punished with fine which may extend to fifty rupees.

Local Government to prepare forms of receipt and account.

59. (*1*) The Local Government shall cause to be prepared and kept for sale to landlords at all sub-divisional offices forms of receipts with counterfoils and of statements of account suitable for use under the foregoing sections.

(*2*) The forms may be sold in books with the leaves consecutively numbered or otherwise as the Local Government thinks fit.

Effect of receipt by registered proprietor, manager or mortgagee.

60. Where rent is due to the proprietor, manager or mortgagee of an estate, the receipt of the person registered under the Land .C.) of Registration Act, 1876, as proprietor, manager or mortgagee of that estate, or of his agent authorized in that behalf, shall be a sufficient discharge for the rent; and the person liable for the rent shall not be entitled to plead in defence to a claim by the person so registered that the rent is due to any third person.

But nothing in this section shall affect any remedy which any such third person may have against the registered proprietor, manager or mortgagee.

Deposit of rent.

t of

Application to deposit rent in Court.

61. (*1*) In any of the following cases, namely :—

(*a*) when a tenant tenders money on account of rent and the landlord refuses to receive it or refuses to grant a receipt for it;

(*b*) when a tenant bound to pay money on account of rent has reason to believe, owing to a tender having been refused or a receipt withheld on a previous occasion, that the person to whom his rent is payable will not be willing to receive it and to grant him a receipt for it; *Deposit of rent.*

(*c*) when the rent is payable to co-sharers jointly, and the tenant is unable to obtain the joint receipt of the co-sharers for the money, and no person has been empowered to receive the rent on their behalf; or

(*d*) when the tenant entertains a *bonâ fide* doubt as to who is entitled to receive the rent,

the tenant may present to the Court having jurisdiction to entertain a suit for the rent of his tenure or holding an application in writing for permission to deposit in the Court the full amount of the money then due.

(*2*) The application shall contain a statement of the grounds on which it is made; shall state—

in cases (*a*) and (*b*), the name of the person to whose credit the deposit is to be entered,

in case (*c*), the names of the sharers to whom the rent is due, or of so many of them as the tenant may be able to specify, and

in case (*d*), the names of the person to whom the rent was last paid and of the person or persons now claiming it;

shall be signed and verified, in the manner prescribed in section 52 of the Code of Civil Pro- XIV of 1882. cedure, by the tenant, or, where he is not personally cognizant of the facts of the case, by some person so cognizant; and shall be accompanied by a fee of such amount as the Local Government, from time to time, by rule, directs.

Receipt granted by Court for rent deposited to be a valid acquittance.

62. (*1*) If it appears to the Court to which an application is made under the last foregoing section that the applicant is entitled under that section to deposit the rent, it shall receive the rent and give a receipt for it under the seal of the Court.

(*2*) A receipt given under this section shall operate as an acquittance for the amount of the rent payable by the tenant and deposited as aforesaid, in the same manner and to the same extent as if that amount of rent had been received—

in cases (*a*) and (*b*) of the last foregoing section, by the person specified in the application as the person to whose credit the deposit was to be entered;

in case (*c*) of that section, by the co-sharers to whom the rent is due; and

in case (*d*) of that section, by the person entitled to the rent.

Notification of receipt of deposit.

63. (*1*) The Court receiving the deposit shall forthwith cause to be affixed in a conspicuous place at the Court-house a notification of the receipt thereof, containing a statement of all material particulars.

Deposit of rent.

(2) If the amount of the deposit is not paid away under the next following section, within the period of fifteen days next following the date on which the notification is so affixed, the Court shall forthwith—

in cases (*a*) and (*b*) of section 61, cause a notice of the receipt of the deposit to be served, free of charge, on the person specified in the application as the person to whose credit the deposit was to be entered;

in case (*c*) of that section, cause a notice of the receipt of the deposit to be posted at the landlord's village-office or in some conspicuous place in the village in which the holding is situate; and

in case (*d*) of that section, cause a like notice to be served, free of charge, on every person who it has reason to believe claims or is entitled to the deposit.

Payment or refund of deposit.

64. (*1*) The Court may pay the amount of the deposit to any person appearing to it to be entitled to the same, or may, if it thinks fit, retain the amount pending the decision of a Civil Court as to the person so entitled.

(*2*) The payment may, if the Local Government so direct, be made by postal money-order.

(*3*) If no payment is made under this section before the expiration of three years from the date on which a deposit is made, the amount deposited may, in the absence of any order of a Civil Court to the contrary, be repaid to the depositor upon his application and on his returning the receipt given by the Court with which the rent was deposited.

(*4*) No suit or other proceeding shall be instituted against the Secretary of State for India in Council, or against any officer of the Government, in respect of anything done by a Court receiving a deposit under the foregoing sections; but nothing in this section shall prevent any person entitled to receive the amount of any such deposit from recovering the same from a person to whom it has been paid under this section.

Arrears of rent.

Arrears of rent.

Liability to sale for arrears in case of permanent tenure, holding at fixed rates or occupancy-holding.

65. Where a tenant is a permanent tenure-holder, a raiyat holding at fixed rates or an occupancy-raiyat, he shall not be liable to ejectment for arrears of rent, but his tenure or holding shall be liable to sale in execution of a decree for the rent thereof, and the rent shall be a first charge thereon.

Ejectment for arrears in other cases.

66. (*1*) When an arrear of rent remains due from a tenant not being a permanent tenure-holder, a raiyat holding at fixed rates or an occupancy-raiyat, at the end of the Bengali year where that year prevails, or at the end of the month of Jeyt where the Fasli or Amli year prevails, the landlord may, whether he has obtained a decree for the recovery of the arrear or not, and whether he is entitled by the terms of any contract to eject the tenant for arrears or not, institute a suit to eject the tenant. *Arrea rent.*

(*2*) In a suit for ejectment for an arrear of rent a decree passed in favour of the plaintiff shall specify the amount of the arrear and of the interest (if any) due thereon, and the decree shall not be executed if that amount and the costs of the suit are paid into Court within fifteen days from the date of the decree, or, when the Court is closed on the fifteenth day, on the day upon which the Court re-opens.

(*3*) The Court may for special reasons extend the period of fifteen days mentioned in this section.

Interest on arrears.

67. An arrear of rent shall bear simple interest at the rate of twelve per centum per annum from the expiration of that quarter of the agricultural year in which the instalment falls due to the institution of the suit.

Power to award damages on rent withheld without reasonable cause, or to defendant improperly sued for rent.

68. (*1*) If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the defendant has, without reasonable or probable cause, neglected or refused to pay the amount of rent due by him, the Court may award to the plaintiff, in addition to the amount decreed for rent and costs, such damages, not exceeding twenty-five per centum on the amount of rent decreed, as it thinks fit:

Provided that interest shall not be decreed when damages are awarded under this section.

(*2*) If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the plaintiff has instituted the suit without reasonable or probable cause, the Court may award to the defendant, by way of damages, such sum, not exceeding twenty-five per centum on the whole amount claimed by the plaintiff, as it thinks fit.

Produce-rents.

Produc rents.

Order for appraising or dividing produce.

69. (*1*) Where rent is taken by appraisement or division of the produce,—

(*a*) if either the landlord or the tenant neglects to attend, either personally or by agent, at the proper time for making the appraisement or division, or

(*b*) if there is a dispute about the quantity, value or division of the produce,

the Collector may, on the application of either party, and on his depositing such sum on account of expenses as the Collector may require, make an order appointing such officer as he thinks fit to appraise or divide the produce.

(*2*) The Collector may, without such an application, make the like order in any case where in the opinion of the District or Sub-divisional Magistrate the making of the order would be likely to prevent a breach of the peace.

(*3*) Where a Collector makes an order under this section, he may, by order, prohibit the removal of the produce until the appraisement or division has been effected.

Procedure where officer appointed.

70. (*1*) When a Collector appoints an officer under the last foregoing section, the Collector may, in his discretion, direct the officer to associate with himself any other persons as assessors, and may give him instructions regarding the number, qualifications and mode of selection of those assessors (if any), and the procedure to be followed in making the appraisement or division; and the officer shall conform to the instructions so given.

(*2*) The officer shall, before making an appraisement or division, give notice to the landlord and tenant of the time and place at which the appraisement or division will be made; but if either the landlord or the tenant fails to attend either personally or by agent, he may proceed *ex parte*.

(*3*) When the officer has made the appraisement or division, he shall submit a report of his proceedings to the Collector.

(*4*) The Collector shall consider the report, and, after giving the parties an opportunity of being heard and making such enquiry (if any) as he may think necessary, shall pass such order thereon as he thinks just.

(*5*) The Collector may, if he thinks fit, refer any question in dispute between the parties for the decision of a Civil Court, but, subject as aforesaid, his order shall be final and shall, on application to a Civil Court by the landlord or the tenant, be enforceable as a decree.

(*6*) Where the officer makes an appraisement, the appraisement papers shall be filed in the Collector's office.

Rights and liabilities as to possession of crop.

71. (*1*) Where rent is taken by appraisement of the produce, the tenant shall be entitled to the exclusive possession of the produce.

(*2*) Where rent is taken by division of the produce, the tenant shall be entitled to the exclusive possession of the whole produce until it is divided, but shall not be entitled to remove any portion of the produce from the threshing-floor at such a time or in such a manner as to prevent the due division thereof at the proper time. *Produce-rents.*

(*3*) In either case the tenant shall be entitled to cut and harvest the produce in due course of husbandry without any interference on the part of the landlord.

(*4*) If the tenant removes any portion of the produce at such a time or in such a manner as to prevent the due appraisement or division thereof at the proper time, the produce shall be deemed to have been as full as the fullest crop of the same description appraised in the neighbourhood on similar land for that harvest.

Liability for rent on change of landlord or after transfer of tenure or holding.

Tenant not liable to transferee of landlord's interest for rent paid to former landlord, without notice of the transfer.

72. (*1*) A tenant shall not, when his landlord's interest is transferred, be liable to the transferee for rent which became due after the transfer and was paid to the landlord whose interest was so transferred, unless the transferee has before the payment given notice of the transfer to the tenant. *Liability for rent on change of landlord or after transfer of tenure or holding.*

(*2*) Where there is more than one tenant paying rent to the landlord whose interest is transferred, a general notice from the transferee to the tenants published in the prescribed manner shall be a sufficient notice for the purposes of this section.

Liability for rent after transfer of occupancy-holding.

73. When an occupancy-raiyat transfers his holding without the consent of the landlord, the transferor and transferee shall be jointly and severally liable to the landlord for arrears of rent accruing due after the transfer, unless and until notice of the transfer is given to the landlord in the prescribed manner.

Illegal Cesses, &c.

Abwáb, &c., illegal.

74. All impositions upon tenants under the denomination of *abwáb*, *mahtut*, or other like appellations, in addition to the actual rent, shall be illegal, and all stipulations and reservations for the payment of such shall be void. *Illegal cesses, &c.*

Penalty for exaction by landlord from tenant of sum in excess of the rent payable.

75. Every tenant from whom, except under any special enactment for the time being in force, any sum of money or any portion of the produce of his land is exacted by his landlord in excess of the rent lawfully payable, may, within six months from the date of the exaction, institute a suit to recover from the landlord, in addition to the amount or value of what is so exacted, such sum by way of penalty as the Court thinks fit, not exceeding

two hundred rupees; or, when double the amount or value of what is so exacted exceeds two hundred rupees, not exceeding double that amount or value.

CHAPTER IX.

MISCELLANEOUS PROVISIONS AS TO LANDLORDS AND TENANTS.

Improvements.

Improvements.

Definition of "improvement."

76. (*1*) For the purposes of this Act, the term "improvement," used with reference to a raiyat's holding, shall mean any work which adds to the value of the holding, which is suitable to the holding and consistent with the purpose for which it was let, and which, if not executed on the holding, is either executed directly for its benefit, or is, after execution, made directly beneficial to it.

(*2*) Until the contrary is shown, the following shall be presumed to be improvements within the meaning of this section:—

(*a*) the construction of wells, tanks, water-channels and other works for the storage, supply or distribution of water for the purposes of agriculture, or for the use of men and cattle employed in agriculture;

(*b*) the preparation of land for irrigation;

(*c*) the drainage, reclamation from rivers or other waters, or protection from floods, or from erosion or other damage by water, of land used for agricultural purposes, or waste-land which is culturable;

(*d*) the reclamation, clearance, enclosure or permanent improvement of land for agricultural purposes;

(*e*) the renewal or re-construction of any of the foregoing works, or alterations therein, or additions thereto; and

(*f*) the erection of a suitable dwelling-house for the raiyat and his family, together with all necessary out-offices.

(*3*) But no work executed by the raiyat of a holding shall be deemed to be an improvement for the purposes of this Act if it substantially diminishes the value of his landlord's property.

Right to make improvements in case of holding at fixed rates and occupancy-holding.

77. (*1*) Where a raiyat holds at fixed rates or has an occupancy-right in his holding, neither the raiyat nor his landlord shall, as such, be entitled to prevent the other from making an improvement in respect of the holding, except on the ground that he is willing to make it himself.

(*2*) If both the raiyat and his landlord wish to make the same improvement, the raiyat shall have the prior right to make it, unless it affects another holding or other holdings under the same landlord.

Collector to decide question as to right to make improvement, &c.

78. If a question arises between the raiyat and his landlord—

(*a*) as to the right to make an improvement, or

(*b*) as to whether a particular work is an improvement,

the Collector may, on the application of either party, decide the question, and his decision shall be final.

Right to make improvements in case of non-occupancy-holding.

79. (*1*) A non-occupancy-raiyat shall be entitled to construct, maintain and repair a well for the irrigation of his holding, with all works incidental thereto, and to erect a suitable dwelling-house for himself and his family, with all necessary out-offices; but shall not, except as aforesaid and as next hereinafter provided, be entitled to make any other improvement in respect of his holding without his landlord's permission.

(*2*) A non-occupancy-raiyat who would, but for the want of his landlord's permission, be entitled to make an improvement in respect of his holding, may, if he desires that the improvement be made, deliver, or cause to be delivered, to his landlord a request in writing calling upon him to make the improvement within a reasonable time; and, if the landlord is unable or neglects to comply with that request, may make the improvement himself.

Registration of landlords' improvements.

80. (*1*) A landlord may, by application to such Revenue-officer as the Local Government may appoint, register any improvement which he has lawfully made or which has been lawfully made at his expense or which he has assisted a tenant in making.

(*2*) The application shall be in such form, shall contain such information, and shall be verified in such manner, by local inquiry or otherwise, as the Local Government from time to time by rule directs.

(*3*) The officer receiving the application may reject it if it has not been made within twelve months—

(*a*) in the case of improvements made before the commencement of this Act—from the commencement of this Act;

(*b*) in the case of improvements made after the commencement of this Act—from the date of the completion of the work.

Application to record evidence as to improvement.

81. (*1*) If any landlord or tenant of a holding desires that evidence relating to any improvement made in respect thereof be recorded, he may apply to a Revenue-officer, who shall thereupon, at a time and place of which notice shall be given to the parties, record the evidence, unless he considers that there are no reasonable grounds for making the application, or it is made to appear that the subject-matter thereof is under inquiry in a Civil Court.

(*2*) When any matter has been recorded under this section, the record thereof shall be admissible in evidence in any subsequent proceedings between the landlord and tenant or any persons claiming under them.

Compensation for raiyats' improvements.

82. (*1*) Every raiyat who is ejected from his holding shall be entitled to compensation for improvements which have been made in respect thereof in accordance with this Act by him, or by his predecessor in interest, and for which compensation has not already been paid.

(*2*) Whenever a Court makes a decree or order for the ejectment of a raiyat, it shall determine the amount of compensation (if any) due under this section to the raiyat for improvements, and shall make the decree or order of ejectment conditional on the payment of that amount to the raiyat.

(*3*) No compensation under this section for an improvement shall be claimable where the raiyat has made the improvement in pursuance of a contract or under a lease binding him, in consideration of some substantial advantage to be obtained by him, to make the improvement without compensation, and he has obtained that advantage.

(*4*) Improvements made by a raiyat between the 2nd day of March, 1883, and the commencement of this Act shall be deemed to have been made in accordance with this Act.

(*5*) The Local Government may, from time to time, by notification in the official Gazette, make rules requiring the Court to associate with itself, for the purpose of estimating the compensation to be awarded under this section for an improvement, such number of assessors as the Local Government thinks fit, and determining the qualifications of those assessors and the mode of selecting them.

Principle on which compensation is to be estimated.

83. (*1*) In estimating the compensation to be awarded under the last foregoing section for an improvement, regard shall be had—

(*a*) to the amount by which the value, or the produce, of the holding, or the value of that produce, is increased by the improvement;

(*b*) to the condition of the improvement, and the probable duration of its effects;

(*c*) to the labour and capital required for the making of such an improvement; *Improvements.*

(*d*) to any reduction or remission of rent or any other advantage given by the landlord to the raiyat in consideration of the improvement; and

(*e*) in the case of a reclamation or of the conversion of unirrigated into irrigated land, to the length of time during which the raiyat has had the benefit of the improvement at an unenhanced rent.

(*2*) When the amount of the compensation has been assessed, the Court may, if the landlord and raiyat agree, direct that, instead of being paid wholly in money, it shall be made wholly or partly in some other way.

Acquisition of land for building and other purposes.

Acquisition of land for building and other purposes.

84. A Civil Court may, on the application of the landlord of a holding, and on being satisfied that he is desirous of acquiring the holding or part thereof for some reasonable and sufficient purpose having relation to the good of the holding or of the estate in which it is comprised, including the use of the ground as building ground, or for any religious, educational or charitable purpose, *Acquisition of land for building and other purposes.*

and on being satisfied on the certificate of the Collector that the purpose is reasonable and sufficient,

authorise the acquisition thereof by the landlord upon such conditions as the Court may think fit, and require the tenant to sell his interest in the whole or such part of the holding to the landlord upon such terms as may be approved by the Court, including full compensation to the tenant.

Sub-letting.

Restrictions on sub-letting.

85. (*1*) If a raiyat sub-lets otherwise than by a registered instrument, the sub-lease shall not be valid against his landlord unless made with the landlord's consent. *Sub-letting.*

(*2*) A sub-lease by a raiyat shall not be admitted to registration if it purports to create a term exceeding nine years.

(*3*) Where a raiyat has, without the consent of his landlord, granted a sub-lease by an instrument registered before the commencement of this Act, the sub-lease shall not be valid for more than nine years from the commencement of this Act.

Surrender and abandonment.

Surrender.

86. (*1*) A raiyat not bound by a lease or other agreement for a fixed period may, at the end of any agricultural year, surrender his holding. *Surrender and abandonment.*

Surrender and abandonment.

(*2*) But, notwithstanding the surrender, the raiyat shall be liable to indemnify the landlord against any loss of the rent of the holding for the agricultural year next following the date of the surrender, unless he gives to his landlord, at least three months before he surrenders, notice of his intention to surrender.

(*3*) When a raiyat has surrendered his holding, the Court shall in the following cases for the purposes of sub-section (*2*) presume, until the contrary is shown, that such notice was so given, namely :—

(*a*) if the raiyat takes a new holding in the same village from the same landlord during the agricultural year next following the surrender ;

(*b*) if the raiyat ceases, at least three months before the end of the agricultural year at the end of which the surrender is made, to reside in the village in which the surrendered holding is situate.

(*4*) The raiyat may, if he thinks fit, cause the notice to be served through the Civil Court within the jurisdiction of which the holding or any portion of it is situate.

(*5*) When a raiyat has surrendered his holding, the landlord may enter on the holding and either let it to another tenant or take it into cultivation himself.

(*6*) When a holding is subject to an incumbrance secured by a registered instrument, the surrender of the holding shall not be valid unless it is made with the consent of the landlord and the incumbrancer.

(*7*) Save as provided in the last foregoing sub-section, nothing in this section shall affect any arrangement by which a raiyat and his landlord may arrange for a surrender of the whole or a part of the holding.

87. (*1*) If a raiyat voluntarily abandons his residence without notice to his landlord and without arranging for payment of his rent as it falls due, and ceases to cultivate his holding either by himself or by some other person, the landlord may, at any time after the expiration of the agricultural year in which the raiyat so abandons and ceases to cultivate, enter on the holding and let it to another tenant or take it into cultivation himself.

Abandonment.

(*2*) Before a landlord enters under this section, he shall file a notice in the prescribed form in the Collector's office stating that he has treated the holding as abandoned and is about to enter on it accordingly ; and the Collector shall cause the notice to be published in such manner as the Local Government, by rule, directs.

(*3*) When a landlord enters under this section, the raiyat shall be entitled to institute a suit for recovery of possession of the land at any time not later than the expiration of two years, or, in the case of a non-occupancy-raiyat, six months, from the date of the publication of the notice ; and thereupon the Court may, on being satisfied that the raiyat did not voluntarily abandon his holding, order recovery of possession on such terms, if any, with respect to compensation to persons injured and payment of arrears of rent as to the Court may seem just.

Surrender and abandonment.

(*4*) Where the whole or part of a holding has been sub-let by a registered instrument, the landlord shall, before entering under this section on the holding, offer the whole holding to the sub-lessee for the remainder of the term of the sub-lease at the rent paid by the raiyat who has ceased to cultivate the holding, and on condition of the sub-lessee paying up all arrears due from that raiyat. If the sub-lessee refuses or neglects within a reasonable time to accept the offer, the landlord may avoid the sub-lease and may enter on the holding and let it to another tenant or cultivate it himself as provided in sub-sections (*1*) and (*2*).

Sub-division of tenancy.

88. A division of a tenure or holding, or distribution of the rent payable in respect thereof, shall not be binding on the landlord unless it is made with his consent in writing.

Division of tenancy not binding on landlord without his consent.

Sub-d of te

Ejectment.

89. No tenant shall be ejected from his tenure or holding except in execution of a decree.

No ejectment except in execution of decree.

Ejec

Measurements.

90. (*1*) Subject to the provisions of this section and any contract, a landlord may, by himself, or by any person authorized by him in this behalf, enter on and measure all land comprised in his estate or tenure, other than land exempt from the payment of revenue.

Landlord's right to measure land.

Mea ment

(*2*) A landlord shall not, without the consent of the tenant, or the written permission of the Collector, be entitled to measure land more than once in ten years, except in the following cases (namely) :—

(*a*) where the area of the tenure or holding is liable, by reason of alluvion or diluvion, to vary from year to year, and the rent payable depends on the area ;

(*b*) where the area under cultivation is liable to vary from year to year and the rent payable depends on the area under cultivation ;

(*c*) where the landlord is a purchaser otherwise than by voluntary transfer and not more than two years have elapsed since the date of his entry under the purchase.

ments. (*3*) The ten years shall be computed from the date of the last measurement, whether made before or after the commencement of this Act.

Power for Court to order tenant to attend and point out boundaries.

91. (*1*) Where a landlord desires to measure any land which he is entitled to measure under the last foregoing section, the Civil Court may, on the application of the landlord, make an order requiring the tenant to attend and point out the boundaries of the land.

(*2*) If the tenant refuses or neglects to comply with the order, a map or other record of the boundaries and measurements of the land, prepared under the direction of the landlord at the time when the tenant was directed to attend, shall be presumed to be correct until the contrary is shown.

Standard of measurement.

92. (*1*) Every measurement of land made by order of a Civil Court, or of a Revenue-officer, in any suit or proceeding between a landlord and tenant, shall be made by the acre, unless the Court or Revenue-officer directs that it be made by any other specified standard.

(*2*) If the rights of the parties are regulated by any local measure other than the acre, the acre shall be converted into the local measure for the purposes of the suit or proceeding.

(*3*) The Local Government may, after local enquiry, make rules declaring for any local area the standard or standards of measurement locally in use in that area, and every declaration so made shall be presumed to be correct until the contrary is shown.

Managers.

ers. Power to call upon co-owners to show cause why they should not appoint a common manager.

93. When any dispute exists between co-owners of an estate or tenure as to the management thereof, and in consequence there has ensued, or is likely to ensue,

(*a*) inconvenience to the public, or

(*b*) injury to private rights,

the District Judge may, on the application in case (*a*) of the Collector, and in case (*b*) of any one having an interest in the estate or tenure, direct a notice to be served on all the co-owners, calling on them to show cause why they should not appoint a common manager:

Provided that a co-owner of an estate or tenure shall not be entitled to apply under this section unless he is actually in possession of the interest he claims, and, it he is a co-owner of an estate, unless
C.) of his name and the extent of his interest are registered under the Land Registration Act, 1876.

Power to order them to appoint a manager if cause is not shown.

94. If the co-owners fail to show cause as aforesaid within one month after service of a notice under the last foregoing section, the District Judge may make an order directing them to appoint a common manager, and a copy of the order shall be served on any co-owner who did not appear before it was made. *Managers.*

Power to appoint manager if order is not obeyed.

95. If the co-owners do not, within such period, not being less than one month after the making of an order under the last foregoing section, as the District Judge may fix in this behalf, or, where the order has been served as directed by that section, within a like period after such service, appoint a common manager and report the appointment for the information of the District Judge, the District Judge may, unless it is shown to his satisfaction that there is a prospect of a satisfactory arrangement being made within a reasonable time,—

(*a*) direct that the estate or tenure be managed by the Court of Wards in any case in which the Court of Wards consents to undertake the management thereof; or

(*b*) in any case appoint a manager.

Power to nominate person to act in all cases under clause (*b*) of last section.

96. The Local Government may nominate a person for any local area to manage all estates and tenures within that local area for which it may be necessary to appoint a manager under clause (*b*) of the last foregoing section; and, when any person has been so nominated, no other person shall be appointed manager under that clause by the District Judge, unless in the case of any estate the Judge thinks fit to appoint one of the co-owners themselves as manager.

The Court of Wards Act, 1879, applicable to management by Court of Wards.

97. In any case in which the Court of Wards undertakes under section 95 the management of an estate or tenure, so much of the provisions of the Court of Wards Act, 1879, as relates to the management IX (B.C.) of 1879.
of immoveable property shall apply to the management.

Provisions applicable to manager.

98. (*1*) A manager appointed under section 95 may, if the District Judge thinks fit, be remunerated by a fixed salary or percentage of the money collected by him as manager, or partly in one way and partly in the other, as the District Judge from time to time directs.

(*2*) He shall give such security for the proper discharge of his duties as the District Judge directs.

(*3*) He shall, subject to the control of the District Judge, have, for the purposes of management, the same powers as the co-owners jointly might but for his appointment have exercised, and the co-owners shall not exercise any such power.

Managers.

(*4*) He shall deal with and distribute the profits in accordance with the orders of the District Judge.

(*5*) He shall keep regular accounts, and allow the co-owners or any of them to inspect and take copies of those accounts.

(*6*) He shall pass his accounts at such period and in such form as the District Judge may direct.

(*7*) He may make any application which the proprietors could make under section 103.

(*8*) He shall be removable by the order of the District Judge, and not otherwise.

Power to restore management to co-owners.

99. When an estate or tenure has been placed under the management of the Court of Wards, or a manager has been appointed for the same under section 95, the District Judge may at any time direct that the management of it be restored to the co-owners, if he is satisfied that the management will be conducted by them without inconvenience to the public or injury to private rights.

Power to make rules.

100. The High Court may, from time to time, make rules defining the powers and duties of managers under the foregoing sections.

CHAPTER X.

Record-of-rights and Settlement of Rents.

Power to order survey and preparation of record-of-rights.

101. (*1*) The Local Government may, in any case with the previous sanction of the Governor General in Council, and may, if it thinks fit, without such sanction in any of the cases next hereinafter mentioned, make an order directing that a survey be made, and a record-of-rights be prepared, in respect of the lands in a local area by a Revenue-officer.

(*2*) The cases in which an order may be made under this section without the previous sanction of the Governor General in Council are the following (namely) :—

(*a*) where the landlord or a large proportion of the landlords or of the tenants applies for such an order and deposits, or gives security for, such amount, for the payment of expenses, as the Local Government directs;

(*b*) where the preparation of such a record is calculated to settle or avert a serious dispute existing or likely to arise between the tenants and their landlords generally;

(*c*) where the local area is comprised in an estate or tenure which belongs to or is managed by the Government or the Court of Wards; and

(*d*) where a settlement of revenue is being made in respect of the local area.

(*3*) A notification in the official Gazette of an order under this section shall be conclusive evidence that the order has been duly made.

Particulars to be recorded.

102. Where an order is made under the last foregoing section, the particulars to be recorded shall be specified in the order, and may include, either without or in addition to other particulars, some or all of the following, namely :—

(*a*) the name of each tenant;

(*b*) the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy-raiyat, non-occupancy-raiyat or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure;

(*c*) the situation, quantity and boundaries of the land held by him;

(*d*) the name of his landlord;

(*e*) the rent payable;

(*f*) the mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise;

(*g*) if the rent is a gradually increasing rent, the time at which, and the steps by which, it increases;

(*h*) the special conditions and incidents, if any, of the tenancy.

Power for Revenue-officer to record particulars on application of proprietor or tenure-holder.

103. On the application of a proprietor or tenure-holder, and on his depositing or giving security for the required amount for expenses, a Revenue-officer may, subject to and in accordance with rules made in this behalf by the Local Government, ascertain and record the particulars specified in the last foregoing section with respect to the estate or tenure or any part thereof.

Procedure as to recording or settling rents.

104. (*1*) When, in any proceeding under this chapter, it does not appear that the tenant is holding land in excess of or less than that for which he is paying rent, and neither the landlord nor the tenant applies for a settlement of rent, the officer shall record the rent payable by the tenant, and the land in respect of which the rent is payable.

(*2*) When it appears that a tenant is holding land in excess of, or less than, that for which he is

paying rent, or either the landlord or the tenant applies for a settlement of rent, or in any case under section 101, sub-section (*2*), clause (*d*), the officer shall settle a fair and equitable rent in respect of the land held by the tenant.

(*3*) In settling rents under this section, the officer shall presume, until the contrary is proved, that the existing rent is fair and equitable, and shall have regard to the rules laid down in this Act for the guidance of the Civil Court in increasing or reducing rents, as the case may be.

Publication of record.

105. (*1*) When the Revenue-officer has completed a record made under this chapter, he shall cause a draft thereof to be locally published in the prescribed manner and for the prescribed period, and shall receive and consider any objection which may be made to any entry therein during the period of publication.

(*2*) After the expiration of this period the Revenue-officer shall finally frame the record, and shall cause it to be locally published in the prescribed manner, and the publication shall be conclusive evidence that the record has been duly made under this chapter.

Procedure in case of dispute as to entries in record.

106. If at any time before the final publication of the record under the last foregoing section a dispute arises as to the correctness of any entry (not being an entry of a rent settled under this chapter), or as to the propriety of any omission, which the Revenue-officer proposes to make or has made therein or therefrom, the Revenue-officer shall hear and decide the dispute.

Procedure to be adopted by Revenue-officer.

107. In all proceedings for the settlement of rents under this chapter, and in all proceedings under the last foregoing section, the Revenue-officer shall, subject to rules made by the Local Government under this Act, adopt the procedure laid down in the Code of Civil Procedure for the trial of suits, and his decision in every such proceeding shall have the force of a decree.

1882.

Appeals from decisions of Revenue-officers.

108. (*1*) The Local Government shall appoint one or more persons to be a Special Judge or Special Judges for the purpose of hearing appeals from the decisions of Revenue-officers under this chapter.

(*2*) An appeal shall lie to the Special Judge from the decision of a Revenue-officer under this chapter, and the provisions of the Code of Civil Procedure relating to appeals shall, as nearly as may be, apply to all such appeals.

1882.

(*3*) Subject to the provisions of Chapter XLII of the Code of Civil Procedure, an appeal shall lie to the High Court from the decision of a Special Judge in any case under section 106 as if he were a Court subordinate to the High Court within the meaning of the first section of that chapter:

1882

Provided that, if in a second appeal the High Court alters the decision of the Special Judge in respect of any of the particulars with reference to which the rent of any tenure or holding has been settled, the Court may settle a new rent for the tenure or holding, but in so doing shall be guided by the rents of the other tenures or holdings of the same class comprised in the same record as ascertained or settled under section 104.

Undisputed entries in record to be presumptive evidence.

109. (*1*) Every record made under this chapter shall distinguish between the disputed and the undisputed entries therein.

(*2*) Every undisputed entry in the record shall be presumed to be correct until the contrary is proved.

Time at which settlement of rent is to take effect.

110. When any rent is settled under this chapter, the settlement shall take effect from the beginning of the agricultural year next after the final publication of the record.

Stay of proceedings in Civil Court during preparation of record.

111. When an order has been made under section 101,—

(*a*) a Civil Court shall not, until the final publication of the record, entertain a suit or application for the alteration of the rent or the determination of the status of any tenant in the area to which the order applies; and

(*b*) the High Court may, if it thinks fit, transfer to the Revenue-officer any proceedings pending in a Civil Court for the alteration of any such rent or for the determination of any of the matters specified or referred to in section 102.

Power to authorize a special settlement in special cases.

112. (*1*) The Local Government, with the previous sanction of the Governor General in Council, may, on being satisfied that the exercise of the powers hereinafter mentioned is necessary in the interests of public order or of the local welfare, invest a Revenue-officer acting under this chapter with the following powers or either of them, namely:—

(*a*) power to settle all rents;

(*b*) power, when settling rents, to reduce rents if in the opinion of the officer the maintenance of existing rents would on any ground, whether specified in this Act or not, be unfair or inequitable.

(*2*) The powers given under this section may be made exerciseable within a specified area either generally or with reference to specified cases or classes of cases.

(*3*) When the Local Government takes any action under this section, the settlement-record prepared by the Revenue-officer shall not take effect until it has been finally confirmed by the Governor General in Council.

Bengal Tenancy Act.

(*Chaper XI.—Record of Proprietors' Private Lands.—Secs. 113—120.*)
(*Chapter XII.—Distraint.—Sec. 121.*)

113. When the rent of a tenure or holding is settled under this chapter, it shall not, except on the ground of a landlord's improvement or of a subsequent alteration in the area of the tenure or holding, be enhanced, in the case of a tenure or an occupancy-holding for fifteen years, and, in the case of a non-occupancy-holding, if the rent is settled in any case under section 112 or on the application of the landlord under section 104, for five years. The periods of fifteen and five years shall be counted from the date of the final publication of the record.

Period for which rents as settled are to remain unaltered.

114. Where an order is made under this chapter in any case except under section 101, sub-section (*2*), clause (*d*), the expenses incurred by the Government in carrying out the provisions of this chapter in any local area, or such part of those expenses as the Local Government may direct, shall be defrayed by the landlords and tenants of land in that local area, in such proportions as the Local Government, having regard to all the circumstances of each case, may determine; and the proportion of those expenses so to be defrayed by any person shall be recoverable by the Government from him as if it were an arrear of revenue due by him.

Expenses of proceedings under chapter.

115. When the particulars mentioned in section 102, clause (*b*), have been recorded under this chapter in respect of any tenancy, the presumption under section 50 shall not thereafter apply to that tenancy.

Presumption as to fixity of rent not to apply where record has been prepared.

CHAPTER XI.

Record of Proprietors' Private Lands.

116. Nothing in Chapter V shall confer a right of occupancy in, and nothing in Chapter VI shall apply to, a proprietor's private lands known in Bengal as khámár, nij or nij-jot, and in Behar as zirát, nij, sír or kamat, where any such land is held under a lease for a term of years or under a lease from year to year.

Saving as to khámár land.

117. The Local Government may, from time to time, make an order directing a Revenue-officer to make a survey and record of all the lands in a specified local area which are a proprietor's private lands within the meaning of the last foregoing section.

Power for Government to order survey and record of proprietor's private lands.

118. In the case of any land alleged to be a proprietor's private land, on the application of the proprietor or of any tenant of the land, and on his depositing the required amount for expenses, a Revenue-officer may, subject to and in accordance with rules made in this behalf by the Local Government, ascertain and record whether the land is or is not a proprietor's private land.

Power for Revenue-officer to record private land on application of proprietor or tenant.

119. When a Revenue-officer proceeds under either of the two last foregoing sections, the provisions of sections 105 to 109, both inclusive, shall apply.

Procedure for recording private land.

120. (*1*) The Revenue-officer shall record as a proprietor's private land—

Rules for determination of proprietor's private land.

(*a*) land which is proved to have been cultivated as khámár, zirát, sír, nij, nij-jot or kamat by the proprietor himself with his own stock or by his own servants or by hired labour for twelve continuous years immediately before the passing of this Act, and

(*b*) cultivated land which is recognized by village usage as proprietor's khámár, zirát, sír, nij, nij-jot or kamat.

(*2*) In determining whether any other land ought to be recorded as a proprietor's private land, the officer shall have regard to local custom, and to the question whether the land was before the second day of March, 1883, specifically let as proprietor's private land, and to any other evidence that may be produced; but shall presume that land is not a proprietor's private land until the contrary is shown.

(*3*) If any question arises in a Civil Court as to whether land is or is not a proprietor's private land, the Court shall have regard to the rules laid down in this section for the guidance of Revenue-officers.

CHAPTER XII.

Distraint.

121. Where an arrear of rent is due to the landlord of a raiyat or under-raiyat, and has not been due for more than a year, and no security has been accepted therefor by the landlord, the landlord may, in addition to any other remedy to which he is entitled by law, present an application to the Civil Court requesting the Court to recover the arrear by distraining, while in the possession of the cultivator,—

Cases in which an application for distraint may be made.

(*a*) any crops or other products of the earth standing or ungathered on the holding;

(*b*) any crops or other products of the earth which have been grown on the holding and have been reaped or gathered and are deposited on the holding, or on a threshing-floor or place for treading out grain, or the like, whether in the fields or within a homestead:

Provided that an application shall not be made under this section—

(*1*) by a proprietor or manager as defined under the Land Registration Act, 1876, or a mortgagee of such a proprietor or manager, unless his name and the extent of his interest in the land in respect of which the arrear is due have been registered under the provisions of that Act; or

(*2*) for the recovery of any sum in excess of the rent payable for the holding in the preceding agricultural year, unless that sum is payable under a written contract or in consequence of a proceeding under this Act or an enactment hereby repealed; or

(*3*) in respect of the produce of any part of the holding which the tenant has sub-let with the written consent of the landlord.

Form of application.

122. (*1*) Every application under the last foregoing section shall specify—

(*a*) the holding in respect of which the arrear is claimed, and the boundaries thereof, or such other particulars as may suffice for its identification;

(*b*) the name of the tenant;

(*c*) the period in respect of which the arrear is claimed;

(*d*) the amount of the arrear, with the interest, if any, claimed thereon, and, when an amount in excess of the rent payable by the tenant in the last preceding agricultural year is claimed, the contract, or proceeding, as the case may be, under which that amount is payable;

(*e*) the nature and approximate value of the produce to be distrained;

(*f*) the place where it is to be found, or such other particulars as may suffice for its identification; and

(*g*) if it is standing or ungathered, the time at which it is likely to be cut or gathered.

(*2*) The application shall be signed and verified in the manner prescribed by the Code of Civil Procedure for the signing and verification of plaints.

Procedure on receipt of application.

123. (*1*) The applicant shall, at the time of filing an application under the foregoing sections, file in Court such documentary evidence (if any) as he may consider necessary for the purposes of the application.

(*2*) The Court may, if it thinks fit, examine the applicant, and shall, with as little delay as possible, admit the application or reject it, or permit the applicant to furnish additional evidence in support of it.

(*3*) Where a Court cannot forthwith admit or reject an application under sub-section (*2*), it may, if it thinks fit, make an order prohibiting the removal of the produce specified in the application pending the execution of an order for distraining the same or the rejection of the application.

(*4*) When an order for distraining any produce is made under this section at a considerable time before the produce is likely to be cut or gathered, the Court may suspend the execution of the order for such time as it thinks fit, and may, if it thinks fit, make a further order prohibiting the removal of the produce pending the execution of the order for distraint.

Execution of order for distraint.

124. If an application is admitted under the last foregoing section, the Court shall depute an officer to distrain the produce specified therein, or such portion of that produce as it thinks fit; and the officer shall proceed to the place where the produce is, and distrain the produce by taking charge of it himself or placing some other person in charge of it in his behalf, and publishing a notification of the distraint in accordance with rules to that effect to be made by the High Court:

Provided that produce which from its nature does not admit of being stored shall not be distrained under this section at any time less than twenty days before the time when it would be fit for reaping or gathering.

Service of demand and account.

125. (*1*) The distraining officer shall, at the time of making the distraint, serve on the defaulter a written demand for the arrear due, and the costs incurred in making the distraint, with an account exhibiting the grounds on which the distraint is made.

(*2*) Where the distraining officer has reason to believe that a person other than the defaulter is the owner of the property distrained, he shall serve copies of the demand and account on that person likewise.

(*3*) The demand and account shall, if practicable, be served personally; but if a person on whom they are to be served absconds or conceals himself, or cannot otherwise be found, the officer shall affix copies of the demand and account on a conspicuous part of the outside of the house in which he usually resides.

Right to reap, &c., produce.

126. (*1*) A distraint under this chapter shall not prevent any person from reaping, gathering or storing any produce, or doing any other act necessary for its due preservation.

(*2*) If the person entitled to do so fails to do so at the proper time, the distraining officer shall cause any standing crops or ungathered products

distrained to be reaped or gathered when ripe, and stored in such granaries or other places as are commonly used for the purpose, or in some other convenient place in the neighbourhood, or shall do whatever else may be necessary for the due preservation of the same.

(3) In either case the distrained property shall remain in the charge of the distraining officer, or of some other person appointed by him in this behalf.

Sale proclamation to be issued unless demand is satisfied.

127. (1) Unless the demand, with all costs of the distraint, be immediately satisfied, the distraining officer shall issue a proclamation specifying the particulars of the property distrained and the demand for which it is distrained, and notifying that he will, at a place and on a day specified, not being less than three or more than seven days after the time of making the distraint, sell the distrained property by public auction:

Provided that when the crops or products distrained from their nature admit of being stored but have not yet been stored, the day of the sale shall be so fixed as to admit of their being made ready for storing before its arrival.

(2) The proclamation shall be stuck up on a conspicuous place in the village in which the land is situate for which the arrears of rent are claimed.

Place of sale.

128. The sale shall be held at the place where the distrained property is, or at the nearest place of public resort if the distraining officer is of opinion that it is likely to sell there to better advantage.

When produce may be sold standing.

129. (1) Crops or products which from their nature admit of being stored shall not be sold before they are reaped or gathered and are ready for storing.

(2) Crops or products which from their nature do not admit of being stored may be sold before they are reaped or gathered, and the purchaser shall be entitled to enter on the land by himself, or by any person appointed by him in this behalf, and do all that is necessary for the purpose of tending and reaping or gathering them.

Manner of sale.

130. The property shall be sold by public auction, in one or more lots as the officer holding the sale may think advisable; and if the demand, with the costs of distraint and sale, is satisfied by the sale of a portion of the property, the distraint shall be immediately withdrawn with respect to the remainder.

Postponement of sale.

131. If, on the property being put up for sale, a fair price (in the estimation of the officer holding the sale) is not offered for it, and if the owner of the property, or a person authorised to act in his behalf, applies to have the sale postponed till the next day, or (if a market is held at the place of sale) the next market-day, the sale shall be postponed until that day, and shall be then completed, whatever price may be offered for the property.

Payment of purchase-money.

132. The price of every lot shall be paid at the time of sale, or as soon thereafter as the officer holding the sale directs, and in default of such payment the property shall be put up again and sold.

Certificate to be given to purchaser.

133. When the purchase-money has been paid in full, the officer holding the sale shall give the purchaser a certificate describing the property purchased by him and the price paid.

Proceeds of sale how to be applied.

134. (1) From the proceeds of every sale of distrained property under this chapter, the officer holding the sale shall pay the costs of the distraint and sale, calculated on a scale of charges prescribed by rules to be made, from time to time, by the Local Government in this behalf.

(2) The remainder shall be applied to the discharge of the arrear for which the distress was made, with interest thereon up to the day of sale and the surplus (if any) shall be paid to the person whose property has been sold.

Certain persons may not purchase.

135. Officers holding sales of property under this Act, and all persons employed by, or subordinate to, such officers, are prohibited from purchasing, either directly or indirectly any property sold by such officers.

Procedure where demand is paid before the sale.

136. (1) If at any time after a distraint has been made under this chapter, and before the sale of the distrained property, the defaulter, or the owner of the distrained property where he is not the defaulter, deposits in the Court issuing the order of distraint, or in the hands of the distraining officer, the amount specified in the demand served under section 125, with all costs which may have been incurred after the service of the demand, the Court or officer, as the case may be, shall grant a receipt for the same and the distraint shall forthwith be withdrawn.

(2) When the distraining officer receives the deposit, he shall forthwith pay it into the Court.

(3) A receipt granted under this section to an owner of distrained property not being the defaulter shall afford a full protection to him against any subsequent claim for the arrears of rent or account of which the distraint was made.

(4) After the expiration of one month from the date of a deposit being made under this section

the Court shall pay therefrom to the applicant for distraint the amount due to him, unless in the meanwhile the owner of the property distrained has instituted a suit against the applicant contesting the legality of the distraint and claiming compensation in respect of the same.

(5) A landlord shall not be deemed to have consented to his tenant's sub-letting the holding or any part thereof merely by reason of his having received an amount deposited under this section by an inferior tenant.

Amount paid by under-tenant for his lessor may be deducted from rent.

137. (1) When an inferior tenant, on his property being lawfully distrained under this chapter for the default of a superior tenant, makes any payment under the last foregoing section, he shall be entitled to deduct the amount of that payment from any rent payable by him to his immediate landlord, and that landlord, if he is not the defaulter, shall in like manner be entitled to deduct the amount so deducted from any rent payable by him to his immediate landlord, and so on until the defaulter is reached.

(2) Nothing in this section shall affect the right of an inferior tenant making a payment under the last foregoing section to institute a suit for the recovery from the defaulter of any portion of the amount paid which he has not deducted under this section.

Conflict between rights of superior and inferior landlords.

138. When land is sub-let, and any conflict arises under this chapter between the rights of a superior and of an inferior landlord who distrain the same property, the right of the superior landlord shall prevail.

Distraint of property which is under attachment.

139. When any conflict arises between an order for distraint issued under this chapter and an order issued by a Civil Court for the attachment or sale of the property which is the subject of the distraint, the order for distraint shall prevail; but, if the property is sold under that order, the surplus proceeds of the sale shall not be paid under section 134 to the owner of the property without the sanction of the Court by which the order of attachment or sale was issued.

Suit for compensation for wrongful distraint.

140. No appeal shall lie from any order passed by a Civil Court under this chapter; but any person whose property is distrained on an application made under section 121 in any case in which such an application is not permitted by that section may institute a suit against the applicant for the recovery of compensation.

Power for Local Government to authorise distraint in certain cases.

141. (1) When the Local Government is of opinion that in any local area or in any class of cases it would, by reason of the character of the cultivation or the habits of the cultivators, be impracticable for a landlord to realize his rent by an application under this chapter, to the Civil Court, it may, from time to time, by order, authorize the landlord to distrain, by himself or his agent, any produce for the distraint of which he would be entitled to apply under this chapter to the Civil Court:

Provided that every person distraining any produce under such authorization shall proceed in the manner prescribed by section 124, and shall forthwith give notice, in such form as the High Court may, by rule, prescribe, to the Civil Court having jurisdiction to entertain an application for distraining the produce, and that Court shall, with no avoidable delay, depute an officer to take charge of the produce distrained.

(2) When an officer of the Court has taken charge of any distrained produce under this section, the proceedings shall thereafter be conducted in all respects as if he had distrained it under section 124.

(3) The Local Government may at any time rescind any order made by it under this section.

Power for High Court to make rules.

142. The High Court may, from time to time, make rules consistent with this Act for regulating the procedure in all cases under this chapter.

CHAPTER XIII.

JUDICIAL PROCEDURE.

Power to modify Civil Procedure Code in its application to landlord and tenant suits.

143. (1) The High Court may, from time to time, with the approval of the Governor General in Council, make rules consistent with this Act declaring that any portions of the Code of Civil Procedure shall not apply to suits between landlord and tenant as such or to any specified classes of such suits, or shall apply to them subject to modifications specified in the rules. XIV of 1882

(2) Subject to any rules so made, and subject also to the other provisions of this Act, the Code of Civil Procedure shall apply to all such suits. XIV of 1882

Jurisdiction in proceedings under Act.

144. (1) The cause of action in all suits between landlord and tenant as such shall, for the purposes of the Code of Civil Procedure, be deemed to have arisen XIV of 1882 within the local limits of the jurisdiction of the Civil Court which would have jurisdiction to entertain a suit for the possession of the tenure or holding in connection with which the suit is brought.

(2) When under this Act a Civil Court is authorized to make an order on the application of a landlord or a tenant, the application shall be made to the Court which would have jurisdiction to entertain a suit for the possession of the tenure or holding in connection with which the application is brought.

Bengal Tenancy Act.

(*Chapter XIII.—Judicial Procedure.—Secs. 145-151.*)

145. Every náib or gumáshta of a landlord empowered in this behalf by a written authority under the hand of the landlord shall, for the purposes of every such suit or application, be deemed to be the recognized agent of the landlord within the meaning of the Code of Civil Procedure, notwithstanding that the landlord may reside within the local limits of the jurisdiction of the Court in which the suit is to be instituted or is pending, or in which the application is made.

Náibs or gumáshtas to be recognized agents.

XIV of 1882.

146. The particulars referred to in section 58 of the Code of Civil Procedure shall, in the case of such suits, instead of being entered in the register of civil suits prescribed by that section, be entered in a special register to be kept by each Civil Court, in such form as the Local Government may, from time to time, prescribe in this behalf.

XIV of 1882.

Special register of suits.

147. Subject to the provisions of section 373 of the Code of Civil Procedure, where a landlord has instituted a suit against a raiyat for the recovery of any rent of his holding, the landlord shall not institute another suit against him for the recovery of any rent of that holding until after three months from the date of the institution of the previous suit.

XIV of 1882.

Successive rent-suits.

148. The following rules shall apply to suits for the recovery of rent:—

Procedure in rent-suits.

(*a*) sections 121 to 127 (both inclusive), 129, 305, and 320 to 326 (both inclusive) of the Code of Civil Procedure shall not apply to any such suit:

XIV of 1882.

(*b*) the plaint shall contain, in addition to the particulars specified in section 50 of the Code of Civil Procedure, a statement of the situation, designation, extent and boundaries of the land held by the tenant; or, where the plaintiff is unable to give the extent or boundaries, in lieu thereof a description sufficient for identification:

XIV of 1882.

(*c*) the summons shall be for the final disposal of the suit, unless the Court is of opinion that the summons should be for the settlement of issues only:

(*d*) the service of the summons may, if the High Court by rule, either generally, or specially for any local area, so directs, be effected, either in addition to, or in substitution for, any other mode of service, by forwarding the summons by post in a letter addressed to the defendant and registered under Part III of the Indian Post Office Act, 1866;

XIV of 1866.

when a summons is so forwarded in a letter, and it is proved that the letter was duly posted and registered, the Court may presume that the summons has been duly served:

(*e*) a written statement shall not be filed without the leave of the Court:

(*f*) the rules for recording the evidence of witnesses prescribed by section 189 of the Code of Civil Procedure shall apply, whether an appeal is allowed or not:

XIV of 1

(*g*) the Court may, when passing the decree, order on the óral application of the decree-holder the execution thereof, unless it is a decree for ejectment for arrears:

(*h*) notwithstanding anything contained in section 232 of the Code of Civil Procedure, an application for the execution of a decree for arrears obtained by a landlord shall not be made by an assignee of the decree unless the landlord's interest in the land has become and is vested in him.

XIV of 1

149. (*1*) When a defendant admits that money is due from him on account of rent, but pleads that it is due not to the plaintiff but to a third person, the Court shall, except for special reasons to be recorded in writing, refuse to take cognizance of the plea unless the defendant pays into Court the amount so admitted to be due.

Payment into Court of money admitted to be due to third person.

(*2*) Where such a payment is made, the Court shall forthwith cause notice of the payment to be served on the third person.

(*3*) Unless the third person within three months from the receipt of the notice institutes a suit against the plaintiff and therein obtains an order restraining payment out of the money, it shall be paid out to the plaintiff on his application.

(*4*) Nothing in this section shall affect the right of any person to recover from the plaintiff money paid to him under sub-section (*3*).

150. When a defendant admits that money is due from him to the plaintiff on account of rent, but pleads that the amount claimed is in excess of the amount due, the Court shall, except for special reasons to be recorded in writing, refuse to take cognizance of the plea unless the defendant pays into Court the amount so admitted to be due.

Payment into Court of money admitted to be due to landlord.

151. When a defendant is liable to pay money into Court under either of the two last foregoing sections, if the Court thinks that there are sufficient reasons for so ordering, it may take cognizance of the defendant's plea on his paying into Court such reasonable portion of the money as the Court directs.

Provision as to payment of portion of money.

Court to grant receipt.

152. When a defendant pays money into Court under either of the said sections, the Court shall give the defendant a receipt, and the receipt so given shall operate as an acquittance in the same manner and to the same extent as if it had been given by the plaintiff or the third person as the case may be.

Appeals in rent-suits.

153. An appeal shall not lie from any decree or order passed, whether in the first instance or on appeal, in any suit instituted by a landlord for the recovery of rent where—

(*a*) the decree or order is passed by a District Judge, Additional Judge or Subordinate Judge, and the amount claimed in the suit does not exceed one hundred rupees, or

(*b*) the decree or order is passed by any other judicial officer specially empowered by the Local Government to exercise final jurisdiction under this section, and the amount claimed in the suit does not exceed fifty rupees;

unless in either case the decree or order has decided a question relating to title to land or to some interest in land as between parties having conflicting claims thereto, or a question of a right to enhance or vary the rent of a tenant, or a question of the amount of rent annually payable by a tenant:

Provided that the District Judge may call for the record of any case in which a judicial officer as aforesaid has passed a decree or order to which this section applies, if it appears that the judicial officer has exercised a jurisdiction not vested in him by law, or has failed to exercise a jurisdiction so vested, or has acted in the exercise of his jurisdiction illegally or with material irregularity; and may pass such order as the District Judge thinks fit.

Date from which decree for enhancement takes effect.

154. A decree for enhancement of rent under this Act, if passed in a suit instituted in the first eight months of an agricultural year, shall ordinarily take effect on the commencement of the agricultural year next following; and, if passed in a suit instituted in the last four months of the agricultural year, shall ordinarily take effect on the commencement of the agricultural year next but one following; but nothing in this section shall prevent the Court from fixing, for special reasons, a later date from which any such decree shall take effect.

Relief against forfeitures.

155. (*1*) A suit for the ejectment of a tenant, on the ground—

(*a*) that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or

(*b*) that he has broken a condition on breach of which he is, under the terms of a contract between him and the landlord, liable to ejectment,

shall not be entertained unless the landlord has served, in the prescribed manner, a notice on the tenant specifying the particular misuse or breach complained of, and, where the misuse or breach is capable of remedy, requiring the tenant to remedy the same, and, in any case, to pay reasonable compensation for the misuse or breach, and the tenant has failed to comply within a reasonable time with that request.

(*2*) A decree passed in favour of a landlord in any such suit shall declare the amount of compensation which would reasonably be payable to the plaintiff for the misuse or breach, and whether, in the opinion of the Court, the misuse or breach is capable of remedy, and shall fix a period during which it shall be open to the defendant to pay that amount to the plaintiff, and, where the misuse or breach is declared to be capable of remedy, to remedy the same.

(*3*) The Court may, from time to time, for special reasons, extend a period fixed by it under sub-section (*2*).

(*4*) If the defendant, within the period or extended period (as the case may be) fixed by the Court under this section, pays the compensation mentioned in the decree, and, where the misuse or breach is declared by the Court to be capable of remedy, remedies the misuse or breach to the satisfaction of the Court, the decree shall not be executed.

Rights of ejected raiyats in respect of crops and land prepared for sowing.

156. The following rules shall apply in the case of every raiyat ejected from a holding:—

(*a*) when the raiyat has, before the date of his ejectment, sown or planted crops in any land comprised in the holding, he shall be entitled, at the option of the landlord, either to retain possession of that land and to use it for the purpose of tending and gathering in the crops, or to receive from the landlord the value of the crops as estimated by the Court executing the decree for ejectment;

(*b*) when the raiyat has, before the date of his ejectment, prepared for sowing any land comprised in his holding, but has not sown or planted crops in that land, he shall be entitled to receive from the landlord the value of the labour and capital expended by him in so preparing the land, as estimated by the Court executing the decree for ejectment, together with reasonable interest on that value;

(*c*) but a raiyat shall not be entitled to retain possession of any land or receive any sum in respect thereof under this section where, after the commencement of pro-

ceedings by the landlord for his ejectment, he has cultivated or prepared the land contrary to local usage;

(*d*) if the landlord elects under this section to allow a raiyat to retain possession of the land, the raiyat shall pay to the landlord, for the use and occupation of the land during the period for which he is allowed to retain possession of the same, such rent as the Court executing the decree for ejectment may deem reasonable.

Power for Court to fix fair rent as alternative to ejectment.

157. When a plaintiff institutes a suit for the ejectment of a trespasser he may, if he thinks fit, claim as alternative relief that the defendant be declared liable to pay for the land in his possession a fair and equitable rent to be determined by the Court, and the Court may grant such relief accordingly.

Application to determine incidents of tenancy.

158. (*1*) The Court having jurisdiction to determine a suit for the possession of land may, on the application of either the landlord or the tenant of the land, determine all or any of the following matters, (namely) :—

(*a*) the situation, quantity and boundaries of the land;

(*b*) the name and description of the tenant thereof (if any) ;

(*c*) the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy-raiyat, non-occupancy-raiyat, or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not and whether his rent is liable to enhancement during the continuance of his tenure; and

(*d*) the rent payable by him at the time of the application.

(*2*) If, in the opinion of the Court, any of these matters cannot be satisfactorily determined without a local inquiry, the Court may direct that a local inquiry be held under Chapter XXV of the Code of Civil Procedure by such Revenue-officer as the Local Government may authorize in that behalf by rule made under section 392 of the said Code.

XIV of 1882.

(*3*) The order on any application under this section shall have the effect of, and be subject to the like appeal as, a decree.

CHAPTER XIV.

SALE FOR ARREARS UNDER DECREE.

General powers of purchaser as to avoidance of incumbrances.

159. Where a tenure or holding is sold in execution of a decree for arrears due in respect thereof, the purchaser shall take subject to the interests defined in this chapter as "protected interests", but with power to annul the interests defined in this chapter as "incumbrances": Provided as follows :—

(*a*) a registered and notified incumbrance within the meaning of this chapter shall not be so annulled except in the case hereinafter mentioned in that behalf;

(*b*) the power to annul shall be exercisable only in manner by this chapter directed.

Protected interests.

160. The following shall be deemed to be protected interests within the meaning of this chapter :—

(*a*) any under-tenure existing from the time of the Permanent Settlement;

(*b*) any under-tenure recognized by the settlement-proceedings of any current temporary settlement as a tenure at a rent fixed for the period of that settlement;

(*c*) any lease of land whereon dwelling-houses, manufactories or other permanent buildings have been erected, or permanent gardens, plantations, tanks, canals, places of worship or burning or burying grounds have been made;

(*d*) any right of occupancy;

(*e*) the right of a non-occupancy-raiyat to hold for five years at a rent fixed under Chapter VI by a Court, or under Chapter X by a Revenue-officer;

(*f*) any right conferred on an occupancy-raiyat to hold at a rent which was a fair and reasonable rent at the time the right was conferred; and

(*g*) any right or interest which the landlord at whose instance the tenure or holding is sold, or his predecessor in title, has expressly and in writing given the tenant for the time being permission to create.

Meaning of "incumbrance" and "registered and notified incumbrance."

161. For the purposes of this chapter—

(*a*) the term "incumbrance", used with reference to a tenancy, means any lien, sub-tenancy, easement or other right or interest created by the tenant on his tenure or holding or in limitation of his own interest therein, and not being a protected interest as defined in the last foregoing section;

(*b*) the term "registered and notified incumbrance", used with reference to a tenure or holding sold or liable to sale in execution of a decree for an arrear of rent due in respect thereof, means an incumbrance created by a registered instrument of which a copy has, not less than three months before the accrual of the arrear, been served on the landlord in manner hereinafter provided.

Application for sale of tenure or holding.

162. When a decree has been passed for an arrear of rent due for a tenure or holding, and the decree-holder applies under section 235 of the Code of Civil Procedure for the attach-

ment and sale of the tenure or holding in execution of the decree, he shall produce a statement showing the parganá, estate and village in which the land comprised in the tenure or holding is situate, the yearly rent payable for the same and the total amount recoverable under the decree.

[1882.

Order of attachment and proclamation of sale to be issued simultaneously.

163. (*1*) Notwithstanding anything contained in the Code of Civil Procedure, when the decree-holder makes the application mentioned in the last foregoing section, the Court shall, if under section 245 of the said Code it admits the application and orders execution of the decree as applied for, issue simultaneously the order of attachment and the proclamation required by section 287 of the said Code.

(*2*) The proclamation shall, in addition to stating and specifying the particulars mentioned in section 287 of the said Code, announce—

(*a*) in the case of a tenure or a holding of a raiyat holding at fixed rates, that the tenure or holding will first be put up to auction subject to the registered and notified incumbrances, and will be sold subject to those incumbrances if the sum bid is sufficient to liquidate the amount of the decree and costs, and that otherwise it will, if the decree-holder so desires, be sold on a subsequent day, of which due notice will be given, with power to annul all incumbrances; and

(*b*) in the case of an occupancy-holding, that the holding will be sold with power to annul all incumbrances.

(*3*) The proclamation shall, besides being made in the manner prescribed by section 289 of the said Code, be published by fixing up a copy thereof in a conspicuous place on the land comprised in the tenure or holding ordered to be sold, and shall also be published in such manner as the Local Government may, from time to time, direct in this behalf.

(*4*) Notwithstanding anything contained in section 290 of the said Code, the sale shall not, without the consent in writing of the judgment-debtor, take place until after the expiration of at least thirty days, calculated from the date on which the copy of the proclamation has been fixed up on the land comprised in the tenure or holding ordered to be sold.

Sale of tenure or holding subject to registered and notified incumbrances, and effect thereof.

164. (*1*) When a tenure or a holding at fixed rates has been advertised for sale under the last foregoing section, it shall be put up to auction, subject to registered and notified incumbrances; and, if the bidding reaches a sum sufficient to liquidate the amount of the decree and costs, including the costs of sale, the tenure or holding shall be sold subject to such incumbrances.

(*2*) The purchaser at a sale under this section may, in manner provided by section 167, and not otherwise, annul any incumbrance upon the tenure or holding not being a registered and notified incumbrance.

Sale of tenure or holding with power to avoid all incumbrances, and effect thereof.

165. (*1*) If the bidding for a tenure or a holding at fixed rates put up to auction under the last foregoing section does not reach a sum sufficient to liquidate the amount of the decree and costs as aforesaid, and if the decree-holder thereupon desires that the tenure or holding be sold with power to avoid all incumbrances, the officer holding the sale shall adjourn the sale and make a fresh proclamation under section 289 of the Code of Civil Procedure, announcing that the tenure or holding will be put up to auction and sold with power to avoid all incumbrances upon [XIV of 18
a future day specified therein, not less than fifteen or more than thirty days from the date of the postponement; and upon that day the tenure or holding shall be put up to auction and sold with power to avoid all incumbrances.

(*2*) The purchaser at a sale under this section may, in manner provided by section 167, and not otherwise, annul any incumbrance on the tenure or holding.

Sale of occupancy-holding with power to avoid all incumbrances, and effect thereof.

166. (*1*) When an occupancy-holding has been advertised for sale under section 163, it shall be put up to auction and sold with power to avoid all incumbrances.

(*2*) The purchaser at a sale under this section may, in manner provided by the next following section, and not otherwise, annul any incumbrance on the holding.

Procedure for annulling incumbrances under the foregoing sections.

167. (*1*) A purchaser having power to annul an incumbrance under any of the foregoing sections and desiring to annul the same, may, within one year from the date of the sale or the date on which he first has notice of the incumbrance, whichever is later, present to the Collector an application in writing, requesting him to serve on the incumbrancer a notice declaring that the incumbrance is annulled.

(*2*) Every such application must be accompanied by such fee for the service of the notice as the Board of Revenue may fix in this behalf.

(*3*) When an application for service of a notice is made to the Collector in manner prescribed by this section, he shall cause the notice to be served in compliance therewith, and the incumbrance shall be deemed to be annulled from the date on which it is so served.

(*4*) When a tenure or holding is sold in execution of a decree for arrears due in respect thereof, and there is on the tenure or holding a protected interest of the kind specified in section 160, clause (*c*), the purchaser may, if he has power under this chapter to avoid all incumbrances, sue to enhance the rent of the land which is the subject of the protected interest. On proof that the land is held at a rent which was not at the time the lease was granted a fair rent, the Court may enhance the rent to such amount as appears to be fair and equitable.

This sub-section shall not apply to land which has been held for a term exceeding twelve years at a fixed rent equal to the rent of good arable land.

Bengal Tenancy Act.

(*Chapter XIV.—Sale for Arrears under Decree.—Secs. 168-174.*)

168. (*1*) The Local Government may, from time to time, by notification in the official Gazette, direct that occupancy-holdings or any specified class of occupancy-holdings in any local area put up for sale in execution of decrees for rent due on them shall, before being put up with power to avoid all incumbrances, be put up subject to registered and notified incumbrances, and may by like notification rescind any such direction.

Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.

(*2*) While any such direction remains in force in respect of any local area, all occupancy-holdings, or, as the case may be, occupancy-holdings of the specified class in that local area, shall, for the purposes of sale under the foregoing sections of this chapter, be treated in all respects as if they were tenures.

169. (*1*) In disposing of the proceeds of a sale under this chapter, the following rules, instead of those prescribed by section 295 of the Code of Civil Procedure, shall be observed, that is to say:—

Rules for disposal of the sale-proceeds.

XIV of 1882.

(*a*) there shall first be paid to the decree-holder the costs incurred by him in bringing the tenure or holding to sale;

(*b*) there shall, in the next place, be paid to the decree-holder the amount due to him under the decree in execution of which the sale was made;

(*c*) if there remains a balance after these sums have been paid, there shall be paid to the decree-holder therefrom any rent which may have fallen due to him in respect of the tenure or holding between the institution of the suit and the date of the sale;

(*d*) the balance (if any) remaining after the payment of the rent mentioned in clause (*c*) shall, upon the expiration of two months from the confirmation of the sale, be paid to the judgment-debtor upon his application.

(*2*) If the judgment-debtor disputes the decree-holder's right to receive any sum on account of rent under clause (*c*), the Court shall determine the dispute, and the determination shall have the force of a decree.

170. (*1*) Sections 278 to 283 (both inclusive) of the Code of Civil Procedure shall not apply to a tenure or holding attached in execution of a decree for arrears due thereon.

Tenure or holding to be released from attachment only on payment into Court of amount of decree with costs, or on confession of satisfaction by decree-holder.

XIV of 1882.

(*2*) When an order for the sale of a tenure or holding in execution of such a decree has been made, the tenure or holding shall not be released from attachment unless, before it is knocked down to the auction-purchaser, the amount of the decree, including the costs decreed, together with the costs incurred in order to the sale, is paid into Court, or the decree-holder makes an application for the release of the tenure or holding on the ground that the decree has been satisfied out of Court.

(*3*) The judgment-debtor or any person having in the tenure or holding any interest voidable on the sale may pay money into Court under this section

171. (*1*) When any person having, in a tenure or holding advertised for sale under this chapter, an interest which would be voidable upon the sale, pays into Court the amount requisite to prevent the sale,—

Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the tenure or holding.

(*a*) the amount so paid by him shall be deemed to be a debt bearing interest at twelve per centum per annum and secured by a mortgage of the tenure or holding to him;

(*b*) his mortgage shall take priority of every other charge on the tenure or holding other than a charge for arrear of rent; and

(*c*) he shall be entitled to possession of the tenure or holding as mortgagee of the tenant, and to retain possession of it as such until the debt, with the interest due thereon, has been discharged.

(*2*) Nothing in this section shall affect any other remedy to which any such person would be entitled.

172. When a tenure or holding is advertised for sale under this chapter in execution of a decree against a superior tenant defaulting, and an inferior tenant, whose interest would be voidable upon the sale, pays money into Court in order to prevent the sale, he may, in addition to any other remedy provided for him by law, deduct the whole or any portion of the amount so paid from any rent payable by him to his immediate landlord; and that landlord, if he is not the defaulter, may in like manner deduct the amount so deducted from any rent payable by him to his immediate landlord, and so on until the defaulter is reached.

Inferior tenant paying into Court may deduct from rent.

173. (*1*) Notwithstanding anything contained in section 294 of the Code of Civil Procedure, the holder of a decree in execution of which a tenure or holding is sold under this chapter may, without the permission of the Court, bid for or purchase the tenure or holding.

Decree-holder may bid at sale; judgment-debtor may not.

XIV of

(*2*) The judgment-debtor shall not bid for or purchase a tenure or holding so sold.

(*3*) When a judgment-debtor purchases by himself or through another person a tenure or holding so sold, the Court may, if it thinks fit, on the application of the decree-holder or any other person interested in the sale, by order set aside the sale, and the costs of the application and order, and any deficiency of price which may happen on the re-sale, and all expenses attending it, shall be paid by the judgment-debtor.

174. (*1*) Where a tenure or holding is sold for an arrear of rent due thereon, then, at any time within thirty days from the date of sale, the judgment-debtor may apply to have the sale set aside, on his depositing in Court, for payment to the decree-holder, the amount recoverable

Application by judgment-debtor to set aside sale.

under the decree with costs, and, for payment to the purchaser, a sum equal to five per centum of the purchase-money.

(*2*) If such deposit is made within the thirty days, the Court shall pass an order setting aside the sale, and the provisions of section 315 of the
1882. Code of Civil Procedure shall apply in the case of a sale so set aside:

Provided that, if a judgment-debtor applies un-
1882. der section 311 of the Code of Civil Procedure to set aside the sale of his tenure or holding, he shall not be entitled to make an application under this section.

1882. (*3*) Section 313 of the Code of Civil Procedure shall not apply to any sale under this chapter.

175. Notwithstanding anything contained in Part IV of the Indian Registration Act, 1877, an instrument creating an incumbrance upon any tenure or holding which has been executed before the commencement of this Act, and is not required by section 17 of the said Registration Act to be registered, shall be accepted for registration under that Act if it is presented for that purpose to the proper officer within one year from the commencement of this Act.

Registration of certain instruments creating incumbrances.

877.

176. Every officer who has, whether before or after the passing of this Act, registered an instrument executed by a tenant of a tenure or holding and creating an incumbrance on the tenure or holding, shall, at the request of the tenant or of the person in whose favour the incumbrance is created, and on payment by him of such fee as the Local Government may fix in this behalf, notify the incumbrance to the landlord by causing a copy of the instrument to be served on him in the prescribed manner.

Notification of incumbrances to landlord.

177. Nothing contained in this chapter shall be deemed to enable a person to create an incumbrance which he could not otherwise lawfully create.

Power to create incumbrances not extended.

CHAPTER XV.

Contract and Custom.

178. (*1*) Nothing in any contract between a landlord and a tenant made before or after the passing of this Act—

Restrictions on exclusion of Act by agreement.

(*a*) shall bar in perpetuity the acquisition of an occupancy-right in land, or

(*b*) shall take away an occupancy-right in existence at the date of the contract, or

(*c*) shall entitle a landlord to eject a tenant otherwise than in accordance with the provisions of this Act, or

(*d*) shall take away or limit the right of a tenant, as provided by this Act, to make improvements and claim compensation for them.

(*2*) Nothing in any contract made between a landlord and a tenant since the 15th day of July, 1880, and before the passing of this Act shall prevent a raiyat from acquiring in accordance with this Act an occupancy-right in land.

(*3*) Nothing in any contract made between a landlord and a tenant after the passing of this Act shall—

(*a*) prevent a raiyat from acquiring in accordance with this Act an occupancy-right in land;

(*b*) take away or limit the right of an occupancy-raiyat to use land as provided by section 23;

(*c*) take away the right of a raiyat to surrender his holding in accordance with section 86;

(*d*) take away the right of a raiyat to transfer or bequeath his holding in accordance with local usage;

(*e*) take away the right of an occupancy-raiyat to sub-let subject to and in accordance with the provisions of this Act;

(*f*) take away the right of a raiyat to apply for a reduction of rent under section 38 or section 52;

(*g*) take away the right of a landlord or a tenant to apply for a commutation of rent under section 40; or

(*h*) affect the provisions of section 67 relating to interest payable on arrears of rent:

Provided as follows:—

(i) nothing in this section shall affect the terms or conditions of a lease granted *bonâ fide* for the reclamation of waste land, except that, where, on or after the expiration of the term created by the lease, the lessee would under Chapter V be entitled to an occupancy-right in the land comprised in the lease, nothing in the lease shall prevent him from acquiring that right;

(ii) when a landlord has reclaimed waste land by his own servants or hired labourers, and subsequently lets the same or a part thereof to a raiyat, nothing in this Act shall affect the terms of any contract whereby a raiyat is prevented from acquiring an occupancy-right in the land or part during a period of thirty years from the date on which the land or part is first let to a raiyat;

(iii) nothing in this section shall affect the terms or conditions of any contract for the temporary cultivation of orchard land with agricultural crops.

179. Nothing in this Act shall be deemed to prevent a proprietor or a holder of a permanent tenure in a permanently-settled area from granting a permanent mukarrarí lease on any terms agreed on between him and his tenant.

Permanent mukarrarí leases.

Útbandi, chur and dearah lands.

180. (*1*) Notwithstanding anything in this Act, a raiyat—

(*a*) who in any part of the country where the custom of útbandi prevails, holds land ordinarily let under that custom and for the time being let under that custom, or

(*b*) who holds land of the kind known as chur or dearah,

shall not acquire a right of occupancy—

in case (*a*), in land ordinarily held under the custom of útbandi and for the time being held under that custom, or

in case (*b*), in the chur or dearah land,

until he has held the land in question for twelve continuous years; and, until he acquires a right of occupancy in the land, he shall be liable to pay such rent for his holding as may be agreed on between him and his landlord.

(*2*) Chapter VI shall not apply to raiyats holding land under the custom of útbandi in respect of land held by them under that custom.

(*3*) The Collector may, on the application of either the landlord or the tenant or on a reference from the Civil Court, declare that any land has ceased to be chur or dearah land within the meaning of this section, and thereupon all the provisions of this Act shall apply to the land.

Saving as to service-tenures.

181. Nothing in this Act shall affect any incident of a ghátwálí or other service-tenure, or, in particular, shall confer a right to transfer or bequeath a service-tenure which, before the passing of this Act, was not capable of being transferred or bequeathed.

Homesteads.

182. When a raiyat holds his homestead otherwise than as part of his holding as a raiyat, the incidents of his tenancy of the homestead shall be regulated by local custom or usage, and, subject to local custom or usage, by the provisions of this Act applicable to land held by a raiyat.

Saving of custom.

183. Nothing in this Act shall affect any custom, usage or customary right not inconsistent with, or not expressly or by necessary implication modified or abolished by, its provisions.

Illustrations.

(1) A usage under which a raiyat is entitled to sell his holding without the consent of his landlord is not inconsistent with, and is not expressly or by necessary implication modified or abolished by, the provisions of this Act. That usage, accordingly, wherever it may exist, will not be affected by this Act.

(2) The custom or usage that an under-raiyat should, under certain circumstances, acquire a right of occupancy is not inconsistent with, and is not expressly or by necessary implication modified or abolished by, the provisions of this Act. That custom or usage, accordingly, wherever it exists, will not be affected by this Act.

CHAPTER XVI.

LIMITATION.

Limitation in suits, appeals and applications in Schedule III.

184. (*1*) The suits, appeals and applications specified in Schedule III annexed to this Act shall be instituted and made within the time prescribed in that schedule for them respectively; and every such suit or appeal instituted, and application made, after the period of limitation so prescribed, shall be dismissed, although limitation has not been pleaded.

(*2*) Nothing in this section shall revive the right to institute any suit or appeal or make any application which would have been barred by limitation if it had been instituted or made immediately before the commencement of this Act.

Portions of the Indian Limitation Act not applicable to such suits, &c.

185. (*1*) Sections 7, 8 and 9 of the Indian Limitation Act, 1877, shall not apply to the suits and applications mentioned in the last foregoing section. XV of 1

(*2*) Subject to the provisions of this chapter, the provisions of the Indian Limitation Act, 1877, shall apply to all suits, appeals and applications mentioned in the last foregoing section. XV of 1

CHAPTER XVII.

SUPPLEMENTAL.

Penalties.

Penalties for illegal interference with produce.

186. (*1*) If any person, otherwise than in accordance with this Act or some other enactment for the time being in force,— *Penalti*

(*a*) distrains or attempts to distrain the produce of a tenant's holding, or

(*b*) resists a distraint duly made under this Act, or forcibly or clandestinely removes any property duly distrained under this Act, or

(*c*) except with the authority or consent of the tenant, prevents or attempts to prevent the reaping, gathering, storing, removing or otherwise dealing with any produce of a holding,

he shall be deemed to have committed criminal trespass within the meaning of the Indian Penal Code. XLV of

(*2*) Any person who abets within the meaning of the Indian Penal Code the doing of any act mentioned in sub-section (*1*), shall be deemed to have abetted the commission of criminal trespass within the meaning of that Code. XLV of

Agents and representatives of landlords.

Power for landlord to act through agent.

187. (*1*) Any appearance, application or act, in, before or to any Court or authority, required or authorised by this Act to be made or done by a landlord, may, unless the Court or authority otherwise directs, be made or done also by an agent empowered in this behalf by a written authority under the hand of the landlord. *Agents representatives landlor*

Bengal Tenancy Act.

(*Chapter XVII.—Supplemental.—Secs. 188-194.*)

(*2*) Every notice required by this Act to be served on, or given to, a landlord shall, if served on, or given to, an agent empowered as aforesaid to accept service of or receive the same on behalf of the landlord, be as effectual for the purposes of this Act as if it had been served on, or given to, the landlord in person.

(*3*) Every document required by this Act to be signed or certified by a landlord, except an instrument appointing or authorizing an agent, may be signed or certified by an agent of the landlord authorized in writing in that behalf.

Joint-landlords to act collectively or by common agent.

188. Where two or more persons are joint-landlords, anything which the landlord is under this Act required or authorized to do must be done either by both or all those persons acting together, or by an agent authorized to act on behalf of both or all of them.

Rules under Act.

Power to make rules regarding procedure, powers of officers and service of notices.

189. The Local Government may, from time to time, by notification in the official Gazette, make rules consistent with this Act—

(*1*) to regulate the procedure to be followed by Revenue-officers in the discharge of any duty imposed upon them by or under this Act, and may by such rules confer upon any such officer—

(*a*) any power exercised by a Civil Court in the trial of suits;

(*b*) power to enter upon any land, and to survey, demarcate and make a map of the same, and any power exercisable by any officer under the Bengal Survey Act, 1875; and

(*c*) power to cut and thresh the crops on any land and weigh the produce, with a view to estimating the capabilities of the soil; and

(*2*) to prescribe the mode of service of notices under this Act where no mode is prescribed by this or any other Act.

Procedure for making, publication and confirmation of rules.

190. (*1*) Every authority having power to make rules under any section of this Act shall, before making the rules, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

(*2*) The publication shall be made, in the case of rules made by the Local Government or High Court, in such manner as may in its opinion be sufficient for giving information to persons interested, and, in the case of rules made by any other authority, in the prescribed manner:

Provided that every such draft shall be published in the official Gazette.

Rules under Act.

(*3*) There shall be published with the draft a notice specifying a date, not earlier than the expiration of one month after the date of publication, at or after which the draft will be taken into consideration.

(*4*) The authority shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*5*) The publication in the official Gazette of a rule purporting to be made under this Act shall be conclusive evidence that it has been duly made.

(*6*) All rules made under this Act may, from time to time, subject to the sanction (if any) required for making them, be amended, added to or cancelled by the authority having power to make the same.

Provisions as to temporarily-settled districts.

Provisions as to temporarily-settled districts.

Saving as to land held in a district not permanently settled.

191. Where the area comprised in a tenure is situate in an estate which has never been permanently settled, nothing in this Act shall prevent the enhancement of the rent upon the expiration of a temporary settlement of the revenue, unless the right to hold beyond the term of the settlement at a particular rate of rent has been expressly recognized in settlement-proceedings by a Revenue-authority empowered by the Government to make definitively or confirm settlements.

Power to alter rent in case of new assessment of revenue.

192. When a landlord grants a lease, or makes any other contract, purporting to entitle the tenant of land not included in an area permanently settled to hold that land free of rent or at a particular rent, and while the lease or contract is in force—

(*a*) land-revenue is for the first time made payable in respect of the land, or

(*b*) land-revenue having been previously payable in respect of it, a fresh settlement of land-revenue is made,

a Revenue-officer may, notwithstanding anything in the contract between the parties, by order, on the application of the landlord or of the tenant, fix a fair and equitable rent for the land in accordance with the provisions of this Act.

Rights of pasturage, &c.

Rights of pasturage, &c.

Rights of pasturage, forest-rights, &c.

193. The provisions of this Act applicable to suits for the recovery of arrears of rent shall, as far as may be, apply to suits for the recovery of anything payable or deliverable in respect of any rights of pasturage, forest-rights, rights over fisheries and the like.

Saving for conditions binding on landlords.

Saving for conditions binding on landlords.

Tenant not enabled by Act to violate conditions binding on landlord.

194. Where a proprietor or permanent tenure-holder holds his estate or tenure subject to the observance of any specified rule or condition, nothing in this Act shall entitle

any person occupying land within the estate or tenure to do any act which involves a violation of that rule or condition.

Savings for special enactments.

ings for cial en- ments.

Savings for special enactments.

195. Nothing in this Act shall affect—

(*a*) the powers and duties of Settlement-officers as defined by any law not expressly repealed by this Act;

(*b*) any enactment regulating the procedure for the realization of rents in estates belonging to the Government, or under the management of the Court of Wards or of the Revenue-authorities;

(*c*) any enactment relating to the avoidance of tenancies and incumbrances by a sale for arrears of the Government revenue;

(*d*) any enactment relating to the partition of revenue-paying estates;

(*e*) any enactment relating to patní tenures, in so far as it relates to those tenures; or

(*f*) any other special or local law not repealed either expressly or by necessary implication by this Act.

Construction of Act.

struction c t.

Act to be read subject to Acts hereafter passed by Lieutenant-Governor of Bengal in Council.

196. This Act shall be read subject to every Act passed after its commencement by the Lieutenant-Governor of Bengal in Council.

SCHEDULE I.

(*See section 2.*)

REPEAL OF ENACTMENTS.

Regulations of the Bengal Code.

Number and year.	Subject of Regulation.	Extent of repeal.
VIII of 1793	A Regulation for re-enacting with modifications and amendments the rules for the Decennial Settlement of the Public Revenue payable from the lands of the zamíndárs, independent taluqdárs and other actual proprietors of land in Bengal, Behar and Orissa, passed for those Provinces respectively on the 18th September, 1789, the 25th November, 1789, and the 10th February, 1790, and subsequent dates.	Sections 51, 52, 53, 54, 55, 61 and 65.
XII of 1805	A Regulation for the settlement and collection of the Public Revenue in the zila of Cuttack, including the pargunas of Pattáspur, Kummudichour, and Bagrae, at present included in the zila of Midnapur.	Section 7.

SCHEDULE I—*contd.*

Number and year.	Subject of Regulation.	Extent of repeal.
V of 1812	A Regulation for amending some of the rules at present in force for the collection of the Land-revenue.	Sections 2, 3, 4, 26 and 27.
XVIII of 1812	A Regulation for explaining Section 2, Regulation V, 1812, and rescinding Sections 3 and 4, Regulation XLIV, 1793, and Sections 3 and 4, Regulation L, 1795, and enacting other rules in lieu thereof.	The preamble and sections 2 and 3.
XI of 1825	A Regulation for declaring the rules to be observed in determining claims to lands gained by alluvion or by dereliction of a river or the sea.	In clause 1 of section 4, from and including the words "nor if annexed to a subordinate tenure" to the end of the clause.

Acts of the Bengal Council.

Number and year.	Subject of Act.	Extent of repeal.
VI of 1862	An Act to amend Act X of 1859 (to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal).	The whole Act.
IV of 1867	An Act to explain and amend Act VI of 1862, passed by the Lieutenant-Governor of Bengal in Council, and to give validity to certain judgments.	The whole Act.
VIII of 1869	An Act to amend the Procedure in suits between Landlords and Tenants.	The whole Act.
VIII of 1879	An Act to define and limit the powers of Settlement-officers.	The whole Act.

Act of the Governor General in Council.

Number and year.	Subject of Act.	Extent of repeal.
X of 1859	An Act to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal.	The whole Act.

Bengal Tenancy Act.

(*Schedule III.—Limitation.*)

SCHEDULE III.

LIMITATION.

(See section 184.)

PART I.—*Suits.*

Description of Suit.	Period of Limitation.	Time from which period begins to run.
1. To eject any tenure-holder or raiyat on account of any breach of a condition in respect of which there is a contract expressly providing that ejectment shall be the penalty of such breach.	One year .	The date of the breach.
2. For the recovery of an arrear of rent—		
(*a*) when the arrear fell due before a deposit was made under section 61 on account of the rent of the same holding.	Six months .	The date of the service of notice of the deposit.
(*b*) in other cases .	Three years .	The last day of the Bengali year in which the arrear fell due, where that year prevails, and the last day of the month of Jeyt of the Amli or Fasli year in which the arrear fell due, where either of those years prevails.
3. To recover possession of land claimed by the plaintiff as an occupancy-raiyat.	Two years .	The date of dispossession.

PART II.—*Appeals.*

Description of Appeal.	Period of Limitation.	Time from which period begins to run.
From any decree or order under this Act, to the Court of a District Judge or Special Judge.	Thirty days .	The date of the decree or order appealed against.
From any order of a Collector under this Act, to the Commissioner.	Thirty days .	The date of the order appealed against.

PART III.—*Applications.*

Description of Application.	Period of Limitation.	Time from which period begins to run.
6. For the execution of a decree or order made under this Act, or any Act repealed by this Act, and not being a decree for a sum of money exceeding Rs. 500, exclusive of any interest which may have accrued after decree upon the sum decreed, but inclusive of the costs of executing such decree; except where the judgment-debtor has by fraud or force prevented the execution of the decree, in which case the period of limitation shall be governed by the provisions of the Indian Limitation Act, 1877.	Three years .	(1) The date of the decree or order; or (2) where there has been an appeal, the date of the final decree or order of the Appellate Court; or (3) where there has been a review of judgment, the date of the decision passed on the review.

Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 27th February, 1885.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I., C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble Sir A. Colvin, K.C.M.G., C.I.E.
The Hon'ble T. M. Gibbon, C.I.E.
The Hon'ble R. Miller.
The Hon'ble Amír Alí.
The Hon'ble W. W. Hunter, LL.D., C.S.I., C.I.E.
The Hon'ble H. J. Reynolds.
The Hon'ble Rao Saheb Vishvanatha Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St.A. Goodrich.
The Hon'ble G. H. P. Evans.
The Hon'ble Mahárájá Luchmessur Singh, Bahádur, of Durbhunga.
The Hon'ble J. W. Quinton.

LAND ACQUISITION (MINES) BILL, 1885.

THE Hon'ble MR. HOPE introduced the Bill to provide for cases in which mines and minerals are situate under lands which it is desired to acquire under the Land Acquisition Act, 1870, and moved that it be referred to a Select Committee consisting of the Hon'ble Mr. Ilbert, Sir Steuart Bayley and the mover. He said:—"Considering the other important business which is before us on the present occasion, I think my colleagues will probably consider it sufficient if I refer them to the Statement of Objects and Reasons for a detailed explanation of the provisions which the Bill contains, without detaining the Council for the purpose of going into the various points in detail."

The motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill and Statement of Objects and Reasons be published in the local official Gazettes in English, and in such other languages as the Local Governments think fit.

The motion was put and agreed to.

INDIAN SECURITIES BILL, 1885.

The Hon'ble SIR A. COLVIN moved for leave to introduce a Bill to amend the law relating to Government securities. He said:—"The main object of the Bill is to legalise and conform the law to the practice obtaining in

England, and actually existing in the Indian Public Debt Offices, both before and after the passing of the Indian Contract Act, which recognises the right to sue, in cases where our securities are held jointly, by one or more survivors in the event of the decease of one or other of the original holders. Doubts have been raised as to whether this practice was in conformity with the provisions of section 45 of the Indian Contract Act. To remove those doubts this measure is about to be brought forward. Advantage will be taken of the occasion to introduce provisions enabling Government officers holding Government securities for public purposes to endorse as such, and not as individuals, the securities they may hold, and to have securities similarly endorsed to them; and, finally, advantage will be taken of this opportunity to conform the provisions of the law to the existing practice as to the issue of fresh securities in place of those which, from being overladen with endorsements, can no longer be conveniently endorsed; and also as to the renewal of lost or destroyed securities, provision being made for the protection of the Government against claims preferred to the securities in place of which renewed securities have been issued."

The motion was put and agreed to.

BENGAL TENANCY BILL.

The Hon'ble SIR STEUART BAYLEY moved that the Reports of the Select Committee on the Bill to amend and consolidate certain enactments relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal be taken into consideration. He said:—

OBJECT OF SPEECH.

"In moving that the Report of the Select Committee be taken into consideration, I do not propose to go behind what passed at the second reading of the Bill. Such questions as whether legislation was necessary at all, and whether legislation was barred by the terms of the Permanent Settlement, I consider to have been then decided, after sufficiently exhaustive discussion, and I, at least, shall not re-open them. What I propose to do is to review the work of the Select Committee; to show the nature and the reasons of the principal alterations they have made, and how far the Bill, as altered, is likely to succeed in securing those results which, in imposing on us our laborious and absorbing task, the Legislative Council had in view.

o review the work f Select Committee.

onstitution of the ommittee.

"Before doing this, however, I may be permitted to say a few words as to the constitution and labours of the Committee. It was particularly strong in numbers, consisting of more than one-half of all the members of the Council. It comprised the selected representative of the Bengal zamíndárs, and though the death of our lamented colleague Rai Kristodas Pal Bahadur in the middle of our discussions was a grievous loss to them, and indeed to all of us, yet their interests could hardly have found a better representative than in his successor, who with inflexible constancy and even a more perfect knowledge of detail than his predecessor, contested every inch of ground, and displayed a temper and ability which showed how wisely the British Indian Association had made their selection. The zemindars of Behar were specially represented, so also were the planters. Several of our members are of the legal profession, and in the course of that profession had acquired an intimate knowledge of the problems with which we had to deal. As will be seen from the published minutes attached to the Report, the cause of the raiyats had the advantage of the most powerful and most sympathetic advocacy. Nor were we deficient in the light that comes from a knowledge of the working of cognate systems in other provinces, and we had a further advantage in the assistance which a long experience in the task of comparing and tabulating the statistics of all the provinces of this vast empire enabled one of our members to extend to us.

rk of the mmittee.

"The Committee sat 35 times last session, and 28 this session, each meeting lasting generally 3½ hours. The correspondence they had to study fills a shelf some 3½ feet in length, and, whatever charge may be brought against them, that of want of industry is certainly not sustainable. I make these

remarks not merely that I may take this opportunity of expressing the thanks of the Government of India to the Committee for their unwearying labours and the great assistance they have given, but also in order to show to the Council that in a Committee so constituted the decisions of the majority may be accepted as at least *primâ facie* likely to be sound, and as certainly the result of an impartial and most earnest desire to do justice in the clash of conflicting interests.

Its prima facie value.

"In what I have now to say I shall follow, as far as may be, the order of subjects as they come in the Final Report of the Select Committee, though I must take you back by reference occasionally both to the Intermediate Report and to the Statement of Objects and Reasons which explained the original provisions of the Bill. And in this order the first point I have to notice is in regard to the definition of "estate" and "proprietor". It will be observed that the main alteration we have made is to add to the definition of "estate" words expressly including Government *khas mehals*, and unregistered *lakhiraj* lands, and we have omitted a proviso that appeared in Bill No. II. The insertion of the unregistered revenue-free lands is intended to meet a real omission in the first draft of the Bill. The insertion of Government estates is intended to clear up a singular misapprehension as to its being the intention of Government to exclude its own estates from the operation of the Bill—a misapprehension which, though entirely erroneous, has given rise to a good deal of criticism on our good faith.

Order of subjects.

Definition of "proprietor".

Insertion of Government of khas mehals

"The original definition made the Bill apply to all land entered in any of the general registers of Government, and if any one will turn to section II, clause V (Vol. 1, page 137) of the Bengal Board's Rules they will see that all *khas mehals* and raiyatwari tracts, all lands even temporarily occupied by Government for public purposes, and all waste and other lands not assessed to revenue have to be entered in these registers. It is difficult to understand how any one should suppose in these circumstances that it was the intention of Government to exempt their own estates. I can only suppose that the proviso which appeared in Bill No. II, referring to certain Government taluks, was not fully understood. That proviso had reference to some *noabad* taluks in the Chittagong district, which, though for revenue purposes treated as tenures were for convenience sake entered in the register of estates, and it was in order to prevent a wrong deduction as to the nature of these tenures being founded on the fact that they were entered in the estate register that a late member of the Bengal Board of Revenue asked for the insertion of the proviso. For the purposes of this Bill it was not wanted, and it has accordingly been struck out, but I repeat emphatically that it was never the intention of Government to exempt its own estates from the substantive provisions of this Bill, and out of abounding caution we have inserted words which can leave no doubt on this point.

Original definition applied to all lands entered in Government registers.

And therefore to all Government estates.

Explanation of proviso.

Since omitted.

"Coming now to the chapter headed Classes of Tenants, we have, as stated in the Intermediate Report of the Committee, attempted to describe rather than to define the various classes. It was urged upon us very strongly by Mr. Dampier, that the most serious practical difficulty arose from the impossibility of deciding whether a man was a tenure-holder or a raiyat, and that it was necessary to give the Courts and Settlement Officers some assistance in coming to a decision, even drawing, if necessary, an arbitrary line founded on the extent of the holding, and we have accordingly provided that where local custom was not sufficiently clear upon the point the Courts should look to whether the land was originally taken for the purpose of direct cultivation by the holder, or for the purpose of indirect cultivation by settling raiyats on it, and that, further to assist the Courts in coming to a decision, there should always be a presumption that a tenancy of 100 bighas was a tenure and not a raiyati holding. The presumption of course is based on the fact that nowhere in Bengal does a man take such a large holding as 100 bighas with the object of cultivating more than a small portion of it himself, and the general opinion of the officers consulted is that the standard selected is a perfectly safe one.

Classes of tenants described, not defined.

Original object of the tenancy to be the test.

Presumption from 100 bighas.

subletting a portion omitted.

actually sublet a portion of his holding, but it seemed to the majority of the Committee that, if the presumption arising out of the size of the holding has any validity at all with reference to the object of the initial taking, the question of whether an acre or two is subsequently at a particular time sublet, is quite irrelevant. Of course if a large portion or the whole of it is sublet, this fact affords an indication of the original object of the holder which the Court would take into consideration, but it seemed wiser not to clog the presumption, by making it depend on the sublease of an arbitrarily fixed proportion of the holding—a proportion which would, in practice, be very difficult to prove, and we have therefore left it to depend entirely on the size of the holding.

Tenure-holders. Substantive position unchanged.

"In the chapter on tenure-holders we have left the substantive position of the tenure-holder as regards his liability to enhancement unchanged. We have however somewhat modified the provisions of the original Bill relating to limitations on enhancement, and to registration on transfer. Under the original Bill the Courts, if granting enhancement against a tenure holder, were bound to leave him not less than 10 per cent. and not more than 30 per cent. of his net rental. The minimum was subject to some alteration in the case of improvements made by the tenure-holder. The enhanced rent was also not to be more than double the previous rent, and was not to be again enhanceable for a period of ten years.

Limitations on enhancement omitted.

"We have thought it expedient to retain the provision which says that the tenure-holder shall not be left with less than 10 per cent. of his net profits. But we have omitted the restriction which limited him to 30 per cent. of those profits, and on the other hand we no longer confine the enhanced rent to a sum equal to double the old rent.

"It seemed to us expedient to leave to the Courts a wider scope for discretion in both directions. In laying down a maximum, there is a danger of what is intended as a final limit being adopted as an equitable standard laid down by the legislature, and thus becoming the general rule, and we were unwilling to offer to the Courts any inducement to take a royal road to a decision instead of giving the fullest consideration to what would be fair and equitable under the circumstances. We have now directed them to have regard not only to the improvements of the tenure-holder, but to the circumstances surrounding the original lease, such as whether it was a reclamation lease, whether it was given in consideration of a bonus, and the like, and then to settle a fair and equitable rent, and we have extended the term for which the enhanced rent is to be fixed, both in the case of tenure-holders and for occupancy raiyats from 10 to 15 years.

What the Courts are to look to.

Registration of transfers.

"In regard to registration on transfer of tenures, this is what the Select Committee report :—

'We have, in sections 12 to 16 of the Bill, so far altered the system of the registration of transfers of, and successions to, permanent tenures as to provide merely for enabling the landlord to register such transfers instead of compelling him to do so.

'The Bill, in its previous stages, provided for a compulsory system of registration by the landlord. This, it was objected, would not work satisfactorily, especially as the landlords of many tenure-holders are poor and ignorant persons, having no regular office, and no means of establishing one or maintaining a suitable register. At the same time it was pointed out that the establishment of an official registry would confer a great benefit on all concerned, and especially on the landlords, who might, if such a registry were established, be allowed to realize their rents by the process of summary sale which is now available only in the case of a limited class of tenures.

'A Bill for the establishment of an official registry is at this moment before the Bengal Legislative Council, and the object we have set before ourselves in re-casting the portion of our Bill now under consideration, has been to frame its provisions in such a manner as to secure to the Collector, who will be the officer entrusted with the preparation and maintenance of the official register, early and accurate information of all transfers and successions which may from time to time take place.

'We have not overlooked the fact that the substitution of official registration for registration in the landlord's sherista, would deprive the landlords of the fees which it was proposed to allow them under the Bill as originally framed, and which, it is believed, they commonly realize at present, though in most cases without any warrant of law. We think that the fees prescribed by the Bill in its earlier stages may well be paid to the landlord, even though he is to be relieved of the duty of registration.

'The provisions we have inserted in the Bill in order to give effect to these views are as follows:—

'First, as regards voluntary transfers (section 12), the simplest plan has appeared to us to be to require that every such transfer shall be registered under the ordinary law relating to the registration of assurances. It is understood that the Local Government will make all arrangements requisite for facilitating the registration of such transfers. The parties applying for registration will be required to pay to the registering officer "the landlord's fee" and a process-fee for the service of notice on the landlord. When the registration has been completed, the registering officer will forward to the Collector the landlord's fee and a notice of the transfer containing all necessary particulars, and the Collector will thereupon cause the landlord's fee to be paid to the landlord and the notice to be served upon him, at the same time taking any such steps as may be prescribed by the measure now pending before the Bengal Legislative Council for the entry of the transfer in his official register.'

"We have made similar provisions for securing notice being given to the landlord in cases of sale for an ordinary decree and of succession. In case of sale for arrears of rent there is no necessity for such notice.

Occupancy-raiyats

"I come now to what I look upon as the most important part of the Bill—Chapter V, which deals with occupancy rights, and on this subject I fear I shall have to ask your attention at some length. The main points are (1) Who is to have the occupancy-right? (2) What are to be the incidents of that right? (3) What rules shall regulate enhancement of the occupancy-raiyat's rent?

Acquisition of the right.

"A very full discussion of the first question will be found at pages 5 and 6 of the Statement of Objects and Reasons, the gist of which is summed up in the statement that the Bill as introduced in Council makes 'the acquisition of the status of the khudkasht, or as he is termed in the Bill the settled, raiyat, depend not on the holding of one and the same plot of land for 12 years, but on the holding of any raiyati land (whether the same or not does not matter) in the same village or estate for a period of 12 years whether before or after the passing of this Act.' That is to say, the Bill originally proposed to continue all occupancy rights already acquired; to define as above the status of a settled raiyat, and to provide that the settled raiyat of a village or estate as thus defined should have occupancy rights in all lands which he might legally occupy in that village or estate. Bill No. II went a step further. The discussion in Council two years ago brought out the fact that whatever might have been the effect of Act X of 1859 as to the legal acquisition of occupancy rights, it was, in practice, exceedingly difficult to prove those rights. The proportion of persons having acquired occupancy rights was estimated at from 90 to 70 per cent. of all the raiyats in the country, but unfortunately, as was said in the course of the discussion, those rights were 'moral' rights, and it was a matter of extreme difficulty for the individual raiyat to enforce in his own case by legal proof the rights which were generally admitted to have accrued to the raiyat in the abstract. Acting on this view, the Select Committee introduced into Bill No. II the presumption which will now be found at section 20 (7) of the Bill before the Council. The presumption runs as follows: 'When it is proved or admitted that a person holds any land as a raiyat, it shall, as between him and the landlord under whom he holds the land, be presumed for the purposes of this section, until the contrary is proved or admitted, that he has for 12 years continuously held that land or some part of it as a raiyat.' The Committee justified it as warranted by the existing state of things in the Lower Provinces, and because, while the presumption tends to simplify litigation, it is one which the landlord can have no difficulty in rebutting where it does not hold good. This presumption the Committee desire to maintain, and the only change they have introduced during their late session in this part of the Bill is the elimination of the words 'or estate,' thus limiting the right to the village in which the raiyat cultivates. As this decision of the Committee has been very forcibly attacked by His Honour the Lieutenant-Governor and some other members of the Committee, it is right that I should explain to the Council the reasons which led me, as representing the Government of India, to vote with the majority on this occasion.

Presumption of status.

Elimination of the words "or estate."

Point noticed by the Select Committee.

"The inconveniences attending the retention of 'the estate' in the definition of settled raiyat was touched on in the Select Committee's Preliminary Report of last year, and the point was one of those referred by the Bengal Government for the opinion of its officers. The great majority of those officers were against the retention of the words. This fact will be found in the 23rd paragraph of the Bengal Government's letter of the 15th September last, where also are given the reasons which led His Honour the Lieutenant-Governor to dissent from the opinion of that majority, and to insist on the extension of the status of settled raiyat to the estate as well as to the village.

"I have no doubt that in the course of the debate His Honour will do full justice to the arguments which are there so ably stated; but, put very briefly, they are these:—

Reasons urged by the Bengal Government for retention of the words.

"The expediency, he urges, of giving stability to the raiyat's position is admitted on all hands. Now 95 per cent. of the raiyats are so poor that they cannot possibly cultivate land at any distance from their homes, or, in other words, hold land away from their own village. On the other hand, if a man can get his landlord to give him a holding in another village (and it is only with his landlord's consent that he can obtain it), then it may be presumed that the landlord knows his man, and there is no sort of reason why he should not have the same stability of position in regard to his new land as he had in his old land.

"Now, if this were all that the definition involves, it would be difficult to contest the Lieutenant-Governor's position, and I for one would very willingly accept it; but the word 'estate' really involves quite a different set of considerations from these. An 'estate' is, so far as this argument is concerned, an administrative fiction.

Objections to retention of "estate".

"It is simply the area registered in our books under one number, and liable to be sold as a single unit in case of arrears of revenue being unpaid. For rent purposes it has no meaning. It is not all the area owned by a landlord, for a landlord may have many estates. It is not the possession of a single landlord, for it may be divided among numerous shareholders. It may be part of a village, or it may be 100 villages. It may be the property of one man, or the property of 100 men. It may be managed direct by the landlord or indirectly by a number of agents, or it may, as in the case of the Burdwan Rájá's estates, be let out into innumerable *patni* or permanent tenures (these tenure-holders subdividing it again), and in these circumstances what is one estate in the Collector's books becomes, for rent purposes, several hundred different estates, the immediate owners or managers of which have no concern with one another, can see nothing of each other's books, and know nothing of each other's raiyats. The Burdwan estate is of course an exceptional instance from its size, but to a smaller extent the same thing happens all over the country, and it is on this point that the objection is most difficult to meet. The effect would be to say that a man having once acquired occupancy-rights in any part of an estate should retain those rights with respect to any land which he may in any way acquire in any other part of the estate. Now, an estate, as I have shown, may be, and frequently is, subdivided among numerous tenure-holders or numerous managers. Any of these men may perhaps be able to say if any particular person has settled rights in his own particular tenure, but he cannot possibly know this in regard to the other tenures of the estate. He may let a man into his village as a non-occupancy raiyat, and the latter can immediately turn round and say that having acquired occupancy-rights in a village twenty miles away belonging to another tenure-holder, he claims to have them also in his new land. Clearly the Lieutenant-Governor's argument, deduced from the landlord's ability to know the character of his own raiyats, does not apply to cases of this class, and from this point of view his position is not an easy one to defend. The only reason for retaining the word 'estate' in the definition is to prevent a landlord from shifting his raiyat's holding from one village to another within his estate and so breaking down the occupancy-right. Now to this argument the

Power of shifting defined.

Lieutenant-Governor himself supplies the answer. He urges that 95 per cent. of the raiyats are so poor that they cannot hold land away from their own residence. This, if it shows that the danger to the landlord would not be great from retaining the word 'estate', also shows that the possibility of shifting raiyats, except within reach of their residence, is equally limited. The advantage to the raiyats of carrying with them the occupancy-right from one village to another within the same estate is very small, for it is shown that 95 per cent. of them are not in a position to take advantage of it, and the only raiyats who could take advantage of it, are those who have abandoned their own village, and its application in their case would be a misuse of the power and contrary to the proposed intention of the Bill.

"It is possible, no doubt, that shifting may occur in exceptional instances, where a landlord has several villages in his own direct management within reach of the cultivator's residence, and where he is powerful enough. But in the case of a very powerful landlord, strong enough to do this and determined to break down the occupancy-right, I am afraid he will always find some door open, and it must be remembered that not only is the number of landlords who are in a position to do this very small, but also the number of tenants to whom the process can be applied is small also.

"I suppose that, when the Bill becomes law, nine-tenths of the tenants will have secure occupancy-rights in the land they cultivate, and of the remaining tenth it is but an infinitesimal portion that can be exposed to the danger above explained.

Advantage of confining the khudkasht rights to the village.

"On the other hand, as long as we confine the accrual of occupancy-rights to the village, we have an absolutely unassailable position. The *khudkasht* raiyat's rights in the village are independent of those of the rent-receiver, and it matters not among how many estates the village may be divided. The raiyat is a *khudkasht* raiyat of *that village*, and has by custom, as well as by old law, a right of occupancy in any land he may cultivate in that village without reference to whom he pays his rent; but when once with the object of stopping gaps we take up more ground and apply the same rule to the estate, our position is no longer defensible. Not only is the theory new and unsupported by prescription or sentiment, it is open to a variety of practical objections, and by taking extreme instances it can be made to appear hopelessly ridiculous. Looking, as I do, upon the danger involved to the raiyats on the one hand, by omitting 'estate,' and to the zamíndárs on the other, by including it as for the most part of exceedingly small importance, I greatly prefer, for the above reasons, to omit it. I do not think any intermediate device, such as that of limiting the 'estate' to so much of it as is comprised in one pargana, or in one permanent tenure, or by extending the village to an artificial area within a fixed radius, would be found to work satisfactorily, and none of these suggestions wholly commended themselves to the Committee. I can only repeat my conviction that, though the danger of raiyats being shifted from one village to another within an estate is not wholly imaginary, it is not a serious danger, and that the provisions in the Bill, supplemented as they are by a working presumption, will sufficiently secure nine-tenths of the raiyats in their just right.

Intermediate device.

Incidents of the occupancy-right.

Transferability.

"Turning now to the incidents attached to the right of occupancy, it will be seen that we have made a most important change in regard to one of these incidents—transferability. Instead of legalising it and regulating it by law, we have left it everywhere to custom. This change was too important to be made at the direct instance of the Select Committee. It has the approval and sanction of His Excellency the Viceroy in Council. I am at liberty to state that I personally adhere to the opinion I expressed in the first debate, to the effect that both in Bengal and Behar the custom has taken such deep root that it is desirable to legalise and regulate it, and that in both provinces this course would, in the long run if not in the immediate future, be attended by beneficial results both to the cultivators, and to the productiveness of the country, and so far I sincerely regret the decision arrived at. But I am bound to admit, apart from the arguments directed against the principle of

My own adherence to it.

transferability,—arguments founded on injury to the landlord, expropriation of the raiyat, and rack-renting of the actual cultivator,—I am bound to admit that the Committee found immense difficulty in devising any practical scheme of pre-emption, any satisfactory safeguard against the dreaded money-lender, any equitable method of securing to the landlord the fee which he now gets in some parts of the country, without injuring the raiyats of other parts where they habitually transfer without payment of a fee, and that in view of these difficulties there is something to be said for leaving the custom to strengthen itself, and crystallise into a shape which may hereafter render its regulation less difficult than it is at present. We have, moreover, made it clear that where the custom of transfer without the landlord's consent has grown up, it is not the intention of the legislature in any way to interfere with it. In all other respects we leave transfer alone, and the Council will not have to consider the schemes of pre-emption, registration, and landlord's fees, which occupied so much of the time and attention of the Committee.

ifficulties in the y of giving ect to it.

stom not inter- ed with.

b-letting.

"While we have dealt thus with transfer, we have not felt it possible to interfere with the long-established right of sub-letting.

"The existence of this right is admitted in section 6 of Act X of 1859, and the authorities consulted have almost unanimously declared that it is impossible now to interfere with it. Moreover, if the tendency to alienate, by way of transfer, is not allowed free play, it must, following the line of least resistance, force an outlet in sub-letting.

heme for restrict- g.

"To check this tendency, or at least to nullify its evil effects, was the intention of the provisions inserted as section 37 of our Intermediate Bill No. II. The scheme is explained fully in paragraph 27 of our Preliminary Report of last year. The main point of it was that an occupancy raiyat, who sub-lets more than half his holding, should be deemed to be a tenure-holder, and thus his sub-raiyats should be in a position to acquire rights of occupancy. But it was felt that this would envelope all rent-litigation in such clouds of uncertainty that it could only be permitted to take effect on the tenure being registered, and on this difficulty the whole scheme was wrecked. It was the very general opinion of the officers consulted, that in such cases registration would never be spontaneously sought for, and could not be enforced, and in view of the general objection taken to it on this score it was withdrawn. All that we have felt ourselves able to do in this direction is to provide in a subsequent portion of the Bill (section 85), that a sub-lease, given without the landlord's consent, shall not be valid against him unless registered, and that no sub-lease for a term of more than nine years shall be registered. To such sub-leases we have given some protection which I shall refer to hereafter, but if it is really desirable to check sub-letting, about which I am personally very doubtful, it will certainly not be done by leaving the sub-lessee defenceless against his lessor.

ithdrawn.

rotection now given.

o attempt by legis- tion.

nhancement of an ccupancy-raiyat's nt.

y private contract.

"The next branch of this subject is as to the rules that should regulate enhancement of an occupancy-raiyat's rent, and in this we have made some important alterations. Dealing, first, with enhancement by private contract, it will be observed that section 39 of the original Bill provided that such contracts should only be valid after being approved and registered by a revenue-officer, and the revenue-officer was not to accept any such contracts if the enhanced rent was more than 6 annas in the rupee above the old rent (these figures were put in tentatively), or more than one-fifth of the gross produce.

a first proposed.

ross-produce limit.

"It was at an early stage obvious to the Committee that, even if the gross-produce limit was accepted as applicable to enhancements made by a Court, it was inapplicable as a test precedent to the registration of a contract.

napplicable to con- racts.

"It would have meant that in every case before a contract could be registered, an exceedingly complex judicial enquiry should take place—an enquiry, too, in which the Revenue-officer would be practically powerless, as the only evidence available would be that of the two parties, who were *ex hypothesi* in agreement as to the terms. The approval of the Revenue-officer, though, if confined to

the form of the contract, strictly in accordance with the conditions of the Permanent Settlement, was felt, when extended so as to cover the question of the fairness of the conditions, to leave too wide a discretion to the Revenue-officer—a discretion, moreover, which, for the reasons above given, he would in practice be powerless to exercise.

Approval of the registering officer no longer required.

"The registering officer will now, under the amended section, merely have to see that the agreement is not contrary to the express stipulations of the contract sections of the Bill, and that the raiyat understands it and is willing to enter in to it.

Fractional limits considered.

"The Committee have, however, it will be seen, reduced the fractional limit within which enhancements can be made by contract to two annas in the rupee. About this clause there was great difference of opinion in the Committee.

"On the one hand the objectors urge that it is useless putting in any such limitations at all, as if the raiyat agrees to pay the enhanced rent he will not care what the deed recites as to the amount of the previous rent, and while it will cause very serious embarrassment to scrupulous landlords, it will in no way serve as a check on the unscrupulous among them. It is also urged that any such check will force a landlord who wishes to enhance to take his raiyat in each case into Court, and then to demand more than he would otherwise be willing to accept—a process which is admittedly full of injury to the raiyat; that whereas if the landlord gets a decree for a sum more than two annas in the rupee on a test-case, instead of being able, as now, to make contracts on the same terms with his other raiyats, he will hereafter have to bring them one and all individually by separate suit into Court to confess judgment, and will thus obtain the same result only by a process far more expensive and far more demoralising to the raiyat. Another objection is that it altogether fails to meet the case of raiyats who are allowed to cultivate at specially low rents on condition of growing indigo or other special crop—a condition frequently used both by Government and by indigo-planters. When this condition comes to an end, there is no means of voluntarily adjusting the rent to the altered circumstances. The force of these arguments cannot be denied. On the other hand it is urged that 12½ per cent. (a fraction which allows of the rent being enhanced by 25 per cent. every 30 years, by 100 per cent in less than 90 years), is as much as a moderate landlord would ever be likely to ask as an addition to the rent; that it is quite reasonable, if the landlord wants a larger enhancement than this, to send him to the Courts for it, where he can prove its reasonableness; that the scheme encourages moderate enhancements, and discourages any large enhancements; that in some parts of the country, and precisely in those parts where the raiyats are least able to protect themselves, and most likely to agree, under pressure, to any terms which their landlords may impose, the rents are already so high that no sufficient margin for subsistence is left to the raiyat, and a single bad season suffices to break him down; and consequently that, in the absence of the checks which the Committee have removed from enhancement by the Courts, it is imperatively necessary for the very existence of the raiyat that enhancement by contract should be restricted within comparatively narrow limits. It is for the Council to say which of these views should prevail: for myself, I feel very strongly the necessity of some such check as the Bengal Government urge in regard to the over-rented parts of Behar, and whatever doubts there may be as to the efficiency in practice of this particular check, no competent observer can doubt the reality of the danger at which it is aimed.

Exception in the case of landlords' improvements.

"We have inserted a section exempting from these conditions enhancements made *bonâ fide* on the ground of landlords' improvements, because we look upon such enhancements in the light of interest on the capital expended, and we desire to encourage improvements.

Period during which fresh enhancement barred extended to 15 years.

"One point remains under this head. We have, in order to lessen the harassment caused by frequent enhancements, provided that the enhanced rent, whether under contract or under decree of Court, should run for 15 years. This is an extension of the term (10 years) originally proposed by the Rent Com-

mittee, but it is only half of that (30 years) recommended by the Famine Committee. It is a very substantial boon to the raiyat, but is, we consider, perfectly just and necessary.

Enhancement in Court.

"Coming now to enhancements by decree of Court, we have to consider the grounds on which enhancement can be demanded, and the considerations by which the Court should be guided in granting it.

"Under the Bill as first introduced, the great regulator of enhancements was intended to be the table-of-rates. This scheme, as I shall hereafter have to explain, has been eliminated from the Bill. Where a table-of-rates was not in force, the Bill provided for enhancement on the following grounds :—

Three grounds.

(1) the prevailing rate;

(2) increase of productive powers of the land;

(3) increase in average prices of produce.

"Of these, the prevailing rate remains in a slightly altered form. Increase in the productive powers has been subdivided into the two efficient causes which alone can bring it about so as to justify in our opinion the enhancement of rent. All other cases seem to resolve themselves into cases, such as railways or canals, in which the landlord will get his enhancement by improvement of prices, or else into improvements effected by Government or by the raiyat. In these cases we do not see any just ground for enhancement. The two elements remaining are fluvial action and landlords' improvements, and these two are maintained as grounds on which a landlord can demand an enhancement. The third of the old grounds—'increase of prices'—has been retained and rendered, in my opinion, an exceedingly valuable instrument in the landlord's hands for obtaining an equitable increase of rent.

"To avoid misapprehension, I may mention here that increase of area is treated separately, as we do not consider that increased rent demanded on this ground is, properly speaking, an 'enhancement'.

Prevailing rate.

"Going back, then, to the first of these grounds of enhancement, it will be seen from the dissents that we have been vehemently urged to get rid of the prevailing rate altogether as a ground of enhancement. This was first moved by the Bengal Government in Committee last year and was not accepted. It was then referred for the opinion of the local officers, and the outcome of that reference was to show a very even balance between those who were in favour of abandoning it and those who were in favour of retaining it in such a form as to safeguard it from abuse. The reasons which led the Lieutenant-Governor to desire its abandonment are very forcibly explained in paragraph 40 (pages 25 to 28) of his letter of the 15th September. Very briefly summarised they are as follows. By the Permanent Settlement a raiyat's rent might, as a rule, be brought up to the pargana rate. The theory of the pargana rate was that it was a fixed and ascertainable entity, and this was in many parts of the country no doubt the fact. Where there was such a rate authoritatively established, it was fair, and was part of the old right of the State landlord, that the raiyat, when not protected by patta, should pay according to that rate. But the established pargana rate disappeared, and there is now no prevailing rate.

Reasons suggested for abandoning the prevailing rate.

"The landlords have been accustomed to take what they can get; rents are as often as not fixed in a lump sum on the holding and not differentiated according to the various qualities of the soil.

"In the absence of a real prevailing rate, the Courts have to take the average of the most prevalent rates in the vicinity. This means that A's rent is to be enhanced because B and C, being in debt, or otherwise at their landlords' mercy, have agreed, or pretended to agree, to pay enhanced rates. There is ample evidence that, apart from the natural effect of such competition-rents as have replaced customary-rents, bogus-rents are fabricated and kept on the jamabandis with a direct view to bring up the standard of the prevailing rate. Proposals have been made to exclude from consideration in determining the

prevailing rate the effect of recent initial or competititive rents, but in the long run this would be impossible, and any way it does not cover the whole ground. These considerations led the Lieutenant-Governor to propose the absolute abandonment of the section, except where a prevailing rate is *established* by a Settlement-officer under Chapter X. The question was very fully discussed in Committee, and the result is given in paragraph 20 of our Report, which runs as follows:—

'20. We were unable to accept the proposal (IX) to abolish the prevailing rate as a ground of enhancement, inasmuch as this has, in one shape or another, been a ground of enhancement ever since the Permanent Settlement, and as it is the only means by which a landlord can remedy the effects of fraud or favouritism on the part of his agent or predecessors. In view, however, of the dangers which are said by competent authorities to arise from the artificial manufacture of rates, and from the very wide interpretation given to the term "places adjacent", we have somewhat modified the terms of the section, have limited enhancement to the rate ascertained to be the prevailing rate *in the village*, and have required that this rate should be determined with reference to the rates actually paid during a period of not less than three years before the institution of the suit.'

Reasons which prevailed with the Committee for retaining it.

"I may have more to say on this subject when specific amendments are proposed, but for the present I will only observe that I believe in the amended section we have accurately retained the existing substantive law as interpreted by the Courts, and have only introduced the necessary safeguards above explained; we have, however, added a qualifying clause which would enable the raiyat to plead any sufficient reason there may be for his being allowed to hold on at a lower rate, have limited enhancement to those cases where the difference between the raiyat's rate and the prevailing rate is substantial so as to prevent the section being used for purposes of harassment, and have indicated that where a local enquiry is necessary to ascertain the prevailing rate it should be conducted by a properly qualified Revenue-officer.

Modifications in form.

"The next ground in the order of our Bill on which enhancement may be demanded is increase of prices. We have made some alterations under this heading, but I would first explain the scope of the section. The prices referred to are those of the staple food-crops, and are entirely independent of the particular crop which may happen at any particular time to be grown by the raiyat. We take the prices of staple food-crops as our standard both on grounds of principle and on grounds of convenience. Starting from the principle that existing rents, even if not corresponding strictly to soil-capacity, are yet to be considered fair and equitable, we hold it to be entirely unjust and contrary to good policy that they should be made to vary according to whether the raiyat at any particular time grows a special crop which may be fetching a high or a low price. We would not make the landlord's rents depend on whether the raiyat is shrewd or the reverse, nor should they in any way in the existing condition of agriculture fluctuate with the fluctuations of foreign markets for such crops as jute, safflower, oilseeds, cotton, &c. What we do mean is, that the landlord should not unduly suffer nor the raiyat unduly prosper from a permanent or long continued alteration in the value of money, and the only practical standard which can be applied to test this point is that of the price of staple food-crops.

Increase of prices

"We have made other alterations. Formerly, it was necessary for the landlord to prove to the Court when the rent was last fixed, in order to be able to enter into any comparison at all. The Court may under this Bill take any period during the currency of the rent that may be equitable and practicable for comparison. As a rule, in order to eliminate the effect of special seasons, decennial periods will be taken, but the Courts may, if necessary, substitute shorter periods. In order to facilitate the comparison, the Local Government will have to draw up, from the materials which are available to a certain extent for the last 20 years, statements of past prices, and in future to record prices accurately, publish them for criticism, and finally, after revision, publish statements of annual average prices which the Courts will receive as presumptive evidence.

Alteration in law to facilitate proof.

"We have, I think, by this scheme redeemed the pledge that Government would put the power of enhancement 'on such a footing that it will readily be

enforceable in practice.' Before leaving this part of the subject, I must refer you to paragraph 18 of our Report, which deals with the deduction to be made to cover the effect of increased prices on the cost of cultivation. We are of opinion that the tendency in this country is for the cost of cultivation to increase in a higher ratio than prices. So far as the labour is done by the cultivator's family or by labourers paid in grain (as is mostly the case in India), no benefit under this item can accrue to the cultivator from increase in prices. On the other hand, as population and prices have increased, pasturage has diminished; cattle are dearer to buy, dearer to keep, and less remunerative; manure is dearer, and so is fuel; and all these elements have to be taken into account. The Local Government proposed to deduct one-half for the increase of prices to cover the increased cost of cultivation; we recognised the impossibility of asking the Courts to solve the hopeless problem of increased cost in each case, and found it necessary to draw an arbitrary line. We have drawn it at one-third.

duction to cover reased cost of duction.

"In regard to the two remaining grounds of enhancement, namely, increase in productive powers caused by landlords' improvements and by fluvial action, I would only mention here that we have provided facilities for at any time registering and recording landlords' improvements, and we have decided that under the head of fluvial action the Courts shall not take into account any increase which is merely temporary or casual.

maining grounds enhancement.

"Before leaving this subject of enhancements I must explain the alterations we have made on the limitation to be placed on enhancement.

nitations on ancement.

"The Bill, as originally introduced, provided that rents should never be enhanced so as to exceed one-fifth of the value of the gross produce, estimated in staple crops, nor should enhanced rent ever exceed double the old rent. In the Intermediate Bill (No. II) the gross produce limit had been rejected, and on the other hand the fractional limitations had been raised in one case to eight annas in the rupee, in others to four annas in the rupee. In the present Bill we have with the consent of the Bengal Government abandoned these fractional limitations without being able, as the Bengal Government wished, to restore the gross-produce limit.

"I hope to be pardoned for touching on this point at some length.

ss-produce limit.

"The gross-produce limit was suggested by the Behar Committee in 1878, who would have fixed it at one-sixth; it found a place in the scheme of the Rent Commission and of Sir Ashley Eden's Bill at the tentative figure of one-fourth; it was one of our proposals to the Secretary of State, and was incorporated in the Bill as introduced into the Legislative Council, having then been changed at the instance of the Bengal Government to one-fifth. I may also say that, in respect to its principle, it had at that time on the whole been not unfavourably received by the zamíndárs. It was not therefore lightly excluded from the Bill by the Select Committee which sat last year, though grave doubts had been expressed in the debate in this Council, among others by His Honour the Lieutenant-Governor, as to the possibility of adopting any universal standard. The line of argument which led to its abandonment was somewhat as follows. In all the previous stages of the discussion the machinery on which reliance had been placed for fixing a fair rent had been what is called the 'table-of-rates.' This meant that a Revenue-officer should after due enquiry, classify soils over a given area, and, judging mainly by existing rent-rates fix a fair rate of rent for each class of soil. This enquiry would have involved by a minute process of investigation and experiment the ascertaining of what was for each class of soil the average gross outturn in staple crops. Thus ascertained, the figures would remain on record, and in suits for enhancement, &c., the Courts would only have to refer to them, and would thus be able, by applying the maximum test, to check any obviously unfair and unreasonable enhancement.

ound for ndoning it.

ture of scheme table-of-rates.

"Before, however, the Committee had begun its labours, the Lieutenant-Governor had, at the instance of the Government of India, deputed selected officers to four or five experimental areas to ascertain if, as a matter of fact,

rents had any such fixed and stable relation to classes of soil and produce as would enable the Revenue-officer to fix any table-of-rates based on existing facts. The result of the enquiry was disastrous to the scheme of a table-of-rates. It was found in almost each area subjected to enquiry not only that the multiplicity of rent-rates was almost inexhaustible, but that little relation could be traced between the existing rates and the quality of the soil. Consequently the table-of-rates as an adequate general machinery for regulating rents had to be abandoned, and the matter relegated to a great extent to the discretion of the Courts; and with the table-of-rates went the process of ascertaining and recording in an accessible form the average gross produce of each class of soil.

"This rendered it necessary for us to reconsider the expediency of retaining the gross-produce test as a maximum, and finally we decided, after some discussion, to abandon it both as unworkable and unfair. It is obviously unworkable in regard to private contracts, because it involves an enquiry which no registering officer can make before a contract is registered.

Impracticable in regard to contract.

"We held it to be unworkable by the Courts, because no Court has at its disposal the machinery for ascertaining the facts. The Lieutenant-Governor has traversed this argument by asserting that we do not want scientific accuracy; and such an estimate as we do require can be obtained by the assistance of a panchâyat of raiyats who are presumably experts, and he points to the estimate made for grain-rents as an illustration. But the estimate in grain-rents is an estimate of the actual crop on the ground before their eyes—an estimate which is obtained by reaping and measuring samples. What the panchâyat in the other case would have to ascertain is very different. They would have to say what a field which may be growing tobacco or sugarcane or opium would grow, not in any particular year, but over an average of years, if it was sown with staple crops. They or the Courts would then have to ascertain what would have been the price which the raiyat might have received for this produce over an average of 5 or 10 years. There is ample evidence to show that we have hitherto failed to ascertain with anything like accuracy what a bigha of land *does* produce over an average of years of the crop actually grown upon it: to ascertain what it might produce if some other crop were grown is an infinitely more difficult problem. Then the panchâyat must be paid, which adds to expense, and there is always the danger of their opinion being in accordance with the longest purse.

Impracticable in regard to suits.

"The unfairness of the test is of not less importance. The produce on two fields being the same, the maximum rent as limited by this test is the same; but on one of these fields it may cost twice as much to raise the crop as on the other: the margin left to the raiyat will in one case be sufficient; in the other it will not preserve him from starvation.

Unfairness of the test. In relation to cost of cultivation and to area of holding.

"The relative size of the holding will similarly interfere with the applicability of the test. The same margin of produce per bigha left to the raiyat may be quite adequate where he holds 20 bighas, and may mean absolute starvation where he holds 4 only.

"Another very serious objection to the scheme is this: as population advances the average area of each man's holding must diminish, and consequently the raiyat will require a larger proportion of the gross produce of his holding for the mere support of himself and his family. A less proportion will therefore remain as rent for his landlord. This is a necessary tendency while population increases at its present rate, and is, moreover, wholly confined to unscientific agriculture for subsistence. At the beginning of this century we have, in the Regulation 1 of 1804* for invalid jaghirs, a clear proof that Government then thought a cash rent equal to two-fifths of the gross produce a fair standard. To-day the Government of Bengal think one-fifth the maximum consistent with

Dangerous effect of fixing a permanent standard in face of increasing population.

* Section IX (6):—

"The proprietor of the land shall be entitled to rent in the proportion of two-fifths of the annual produce, whether it be in kind or in money, as may be agreed on between the parties concerned in the adjustment. This rent shall not be liable to any variation and shall be paid to the zamíndár or other proprietor."

safety. If the Government of that day had been called on to fix a general standard they would have fixed it probably at two-fifths. It would be as dangerous for us to lay down now a permanent standard of one-fifth up to which, by the inevitable law which makes water find its level, rents would surely rise, as it would then have been for Government to lay down the standard at two-fifths. Until you can limit the amount of population to be fed you cannot with any safety say what proportion of the gross produce shall go to the landlord and raiyat respectively.

Committee objected to its principle and doubted its efficiency in practice.

"The Committee therefore, after full consideration condemned the principle of the gross-produce limit, because it left out of consideration other elements of equal or more importance in determining a fair rent. It took no thought of the cost of cultivation or of the size of the holding, or of the relative productiveness of it. They also objected to it in practice, because they thought the problem was one which the Courts could not solve, and because the attempt to solve it must add overwhelmingly to the cost of rent-suits—a burthen, which, as the *onus probandi* is on the raiyat, must inevitably fall on him in a large number of cases. So far we had not discussed the special fraction which it was proposed to introduce. Last autumn the Bengal Government again urged in the strongest terms the imperative necessity of retaining the gross produce limit as the only ultimate check on enhancements which might otherwise, under the prevailing-rate scheme, become destructive to the raiyat, and which certainly could not with safety be borne in Behar.

Consideration of test with reference to specific limit of one-fifth.

"The matter was again carefully considered, there being a decided readiness to accept the necessity of establishing a final check if one could be found, and this time the question was considered with reference to the special fraction proposed. The evidence as to average rates in each district is not such as can be altogether relied on, but, such as it is, it satisfied the Committee that the contention that a raiyat *can* not pay more than one-fifth of the estimated value of the staple crop is one which it is impossible to maintain. So far as it goes, and so far as the enquiries made by selected Revenue-officers last year bear upon the point, the evidence shows that in many districts which are not supposed to suffer from rack-renting, and in Court of Wards' estates as well, the raiyats *do* pay more than this proportion. But the evidence shows more than this: it shows that the relation of rent to gross produce varies so enormously (the Board give the result of their experiments as showing a variation from 67 per cent. to 7 per cent.), that it would be impossible to apply any one standard to all parts of the country, and that no sufficient remedy could be found in the direction of altering the limit to one-fourth or any other uniform fraction. It occurred to me that the test might perhaps be safely applied after a special enquiry in each district or smaller local area such as the table-of-rates contemplated, but this idea was not favourably received, and the Government of Bengal no longer press the scheme. Its loss however is made a ground of objection to the Bill as it stands; but fully as I recognise the real deficiency in the Bill of any adequate check on rack-renting in certain parts of the country, where enhancement is incompatible with the welfare, almost with the existence, of the raiyat, I must yet say that I consider the Committee were amply justified in refusing to accept a remedy which, in the shape proposed, was indefensible in theory, and would probably prove useless in practice.

Possibility of applying it after special enquiry.

Finally abandoned.

Fractional limits condemned.

"The alternative fractional limits which had been inserted last year by the Committee, meanwhile, had been condemned by the Government of Bengal.

"As I have said in regard to tenures, there was a danger in establishing a maximum which would inevitably tend to become a standard of enhancement. They involved also the erroneous principle of adding most to the highest rent and least to the lowest; and we thought that, looking to the limitations which the grounds of enhancement carry within themselves, namely, in one case the rate prevailing in the village, and in that of prices the actual increase, minus one-third, it would be safer to trust to the discretion of Courts and to leave them within those limits to be guided by what is fair and equitable.

"We have therefore discarded the fractional limits on enhancement in Court, but I must repeat that it was the abandonment of these successive checks which led the Bengal Government to urge on us so strongly the necessity of strictly limiting enhancement by contract, and I trust this fact will be remembered when dealing with the limit of two annas in the rupee to which such contracts are subjected.

And abandoned on condition of limitation of enhancements by contract.

"The only other point remaining in this chapter which I need notice, is the alteration which we introduced into the provisions for produce-rents in our preliminary Bill of last year. For the reasons given in paragraph 43 of the Intermediate Report, we eliminated the maximum that had been imposed on produce-rents, and we gave discretion to a Revenue-officer to refuse an application for commutation if opposed. We also added rules for his guidance in deciding what the equivalent money-rent should be. I need not take up your time at present by examining these rules.

Produce-rents.

"Having dealt with the occupancy-raiyat, we must now turn to the non-occupancy-raiyat, who was called in the original Bill the ordinary raiyat. This name we have changed for reasons given by Mr. Reynolds and the Government of Bengal, to the effect that the non-occupancy-raiyat is not an ordinary raiyat, the ordinary or customary raiyat being the khudkasht.

Non-occupancy-raiyats.

"Around this raiyat, whatever he be called, a severe conflict has arisen. Some of the minutes of dissent declare that a great deal too much has been done for his protection, others say that he is entirely unprotected. Mr. Reynolds says the Bill 'affords him no protection as regards his rent, and that it does nothing to facilitate his acquisition of the right of occupancy.' Babu Peári Mohan Mukerji says: 'The rights given by the Bill to a non-occupancy-raiyat will, to all intents and purposes, convert him into an occupancy-raiyat.' The Mahárájá of Durbhunga agrees with the latter, Mr. Amír Alí with the former. His Honour the Lieutenant-Governor also says the Bill 'leaves the non-occupancy-raiyat practically unprotected, and that on this point the Committee have departed from the intentions of the legislature and the conclusions of authoritative opinion.'

Differences of opinion.

"If this view were correct, I could only reply that among the conclusions of authoritative opinion which we have not departed from is one no less authoritative than that of His Honour the Lieutenant-Governor himself. In his speech on the second reading of the Bill in this Council, the Lieutenant-Governor, after urging that the Regulations of 1793 attempted only to protect the *khudkasht* raiyat, and that only so long as we dealt with his representative was our position unassailable, went on to say that 'it would be unreasonable and inequitable to extend the right of occupancy to every raiyat in the country,' and that he most cordially concurred in the maintenance by the Secretary of State 'of the distinction deeply rooted in the feelings and customs of the people, not only in Bengal but in most parts of India, between the resident or permanent, and the non-resident or temporary, cultivator.' 'It was to the resident raiyat and him alone', he says further on, 'that any ancient privileges and rights appertained' and accordingly when he came to deal with the details of the Bill, he said 'I am unable to accept the provisions of Chapter VIII (the ordinary raiyat) which deal with compensation for improvement and disturbance. I think too, though I myself have suggested a 20 per cent. (gross produce) limitation, that it may be impossible to enforce a uniform limitation of that kind in all parts of the province.'

The Lieutenant-Governor's view.

"If then it were the case that we have given the non-occupancy-raiyat little or no protection, I might at least plead high authority for such a course; but I deny that it is the case, and I do not rest our defence on such authority. The line of action we have endeavoured to follow has been to keep, as directed by the Secretary of State, a marked distinction between the occupancy and non-occupancy raiyat, but to facilitate the acquisition by the latter of occupancy-rights, to give him some protection against undue enhancement, without barring the zamindar absolutely from all voice in the selection of his tenants or in the determination of their rents. One party of the dissentients would

Nature of protection afforded by the Bill

leave the non-occupancy-raiyat absolutely at the mercy of the zamindar without protection of any kind; the other party, in its endeavour to stop up every gap by which a zamindar could possibly find a means to injure his tenant, would force the zamindar to retain for ever, subject to a heavy fine, any paikasht raiyat he had once admitted on the land, and would make the acquisition of occupancy-rights inevitable.

"The latter course would be contrary to the orders and intention of the Secretary of State, the former would be destructive to the stability of the cultivator and against the interests of public policy. I think that the attacks of the dissentients from two such opposite standpoints may fairly lead the Council to conclude that we have adopted a just and moderate view, and have taken the line which is fairest to the two contending interests.

Protection under the existing law.

"Under the existing law the non-occupancy-raiyat can get a patta at the rates agreed upon with his landlord. He can be ejected at the expiry of his lease, or, if without a lease, at any time after notice to quit. His rent can be enhanced as often as the landlord likes after service of notice of enhancement.

Protection under the Bill.

"We have provided that, after the expiry of an initial lease, he should still be liable to be ejected, but only after his first lease, not if he is permitted to hold on; and unless the suit for ejectment is brought within six months after the lease expires, the right to eject on that ground lapses. He will always be liable to ejectment by *suit* for non-payment of arrears. He will be liable to enhancement in two ways, either by registered agreement, or by suit in Court, but enhancement by suit carries with it, if the raiyat accept it, a lease for five years at the rate fixed by the Court, after which, unless he has meanwhile acquired rights of occupancy, he can be ejected.

Alteration made by the Committee.

"The Bill, as originally introduced, was silent as to ejectment after the initial lease, and the check it proposed on undue enhancement was (1) a gross produce limit, and (2) that the zamíndár should pay compensation for disturbance graduated according to the ratio of enhancement demanded. It is on these points that the Government of Bengal objected to the conclusions of the majority, and asked us to go back to the original Bill. In regard to compensation for disturbance, I may say that at the original discussion in Council it was more objected to than any provision in the Bill, and it was condemned, not only, as I have already mentioned, by the Lieutenant-Governor but also in stronger terms by Mr. Reynolds. He said: 'the proposed compensation for disturbance introduces an entirely new element into the agricultural laws of the country. We have not the least experience to show how this provision would work in India, and the principle of it seems to me objectionable.' We found that Mr. Reynolds' condemnation was endorsed by others whose opinions we could not disregard, and we abandoned it. As a substitute the judicial lease for five years was proposed and accepted, and so far the difference between the safeguard provided in the original Bill and that now given is that whereas, under the old Bill, the non-occupancy-raiyat objecting to pay the enhanced rent demanded of him could be ejected at the landlord's discretion subject to the payment of a fixed sum of money, he can now have the rent fixed by the Court; if he refuses to pay this rent he must go; if he accepts he is secure in his holding for another five years.

Abandonment of compensation for disturbance.

Substitution of judicial rent with a five years lease.

Effect of this protection.

"The security from ejectment and from undue enhancement which this provision affords, and the additional security given by the rule that all agreements for enhanced rent must be registered, do unquestionably facilitate the acquisition of the occupancy-right, though they are of course a long way short of the security which that right confers; and I am bound to say that, on this point, the two sets of criticism which I have read out to you seem to me equally exaggerated and unreal.

Initial lease.

"There remains the question of the initial lease. I have explained to you that, under the existing law, the landlord has a right to eject a non-occupancy-raiyat at the end of his initial lease.

"The Government of Bengal urged that this provision should not be maintained, and that, after having once been admitted to cultivate, no tenant should be ejected except upon receipt of compensation up to one-fourth of the rent which he has paid. I have explained to you that the considerations which led the Committee to reject this proposal were, *first*, that it was only fair that a zamíndár should be able to give a new tenant a period of trial to ascertain if he was likely to be a satisfactory tenant before establishing him permanently, and, *secondly*, that the proposal led directly to the effacement of the distinction between the two classes of raiyat which the Secretary of State had insisted on our maintaining. I do not, however, deny that the provision is one which can be taken advantage of to prevent new tenants hereafter from acquiring occupancy-rights. It will not hurt existing tenants to any great extent; it can only touch in the future the restricted class who are not settled raiyats of the village, and these it can only injure where a regular lease is given, and where the zamíndár is careful to sue within six months of the expiry of the lease.

Objection of the Government of Bengal.

Reasons for retaining the rule.

Dangers inherent in it.

"Thus restricted I should not have supposed that the right could do serious harm, but the contention of Mr. Reynolds has received valuable support from the quarter whence he can least have expected it, and the representative of the zamíndárs corroborates his prediction that they will use this provision to the utmost of their power to prevent the accrual of the occupancy-right. He says, and he ought to know, that 'having an absolute right of ejecting such a raiyat on the expiry of the term of his lease, the landholder will in every case grant short-term leases, with a view to protect his interests, and thus reduce non-occupancy raiyats to mere tenants-at-will.' It is true they have the power at present, and to some extent, perhaps, make use of it, but I had not expected such authoritative testimony to the fact that the zamíndárs prefer a set of serfs to stable and improving tenants; and I confess that if anything could make me doubt the wisdom of the decision arrived at by the Committee, it would be the gratuitous testimony of the Bábú to the evil use which will be made of it.

View of Babu P. M Mukerji.

"The application of the gross-produce limit to the non-occupancy-raiyat's rent must, I fear, stand or fall with its application to that of the occupancy-raiyat. If it were deemed applicable to the latter I should be glad to see not only the system but the identical standard applied to the former, but if it is condemned as impracticable in the one case, it will be difficult to maintain the propriety of applying it to the other.

Gross-produce limi

"The next chapter deals with the under-raiyat. This class we have left as in the Intermediate Bill No. II, with only the nominal protection of a fractional limit above the head rent beyond which the lessor cannot recover in Court. This is to my mind the most unsatisfactory part of the Bill, but the Committee were unable to afford to under-raiyats any real protection without subverting the customs and traditions attaching to the status. So long as they are liable to arbitrary ejectment, there can be no protection against arbitrary enhancement, and the protection afforded by the Bill can in practice only refer to arrears of rent. With the right to eject, the lessor will always prefer this method of attaining his object to that of a suit in Court, so that the protection is, as I said, nominal. In fact the only practicable method of protecting them would be by giving to under-raiyats sub-occupancy rights against the lessor, of the same nature, though not necessarily in the same degree, as the occupancy-raiyat has against the tenure-holder above him. No such plan would, at the present time, be favourably received, as it is contrary to existing custom and is in that sense justly condemned as revolutionary. Moreover, the question is not at present of serious importance, though as population increases it is likely to become so; but I wish to say that in regard to the under-raiyat I do not think the Bill can be considered to be in any way a final settlement of the difficulty, and the next generation will probably have to reconsider his position.

Under-raiyats.

Protectionvisionar

Problem remains to be solved.

"I come now to Chapter VIII, which is headed General Provisions as to Rent. The chapter opens with the sections which contain the well-known

Chapter VIII.

The 20 years' presumption.

presumption that a tenure-holder or raiyat, who has held for 20 years at an unchanged rate of rent, shall be presumed to have held at that rent from the time of the Permanent Settlement and shall therefore not be liable to enhancement.

Not to apply to produce-rents.

"The first alteration to be noticed is that we have omitted the provision making this presumption applicable to produce-rents. It seemed clear to us that where the rent is paid in kind, although the proportion of the gross produce paid remains the same, yet by a self-acting machinery this very fact discounts the rise in prices, and rents are thus of necessity enhanced or reduced as prices rise or fall. There is here no room therefore for the presumption. We have, moreover, exempted from this presumption tenures in any area to which the registration of tenures under the Bengal Bill is applied, and both tenures and holdings in any area in which a record of rights is made. In those cases the rights having been once registered there is no ground for continuing a presumption the object of which is to facilitate the proof of existing rights rather than to create new rights.

For to recorded and registered holdings.

Question of period for calculating the presumption.

"A more important change, however, was strongly urged upon us, which the majority of the Committee did not see its way to accept. Ever since the presumption was created in 1859, the period to be taken into consideration has been the 20 years immediately before the institution of the suit.

"It was argued, and the argument is repeated in some of the dissents, that year by year as the Permanent Settlement fades into the remote past, the presumption ceases more and more to correspond with the facts and probabilities of the day, and therefore that the presumption should run, if not from the 20 years before the passing of Act X of 1859, at least from 20 years before the passing of this Act. In other words, unless a person could show hereafter that his rent had been unchanged since 1864 he should not get the benefit of the presumption.

"This would have left the presumption operative in any case in which it could now be pleaded, but would not have allowed it to grow up by lapse of time in those cases in which it has not yet come to maturity.

"The majority of the Committee held that the presumption arising from the fact of a man holding for 20 years at an unchanged rent is in itself a wise provision of law without any reference to its dependence on the existence of the tenure or holding at the time of the Permanent Settlement, that it was in most cases easier for a zamíndár who may be expected to keep regular books to prove if rent had been changed, than for a raiyat who does not keep books to prove that it has not been changed, and that as the law had been in its present shape on the statute-book for a quarter of a century, it was inexpedient to alter it. I myself voted with the minority on that occasion, but I am not anxious to see the decision of the Committee disturbed.

Decision of Committee to maintain the existing law.

Increase of area.

"We have made some alterations in section 52, the first of which, as it only assimilates suits for diminution with suits for increase of rent on the ground of alteration of area, I need not notice; but in sub-section (2) we have inserted some provisions to guide the Courts in deciding whether an increase of area is really a ground for increase of rent or not. They will have to consider whether the apparent increase is the result of encroachment on the part of the raiyat, or of erroneous entries in the books of the landlord; whether, in short, the entire area has really been previously considered in the rent or not.

Instalments.

The provision regarding instalments (53) is new. It has been strongly represented to us that the custom of making the rent payable in twelve monthly instalments was frequently a source of great oppression to the raiyat, as it enables his landlord to harass him with an equal number of suits for arrears. On consideration we have deemed it inexpedient to interfere with custom in regard to instalments, but where no custom or contract exists we have provided for the payment being in four equal quarterly instalments; and have, in every case, directed (section 147) that suits for arrears shall not be brought more frequently than at intervals of three months.

"In paragraph 79 of the Statement of Objects and Reasons will be found an explanation of the provisions which the original Bill contained in regard to receipts and accounts. Receipts and accounts.

"The main alterations introduced by the Committee are the annexure as a schedule to the Bill of forms of receipts and accounts which the Local Government will be bound to keep on sale, but which landlords may use or not at their pleasure. The Local Government will have power to vary these forms from time to time.

"If landlords prefer to use another form, we only require that it shall contain substantially the information which the receipts in the approved form provide for, and the penalty attached to non-conformity is that such a receipt shall be *presumed*, till the contrary is proved, to be an acquittance in full. By the original Bill it was *deemed* to be so.

"We did not think any more arbitrary clauses required. The greater confidence which the Courts will naturally repose in receipts kept according to the standard plan will probably be a sufficient inducement to secure their gradual adoption.

"Section 60 is new, and its object is to give an advantage to the landlord whose title is registered against a claimant who is not registered in the Collector's books. Receipt by registered proprietor.

"The sections on deposits, though very carefully considered, have received but slight alteration at the hands of the Committee, and that only in matters of detail. Substantially the sub-chapter is the same as the provisions in the original Bill, explained in paragraphs 80 and 81 of the Statement of Objects and Reasons; but we have somewhat limited the discretion of the raiyat who deposits on the ground that he believes that his rent will not be received, by making this discretion dependent on the fact of the rent having been refused or a receipt withheld on a previous occasion. Deposits.

"In the sections dealing with the division or appraisement of the crop, where rent is paid in kind, we have made some alterations. Produce-rents.

"The original scheme is set forth in paragraphs 82 and 83 of the Statement of Objects and Reasons, as follows:—

'82. The provisions contained in sections 112 to 116, for the division or appraisement of a crop by a public officer in cases where the rent is paid in kind or is the value of a certain share of the gross produce, and a dispute arises between the parties, are based on the proposals made for Behar by the Behar Committee and the Rent Law Commission; but they are made generally applicable, and their details are taken, for the most part, from enactments in force in Upper India, where rent is very commonly paid in kind or in appraisement of the crops. They enact that, if either party neglects to attend at the proper time for making the division or appraisement, or if there is a dispute regarding the division or appraisement, the Collector may, on application made to him, issue a commission to such person as he thinks fit, directing him to divide or appraise the crop, and may further direct him to associate with himself any other persons as assessors for this purpose. If, in a division made in this way, either party receives less than his proper share, he may, within three months from the date of the division, sue the other party to recover the value of the additional portion of the crop due to him, and, if he does not so sue, the division will be deemed to have been rightly made. When the case is one of appraisement, the commissioner is required to submi this appraisement in writing to the Collector, who shall, after such hearing and enquiry as he thinks necessary, pass an order either confirming or varying it, and that order will be final.' Alterations made by Committee.

"The principal alterations are these. We allow the Collector to interfere on the application of a magisterial officer, should his interference be deemed necessary to prevent a breach of the peace.

"We have allowed the Collector to decide the question before him and carry out his order, only leaving it discretionary with him to refer questions to the Civil Court. We have added a section defining the tenant's rights as to the possession of the crop, its cutting, threshing and storing. The double claim to possession has given rise to much doubt and to much oppression, and it is most desirable that the right should be clearly defined.

hapter IX.—Miscellaneous Provisions s to Landlord and enant.

"In Chapter IX we have made some alterations in the portion relating to improvements.

"We have given the Collector power (section 78) to decide disputes as to whether the landlord or tenant should have a right to make an improvement, and whether a particular work is or is not an improvement.

mprovements.

"We have given the non-occupancy-raiyat the absolute right to make a well which in some parts of the country is essential to his cultivation. This right carries with it a right to receive compensation for it on ejectment.

"We have, in order to facilitate the decision of disputes regarding improvements, introduced a section (81), based on the law in force in the Central Provinces, providing that a landlord or tenant desiring to have any evidence recorded regarding an improvement which has been made may apply to a Revenue-officer to record it, and that the record so made shall be admissible in subsequent proceedings between the parties. We have also introduced a section (80) providing for the registration of improvements made by landlords. We have inserted a new section (84) giving power to landlords to acquire by compulsory sale, at a price to be fixed by the Court, any land on their estate required by them for the good of the estate, for building purposes, or for religious, educational or charitable objects. The Collector will have to certify to the sufficiency of the reason before the Court puts the section into operation.

arrender.

"We have retained the old substantive law in regard to the raiyat's right to surrender, but we have added clauses to assist the Court in deciding under what circumstances he shall be liable for the rent of the following year in case a formal notice was not served three months before the surrender.

bandonment.

"The object of section 87 (abandonment) is to meet the difficulties which occur when a raiyat apparently abandons his holding, but in such circumstances as to give no assurance whether it is permanently abandoned or not. On the one hand, there is danger to the landlord of an action for dispossession, if he lets the land hastily to a new tenant; on the other hand, there is the danger of temporary absence being taken advantage of by the landlord to effect the dispossession of a raiyat.

"To meet these two dangers we provide that if a raiyat abandons his residence without notice and without arranging for his cultivation and payment of rent, the presumption is that he has abandoned his holding. The landlord can then, after filing a notice in the Collector's office, enter on the holding and let it to another tenant. We give, however, a term of two years in which the raiyat can sue for re-admission, and the Court may, on being satisfied that the raiyat did not voluntarily abandon his holding, order recovery of possession, on such terms as to payment of compensation and arrears of rent as he thinks fit.

rotection of third arties.

"We have also added sections directed against collusive surrender or abandonment in fraud of the rights of third parties. The necessity for this was brought to notice in paragraph 69 of the Bengal Government's letter of 15th September, where it is shown that raiyats not unfrequently sub-let the whole or a portion of their holdings in consideration of a large bonus for a term of years. To leave the interests of sub-lessees in such cases entirely at the mercy of the sub-lessor in collusion with his landlord would do serious practical harm. We have therefore provided that the surrender of a holding which is subject to a registered encumbrance shall not be valid without the consent of the encumbrancer and the landlord, and in case of abandonment we have provided (section 87 (4)) that the sub-lease shall only be avoided after the sub-lessee has had the opportunity of taking over, for the unexpired period of his sub-lease, the full rights and liabilities of his lessor in regard to the rent of his entire holding. These provisions appear to us to present the only method by which protection can be given to the sub-lessee without injury to the landlord, or without risking the conversion of these sub-leases into permanent transfers.

Merger.

"The only other point in the chapter to which I need draw attention is that we have omitted section 141 of the original Bill, which dealt with the

merger of the tenant's interests generally in those of the landlord. The section as it stood was, we thought, open to objection, inasmuch as it allowed of the occupancy-right being retained in the hands of the landlord, his tenants being thus reduced to the position of under-raiyats; but we objected to it also from a more general point of view, as enabling individuals to introduce serious complications into the tenure of property without sufficient reason. All that remains on the subject will now be found at section 22, the effect of which, stated in general terms, is that when the occupancy-right in a holding falls into the landlord's hands it ceases to exist.

Chapter X.—Reco of Rights and Settlement of Ren

"Chapter X deals with the procedure for the record of rights and settlement of rents. As the Bill originally stood these two processes were separate and were provided for in separate chapters. The Revenue-officer undertaking a record of rights had no power to settle rents nor to decide disputes. He had only to record what he found to be the existing facts of each holding, and the entries in such a record were to be presumed to be correct till the contrary was proved. This process, however, was to be supplemented by another called the settlement of rents, and the object of the Government in providing for this latter process cannot be better shown than by an extract from the Statement of Objects and Reasons. It was said in paragraph 99 of that Statement:

Provisions in the original Bill.

'It has been stated, in the remarks above made on Chapter VI, that it is apprehended that, in many parts of the country, the framing of a table of rates will be impossible. It should be added that, in many instances, the mere framing of a table of rates will not suffice to settle the disputes between landlords and tenants. In either case the only satisfactory remedy may be a settlement of individual rents by a Revenue-officer, conducted somewhat in the same manner as in a Government estate at present; and it is with a view to providing such a remedy that Chapter XI has been framed.

'There is, however, one cardinal difference between the provisions of this chapter and those of the existing settlement law which should be noted at the outset. Under the existing settlement law, when a Settlement-officer has, after the most careful and protracted inquiry, settled the rents of an estate, and his proceedings have been scrutinized and checked by the superior Revenue-authorities, every individual rent fixed by him is liable to be called in question in the Civil Courts, and that not merely on the ground of error in respect of some matter, such as the status of a tenant or the validity of an alleged lease, falling most appropriately within the cognizance of a Civil Court, but also on the ground of an error in regard to the quality of the soil, the estimated amount of the produce, or some other such matter with which the Revenue-authorities, conducting their inquiries on a great scale, are far more competent to deal than any Civil Court trying a suit relating to a single holding can possibly be; in other words an important portion of the work, after being done by those authorities who are most competent to perform it is liable to be pulled to pieces by another set of authorities, who are far less competent to perform it. The enormous amount of unnecessary expense, trouble, and vexation, which this system entails on all concerned can be estimated from the fact, stated by the Board of Revenue in referring to a recent settlement, that out of 2,391 decisions in suits brought to contest the Settlement-officer's rates, 2,202 were absolutely adverse to the plaintiffs. An attempt has been made to avoid this in Chapter XI of the Bill by distinguishing, among the various questions which may arise in a settlement of rents, those which the Revenue-authorities are most competent to determine and those which a Civil Court is most competent to determine, making the decision of the Revenue-authorities final on the former, and providing that the latter may ultimately be brought for decision before the Civil Court.

'The procedure of this chapter, besides being available for the purpose of Government settlements, may be made applicable by the Local Government—

'(*a*) when a large proportion of the tenants or of the landlords desires that it should be applied, and

'(*b*) when a resort to it is likely to settle or avert a serious dispute, existing or likely to arise, between landlords and tenants generally.

'It is applicable to tenants of any class, but would probably be made use of chiefly for settling the rents of occupancy-tenants.

'When the rents to be settled are rents which are subject to alteration by order of a Court, they will be *fixed* according to the principles embodied in the Bill, and so that they shall not exceed the maximum prescribed by the Bill in cases of enhancement. When, on the contrary, the rents are not of this description, they will be merely ascertained and recorded as rents are under Regulation VII of 1822.

'The Revenue-officer, having settled the rents, will prepare a jamabandi, showing the status of each tenant, the land held by him, the name of his landlord, whether the rent has

been fixed or ascertained and the amount of the rent fixed or ascertained. This jamabandi will be published, and, after an opportunity for urging objections against it has been allowed, will be submitted to the higher Revenue-authorities with the objections and a report setting forth the grounds on which the Revenue-officer has proceeded. If ultimately sanctioned by the Local Government, it will be again published, and will then continue in force for 10 years.

'While it remains in force it will be conclusive (except as will be presently explained) as to the rents payable by those tenants whose rents are shown in it as fixed. As regards rents shown in it merely as ascertained, and as regards all other matters contained in it, it will be merely presumed to be correct until the contrary is proved.

'It will be observed that, in thus empowering a Revenue-officer to fix rents so as to bind the parties, we necessarily empower him to decide certain questions (as, *e.g.*, that of the status of a tenant) which more properly appertain to the jurisdiction of the Civil Courts and ought not to be finally decided by any other authority. It is not, however, intended that the Revenue-officer should finally decide such questions. He may, if he thinks fit, when such a question arises, abstain altogether from deciding it, and, under section 155, refer it to a Civil Court, or leave it to be raised before a Civil Court in a suit instituted by any party interested.

'It only remains to add that, by section 163, the Local Government is empowered to charge the expenses of all proceedings, other than Government settlements, under this chapter to the landlords and tenants concerned, in such shares as it thinks fit.'

"Under the scheme, therefore, as sketched out in the original Bill, it will be observed (1) that the Revenue-officer, in recording rights, could not decide any disputes which might arise, and consequently his record could be of very little value; (2) that the Settlement-officer, though he could decide whatever disputes come before him, could only deal in a preliminary sort of way with a large class of disputes, which might afterwards be tried out by a regular suit in a Civil Court; (3) that though no settlement can in the nature of things be undertaken without the previous preparation of a record of rights, the two processes were unconnected in the Bill, and were treated as essentially separate and distinct.

Alterations made by Select Committee.

"I need not take you through the successive steps by which the procedure was altered, first in the Bill No. II of last year, a description of which will be found in paragraphs 71 to 77 of our Preliminary Report, and then in the Bill of this year as explained in paragraph 42 of our Final Report. It will be sufficient if I explain to you the final result of our discussions as embodied in the Bill now before you.

Two processes amalgamated.

First, then, we have amalgamated the two processes. It was obvious that on a Revenue-officer beginning to record rights he would find himself face to face with numerous cases in which, on one side or the other, the status of the raiyat, the area of the holding, the amount of the rent payable, were the subject of dispute. Unless he could deal with these disputes his record would be of little value, and it was obviously absurd to empower one officer to settle questions of status and area and then to send in another to settle questions of rent.

Reasons for the change.

"It seemed equally unreasonable to empower a Revenue-officer, with all the parties and witnesses before him, to decide disputes and then to allow the whole matter to be re-opened *de novo* and fought out from the very beginning in a Civil Court. At the same time we wished in no way to diminish the security which parties now have in the decision of their cases by the most competent Courts and in the right of appeal to the highest Court in the country.

Powers of Revenue-officer.

"What we have done then has been to give the Revenue-officer, in the first instance, power to settle all disputes that may come before him. Where no dispute arises, he will record what he finds, he will not alter rents, and his entries will only have a presumptive value in cases afterwards brought before the Courts; where a dispute arises, he will decide it, on the same grounds, by the same rules, and with the same procedure, as a Civil Court.

Special Judges and High Court to hear appeals.

His decision will be liable to appeal like that of the ordinary Civil Court to a Special Judge, who may or may not be the Judge of the district, and will be subject to a further special appeal to the High Court. In appeal the High Court may settle a new rent, but in so doing is to be guided by the other rents shown in the rent-roll. In other words, there can be no second appeal to the High Court merely on the ground that the rent has been pitched too high or too low, but if a second appeal is preferred, as it may be, on the ground

that the Special Judge, owing to some error on a point of law, has, for example, found the holding to comprise more land or less land than it actually does comprise, or has given the raiyat a wrong status, and the appellant succeeds, the High Court can, without altering the rates, reduce or increase the rent, as the case may be.

"The decision of the Revenue-officer in disputed cases, subject to these appeals, will have the effect of a judgment of the Civil Court, and will be *res judicata*, thus barring a fresh suit for enhancement for 15 years.

Landlords empowered to apply for settlement.

"In section 103 we have given a special power to landlords to have this procedure applied, on depositing the expenses, to individual estates, and we apprehend that in the cases of auction-purchasers who are met by a combination of their tenants and are unable to get at the papers of their predecessor, this power will be found very useful.

"In sections 105 and 106 we have made ample provision for the publication of the record and for hearing objections, so as to eliminate the danger of any one being prejudiced by entries made behind his back.

Ordinary settlements.

"All this applies to ordinary settlements which may be undertaken either by direction of the Government of India, or by order of the Local Government on the application of the parties, or in the case of serious disputes, in Court of Wards or Government estates or where an estate is under settlement. In fact, this procedure is the only procedure which will now be at the disposal of Government for the purposes of a revenue settlement. But this procedure allows of no alteration of rent except on the application of the individual landlord or individual tenant, and allows of no reduction of rents, except on the two or three grounds, such as diminished area and diminished prices, which can be pleaded as grounds of reduction in a Civil Court. We have, however, provided for a special settlement to meet special circumstances. Under the special settlement (section 112), the Settlement-officer will have power to settle all rents, and will, moreover, have power to reduce rents on other grounds than those ordinarily applicable, and all such rents as he settles will hold good for the same term of years as if fixed under a judicial decree. But this procedure, which gives unusual powers of interference, and which is meant to be applied only in circumstances in which the operation of the ordinary law is likely to prove insufficient, requires some strict safeguard. We have therefore provided that it shall only be applied after the previous sanction of the Governor General in Council has been obtained. It is an extreme power intended to take the place of Sir R. Temple's Agrarian Outrage Act, and I trust it will be resorted to as little as that Act was; but it seems desirable that in the exceptional cases in which it may be necessary to have recourse to this procedure, the Government should have the power of going to the root of the disputes and should be able to put the whole relations of landlord and tenant on a stable footing for a reasonable period.

Special settlement

To be undertaken only with the previous sanction of the Government of India

Divergent views as to the Settlement Chapter.

"I have dealt with this chapter at some length, because I think it is one of the most important in the Bill. The zamíndárs naturally object to it, because its operation tends, by the process of registering the rights of the raiyat, to lessen their own power of dealing with him at their pleasure, while the Bengal Government seem to look upon it as the one oasis which stands out, in the sterile wilderness of the Bill, rich with potentialities of rest and refreshment to the weary raiyat.

My own opinion

"I am not sure myself that the raiyats will welcome the light of day in regard to their holdings more than the zamíndárs will welcome it in regard to their rents, but I am sure that the operation of this chapter, if wisely and discreetly carried out, will ultimately tend to give greater stability to all rights in the land, to reduce litigation hereafter, to give the Government the benefit of that real knowledge of facts in regard to the relation of landlord and tenant which they now have to pick up piecemeal through the records of the Courts and the registration officers, and the deficiency of which they so much lament, and that it will prove, as we are informed the similar record has proved in the permanently-settled districts of the North-Western Provinces, 'the saving of the raiyat'.

ables of rates.

"The next subject with which I ought to deal is that of the table of rates; but in our present Bill this chapter is like the more famous one on the snakes in Iceland. There is no longer a chapter on the table of rates. I have explained to you how special experiments have shown that only in very exceptional tracts were rates to be found so uniform as to offer any hope of the procedure being satisfactorily worked; and as a more effectual method of arriving at the same end has been provided in the settlement chapter, we have decided, with the consent of the Local Government, to apply the happy despatch to this portion of the Bill.

andoned.

amar or private id.

"We have made some alterations in the provisions regarding *khamar* or *zirát* land.

aning of the rd.

"A reference to paragraphs 18 and 19 of the Statement of Objects and Reasons will show the intentions of Government in respect to surveying and recording *khamar* land. It must be explained that the word *khamar*, and the other words used in the Bill, have a great variety of significations, but in this Bill, as in Act X of 1859, the only distinction we wish to draw, or are in any way concerned with, is between that private land of the zamindars in which occupancy-rights do not accrue, and land which is not the zamindar's private land in which they do accrue. It was to meet a very real evil, *viz.*, the tendency to absorb into the landlord's private land large areas of land in which raiyati rights had grown up—an evil of the existence of which in Behar there is ample evidence—that Government took power in the Bill to record and mark off for the future in specified local areas all such land as is no longer open for the acquisition of occupancy-rights. The injury of the past could not be undone, but in a part of the province where the wholly agricultural population is not less than 800 to the square mile, it is obviously right to prevent any further encroachments in the future to the stock of raiyati land. We have supplemented the provisions of the original Bill by a section which allows a landlord at any time to get his private land recorded, so as to obviate the difficulty which might occur if he has to bring evidence of a past state of facts on a survey being ordered at some distant date, and we have given the tenant a converse power.

ect of the pro-ons.

uctions to the Revenue-r or Courts.

"We have also given specific instructions that the Revenue-officer should record as private land all land which has been cultivated as such by the landlord for 12 years previous to the passing of the Act, and all cultivated land that he finds to be recognized as such by village-custom. In regard to other land, where local custom is insufficient to guide him, he shall look to whether the land has been leased specifically as private land in past years; but otherwise the general presumption shall be that land is not the proprietor's private land.

int.

"Coming now to the chapter of distraint, we have maintained the principle that distraint shall not ordinarily be left to be carried out by the zamíndár's servants without the supervision of the Courts. We have by requiring it to be made on 'application' instead of on 'suit' materially reduced the expense. We have given facilities for an early application being made, and have empowered the Courts to issue in such cases an order prohibiting the removal of the produce pending the final order.

"We have also provided that when the Local Government is of opinion that in any local area or in any class of cases it would, by reason of the character of the cultivation or the habits of the cultivators, be impracticable for a landlord to realize his rent by an application to the Court under this chapter, it may, by order, authorize the landlord to distrain by himself or his agent; but that a landlord so distraining shall forthwith give notice to the Court, and that the Court shall thereupon depute an officer to take charge of the produce distrained, and proceed thereafter as if he had distrained under the ordinary procedure. The High Court is empowered to make rules regulating this procedure.

r XIII.—
l Procedure.

"The alterations made in the existing procedure in rent-suits by the Bill as first introduced were explained in paragraphs 114 to 116 of the Statement of Objects and Reasons.

"That Statement then went on to say—

Explanation in Statement of Objects and Reasons.

'It is hoped that, when the measure comes to be fully discussed, other expedients for simplifying the procedure in rent-suits may be discovered, but, with the exception of those above referred to, none have hitherto been suggested which the Government of India would be prepared to accept. As regards the possibility of devising any effectual procedure analogous to that on negotiable instruments under Chapter XXXIX of the Code of Civil Procedure, or any other form of summary or provisional remedy, the whole history of such remedies both in this country and elsewhere is against it.

'A summary form of procedure can scarcely help a plaintiff unless his case is of the simplest description, admitting of being answered only in the simplest way, and he comes into court armed with documentary evidence of so reliable a character that the presumption against any defence being possible is extremely strong. In such cases the Court may very properly, and with great advantage to the plaintiff, be empowered to decline to hear the defendant and to decide against him summarily and provisionally, unless he pays the amount of the claim into Court or gives security for it. But what advantage could be hoped for from a procedure of this description in rent-suits in Bengal, which admit of the most varied and complicated defences, in which the evidence on both sides is usually of the most worthless character, and charges of forgery and perjury almost common forms in the pleadings? If the legislature consented to provide such a procedure for rent-suits, it would probably feel bound to surround it with so many safeguards that the plaintiff would gain nothing by adopting it; and, even if such safeguards were dispensed with in the Act, the Courts would naturally be so cautious about refusing leave to defend or requiring security from a penniless raiyat, that the so-called summary remedy would cease to be summary, and, like the summary suits of former days in some parts of India, become as lengthy and complicated as an ordinary suit, with the further disadvantage of not being final.

'The truth would seem to be that facilities for recovering rents in Bengal should be sought for not so much in novel forms of procedure as in a reliable record of tenancies and their incidents and a simple mode of adjusting rents; in other words, by going to the root of the disputes which, though they may not always come to the surface, are believed to underlie a very large proportion of the contested rent-suits.'

"The Select Committee gave their most earnest consideration to the question of further simplifying the procedure, but without much success.

Changes made by Select Committee their Intermediate Report.

"In our intermediate report we explained what we had been able to do, which was as follows:—

'We have excluded suits for penalties and suits for the recovery of possession of land from the special procedure prescribed in sections 191-197 of the original Bill.

'We have introduced at the opening of this chapter a section (159), modelled on a section in the Presidency-towns Small Cause Courts Act, empowering the High Court, with the approval of the Local Government, to make rules declaring that any portions of the Code of Civil Procedure shall not apply to suits between landlord and tenant, or shall apply subject to modifications. We trust that as experience is acquired of the working of the Courts under the new Act it may be found possible to exercise this power so as to effect further simplifications in procedure.

'For ourselves we must confess that, after the most anxious consideration of the various schemes which have been propounded for shortening and simplifying the procedure in rent-suits, we are unable to suggest anything of importance in this direction which would not involve a serious risk of failure of justice. In particular, while we are anxious to facilitate the service of summons and the proof of such service, we are unwilling to give any presumption of law against an absent defendant except on adequate proof of such service.

'We have, however, with a view to avoiding, as far as possible, the complication and delay which arise from questions as to the landlord's title being raised in rent-suits, made an important amendment in the section (164) which requires a tenant, admitting that rent is due from him, but pleading that it is due not to the plaintiff but to a third person, to pay the amount into Court. Our object is to force the issue of disputed title to be raised separately and independently of the rent-suit, and we have therefore provided that the Court shall, on the money being paid in, cause notice of the payment to be served on the third person, and unless he, within three months, institutes a separate suit against the plaintiff and obtains an order restraining the payment of the money, it will be paid out to the plaintiff on his application.

'We have further added a section (165) providing that when a defendant in a rent-suit admits that money is due from him to the plaintiff but disputes the amount, the Court shall, as a rule, require him to pay the amount admitted into Court.

'We have provided (section 173) that when a plaintiff institutes a suit for the ejectment of a trespasser he may claim, as alternative relief, that the defendant be declared liable to pay for the land in his possession a fair and equitable rent to be determined by the Court.

'Section 207 of the original Bill provided that a landlord or a tenant might institute a suit for the determination of the nature and incidents of the tenancy. We have (section 174) substituted the simpler and cheaper procedure of an application, and have empowered the Court, to which the application is made, to direct that a Revenue-officer shall make a local enquiry into any matter it thinks fit.'

estions referred to High Court.

"In addition we referred two questions specially to the High Court—

'What modifications it may be desirable to make, whether by rules or otherwise, in the Code of Civil Procedure, with a view to expedite the trial of rent-suits; and in particular whether it is desirable that landlords should be empowered to institute, by means of a single plaint, suits for arrears against a number of raiyats holding independently of each other.

'Whether any provision can safely be enacted restricting the right to claim a re-trial when a decree has been given *ex parte*. We are aware that a Judge is in no way bound to admit a re-trial unless he is satisfied that the summons failed to reach the defendant or that he was prevented by some sufficient cause from appearing; but the representations made to us are to the effect that the due service of the summons is systematically denied, and that the Courts too readily accept the plea, thus encouraging tactics the only object of which is to interpose delay and to involve the landlord in unnecessary expense in recovering his dues.'

ply of the Judges.

"These questions were considered and answered by the Hon'ble Judges of the Court in their collective capacity. Their answers were to the effect that the modifications already introduced were unobjectionable, but that no modifications other than those 'could be made in the ordinary law applicable to civil suits, without opening the door to evils which would outweigh the advantages to be derived from increased expedition.'

'The suggestion,' they said, 'made in the Report of the Select Committee that suits for arrears of rent should be brought by means of a single plaint against a number of raiyats holding independently of each other would, the Judges believe, be impracticable and lead to delay, worse, in all probability, than those now experienced. The Judges have carefully considered the question whether, leaving the law unaltered, any changes could be made in the executive orders issued to subordinate judicial officers with a view to expedite the decision of rent-suits. The orders at present in force seem to provide almost all that is necessary to ecure the postponement of other suits to rent-suits and the prompt decision of all rent-suitss which are not contested. The Court proposes, however, to direct that in future undefended rent-suits shall have priority over short suits, though both alike shall, as far as possible, be taken up on the date fixed.

'It would, the Judges believe, be extremely dangerous to enact any such provision as that proposed in clause (*b*) of paragraph (2), to restrict the right to claim a re-trial where a decree has been given *ex parte*, and on this point they agree entirely with the Select Committee. It is true, as has been represented to the Committee, that landlords are frequently involved in unnecessary expense and delay by the tactics of their raiyats who deny service of summons, but it seems absolutely essential, in order to prevent fraud by dishonest agents of landlords in collusion with the process-servers, that raiyats against whom decrees are passed *ex parte* should have an opportunity for applying for a re-hearing.

'The third suggestion is that a defendant in a suit for arrears should not be allowed to appeal from a decree passed against him except on depositing the amount of the decree. This proposal, which might, no doubt, serve to obviate some of the inconvenience, expense and delay now caused to zamindars by recalcitrant raiyats, would, however, it is believed, in many cases involve the defendants in very serious hardship. The Court is not, therefore, disposed to recommend its adoption. It may be observed further that it is always open to a zamindar to execute his decree notwithstanding that it is under appeal, in which case, if execution is stayed, the law provides that security shall be given for the due performance of the order that may ultimately be passed.

'The Judges are fully sensible of the necessity for affording assistance to the landlords in the speedy and cheap recovery of the rents due to them, and are aware that at present much real cause for complaint exists. It would therefore have been a matter of satisfaction to them had they been able to accept any of the suggestions put forward for the simplification of procedure and the removal of the means now too often employed by raiyats to harass their zemindars. It is, however, scarcely possible legally to facilitate the recovery of rents without putting into the hands of unscrupulous landlords or their subordinates weapons which may be easily used for the oppression of their tenants.'

medies proposed the Judges.

"The Judges go on to point out that the only remedies for expense and delay are to be found in the lowering of fees and in the multiplication of Courts. On these points I am not in a position to say anything here, save

that, while I have no doubt that the latter question will be fully considered by His Honour the Lieutenant-Governor, the former, in connection with the scale of court-fees generally, is now under the consideration of the Government of India. Further proposals made by Babu Mohini Mohun Roy with the object of shortening the procedure have since been considered by us. They were referred to a number of experienced judicial officers, but were not favourably received. It seems quite clear that no remedy is to be found either by summary procedure, by making returns of service conclusive evidence of actual service of process, by restrictions on the right of re-trial, or by any similar method. Rent-suits are tedious and expensive, because the issues to be tried are often intricate, and because facts are hard to be got at. With rights and rents recorded, with receipts and accounts properly kept, and above all with trustworthy agents, the zamíndárs would find many of these difficulties vanish. But if there is a real dispute a summary trial will not help. It only means that the real trial of the question at issue is postponed and there are two processes instead of one. I am afraid the Judges touched the heart of the matter when they said: 'It is scarcely possible legally to facilitate the recovery of rents without putting into the hands of unscrupulous landlords or their subordinates weapons which may be easily used for the oppression of their tenants.' I have dealt at some length on this subject and been careful to give the opinion of the High Court, because it is made a ground of reproach to us that we have not given any more summary method of recovering rents. I regret that we have not been able to go further. We have rejected no suggestion having any element of success in it without first obtaining the concurrence of the most competent judicial officers, and we have in addition to those abbreviations already mentioned added some more in the chapter about sales for arrears which I hope will prove useful.

Suggestions by Babu Mohini Mohun Roy.

"The general scheme of the Sale chapter was very fully explained in paragraphs 124-132 of the Statement of Objects and Reasons, and as we have not departed from the general scheme I will not go over the whole ground again, but merely explain the slight modifications of detail which we have ventured to introduce. We have included among 'protected' interests, that is to say those which cannot be voided by the purchaser, the right of a non-occupancy-raiyat to hold for five years at the rent fixed by a Court.

Sales for arrears.

"We have removed the limitation which restricted the decree-holder's right to get arrear-rents out of the purchase-money to such rent only as might be due for six months after the date of decree. It is not in the interest of either party to penalise the landlord's forbearance in abstaining from executing his decree.

"We have, in order to shorten proceedings, inserted in section 163 a clause enacting that in cases under this chapter the order of attachment and the proclamation of sale required by section 287 of the Civil Procedure Code shall be issued simultaneously.

"We have, at the suggestion of our hon'ble colleague, Bábú Peári Mohan Mukerji, inserted a new section (174) allowing a judgment-debtor to apply to set aside a sale of his tenure or holding, on depositing in Court within thirty days from the date of sale for payment to the decree-holder the amount recoverable under the decree with costs, and for payment to the purchaser a sum equal to 5 per cent. on the purchase-money. Applications under section 311 of the Code of Civil Procedure to set aside sales cause expense and annoyance to the decree-holder and auction-purchaser. It is believed that they are often instituted merely with a view to recovering the tenure or holding which has been sold; and it is anticipated that, if a judgment-debtor is allowed to recover his property by depositing after the sale the amount decreed against him, the number of these applications will be considerably diminished.

New section for repurchase of holding on payment of arrears and interest.

"Having decided that no alteration should be made by this Bill in the existing law relating to the incidents of the patni tenure, we have consequently excluded those sections which dealt with the sale procedure applicable to those

Patni sales.

and similar tenures. It will be for the Government of Bengal to deal with the question of making this procedure applicable to the summary sale of other tenures which may be registered under the Bill now before the Lieutenant-Governor's Council.

ontract sections.

"I have a few remarks to make on Chapter XV, which brings together in one focus all the provisions we think it necessary to make in limitation of contract. The necessity of interfering with freedom of contract was fully discussed at the second reading of the Bill, and was then affirmed by the Council. I shall not therefore further discuss this question. I shall only deal with our alterations, and, first, I would point out that, instead of making our restrictions equally applicable to all contracts whenever made, we have divided these limtiations into three classes, the first one referring to all contracts whether past or future, the second to quite recent contracts, the third to future contracts only. In the first class are placed only those contracts which purport to bar in perpetuity the accrual of occupancy-rights, to destroy occupancy-rights already in existence, to allow ejectment without process of law, to prohibit improvements. The second class deals with contracts, purporting to bar the accrual of occupancy-rights during a particular tenancy, and in this class we have decided not to go behind the date on which the Government published the Rent Commission's Report and Bill. It may be fairly said that any contracts of this nature made subsequent to that date have been made in order to defeat impending legislation, and we think they should not be given effect to. In the third class, which only restricts future contracts, we have simply put in legal form the general statement that neither the accrual of the occupancy-right nor the enjoyment of the more important incidents attached to that right shall hereafter be defeated by stipulations in a lease.

Division into three lasses.

econd class.
hird class.

eclamation leases.

"We have left reclamation leases wholly to contract, save that we do not allow them to operate so as to destroy an occupancy-right which has grown up during the lease.

hur and utbundi.

"We have put *chur* lands and *utbundi* lands on a special footing, which is practically the same as that of the ordinary raiyat under Act X of 1859. No occupancy-right will be acquirable in them until they have been held for twelve years, and meantime the tenant will be bound to pay whatever amount may be agreed upon between him and his landlord. We have omitted the chapter in the original Bill relating to *bastu* or homestead lands, and have brought all our legislation on this point into one brief section, to the effect that homestead land when not held as part of the holding shall be dealt with according to local usage; and when local usage cannot be ascertained, then it shall be treated as if it were ordinary raiyati land. The varieties of local usage were so many and of such importance that any regulations which could have been framed must have done harm and have been found inapplicable in many places.

Bastu.

upplemental
hapter.

"There are two alterations only in the Supplemental chapter which need be noticed. One is that when a proprietor or permanent tenure-holder holds his estate or tenure subject to the observance of any specified rule or condition, nothing in this Act shall entitle any person occupying land within the estate or tenure to do any act which involves a violation of that rule or condition.

"The other provides that 'this Act shall be read subject to any Act passed after its commencement by the Lieutenant-Governor of Bengal in Council.' In the absence of some such provision as this, the Bengal Legislative Council would, owing to the wide extent of ground covered by this measure of the supreme legislature, find itself practically debarred for all time to come from dealing with almost every question affecting the relations of agricultural landlords and tenants.

Bill finished.
Further remarks.

"I have now gone through all the more important changes which have been made in the Bill since it came into the hands of the Select Committee, and have endeavoured to put you in full possession of the considerations by which we have been influenced. In performing this task I am well aware of the intolerable tediousness I must have inflicted on you, but I must still ask your

patience for a little time while I offer some remarks as to the value which should be attached to the two opposing lines on which the minutes of dissenting members proceed, and the real amount of protection given to the raiyat by the labours of the Select Committee.

Three classes of dissents.

"Turning now to the dissents, we find that they may be broadly divided into three classes: (1) those which object only to a few specific provisions of the Bill; (2) those which, accepting the Bill as a whole, express dissatisfaction at the insufficiency of the protection given to the raiyat; (3) those which object to the whole scope of the Bill as injurious to the interests of the zamindar.

Specific proposals

"It is not my purpose here to deal with objections to specific clauses of the Bill. The more important have been noticed already; the less important can best be reserved till the specific amendments on them are brought before the Council.

Insufficient protection to raiy

"I wish, however, to say, a few words on those objections which are directed against the general scope of the Bill. It was not to be expected that a Bill of such importance and complexity as this—a Bill which has to deal with absolutely conflicting interests, which purports to set a limit on the power of one class to absorb the fruits of the industry of another class, and which has to regulate their relations in regard to the two leading interests of property and power—it was not to be expected that such a Bill could meet with universal acceptance or could fail to give cause of offence to those who on either side take extreme views. There are some who, if their views were carefully analysed, would see in the raiyat nothing but a serf, who look upon his rights as only interests carved out of the landlord's absolute property in the soil, and as being therefore entirely dependant on the landlord's will and pleasure. There are others who look upon the raiyat as having the true property in the soil, and the landlord only as the tax-collector for the State, as one therefore who should have no more part in settling what that tax is to be or from whom it should be taken than a collector of any other State assessment. Between these two extreme points there are many halting-places, and the dissents show that, while some of our members would have guided us some way towards the latter point, others would have had us adopt the high landlord view of the position and look mainly if not solely to his interests. The dissents are naturally coloured by the dominant idea in the mind of either party, and will, I think, to some extent have the effect of neutralising each other in the public mind. What I would ask the Council to consider is, whether it is true that in the words of one party we have 'signally failed to afford the occupancy-raiyat reasonable protection,' and as regards the non-occupancy-raiyat 'have neither given protection as regards his rent nor facilitated his acquisition of the right of occupancy'—whether it is true, in the words of the other party, that the 'measure is opposed to the just rights of the proprietors of the land and detrimental to the best interests of the country.'

Position of the occupancy-rai

"Let us compare briefly the position of the raiyat under the old law and under the Bill as it stands.

Under the exi law,

"Under the existing law the position of the occupancy-raiyat may be thus described. In the first place, he has a great difficulty in making good his title to occupancy-rights. He must prove that he has held every particular field of his holding for 12 consecutive years, and in the absence of trustworthy village-records the proof is often impossible. He and his forefathers may have resided in the village for generations, but evidence of this is entirely immaterial to the issue. He may be able to show that he has held *some* land in the village in every year of the last 12, but if the fields have been changed his claim to the occupancy-right cannot be maintained. *Secondly*, the law, not content with making the proof of occupancy-rights very difficult to the raiyat, allows him to contract himself out of them, and these engagements, entered into without understanding and forced on the raiyat without adequate consideration, are rapidly becoming a common form. *Thirdly*, the law gives the occupancy-raiyat no protection from incessant enhancement. It enumerates, it is true, the grounds on which enhancements may be sought, but it does not prescribe the

term for which a rent after enhancement is to hold good, and it does not prevent a landlord from instituting annual enhancement-suits, or from annually serving the raiyat with a demand for an enhanced rent. *Fourthly*, the law does not define the raiyat's right to make improvements, even of the most ordinary and necessary character, nor does it determine his rights in them in the event of his being ejected. *Fifthly*, the law makes every instalment an arrear of rent that is not paid on the exact date fixed in the raiyat's engagement or by custom, and allows a landlord to institute a separate suit for each instalment in arrear. As the custom of monthly instalments is common, the harassment which a landlord may thus inflict on his raiyat is intolerable. *Sixthly*, the law makes the raiyat liable to be ejected in execution of a decree for an arrear of rent, even though the sale of his occupancy-right by auction would more than satisfy the debt. Thus he loses, and the landlord acquires, not only the value of his interest in the land, but also of any improvements he may have made, and of any crops which may be still on the ground. *Seventhly*, the law of distraint is such that under cover of it landlords are able, if so disposed, to exercise a ruinous interference with the raiyat's disposition of his crops and reduce him to beggary.

under the Bill.

"To turn to the corresponding provisions of the Bill. *First*, the Bill, by returning to the old principle of the khudkhast raiyat, gives him his occupancy-right not only in the actual lands held for 12 years, but in any land held by him in the village, and it meets the great blot of the old law by facilitating his proof of these rights. He has merely to show that he has held *some* land continuously within the village boundaries for 12 years, and he becomes a settled raiyat of his village. It is presumed in his favour, in any proceeding between himself and his landlord, that in the absence of proof to the contrary he is an occupancy-raiyat of the land which he is found to be holding. This presumption, which cannot operate unjustly to the zamindar, is very rightly thought to be of immense value to the raiyat.

"*Secondly*, the Bill prevents the occupancy-raiyat from contracting himself out of his status.

"*Thirdly*, the Bill puts an effectual check on incessant enhancements. Whether the raiyat's rent be determined by a Court or by private agreement, in either case the Bill says that it shall not be again enhanced for fifteen years. The Bill also puts a strict limit to the amount of enhancement by agreement, and that this protection is considered of real value by the dissentients is shown by the importance they have attached to it. The changes made in the grounds of enhancement in Court have already been discussed. The only change that is in any way likely to prove prejudicial to the raiyat is the enhancement on the ground of a rise in prices, and that not because it is unfair, but because it is workable, while the old law was admittedly impracticable. Even this concession the landlords profess to regard as 'visionary'.

"*Fourthly*, the Bill secures to the occupancy-raiyat power to make improvements and enables him to recover his outlay in case of eviction.

"*Fifthly*, in the matter of rent instalments, the Bill, while leaving the number and dates of instalments to agreement or local usage, provides that an interval of at least three months shall intervene between the institution of successive suits for arrears of rent.

"*Sixthly*, the Bill abolishes ejectment in execution of a decree for an arrear of rent against an occupancy-raiyat, and requires the decree-holder to bring the tenancy to sale.

"*Seventhly*, the Bill has effectually weakened the power of the landlord to use the process of distraint for purposes of simple oppression, though it remains a valuable instrument for the recovery of arrears.

"I say confidently that on all these points the Bill is an improvement on the old law, and, without any injustice to the landlord, fulfils the object of the Government, which was 'to give reasonable security to the tenant in the occupation and enjoyment of his land.'

"To pass now to the non-occupancy-raiyat. I have already, with reference to Chapter VI, gone so fully into a comparison of his position under the Bill with that under the old law, that I need not take you over the ground again; but admitting that a certain amount of peril lies in the power of a landlord to eject him at the expiry of his initial lease when he is first admitted under a registered lease, and when the landlord sues within six months of its expiry, I would ask you to look at the effect of our provisions as a whole. The raiyat can, under the above circumstances, be ejected, but otherwise he cannot be. If the landlord wishes to enhance his rent, he can only do so by a registered agreement or by suit in Court. The raiyat is not to be ejected for refusing an enhancement, but the Court will fix a fair rent and he can hold on at this rent for five years. He cannot contract himself out of the right to acquire occupancy-rights. The Bill allows the period during which he holds under a lease and the period during which he holds at a judicially fixed rent to count towards the accrual of occupancy-rights; and yet we are told that all these things are vain. Neither in the necessity of registering initial agreements and agreements of enhancement, nor in the right to sit on unless ejected by suit within six months of the expiry of the initial lease, nor in the right to a judicially fixed rent with its period of five years, neither in any of these things nor in all of them put together is any protection afforded to the non-occupancy-raiyat nor is anything done to facilitate his acquisition of the right of occupancy. I leave it to you, gentlemen, to decide what weight should be attributed to accusations such as these.

The non-occupancy raiyat.

"Coming now to the objections taken by the landlords, it is more difficult to formulate these, for they deal apparently with more than half the sections of the Bill and must be considered with reference rather to specific clauses than with the general scope of the Bill. The general accusation which I have quoted would seem to have been intended to refer to a Bill which still enforced the transferability of occupancy-rights, the extension of that right to the estate as well as to the village, the gross produce limit, the limitations on initial rents, the fractional limitations on enhancement in Court, the avoidance of all past contracts not in accordance with the Bill. I find no allusion made anywhere to the fact of these provisions having been struck out. I find no allusion to the simplification of the method of enhancement on the ground of rise in prices except that what Mr. Reynolds speaks of as a provision that 'puts enormous powers of enhancement into the hands of the landlord' is sneered at by Bábú Peári Mohan Mukerji as more visionary than real. I can only say that we have endeavoured, and I think have succeeded in our endeavour, to give great facilities for moderate enhancement, and have striven, as far as was possible without injuring the rights of others, 'to give reasonable facilities to the landlord for the settlement and recovery of his rent.' The Council will, I think, easily understand from the general scope of my remarks and from the resistance we have offered to many proposals supported by all the ability and all the authority of the Bengal Government, that we have not lost sight of the just interests of the landlord, and I hope to be able to prove this with regard to the long series of amendments which it is proposed to move on specific sections. There is one complaint made by the representatives of the zamindars, and in a modified form by Mr. Hunter, on which I should like to say a few words. The complaint is that the Committee did not examine witnesses personally. Mr. Hunter sees very clearly that it was not possible for the Select Committee to do this, but regrets that the Rent Commission did not adopt the method—a method which, in enquiries of quite another scope, and, indeed, recently under the hon'ble gentleman's own auspices, has worked most successfully. Well! I am not acquainted with the reasons which induced the Rent Committee to forego this method. My own connexion with the Bill, and my official knowledge of the discussion, indeed, date from a much later time, only from the receipt of the Secretary of State's despatch sanctioning legislation; but I can quite understand that the Rent Commission did not act without good reason.. Those who can recollect the agitation caused by the Indigo Commission of a quarter of a century ago may well have thought it dangerous to start an agitation on the infinitely more important question of rent by a peripatetic Commission of Enquiry. They

Landlords' objection

Personal examination of witnesses.

Probable reasons of the Rent Commission for foregoing this method.

may well have thought that more light would be thrown upon the problem by the opinions and knowledge of the judicial and executive officers, whose business it is to enquire daily into the relations of individual landlords and tenants, than by collecting evidence which, on the side of the rich and powerful, would be forthcoming in abundance, and would be put before them with all possible skill and ability, while on the part of the poorer and humbler side it would be no one's business to collect it, nor could it, in the shape of personal knowledge, be got at save with infinite trouble and at some peril to the witness.

ch a course not sn to the Select mmittee.

"These and other similar considerations may have led them to prefer the method they adopted to that of a Commission going about to take evidence. I am not concerned to discuss the question whether they were right or wrong, for there is very much to be said on the other side; it is sufficient to point out that, when the legislature had once decided the general lines on which we were to proceed, it was no longer open to the Select Committee to adopt this method. Such a course is neither usual nor desirable. In fact the whole constitution of Select Committees of this Council renders it impracticable for them to go about the country collecting evidence. In what we did, however, we adopted, I think, an equally efficacious method. We have, during the past two years, submitted

ethod adopted by Committee.

every section of the Bill twice over to the most thorough sifting at the hands not only of persons interested, but of experienced and impartial officers, judicial and executive, and to Committees which could test the experience and opinions of one officer by confronting them with the experience and opinions of another officer; and if the result has been a great variety of opinions, it is not merely because human nature is so constituted that opinions must differ on questions involving most important and antagonistic interests—questions in which the everlasting debate between old and new, between those who have and those who have not, must come to the front, but also because

ason of great riety of opinions.

the facts themselves differ so widely; the facts of one estate are not the facts of another estate; the facts of one part of the country are not the facts of another part of the country. It is one of the misfortunes of legislation that in this country as well as in others, but more in this country perhaps than elsewhere, we have to make our laws applicable to a number of heterogeneous units of area and population, united together only by one common Government. We have to legislate in the interest of the average, and to neglect what is local and

fficulty of legislat- g for the whole of ngal.

exceptional. This leads no doubt to difficulties. We have to insert some provisions which, in parts of the country, are not wanted; we have to omit other provisions which, in some parts of the country, are certainly desirable. Accepting this as the necessity of our position, not only have we endeavoured to get the fullest measure of light and knowledge to bear on our deliberations, we have also endeavoured to guide ourselves by that light and knowledge. We have given time—ample, abundant and overflowing—for the elaboration of criticisms, and for the collection of opinions, and the criticisms and opinions so collected and elaborated have been carefully and laboriously digested. The amount of literature that has gathered round this subject is such that no one except under the sternest sense of duty could possibly read, much less assimilate, it, and it really leaves nothing new to be said on any point in this wilderness of controversy.

"The Bill was before the public in one shape or another for three years before it was introduced into this Council, and during the two years it has been before the Select Committee every section has been discussed and re-discussed from every possible point of view. I can safely say that never has a Bill been introduced into this Council which has had so much thought and consideration expended upon it by the outside public. There is really a ghastly irony in the accusation that we are now giving no time for consideration and are asking you to pass the Bill with undue and indecent haste; I am unwilling to look upon such an accusation as made in a malicious spirit, but it is really difficult to suppose that any one can attach serious credence to it. I can understand the advocates of the zamindars wishing to drop the Bill altogether. I can understand, though I cannot sympathise with, those advocates of the raiyats who would see this Bill abandoned in the hope that this may necessitate a more drastic

measure being passed hereafter; but what I do not understand is, how any one, who regards public and not personal interests, can wish that a growing agitation should be inflamed, and that dangerous passions should be further exaggerated, by a renewed and useless discussion of matters which further discussion cannot possibly further illumine. Yet this is, I understand, the recommendation made by the representatives of the zamindars. In fact, what I am now saying is really addressed to what is practically the first disputed question for the Council to decide. You have to consider whether this Bill should be re-published with a view to a fresh collection of opinions, involving a fresh consideration by the Select Committee, and the hanging up of the whole subject for another year, when precisely the same tactics would be repeated. I would answer that there must be some point of finality in all this discussion. The whole scope of the work of the Select Committee, since the Bill was last re-published, has been to prune excrescences and to cut away novelties. Our alterations during this session have not been such as to insert any novel provisions of serious importance into the Bill, nor such as to offer material for discussion outside the well-worn lines. We have ample evidence from various parts of the country—from Mymensingh in the east to Behar in the west, from Rungpore in the north to Orissa in the south—that the agitation on this subject cannot safely be prolonged, and that whatever is done in regard to the Bill should be done finally and at once. I believe I shall have the support of His Honour the Lieutenant-Governor in saying that it would, in his opinion, be seriously injurious to the interests of the province if legislation is now postponed, and I have no hesitation therefore in asking you to reject the amendment that the Bill should be re-published, and to decide on proceeding at once with the consideration of our Report and of those amendments of which notice has been given."

The Hon'ble MR. QUINTON said:—"The impressive words with which my hon'ble friend Sir Steuart Bayley has just concluded his speech may, I think, notwithstanding the plea for delay put forward by my hon'ble friend Bábú Peári Mohan Mukerji in the first amendment standing in his name, justify us in congratulating ourselves on at last approaching the end of this long controversy, and on reaching the final stages of the Bill, which has been under the consideration of the Select Committee for the past two years.

"My hon'ble friend Sir Steuart Bayley has, on the part of the Government of India, acknowledged our services in generous terms, and whatever may prove to be the value of those services I am sure that not one of us failed to appreciate the gravity of the work on which we were engaged, and the momentous results that must follow on our recommendations; for the task which this Council has undertaken, and on which we were required to advise it, namely, the revision and amendment of the Statute-law respecting the rights and interests of landlords and tenants in Bengal, is certainly second in importance to no measure which has come before it during the present generation. That law affects vitally the interests, the well-being, even the very means of subsistence, of a population of 60 millions of people, for the bulk of whom agriculture furnishes the sole means of support. With such a law, when it works well on the whole, no wise Government would interfere; but when it has been found mischievous in its operation, when it has been left behind by the progress of the agricultural classes, or has ceased to be applicable owing to altered economic conditions, then it is the duty of the Government to step in, and to bring the law into accordance with the requirements of the time. In fulfilment of this duty the Bill was introduced, and referred to the Select Committee, whose report, now on the table, we are, I hope, about to take into consideration. That report expresses the opinion of only a majority of the Committee on the points with which it deals. It was not to be expected that unanimity should prevail respecting a measure purporting to regulate questions so numerous, so delicate and so important, among members holding such antagonistic views as those entertained by extreme partisans on the side of the landlords and of the tenants. It was hopeless to think that those who considered that the tenantry throughout Bengal and Behar were living in such a state of contentment and prosperity that any attempt to amend their condition by law was altogether uncalled for could be brought to agree on provisions for that purpose with others who

believed that a diametrically opposite state of things existed, that the condition of the peasantry in many parts of the provinces was deplorable, and that the defects and abuses of the law by which this has been allowed and encouraged called for a speedy and drastic remedy.

"The reports and opinions elicited by the publication of the Bill, as introduced in 1883, and as revised in 1884, furnished the Select Committee with very valuable materials, in addition to those already accumulated, for deciding on the various contested questions, and the result has been a report with which neither party is fully satisfied. This dissatisfaction has been forcibly expressed in the recorded dissents, some of which blame us for what we have done, while others find fault with us for what we have left undone. Some censure us for needlessly and recklessly interfering with the existing state of things, others for having stopped far short of what was necessary to correct its evils. These contradictory animadversions raise a strong presumption that the majority of the Committee has avoided extreme measures on either side, and has turned a deaf ear to the songs of the sirens that, often with more vociferation than melody, attempted to lure us from what will, I hope, be found to be the course of prudence and of safety.

"Nor can this moderation be justly condemned so long as it effects the essential objects of the Bill. If there is one point more than another with which we have been impressed in the course of our deliberations, it is that the Government of Bengal is far behind other Governments and Administrations in the possession of accurate information respecting the condition and relations of the agricultural community. The existence of the Permanent Settlement relieved that Government from the necessity in its own pecuniary interest of making a record of rights in land—a measure the importance of which was realised at an early period in those provinces where settlements of land-revenue recurred at periodical intervals; and the mode of collecting the revenue by the single process of selling the defaulting estate at head-quarters deprived it of an agency in the interior of the districts, charged with the duty of making itself and its principals thoroughly acquainted with the landed classes, and all facts bearing on their condition. This being so, we felt that we were travelling along a somewhat dark road, and that a safe arrival at our destination was not likely to be achieved by rapid driving. The revised Bill undoubtedly does not go as far in the direction of tenant-right in its broadest sense as the Bill originally introduced, but it provides, I believe, adequate remedies for evils the existence of which is undoubted. It strengthens the defences of the raiyat at points which have proved to be weak; it does not provide him, at the expense of the landlord and possibly to his own destruction, with torpedoes to ward off attacks which there are no good grounds for anticipating.

"My hon'ble friend Sir Steuart Bayley has explained clearly and at length the changes we have made in the Bill as introduced, and the reasons which led us to make them. I shall not, therefore, weary the Council or prolong what is likely to be a protracted debate by following him step by step over the same ground. The importance of the provisions respecting the occupancy-right will however justify my dwelling on them for a short time even at the risk of repeating in feebler language what has been said about them by my hon'ble friend; and in what I shall say I have in mind the objections of those who think we have done too little for the raiyat rather than of those who consider that we have done too much. My hon'ble friend the Mahárájá, who is to speak after me, will, no doubt, put this last class of objections as strongly as they can be urged, and I have equally little doubt that most of the speakers who have to follow him will fully answer his objections on this score.

"The land of Bengal is divided into 110,456 estates, owned by about 180,000 proprietors; subordinate to these proprietors come a body of middlemen whose numbers can be only guessed at; they are probably about a million. Lastly, there are 10 millions of raiyats. Of these last, occupancy-raiyats form by far the most numerous and important class. About their numbers also there is much uncertainty; the lowest estimate I have seen puts them at 60 and the highest

at 90 per cent. of the whole number of raiyats, and, being the permanent agency by which the cultivation of the soil is carried on, they are the backbone of the agricultural organism of the country. It is clear from this that the provisions respecting them will have effects far more wide-reaching than those relating to the other classes of the agricultural population, and that if we have failed in adequately protecting the rights essential to their welfare, we have failed in the most important portion of the duty laid upon us. To show that we cannot justly be reproached with such failure I shall, following the example set by my hon'ble friend, ask you again to consider how the Bill found the occupancy-raiyat and how it has left him.

"The constituent elements of a tenant-right theoretically perfect are fixity of tenure, fair rent and free sale—the three F's. I need not enter upon an economical dissertation on the relative importance and value of these three principles. My hon'ble colleagues are probably much better able to instruct me than I them on the subject. We had, however, to consider in Select Committee to what extent these principles should be given effect to in our provisions respecting occupancy-raiyats.

"After long discussions and some fluctuations of opinion we came by different roads to the conclusion that in respect of free sale—or the power of transfer—the law with one exception, to which I shall allude more fully when dealing with fixity of tenure, should be left as it is. We were fully conscious of the stimulus to enterprise and improvement of the land which the power of raising money on the mortgage of his holding might give to a frugal and industrious tenant, but when we came to apply the principle generally, we found the risks attendant on suddenly enlarging in this way the credit of a weak and impoverished tenantry like that of Behar so great, and the difficulties in other localities of conceding to the landlords a veto upon the practice without strangling a healthy and rapidly-growing custom which is, we believe, of great public benefit to be so insuperable, that we determined to follow the cautious advice of the Famine Commissioners, and allow the right to be governed as at present by local custom.

"Those gentlemen write as follows on the subject of transfer in Bengal:—

'Though on the whole we regard the general concession of the power of sale of those* rights to be expedient and ultimately almost unavoidable, the immediate course to be followed by the Government must no doubt be to a great extent governed by local custom. Where the custom has grown up and the tenants are in the habit of selling or mortgaging their rights in land, it should certainly be recognised by law, and where it has not it may be questioned whether the law should move in advance of the feelings and wishes of the people.'

"Article 41 of Mr. Justice Field's Digest states that under the existing law the holding of an occupancy-tenant is transferable by custom, and that in such cases no registration in the landlord's sherista is necessary. We, by section 183 of the Bill, expressly save customs, usages or customary rights not inconsistent with the Act, and by an illustration to that section call attention to its effect on the usage of transferring occupancy-holdings without the landlord's consent. My hon'ble friend Mr. Amír Alí has, I observe, an amendment on the paper proposing that we should go much further in this direction than we have done. The discussion on this will give an opportunity for a fuller statement of the reasons which actuated us* than I need now trouble Council with. So far as regards free sale we have left the position of the occupancy-raiyat unchanged.

"Under Acts L of 1839 and VIII of 1869, a raiyat who claimed occupancy-right in any land was obliged to prove that he had held that land for 12 consecutive years immediately before the dispute arose. The unexpected effect of this provision was to make the acquisition of the status depend upon the will of the landlord, who had merely to shift the tenant about from one field to another, or, simpler still, to have the patwárí's papers, which were the chief evidence the Courts had to go upon, manipulated so as to show a change in the tenant of the holding or of some of its constituent fields. By either of these measures he

* *i. e.*, occupancy.

might prevent the accrual of the occupancy-right, or defeat it when it had accrued. The Bill renders these methods of getting round the intention of the law, if not impossible, at least a matter of great difficulty. Occupancy-right will henceforward depend, not on the holding of any particular land for 12 years, but on holding as a raiyat for that period any land in the village in which the right is claimed. To prevent the accrual of the right the landlord must turn the raiyat out of the village altogether—a much stronger measure and probably more unprofitable than shifting him about from field to field within the village; while, on the other hand, the raiyat will find it much easier to prove that he has held some land in the village for 12 years than that he held the same land for that period. The same reasoning applies to the falsification of the patwari's papers. Such falsification will now be made more difficult to effect and more easy to detect. All raiyats are practically declared to be possessed of the occupancy-right in their holdings whose tenure of any land in the village as a raiyat has lasted for 12 years from the 2nd of March, 1871, or any subsequent date; so that no amount of shifting within the village will now avail to extinguish the raiyat's occupancy-right in land held by him, and no tampering with village-papers short of omitting the raiyat's name altogether will be effective for the same object.

"Besides this we provide further that all raiyats holding land shall in case of dispute be presumed until the contrary is proved to have held all or part of it for 12 years—a presumption of which the raiyat has not hitherto had the benefit, though it is, in our opinion, based upon existing facts.

"Again, under the present law, occupancy-rights could not be acquired in land known in different parts of the country as sír, zírát and khámár. We have reason to believe that in many localities this reserved area has been unjustly and illegally extended to the injury of the raiyats. We have laid down strict rules for the guidance of the Courts in determining what is khámár or zírát, and have stopped the growth, after the passing of the Act, of the area in which raiyats are debarred from acquiring rights of occupancy.

"These provisions constitute a great advance upon Act X of 1859, and facilitate the acquisition of the occupancy-right far beyond the present law. I shall not anticipate the discussion on the amendment of my hon'ble friend Mr. Reynolds, by alluding to the still greater facilities which the addition of the words 'estate' to sections 20 and 21 would afford. I hope I have shown that even if that amendment be not accepted the gain to the tenant from the provisions of the sections as they stand is very great.

"Act X of 1859 left it open to a landlord and tenant to defeat the accrual of the occupancy-right or to extinguish it when it had accrued by written contracts. The mischievous effects of this have been so fully explained to Council both to-day and on previous occasions when the Bill was under debate, that I need not now dilate upon them. Suffice it to say that we have in express terms declared to be null and void contracts of this nature, whether made in the past or in the future. The law will no longer give effect to contracts whereby a helpless tenant signs away his legal rights at the dictation of a powerful and unscrupulous landlord.

"The existing law allowed of the ejectment of an occupancy-raiyat from his holding if the amount of a decree against him for arrears of rent was not paid within 15 days. This provision furnished landlords with a ready weapon for destroying the occupancy-right. It gave them a direct interest in dealing oppressively with their tenantry, and it has not been everywhere allowed to remain a dead-letter. The Bill puts an end to all this. It recognises the principle that the occupancy-raiyat has a valuable interest in his holding which the landlord cannot be allowed to confiscate, by enacting that an occupancy-raiyat shall not be liable to ejectment for arrears of rent, but that his holding shall be liable to sale in execution of a decree for such arrears, and that the rent shall be a first charge on the holding. The interest of the tenant will thus be saved from forfeiture when he is unable, from calamities of season

or other misfortune, to meet his landlord's demands, and he will obtain so much of the market-value of it as remains after the claim for rent has been fully satisfied.

"Here also we considered that the tenant should be debarred from contracting himself out of his rights, and we have provided that no contract, whether before or after the passing of the Act, shall entitle a landlord to eject a raiyat otherwise than in accordance with the provisions of the Act.

"In close connexion with the point on which I have been dwelling is the legal power conferred upon the tenant in Bengal for the first time by this Bill of making improvements on his holding and of being recouped for such improvements when ejected by the landlord in the shape of compensation, or when his holding is sold in execution of decree or otherwise, by the enhanced price paid for the value added to the holding. This principle of compensation for tenants' improvements was adopted in Oudh in 1868, in the North-Western Provinces in 1873, and the extension of it to Bengal by the present Bill adds a strong bulwark to fixity of tenure for the occupancy-raiyat in that province. Taken with the other provisions respecting this element of tenant-right, to which I have been calling the attention of Council, it will place the Bengal occupancy-raiyat in a better position as regards fixity of tenure than that held by the corresponding class of cultivators in any other province of British India.

"I now turn to the question of enhancement, which is of no less importance. Fixity of tenure alone is of little use so long as the rent at which the tenant holds can be frequently and capriciously enhanced; on the other hand, nothing affords a stronger screw for squeezing successive enhancements out of a tenant than the arbitrary power of ejectment. An occupancy-tenant will under the threat of ejectment from his holding—generally the sole means of support for himself and his family—agree to enhancements which, at first small, gradually raise the rent to an amount which leaves him the minimum sufficient to subsist on. The two rights hang together and re-act on each other.

"By giving greater fixity of tenure we have restricted the landlord's power to exact capricious enhancements, and our next duty was to regulate the powers of enhancement directly conferred on him by law. These were twofold—enhancement by contract and enhancement by suit. The present law places no restriction on enhancement by contract. This was a point on which the Local Government laid very great stress, and at their instance we have provided that all contracts for the enhancement of rent must be registered, that the enhancement is not to exceed the previous rent by more than two annas in the rupee, or 12½ per cent., and that the rent is to be fixed for the same term as is fixed in case of enhancements by suit.

"The provisions of Act X of 1859 relating to enhancement by suit, according to the admissions of the tenant's friends and the complaints of his enemies, have proved for the most part unworkable—a state of things which my hon'ble friend Mr. Reynolds has described as a public scandal. If the law recognises the landlord's right to enhance, it should certainly not attach to that right conditions which render the exercise of it impossible. My hon'ble friend Sir Steuart Bayley has explained fully the alterations we have made with the object of removing this defect in the present law, and I shall confine myself to showing how far we have endeavoured to provide that the increased facilities for enhancement afforded by the Bill shall not operate unfairly or oppressively as regards the raiyat.

"At starting I may observe generally that, the easier enhancement by due process of law is made for the landlord, the less inducement he will have to resort to irregular and oppressive methods for securing the same end—a result of no small gain to the tenant when we find in some localities rents doubled by irregular enhancements in 16 years, and raised 500 per cent. by the same means in some estates within a comparatively recent period.

"The first of the grounds on which enhancement is authorized by the present law is 'the prevailing rate'. This ground I should gladly have seen

omitted from the Bill. It appeared to me that, looking to the impossibility of now discovering a parganá rate in most parts of the two provinces, and considering the abuses which have been proved to have attended the working of this ground of enhancement and the greater facilities afforded to the landlords for enhancements on other grounds, they would have had no just cause of complaint if this had been abolished. The question, however, was decided otherwise by the Select Committee, and their decision has been accepted by the Executive Government. But while so deciding they felt that some attempt should be made to prevent the possibility of the manufacture of bogus rates to be used as a lever for raising rents all round: and have laid down a rule, to be found in section 31, which will, we hope, be effective for this end. My hon'ble friend Mr. Reynolds has an amendment on the paper which he considers will be much more effective for the same purpose. Both the section and the amendment agree in providing that there must be a substantial difference between the rent sought to be enhanced and the prevailing rate, and that the prevailing rate is to be ascertained with reference to what has been actually paid for not less than three years, and both enable the tenant to show as a bar to enhancement that there is a sufficient reason for his holding at such an exceptionally low rate. Thus, whether the amendment be accepted or not, the tenant who has been allowed to hold at a low rate for special reasons will be protected from enhancement; only rents which are substantially below the prevailing rate will be enhanced, and the prevailing rate must be not a bogus rate, but one actually paid for such a period as will be a guarantee for its *bonâ fide* character.

"The section also provides for an enquiry by a Revenue-officer as to the prevailing rate if the Court cannot otherwise ascertain it satisfactorily. I need scarcely point out to the Council that the facts are more likely to be elicited by such an enquiry than by the evidence of witnesses whom the contending parties bring forward.

"I cannot understand how these provisions can be objected to as being but feeble checks on the abuses which have hitherto attended the working of the prevailing rate as a ground of enhancement. The omission of them and the retention of the prevailing rate in its present form would, in my mind, be much more disadvantageous to the raiyat.

"The next ground of enhancement, namely, a rise in the average local prices of staple food-crops during the currency of the present rent, has been substituted for a rise in the value of the produce of the land for which enhanced rent is claimed. The reasons which led to the change have been fully explained by my hon'ble friend Sir Steuart Bayley. The landlords complained that the law in this respect had become a dead-letter from the difficulty of working the rule of proportion laid down in the great rent case, and to meet this complaint, which appeared to be well-grounded, the present scheme was devised. The Select Committee believed it to be sound in principle, and considered that they could guard against its operating to the injury of the tenant by the special provision which gave an enhancement in proportion, not to the whole rise of prices, but only to two-thirds of such rise, thus allowing a deduction of one-third to cover increased cost of cultivation, and still more by the general rule, to which I shall allude hereafter, by which enhancements on all grounds are to be qualified.

"The change has not given satisfaction to either party, and I see that my hon'ble friend Bábú Peári Mohan Mukerji has placed on the paper an amendment proposing to revert to the old ground of enhancement which formerly proved so ineffective. If the old rule in all its clumsiness be restored at the request of the landlords, the advocates of the tenants will no doubt rejoice, and the landlords must expect little sympathy with future complaints as to the rule of their choice being unworkable. If the scheme of the Bill be retained, the tenant gets the benefits of the limitations to it which I have above referred to.

"Next, enhancement is allowed by suit on the ground of landlords' improvements, the justice of which cannot be gainsaid. Under the existing law this ground of enhancement, from the difficulty of proving the making and value of the improvements, must have operated unfairly to both parties. On one hand, it threw obstacles in the way of a landlord establishing his rights to enhancement, on the other it held out inducements to the fabrication and production of false evidence in support of claims which the raiyat as the weaker of the two parties could not always resist. The provisions of the Bill respecting the registration of landlords' improvements, and as to the considerations which are to guide the Courts in determining the value of the improvement to the tenant, will prevent enhancements being made for improvements which are not *bonâ fide* and which do not add to the value of the tenant's holding. No enhancement can be successfully claimed for an improvement which is not registered, and which does not increase the productive powers of the land; and in determining the amount of the enhancement, the Court must have regard to the cost of the improvement, so as not to give the landlord an inordinate increase of rent for what cost him but little, to the cost to the cultivator required for utilizing it, to the existing rent, and to the ability of the land to bear a higher rent.

"Lastly, comes the ground of enhancement on account of increase in the productive powers of the land due to fluvial action. This is a modification of the existing law, which contains no qualification as to the cause which gives rise to the increase in productive powers. My hon'ble friend Sir S. Bayley has explained that all other causes may be expected to fall under those which bring about a rise of prices, and, if they be not so, it is clear that the modification is in favour of the raiyat. In no case is the landlord to receive more than one-half of the increased increment so brought about.

"Among the grounds of enhancement under the existing law was the circumstance that the quantity of land held by the raiyat is proved by measurement to be greater than the quantity for which rent was previously paid. This provision appears in a different place in the Bill for reasons which were given in the Statement of Objects and Reasons, but an important alteration has been made in it for the benefit of the raiyat by the restriction that the landlord is not to measure more than once in ten years. In the absence of a cadastral survey such frequent measurements are a preliminary to a demand for increased rent, and give rise to serious disputes and much bitter feeling. Further, by requiring the Court, when determining the area for which rent has been previously paid, to have regard to the origin of the tenancy, the length of time during which it has lasted without dispute, local usage and like considerations, we have endeavoured to guard against enhancements which were really a rackrent being granted on this plea.

"I have thus gone through the grounds of enhancement recognised by the Bill, and have shown that they are each qualified by special restrictions to prevent their operating so as to weigh down the raiyat. We have, it is quite true, removed the public scandal to which I have already adverted, but in so doing we have not necessarily, we believe, subjected the tenant to rackrenting.

"Besides the limitations on the working of each rule, we have laid down for all cases the broad principle that the Court shall not in any case decree an enhancement which is under the circumstances of the case unfair or inequitable. It has been objected that this rule, however broad and benevolent in intention, will prove from its vagueness of no practical value for the protection of the tenant, and that we should have defined precisely in the Act for the guidance of the Courts 'a fair and equitable rent.' To such objections I can only say, try your hand at such a definition. The many able officers who have taken part in this long controversy from its first beginning, the Government of Bengal, the Government of India, and I may add the Imperial Parliament, have all failed to produce a definition of a fair and equitable rent which could be safely acted on by the Courts; and our Committee need feel no shame at being unable to do that to which they proved unequal. The Courts must be left to deal with each case on its own merits, and to exercise a judicial discretion

arrived at after a careful consideration of all the circumstances. That such a discretion will be inoperative in checking unfair and inequitable enhancements I cannot bring myself to believe.

"But although we were unable to lay down a rigid rule for determining a fair and equitable rent which would suit the varying circumstances of the six or seven millions of occupancy-raiyats throughout the two provinces, there was one matter on which we were nearly all agreed, that a rigid rule was both expedient and necessary. We recognised fully the landlord's right to enhance the rent of his tenants, and we authorized him to bring suits for the purpose on certain specified grounds, but we were satisfied that when he had thus attempted to enhance a tenant's rent, and obtained his enhancement, or failed to obtain it because there were no good grounds for it, the tenant should not for a considerable period be subjected to the worry and expense of a similar suit, or to threats of a similar suit, which would be equally effective for the landlord's object. This term was fixed in the Bill as introduced at 10 years, thereby following the precedent of the North-Western Provinces Act. In the Bill now before Council the term has been extended to 15 years—a term which, in my opinion, does not err on the side of excessive length. This provision gives the raiyat rest for 15 years. He cannot, as at present, be harassed by annual notices of enhancement which threaten to absorb the fruits of his industry and prevent his applying his full skill and labour to the cultivation of his holding. He has now the assurance that, let the karindár or thíkádár bluster as they may, so long as he pays the rent last settled, no legal pressure can be brought to bear on him; and this security and the independence engendered by it nerve him to resist all the more stoutly demands which have no legal warrant. I cannot hold this provision to be a feeble palliative; on the contrary I believe it to be a strong shield against unjust enhancements.

"We have also enabled the Courts to temper the rigour of their decrees by empowering them to direct that the enhancement shall be progressive if they think hardship would be the effect of giving full effect to it at once.

"The provisions as to the reduction of the occupancy-raiyat's rent are much the same as in the existing law, except that reduction, like enhancement, is made to depend on variation in the prices of staple food-crops. The same reasons which justified the adoption of this as a ground of enhancement warrant its retention as a ground of reduction. The arguments which tell for or against it in the one case are equally applicable to the other. If it is inequitable that a landlord should obtain an enhancement of rent on account of a general rise in prices or fall in the value of money as indicated by a rise in the price of staple food-crops, it cannot be contended that the tenant's rent should be reduced for this reason. On the other hand, those, of whom I am one, who hold that a rise of prices is a proper ground for enhancement of rent are ready to admit that it is an equally strong ground for reduction.

"We, however, go one step further than the existing law in this matter. We not only allow reduction for suit on specified grounds, as at present, but we provide a remedy for an evil which has already proved a scandal to the administration, namely, irregular enhancements of rent carried to such an extent as to endanger the welfare of the locality or public order. Under the former class fall those enhancements up to 500 per cent. to which I have already alluded, and under the latter those which brought about the Pubna and Mymensingh riots. With such evils the ordinary course of law is an engine too cumbrous and too tedious in its operation to deal effectively. People cannot be allowed to perish, or on the other hand to spread destruction over whole parganás while cases are being tried by the ordinary tribunals and fought out in appeal to the High Courts. The remedy must be prompt and drastic. We have accordingly empowered the Local Government, when it is itself satisfied and can satisfy the Governor General in Council that such a remedy is needed, to apply it by enabling a Settlement-officer to settle all rents and to reduce rents in any specified area generally or with reference to specified cases or classes of cases, if in his opinion the maintenance of existing rents would on any ground, whether mentioned in this Act or not, be unfair or inequitable.

"The power is not one to be lightly exercised, but the knowledge that Government has in its hands such a weapon must operate as a check on the oppressive exactions of grasping landlords.

"I have, I fear to the great weariness of my hearers, enumerated in detail the provisions respecting the rent of the occupancy-tenant, because it is on this point mainly that we are accused of having done least for him, or rather of having rendered his position worse than it is at present; but the objection underlying the arguments of some at least of the assailants of the Bill on this ground is not that we have done too little for the raiyat but that we have done too much for the zamíndár. They oppose really any ground of enhancement which can be made workable. They think that the raiyat will be better off by taking his chance under the existing law, which is so difficult for the Courts to give effect to, than if subjected to rules, however guarded, which can be made a reality. They are loud in their clamours against the restrictions by which it is proposed to qualify the rules in the Bill, but they have failed altogether to suggest others of a more satisfactory nature, or to substitute grounds of enhancement which would be free from the abuses to which they believe that these will be liable. We, on the contrary, think that no grounds of enhancement should be offered to landlords which the Courts are unable to work; and, while recognising reasonable and workable grounds of enhancement in the Bill, we have, to the best of our ability and judgment, made such provisions as will prevent their working unfairly or inequitably. By doing so we withdraw a strong encouragement hitherto held out to irregular enhancements, and, instead of a fitful and uncertain protection arising from the difficulty of working the rules, we give to the tenant the security that the rules cannot be worked to his injury.

"As regards another class of objectors who describe the restrictions we have imposed as 'feeble palliatives impotent to restrain the evils which the working of the enhancement sections is calculated to produce,' I hope I have satisfied the Council that this description does not accurately represent such measures as the modification of the rule respecting the prevailing rate, the deduction of one-third of the increase claimable on account of rise of prices, the provisions that only *bonâ fide* improvements by landlords and the benefits flowing from them to the tenants can authorise enhancement, the precautions to guard against a tenant's rent being unfairly enhanced on re-measurement, the general rules as to all decreed rents being fair and equitable, as to rents once settled being undisturbed for fifteen years, and as to progressive enhancements, and lastly the power reserved to the Local Government to send in the Settlement-officer to reduce rents without reference to the grounds specified in the Act when the local welfare or public order require the adoption of such a course. If these be feeble palliatives it is difficult to say by what other restrictions the grounds of enhancement could have been qualified which would not amount to a declaration that those grounds might remain on the Statute-book as a reasonable concession to landlords, but that in the interests of the tenants no practical effect should be given to them.

"We have further, as explained by my hon'ble friend the mover, applied remedies to the abuses of the right of distraint, of the collection of rent by monthly instalments, of the power of bringing, or threatening to bring, frequent suits for arrears; and we have endeavoured, by rules respecting the delivery of receipts and statements of account, to furnish all tenants with materials for resisting unjust claims for arrears of rent. Though petty in appearance, these are matters which closely affect the happiness and welfare of the raiyat.

"Finally, we have by the Record-of-rights chapter laid the foundation of a system which will in time extend to Bengal the benefits which have elsewhere been found to follow in the preparation and maintenance of an accurate record of the rights of the different classes having interests in the soil. This system cannot be brought into force over the whole country at once, and must of necessity be gradual in its operation, but as it spreads it will dispel the darkness as to agricultural facts which has so long covered these provinces, will

determine the mutual rights of landlords and tenants where they are uncertain, and by furnishing both with a correct measure of those rights will increase the value of landed property, will remove causes of strife, will deprive the powerful of pretexts for enhancement, and will strengthen the weak to withstand oppression."

The Hon'ble THE MAHÁRÁJA OF DURBHUNGA said:—"I regret that I cannot support the motion of the hon'ble member that the Bill should be taken into consideration. In my opinion it is not submitted to the Council in a form in which we can reasonably be asked to consider it. It comes before us disapproved and discredited by all parties. The raiyats are as much opposed to it as the zamíndárs; and are we, who are legislating in the interests of the zamíndárs and the raiyats, altogether to disregard their wishes and their opinions? Is there a single raiyat or a single zamíndár in the country who desires that this Bill should be passed? And if it is an undoubted and an undisputed fact that neither zamíndárs nor raiyats desire this measure, will this Council be justified in forcing it upon them? Are we to suppose that zamíndárs and raiyats are alike ignorant of their true interests? Surely they may be trusted to know whether a law will injuriously affect them or not. But if we are to disregard the expressed wishes of the parties who will be affected by the proposed legislation, upon whose opinion is the Council to rely? Are we to rely on the Select Committee? The Select Committee consisted of eleven members, but out of this number only three have signed the Report without reservation. All the other members have on most important particulars dissented from the Report. The Report, therefore, and the Bill, which has been drafted in accordance with the report, is practically the Report and Bill of three members only: and two out of the three hon'ble members have no practical experience of Bengal. The Bill, therefore, comes before us discredited and disowned by the majority of the Select Committee itself. If the Select Committee had been unanimous in their recommendations, some sort of justification might have been found for proceeding further with a measure which has been so universally condemned. But with this great divergence of opinion among the members of the Select Committee, there seems to me no other alternative but to withdraw the Bill. It cannot be expected that the members of this Council should accept the Report of the Select Committee as an authoritative document. If the members of the Select Committee are not themselves agreed as to the principles of the Bill, is it reasonable to expect that this Council should act upon their recommendations? If the Bill in its present shape is proceeded with, all the questions which engaged the attention of the Select Committee will necessarily be re-opened in this Council, and every hon'ble member will have to form his independent opinion upon them. But here an initial difficulty presents itself. There is absolutely no reliable information upon which you can proceed. The Select Committee had no evidence before them. They acted upon official opinions, which were generally conflicting and often misleading. My hon'ble friend Mr. Hunter has well described in his dissent the difficulty in which the Select Committee was placed. 'The Select Committee,' he writes, 'has been asked to deal with the entire relation of landlord and tenant in Bengal without being furnished with any body of cross-examined evidence to guide its deliberations. Opinions and statements, often conflicting and sometimes contradictory, have been furnished to it in large numbers. But it has not had the means of ascertaining which of these opinions and statements would have borne the test of cross-examination, or how far their discrepancies might have been reconciled. Absence of such data is the more to be regretted in a measure affecting land right in Bengal, for in Bengal, almost alone among the provinces of India, there is no central department of statistics * * * which might in some measure have compensated for the evidence of witnesses heard in the districts. * * * The result has been to leave in my mind an extreme uncertainty in regard to several important classes of rights with which the Bill deals.' Is this Bill, then, my Lord, ripe for discussion? Are we to legislate in uncertainty? Are we to pass a measure which will revolutionize and disorganize the whole rural economy of the country, without having any reliable data before us? From the very first the zamíndárs have

demanded an enquiry. They deny the facts and the assumptions upon which the Government of Bengal has proceeded. I will give one or two illustrations. The justification of the occupancy clauses in the Bill was based upon the fact that the zamíndárs of Behar were in the habit of shifting their raiyats to prevent the accrual of occupancy-rights. This fact, in their memorial to the Secretary of State, the zamíndárs of Behar emphatically denied. From my own experience I can affirm this denial. I can state as a fact that such a custom is not prevalent in Behar, and that I have never even heard of its existence, and yet the whole of the legislation with regard to those occupancy-rights has proceeded on an assumption which is absolutely baseless. Another charge made against the zamíndárs of Behar was that they rack-rented their raiyats; that rents were so excessive that the raiyats were left without a reasonable margin for subsistence. In their memorial to the Secretary of State the zamíndárs of Behar conclusively, as I think, showed that the charge was baseless, but the restrictions on enhancement have been mainly introduced into the Bill on the assumption that the charge is true. Is this fair upon the zamíndárs? Have they not a right to ask that their rights shall not be taken away on mere assumptions? Have they not a right to demand that the charges brought against them shall be sifted and examined before the legislature is invoked against them? But the Bill itself contains the best commentary on this charge. These raiyats, who are supposd to be so ground down and oppressed, are allowed to demand from their under-raiyats 50 per cent. more than they themselves pay. You are asked to restrict the demand of the zamíndár upon the raiyat, and at the same time to allow the same raiyat to demand for the same land 50 per cent. more than he pays himself. Can any inconsistency be greater? I have merely given these illustrations by way of example to show that we are legislating in the dark. The foundations of the Bill rest upon facts which are alleged and denied, and upon assumptions which are challenged as untrue. We have no ascertained facts before us upon which we can possibly proceed. There is assertion on the one side and denial on the other, and the truth has yet to be ascertained. If this is a correct description of the position in which we stand, is it possible to proceed with the Bill? How are we to decide between conflicting assertions? We may repeat in this Council the interminable discussions of the Select Committee, but in the absence of ascertained facts we shall not be able to arrive at any satisfactory conclusion. To me it seems amazing that we should be considering the matter at all. Among the many millions of people who will be affected by the Bill not a single voice has been raised in its favour. If it is passed, for whose benefit will it be passed? It surely cannot be wise to pass a Bill which will benefit no one and irritate every one. I look upon the Bill as disastrous in every point of view. It will be disastrous in a political point of view, because it will be regarded as a flagrant breach of the Permanent Settlement, and will therefore shake the confidence of the landed proprietors in the Government. It will be disastrous to the zamíndárs, because it will not only deprive them of their rights but will render zamíndári management for the future absolutely impossible. It will be disastrous to the raiyats, because it will give rise to endless disputes and lead to interminable litigation. For these reasons I am strongly of opinion that the Bill should be withdrawn, and that any measure which may hereafter be proposed should be drawn up on the lines of the present law, instead of sweeping away existing landmarks and disorganizing the whole fabric of rural society. I shall, therefore, vote against the motion that the Bill be taken into consideration."

The Hon'ble MR. EVANS said:—"I have to apologise to the Council and to Your Excellency for not being fully prepared to speak to-day on this important measure. Knowing the strong opposition of the Mahárájá of Durbhunga to to the Bill, I not unnaturally counted upon his speech taking up the rest of this afternoon. I can only ask the indulgence of the Council in case my observations should in some respects be discursive, and in other respects insufficient, considering the importance of the measure before the Council.

"Your Excellency can well believe that it is with great reluctance that I have taken any active share in this legislation. My own heavy professional

engagements and the active opposition of many of my personal friends to this measure all combined to make me desire to avoid it. Believing, however, as I did and do, that some legislation on the subject was, in consequence of the admttted imperfections of the Act of 1859, necessary for the welfare of the country, I did not feel myself at liberty to decline to give what assistance I could to the undertaking.

"In this task the Select Committee have been beset by many difficulties, of which perhaps one of the greatest is the initial mistake that was made in not having two Bills, one for Behar and one for Bengal. I have always thought this a mistake, and I believe other members of the Select Committee have thought the same.

"In Behar, as a rule, the landlord is strong, the raiyat weak. In most parts of Bengal, notably in the Eastern Districts, the raiyat is stronger than the landlord. It was, however, decided by Government that the Bill was to be a general rent law, and not two special laws to meet the wants of the two provinces. We have done our best under these circumstances. But the result is unavoidable, that those whose eyes are mainly fixed on the poorest parts of Behar say we have not done enough for the raiyat, while those who mainly regard the condition of Eastern Bengal accuse us of having done too much for the raiyat and having done too little for the landlord. There have been very strong statements before us that in Behar, or portions of Behar, the raiyats are so rackrented that they have absolutely no sufficient margin for subsistence; they are described as having an actual insufficiency of food. If things are as described by some of the officers of Government, and if this state of things can be remedied by legislation, it would justify legislation of a most drastic character for the special local areas where these evils prevail. If it be shown that these evils arise from rackrenting, and can be cured by stopping enhancement altogether, or even by reducing the rents, it should be done by special legislation.

"But all that we can do in laying down general rules for the regulation of the law between landlord and tenant is to provide such rules as shall prevent such a state of things arising where it does not already exist, and to arm the executive with power to interfere, if absolutely necessary for the public welfare, pending the further enquiries necessary for legislation of such an exceptional character. This I think we have done. My hon'ble friend the Mahárájá of Durbhunga denies that such a state of things exists among the raiyats in Behar, and it may be that the poorest class are sub-raiyats. It may be, again, that many of them are technically raiyats holding as such a very small portion of land, too small for the subsistence of themselves and their families, and eking out a scanty subsistence by holding land at a rackrent under substantial raiyats and by working as day-labourers. This state of things would require a different class of legislation. These considerations have led me to the belief that this question of peculiar special local areas must perforce be left to special legislation. It would be wrong to legislate for the sixty-nine millions in Bengal upon any idea that such was the case in general, or that such things prevailed to an extent which would justify us in offering a remedy by any general rules. Having said this much, I desire particularly to say that if such a state of things can be shown to exist, and to be capable of being remedied by legislative attempts, I for one am perfectly willing to adopt that special remedy which may be shown to be necessary. Before noticing the special provisions of this Bill, I desire to say a few words upon the history of the occupancy-right. The subject has been so exhaustively discussed on both sides that I can add little to what has been said, and what little I have to say arises mainly out of a fresh pamphlet recently published. I have here before me a pamphlet entitled 'Proprietory Rights of the Zamíndár,' issued by the Central Committee of the Landholders of Bengal and Behar. I am glad to see from this work that upon one point we are agreed. In page 12 I find these words:—

'Under the customary law the resident or occupancy raiyat was entitled to hold his land so long as he paid the general rates which were settled for the village or parganá in which he lived: so far both sides agree.'

"We have this much to agree with at any rate, that, on the universal customary law of India, there is a fixity of tenure, so long as a man pays his rent; and the book goes on to say that the real point in the zamíndár's opinion is the question of how he is to enhance, and it goes on further to say that the will of the zamíndár should be the sole arbitrator of the amount of enhancement, and it challenges us to show that at any time in Bengal since the time of the Permanent Settlement the ruling power has ever exercised the power of regulating the assessments upon the individual raiyats. No doubt, though by the institutes of Akbar, the relative proportions of the produce were settled between the cultivator and Government, yet, as Mr Shore said, even when the Government professedly dealt with the raiyats, it was found impossible in practice to assess each individual cultivator, and so the distribution of the assessment was left in Bengal to the zamíndárs. But this is very different from a right to demand what they pleased. I certainly agree with the Court of Directors that it was 'a general maxim under the Moghul Government that the immediate cultivator of the soil, paying his rent, should not be dispossessed. This necessarily supposes that there are some measures and limits by which the rent could be defined, and that it was not left to the arbitrary discretion of the zamíndárs.' It is, I think, quite evident that there was a right of some sort in the cultivator which was not illusory. There was some kind of right as regards the quantity of rent. The fact that it was the zamíndár and not the Sovereign that fixed the rent can be very easily accounted for. In a huge despotism like that of the Moghuls,—a central despotism,—powers to a very large extent were delegated to the Provincial Governments, which in turn delegated many of their powers to the great princes and the great zamíndárs; and we all know that these great princes and zamíndárs exercised the authority and the functions of Government, both civil and, to a certain extent, criminal as well; and therefore it came to pass that with regard to these matters of revenue over which there was no control by any Courts in those days, nor any written law, no redress could be had save possibly by petition to the Executive Government, which would, save in rare cases, receive little attention. So far as we know, no questions of rent were allowed to be discussed in the Courts, and the consequence was that the settlement of all questions *quoad* the raiyat was in the hands of the zamíndárs not as owners of the land but as delegates of the Sovereign. It is admitted now that the zamíndár had really proprietory and hereditary rights; but how could he assert those rights? Could he go to a Court of law and ask for a decree against the Sovereign Power? He had to take what he could get from the Sovereign Power; hence it was that with a despotic Sovereign Power all rights must necessarily be uncertain in their enjoyment. There was no tribunal to appeal to, and all proprietory rights were of a precarious nature. But we know that, however despotic a Government may be, rights of property must be recognised more or less. Subjects and rulers both recognise the existence of unwritten law and customs even under a despotism, and are generally guided by them, even though they often use their powers to trample on them. Therefore, I do not think there is anything in this objection, that the Sovereign did not directly fix the individual raiyat's assessment. If the Central Government was far away, the delegate was allowed to do what he liked. I think it comes to what Mr. Harrington says in his 'Analysis' that in the decay of the Moghul Power the ruling Power plundered the great zamíndárs, who were in turn forced to plunder the raiyats. That is, I think, the real explanation of much of the confusion which has been thrown upon this subject. When in later and more peaceful times the matter came to be examined, then the fact became clear, which is stated in the Report of the Parliamentary Committee of 1832, that—

'In the general opinion of the agricultural population, the right of the raiyat is considered as the greatest right in the country; but it is an untransferable right.'

"And they go on to say:—

'This part of the evidence before your Committee has been particularly adverted to, as it is of so much importance that the Government cannot be too active in the protection of the cultivating classes, for the vital question to the raiyat is the amount of the assessment he pays.'

"If this be so, we really find the position to be as follows:—It being conceded now that there is such a thing as a customary law giving such occupancy-rights, it follows that everybody who before the Permanent Settlement had held or reclaimed land in his own village, without exception, acquired occupancy-rights. What was the effect of the Permanent Settlement? It was a contract between the Government and the zamíndárs in which the Government gave the zamíndárs certain rights, and the Government had declared, so far as the Government could declare, that the zamíndárs were the proprietors. But this cannot be said to make any alteration in the unwritten law, nor could it affect any persons who were not parties to the contract; and the case may be stated thus. The man who came in the next day after the making of that settlement, who claimed land or held land in his own village, was under the same old customary law as before, and by virtue of that law acquired a right of occupancy. The truth is that, at the time of the Permanent Settlement, Government settled their own disputes and quarrels with the zamíndárs. They were very numerous, and zamíndárs had just reason to complain, and did in fact make the complaint heard in Parliament. The final settlement of all these difficulties as to the respective rights of Government and zamíndárs was come to in the Permanent Settlement. The Government, finding that the matter of the rights of the raiyats was an obscure and complicated matter, which they could not go into on account of its intricacies, left it alone, because they thought it could probably be settled by agreement between the zamíndárs and their raiyats, much in the same way as they had settled the difficulties between themselves and the zamíndárs. But what was the position? The raiyats continued as they came in to cultivate their lands and to acquire the same rights under the same old customary law, which was never abrogated save so far as it might be affected by the express provisions of any of the Regulations. The only difference was that, whereas before they acquired their rights against the Government and zamíndár, after the Permanent Settlement they acquired the same rights against the zamíndár, as representing his own and the Government title, and that the Government had left only a perpetual charge on the land with the duty solemnly reserved to protect the raiyats, and to legislate when they thought it necessary for their protection.

"But the hoped for result did not come to pass. The raiyats and zamíndárs did not settle their respective rights amicably, and so it befell that, at the end of 60 years, the legislature found it necessary to lay down some rules in regard to the enhancement of the rates of rent which were demandable from the raiyat. Now one of the main arguments of this pamphlet is that the legislation of 1859 was a breach of the Permanent Settlement; and they make it out in this way. They say that before the Permanent Settlement they had the right to demand rent according to their own arbitrary discretion. Shorn as they have been of their civil and criminal jurisdiction, and no longer representing the ruler's power, they still contend that their will is the measure of enhancement, and that the effect of the reign of law which the British Government have introduced is that the Courts ought to register their arbitrary demands as decrees, and that the resistless might of the executive should be at their call to enforce their decrees and protect their persons. It is upon this view of their rights that the pamphlet really proceeds. It is upon that ground, they say, that we departed from the Permanent Settlement in that Act of 1859. I deny that altogether. I think it was clearly competent to the Government to legislate as it then did. But it is idle to go into a question like that, because, if they once admit that the Government had the power, in 1859, to make these rules to regulate the rent, and to define the occupancy-raiyat, they cannot deny that this Council has in 1884 the right to amend the definition and the rules. If they rest on the argument that the legislation of 1859 was improper, we can only say that that question is long ago concluded by authority, and that it is useless to discuss it save as a forensic exercise. As regards the position in 1859, it stood very much in this way. Nothing had been done for 60 years, and it was found that matters were not satisfactory. The legislature came to the conclusion to make rules. They first desired to define who had the right of occupancy, so as to enable the Courts to ascertain that fact. Then they pro-

ceeded to make what they considered to be fair and equitable rules to guide the Courts in decreeing enhancements of the rents of occupancy-raiyats, and they made an express reservation that the occupancy-right should not accrue in respect of any land as to which the raiyat had contracted expressly that he would give it up at a certain time. As regards those raiyats who had not a right of occupancy, it was decided that they must give up the land on reasonable notice; but that so long as they were allowed to remain, no more than a fair and equitable rent could be demanded from them.

"These were the main provisions, but complaints were soon heard. The zamíndárs complained that the grounds of enhancement were unworkable, and that they found moreover often insurmountable difficulties in obtaining in fact the enhancement to which they were in theory entitled; while those who had at heart the interests of the raiyat complained that the effect of the definition as construed by the Courts was to defeat the intention of the framers of the Act, and to shut out from the status of occupancy a large number of raiyats who were entitled to it. It was complained of on both sides. The raiyats, or those who spoke for them, complained that they had very great difficulty in proving the occupancy-right. They pointed out the immense difficulty of proving 12 years' continued cultivation of the same plot of land, in that there were no fences as in England. The raiyat might be holding five or six little plots in a large plain of rice-land divided into plots by temporary ridges of mud. The only documentary evidence, measurement-papers and zamíndári records of rents and holdings were all in the hands of the zamíndárs and liable to falsification by zamíndári servants. They also complained in respect of various portions of Behar that there was a practice of shifting them from one village to another. Now I understand my hon'ble friend the Mahárájá to say he has ascertained that that is not done for the purpose of preventing the accrual of the occupancy-right. That may be so, but this much is certain, that for some reason or other the raiyats in many, if not most, parts of Behar were unable to avail themselves of the protection of the occupancy clauses even to the limited extent which their brethren in Bengal could and did. On the other hand, the zamíndár complained, and complained rightly, that he could not get the enhancement he was in theory entitled to. We all know the immense difference between what is the result in theory and fact. It was one thing to discover the motive power of steam and another to construct the locomotive engine. The data were left to the Courts to discover, and unless the Courts found the data it was impossible to work the rules at all; and in working these rules there were very many difficulties. I will not go into them in detail; they are familiar to all who are conversant with the subject. Now it is a very demoralising state of things when we dangle before a man's eyes his rights, and assure him they are his rights, and send him to our Courts to enforce them, and then provide the Courts with such rules that the odds are against his getting them. Perhaps the most workable of the rules was the 'prevailing rate' as interpreted by the Courts, but the vagueness of the expression 'places adjacent' rendered this uncertain. Besides, if the 'prevailing rates' were too low, he got no remedy under this head. It has been said that it was the outcry of the zamíndárs on this head, and on the score of difficulty in realising rents, that led to this legislation, and that we have forgotten this, and legislated in favour of the raiyat instead. But we have tried to grapple with both the evils above mentioned by altering the definition in favour of the raiyat and making the grounds of enhancement workable in favour of the zamíndár; and if we have failed to facilitate in any marked degree the realisation of rent, it is because all the summary remedies proposed failed to yield just and satisfactory results. Having failed ourselves to do any more than is here set forth, we applied to the Judges, and the Council have seen their answer.

"As to the charge of having legislated for the raiyat without sufficient reason, you will have seen what has been said about the imperfection of the Act of 1859, from its passing to the present day, and attention had been directed afresh to this matter by the recent famines, and it was felt to be unjust to redress the complaints of the one side without taking into consideration the just demands of the other side. Besides, it became apparent that our best

method of carrying out the often declared policy of the Government of protecting the cultivating classes, who form the bulk of the population, lay in extending the definition of the occupancy-right in such a way and to such an extent as to secure the fruition of that right to the great mass of the raiyats, who in my judgment ought to possess and enjoy it. Believing that with an advancing education nothing but trouble can befall us if our laws do not recognise what the agricultural population firmly believe to be their old and just right, that is, the right of occupancy, I have not hesitated to accept such amendment of law as seemed necessary to that end. I will endeavour to describe briefly what we have done on this essential point. The whole revenue map of Bengal, speaking roughly, is divided into small village areas of different sizes and shapes called mauzás. Now, a resident raiyat had by the old custom a right of occupancy in the land in his own village, but in no other land. New villages sprang up, and even within the same village area arose detached clusters of homesteads, subsidiary villages or tolas came into existence, many of them near the boundary of the next village; and as the cohesion of the old village communities with their old organisation decayed, it became more common for the inhabitant of one village to become a permanent cultivator, though not a resident, of an adjoining village. It was thought right in 1859 to make permanence of cultivation and not residence the ground of the occupancy-right. I think this was only such a modification of the old law as might fairly be made to suit the altered conditions of the times, and so the rule laid down in 1859 was that whether a raiyat was a khudkhast raiyat or pykasht raiyat, yet having shown that he cultivated the same land for twelve years he should have a right of occupancy. The mistake was in providing that he should show that he had cultivated that particular piece of land for twelve years. The amendment that we have made is by providing that it should be enough that he is a permanent cultivator either in this or that village area, and that he should thereupon be considered to be an occupancy-raiyat of those village areas in which he is a permanent cultivator. Now this makes a great difference, as we get rid of the whole difficulty of proving that he cultivated a particular plot of land for twelve years. If he is a cultivating raiyat of one mauzá or village where he has his house and in two mauzás alongside, he should be held to be a settled raiyat of the whole three mauzás and have a right of occupancy in all of them.

"It must be abundantly known that a raiyat is not a man who goes about as a nomad, but is really attached to his own village; and so it follows in reason and common sense that he cannot cultivate except near his own village where his home is. If he takes up land he generally takes it up permanently. He may take it up for a temporary purpose, but ordinarily he takes it up either in his own mauzá or in the adjoining ones, and then no power can drive these men out of their own villages. The result is that this rule goes far to secure that the ordinary class of raiyats shall be entitled to the occupancy-right. We have made a further provision. Whereas the Act of 1859 said 'you shall be an occupancy-raiyat of every piece of land which you have cultivated for twelve years,' yet it has this exception, 'provided that the landlord does not prove a contract by which the raiyat took up the land on the condition of not being an occupancy-raiyat.' It is no doubt a strong thing to override a written contract, but it was thought that there was a tendency to insert this in every contract, and there is no doubt that it would be inserted to a very large extent; and therefore the Committee assented, though not without reluctance, to the insertion of a provision by which the raiyat is barred from contracting himself out of his occupancy-right. It was of very paramount importance to my mind that we should secure this right of occupancy to the raiyats, and not leave room for any device by which it might be defeated, bearing in mind that with illiterate and poor persons anxious to get land a provision of the kind might easily be slipped into a document. It was also apparent that both the zamíndárs and under-tenure-holders here are not people who desire the possession of land for cultivation, but they are simply rent-receivers. The only thing they desire is that the land shall be cultivated by the raiyats, and that they will pay as much rent as possible, and as regards the bulk of the zamíndárs of

Bengal, there is not much hardship, because you are merely attaching a customary incident to the holding, and the only result is that the landlord is bound to enhance according to certain rules and not arbitrarily. Such a man cannot very much complain if we provide that the land shall be held under such circumstances that the right to enhance shall not be arbitrary but according to fixed rules. But there is another class of proprietors in respect of whom there really appears to be considerable hardship. These are persons who acquired land for the purpose of cultivating, at an expense beyond the power of the raiyat, certain valuable crops, such as tea and indigo. They have great ground to complain of these restrictions, namely, that it prevents them letting out temporarily to residents of the village any lands which they do not for that year wish to cultivate themselves. They say, very rightly, 'we want to let out the lands, which we wish to be cultivated for a year or two.' Take an ordinary case. The indigo plant derives its nourishment very far down in the ground, and it is a very exhausting crop. Rice, on the other hand, grows right on the top of the land, and does not exhaust the land except near the surface. An indigo-planter has in his hands a large tract of land, say, of 2,000 bíghás, on which he grew indigo last year. The raiyats, on the other hand, have another tract of land in their possession, and they come under the new Bill and say, 'let us have the land, which will give us an abundant crop of rice, and do you take our land for indigo for this year. We will pay you so much for your land, and we will give you back your land next year.' Under our legislation the zamíndár is obliged to say 'I must let the land to a person from another village, because you will acquire occupancy-rights in this land; you are not competent to contract, and therefore, though a stranger offers me only half the rent, I must either let it to him or keep the land fallow or try and grow another crop of indigo, because the legislature has determined that you shall not contract yourself out of the right of occupancy. I should have to trust to your honesty, because the law will not recognise a contract entered into by you.' There is no doubt whatever of the very considerable hardship of this provision, and the only thing which will justify the doing of it is that the class it will affect is small. It is not very clear how landlords can protect themselves against this provision. Possibly they may do so by letting the land to a stranger or by getting the raiyats to exchange the lands which they cultivate, under some form of contract not amounting to a tenancy. But this, even if possible, would not meet all cases. I still hope that my hon'ble friend Mr. Ilbert may see his way to drafting some clauses which will give relief in these cases, while providing against abuse.

"The evil to be guarded against is that, if a raiyat is allowed to contract himself out of the occupancy-right, such a condition would, I fear, in time be be found in every pattá, and thus the main object of protecting the occupancy-right would be defeated. The result of this legislation is that the bulk of the raiyats must be occupancy-raiyats, though new raiyats coming in from time to time would not become occupancy-raiyats until the expiration of twelve years.

"We have gone further and provided that when a raiyat is found cultivating as a raiyat, that is, paying rent for any piece of land, he shall in a suit by his landlord to whom he pays rent have the advantage of a presumption that he has been cultivating that piece of land for twelve years.

"The reasons for doing this are that the documentary evidence on this head is in the landlord's hands, and not in his, and that as a matter of fact most of the land is cultivated permanently, and the raiyat is often so poor and illiterate and so ill equipped to meet litigation, and so ill provided with money and reliable evidence, that it was feared that, without some provision of this kind, our efforts to secure him the enjoyment of the occupancy-right would not have the desired effect.

"This provision has been much complained of, but many of the strictures made on it are based on misconception. He does not by this clause get a general presumption that he is an occupancy-raiyat in consequence of his holding some undisclosed piece of land in the village or the estate. He gets the

presumption only as against the landlord to whom he pays his rent, and who has the best evidence in his hands, and only as regards the particular land in dispute. This limitation, when duly borne in mind, disposes of many of the objections made against this presumption, though no doubt some remain in the case of the auction-purchaser, and will have to be discussed on the proposed amendments. But I think, in spite of them, it should be retained. As to the relief to the raiyat in cases when his occupancy-right is threatened to be disputed in Court, it is immense. The difference in all countries is great when the onus of proof is shifted on one side or the other. The person on whom the onus of proof lies has always to discharge a heavy burden. But if the onus of proof is so burdensome in all cases in countries where facts are more or less ascertainable, what must it be in this country, where everything brought before the Courts is too often illusory, where oral testimony evidence is so often worthless, and documentary evidence is frequently forged? I don't mean to say that the zamíndárs tamper with their documentary evidence, but it is quite certain that the gumáshtas and other inferior servants do it. This being the state of things, it makes an enormous difference on which side the burden of proof is thrown, and it may be said that it is easier for the zamíndár with his documentary evidence to prove that the particular piece of land has not been held by the raiyat for 12 years than for the raiyat to prove that it has been so held. I think that is going a long way in behalf of the raiyat, and I am astonished to find that my hon'ble friend Mr. Reynolds appears to think that we have not gone far enough, and that we ought to give him an occupancy-right in the estate, if he has held any land in any part of it for 12 years. I must point out the difference between a village and an estate, and the effect of introducing the word 'estate,' which has been cut out by the majority of the Committee. The villagers are the villagers of a particular village, just as much as parishioners are parishioners of a particular parish; and the best illustration is to describe a village as a parish. Then the position is this. If a man is asked where he comes from, he at once says, 'I am so and so, the son of so and so, of a particular village.' On the other hand, an estate is an abstraction, a revenue-unit on which the Government revenue is paid, and which is liable to be sold up in default of payment of revenue. This unit is sometimes very large. It extends sometimes to 50 or 100 miles. Still the zamíndárs frequently sublet the estate in whole or in part, often in a number of perpetual tenures, generally known in Bengal as patnís. Each patnídár may again sublet in perpetuity by one or more under-patnís, and so on.

"Now, it is the lowest in gradation of the under-landholders who has to deal direct with the raiyat. He perhaps has in his tenure 10 villages out of 100 or 1,000 forming the estate, or he may have only one village. He can tell who are the raiyats of his villages. He has got power there and the means of knowledge, but with regard to the other villages in the estate he knows no more than I do. Why should the tenure-holders of other villages give him any information? Now, what is the result? When in good faith a small tenure-holder has let a little piece of land to a stranger, this stranger says 'No doubt I said I will give up the land in a year or two, but I have a brother 20 miles away in the same estate; and although I am not even on the register of the landowner there, I enjoy it jointly with my brother, and under the cover of my brother I am a settled raiyat of the whole estate, and therefore I cannot cultivate any land in this large estate without acquiring the right of occupancy.'

"The particular landlord of this man knows nothing of the distant place, and cannot well ascertain whether the story is true or false. There is no warrant for this in the old customary law of the country, and I do not see any reason for doing that which it is so very difficult to justify. I am aware that this word 'estate' is in the Secretary of State's despatch, and in the Bill as originally framed; but it is doubtful if the Secretary of State ever considered this particular point, or used the word in this sense. But whether he did or not matters little, for neither his despatch nor the Bill as first drafted contained the presumption, and it is very evident to me that my hon'ble friend cannot have both. It is going altogether too far.

"I hope I have satisfactorily shown that we have done a great deal for these occupancy-raiyats, and that we have strong reason for doing it. I have next to consider what we have done for the zamíndárs, because the allegation is that, while we have done a little for the raiyat, we have done nothing for the zamíndár. First of all, we have provided that the rise of prices shall be a ground of enhancement. It appears to me that that is in effect to fix the present rent in the staple grain of the country, so that the zamíndárs shall get the benefit of a rise in the value of the grain, with this proviso, that they shall not get the whole of the rise but only two-thirds, one-third being reserved to cover the increased cost of production, and that the rise should be a rise in the average price of over a period of ten years. It must be evident that this will be very beneficial to the zamíndár. First, we know that the value of money, as compared with the value of grain, has been falling; that 12 annas per maund was the price of rice at the time of the Permanent Settlement, and we see how enormously more silver it now takes to purchase a maund of rice. The result of this amendment is to establish a sort of self-acting scale by which the Courts, by performing a simple sum in arithmetic by reference to the Government price-list, would regulate the enhancement, and the zamíndár would be enormously benefited, and saved much of the present harassing and uncertain litigation. We know that in a great part of the country the rise in the price of cereals has been very great, but the provision in the Bill merely fixes the rent of the zamíndár, so far as the ground goes, at so many maunds of grain. At the present time no permanent fall of prices need be expected, as prices are steadily rising over decennial periods, though they are falling in certain years which only affect the average. No doubt the zamíndár may say, 'Why do you call this a ground of enhancement at all? It is merely adjusting the rent to meet the depreciation of money as compared with grain.' But it is something which he had not before, and which will give him steady enhancement, and, this being so, no word-splitting will alter the reality of this ground of enhancement, and most zamíndárs who wish to get on without harassing litigation will hail this as a substantial relief from the present position as regards the power of enhancing occupancy-raiyats. On the other hand, it has been said that this is a very sharp weapon to place in the hands of the zamíndárs, and that this enhancement ought to be treated as a great boon, and that, this boon being granted, the prevailing rate ought to be struck out. But this is simple justice to the zamíndár if you accept the Secretary of State's clear enunciation that the rents at present existing are to be considered fair, and not to be reduced except under special cases. The real meaning of the complaint is that it is believed that certain parts of Behar are rackrented already, and that any enhancement we legalise is an unmixed evil.

"If the districts of Behar are so rackrented, nothing you can do in the way of laying down general principles will help it. You must have special legislation to meet such cases. I therefore say that what we have done in respect of enhancement on the ground of rise in prices, while it is but justice to the zamíndár, greatly betters his position, and is a substantial amendment in his favour. Then we come to the question of the prevailing rate. It has been said that that provision should be struck out. I wish to point out that enhancement on the ground of the prevailing rate has existed in one form or another from the time of the Permanent Settlement. This ground of the prevailing rate is a ground on which enchancement was allowed, and it was put in the Act of 1859, and it has been worked ever since. We have been strongly pressed by the Government of Bengal to drop the 'prevailing rate' as a ground of enhancement. And I observe that His Honour, in his official dissent, assumes, on the strength of the opinion given by various persons, that this ground is never worked except by fictitious rates. But though there are false cases started under every law that we have made, and fictitious evidence manufactured to meet the requirements of the law, yet, so far as I can learn, the majority of the cases on the prevailing rate contain no more perjury or fabrication than seems to be incidental to the bulk of litigation in this country. At any rate, the appeal pending in the High Court, in which the Government claim on the

ground of 'prevailing rate,' enhancements from 100 to 400 per cent., has a strong bearing on this and the next point.

"As to this point, it would seem to show that the legal advisers of Government share my opinion that it is possible to prove an enhancement case on the ground of the prevailing rate without having recourse to fictitious rates or any demoralising process, for it cannot be supposed that any element of that character enters into a case which is in charge of that venerable body the Board of Revenue and the officials under its orders. Of all the grounds given in Act X of 1859, the ground of the prevailing rate has, I think, proved the most workable. I cannot share the apprehension of my hon'ble friend Mr. Reynolds that we have left the occupancy-raiyat defenceless in the matter of fair rent and liable to be forced up to a rackrent.

"The 'prevailing rate,' which is even more necessary under this Bill than it was before to check the effects of fraud and favouritism of gumáshtas and others, cannot bring the rent higher than the present prevailing rates as increased in money expression by the fall in value of money as compared with grain. They seem therefore fair general rules for places not already rackrented. As to those places which are rackrented (if any), I have already expressed my opinion. I have thought it necessary to give reasons for the retention of the 'prevailing rate,' although there is no amendment proposing to strike it out, because the majority of the Committee differed upon the matter with the Government of Bengal, and it appeared necessary to me to justify the position taken up by the majority.

"Section 29, clause (*a*), I consider to be absolutely indefensible. Mr Henessy's memorial has shown that a large proportion of his raiyats have holdings under Rs. 5, and that the cost of registering contracts is prohibitive in such cases, but he has also drawn attention to the fact that in many places it is impossible to get the raiyats to give kabuliyats or take pattás. He instances the case in which the Commissioner of Bhagulpore, Mr. Alonzo Money, entirely failed to force the raiyats to do so on a ward estate. And it appears that Mr. Reilly, managing the Chanchal Estate under the Board of Revenue, has equally failed. We all know that it was made a universal rule under the Permanent Settlement regulations that the engagement as to rent should be in writing. We all know that it has been found impossible to enforce this, and that the rent engagements in many parts of the country are still oral, and that the only trustworthy evidence of what the raiyat has agreed to pay is to ascertain what he has actually paid. It would appear that the real effect of sections 28, 29 and 30 is to provide that those raiyats who have no written engagements and who traditionally refuse to sign anything can never be enhanced legally except by suit. What the effect of this will be in cases in which they have orally agreed to enhancements and have paid at enhanced rates for a year or more it is difficult to tell. This matter should be seen to, and some provision made for it. But apart from this I regard clause (*a*) of section 29, which protected the raiyat from agreeing to an enhancement of more than two annas in the rupee or 12½ per cent. out of court as exceedingly mischievous, and likely to lead to lamentable consequences in many cases both to landlord and tenant. It is fatal to the raiyat in many cases.

"Take the Government case against a large body of raiyats in Malanagor, to which I have just referred. There the Government had a very heavy claim, from 100 to 400 per cent., against the raiyats, who number in all 600 or 700. It was certain that, unless the raiyats could establish fixity of rent, an enhancement of far more than 12½ per cent. would be decreed, as they most undoubtedly held for a very long time at very low rates on condition of growing oats. Is it reasonable that, if a test case had been tried, or from some other reason, the raiyats came to the conclusion that it would be to their interest to accept a 25 per cent. or even 50 per cent. enhancement, they should be prohibited from doing so, and the landlord should be forced to drag them each one into Court, and obtain decrees for the full amount he was entitled to, with costs, stamp-fees, &c.? There are large numbers of raiyats holding at low rates on condition of cultivating indigo, and it is within

my personal knowledge that, when it is proposed to discontinue indigo, they agree willingly to large enhancements of the rents, considering it beneficial to themselves to do so. Mr. Henessy states that he has let lands, the letting value of which is one rupee, for eight annas on condition of the raiyats growing indigo. The raiyats would all be enhanceable on the ground of 'prevailing rate' when indigo is discontinued, and would probably consent to a 50 per cent. enhancement. Is it just to them to force them into Court with its heavy expenses? Is it just to the landlord to force him to undergo the expense ruinous to him unless he recoups himself by ruining the raiyat? It is not just, nor can I believe it is necessary. At the time of the Permanent Settlement it was thought right to leave everything to contract. We have found that freedom of contract must be limited in certain cases, just as in England it has been found necessary in the matter of hares and rabits. But if there is one thing which the raiyat thoroughly understands and is specially heedful about, it is the *narikh* or rate per bíghá which he is to pay. This is the one subject which he thoroughly understands, and which he is most deeply interested in. It is most difficult to get him to consent to an enhancement unless he is satisfied he cannot resist. It is by watching test cases and the fate of his neighbours' litigation he satisfies himself that it is more to his interest to agree with his adversary than go to law. It is a cruel mercy to him to insist against his better judgment that he shall be ruined by litigation. If the raiyat is not given power to contract in these cases, it is difficult to know in what cases he ought to have the power. I do not think that 100 years of British rule has left the raiyat in so much less intelligent a condition than he was when we came, as to call for any such provision. I know well it is intended to protect him in contracting with one more powerful, but in this case I think this protection is illusory and the mischief very real.

"As regards the motion before us and the question of re-publication, I will only say that I regard the kernel of the Bill as sound, and the general object and scope of it as salutary, and that it should be proceeded with and necessary amendments made in Council. The recent modifications have been in the direction of meeting just objections of the zamíndárs, and I am not aware that any new matter has been introduced into it which would call for re-publication. In considering the desirability of future delay the possibility of agitation among the raiyats should not be lost sight of.

"The hour is late, and I will reserve the remarks I have to make on various other sections for the Motions to amend those sections, which are very numerous."

The Council adjourned to Monday, the 2nd March, 1885.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Monday, the 2nd March, 1885.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B., G.C.M.G., G.M.S.I., G.M.I.E., P C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., C.I.E.
The Hon'ble J. Gibbs, C.S.I.,C.I.E.
Lieutenant-General the Hon'ble T. F. Wilson, C.B., C.I.E.
The Hon'ble C. P. Ilbert, C.I.E.
The Hon'ble Sir S. C. Bayley, K.C.S.I., C.I.E.
The Hon'ble T. C. Hope, C.S.I., C.I.E.
The Hon'ble T. M. Gibbon, C.I.E.
The Hon'ble R. Miller.
The Hon'ble Amír Alí.
The Hon'ble W. W. Hunter, LL.D., C.S.I., C.I.E.
The Hon'ble H. J. Reynolds.
The Hon'ble Rao Saheb Vishvanath Narayan Mandlik, C.S.I.
The Hon'ble Peári Mohan Mukerji.
The Hon'ble H. St. A. Goodrich.
The Hon'ble G. H. P. Evans.
The Hon'ble Mahárájá Luchmessur Singh, Bahádur, of Durbhunga.
The Hon'ble J. W. Quinton.

BENGAL TENANCY BILL.

The adjourned debate on the Hon'ble SIR STUART BAYLEY'S Motion that the Reports of Select Committee on the Bill be taken into consideration was resumed this day.

The Hon'ble MR. GOODRICH said:—"It is right that I should, however briefly, express my opinion on the two questions to which each member of the Council must presently reply in the affirmative or negative.

"In the first place, the necessity of immediate regulation by law of the relations between landlord and tenant seems proved. In the second place, the Bill in question will limit the landlord's rights no further than the public interest demands.

"My assent to the second proposition is, like the adhesion to the report of most of the members of the Select Committee, given subject to some reservations which I will briefly indicate.

"In the first place, the public interests will suffer if an improving landlord be not permitted to bar for a term of 30 years his tenants on land which he has reclaimed from beginning to acquire occupancy-rights therein. Mr. Hunter's amendment will meet this case, and will increase the chance of capital being applied to land.

"Under this Bill the enhancement of rent seems not permissible, on the ground that land let to a raiyat as *rural* land may have become *suburban* by the rise of a centre of commerce or industry, such as a new railway-junction, port, coal-mine or factory. Such cases will arise, and the landlord ought to be able to enhance on lands which, when let, were far from any market, but which have

acquired a fancy value as accommodation-land by proximity to a new centre of population.

"The partial denial of the tenant's competency to contract must affect interests in various ways, not all perhaps now foreseen; but a practical consequence of the denial of the right to agree to an enhancement of more than two annas, excepting by suit, will be the infliction of the costs of a great mass of litigation upon the raiyats. I speak as one who has been Settlement-officer or Collector for the last 14 years, and can assure the Council that if the condition of the estate of zamíndárs resembles that of Government estates and of zamíndári estates in the Northern Districts of Madras, enquiry, such as Government, when landlord, everywhere asserts its right to conduct, will bring to light instances of lands fraudulently under-rated in almost every village.

"These questions will no doubt be fully discussed when the amendments to section 30 of the Bill are under consideration.

"I do not see any complaint from landlords on the score of the want of provisions empowering them to expropriate on terms assessed by a panchâyat occupancy-raiyats holding lands which the landlord needs for the execution of improvements, or for the erection of buildings or extension of premises which may be needed for the industrial development of his estate, or for necessary use in the working of mines or quarries. I think a prudent landlord would desire to possess this power. The State where it is landlord enjoys it, and it is for the public interest that it should be given to the landlord under due safeguard. Whether the landlord should be allowed to do as the State is doing, and take up land needed for fuel and timber reserves, paying of course compensation to evicted tenants, is a somewhat larger question; if it has been raised in the course of the Committee's enquiry, I have missed it.

"Permit me, my Lord, to add that the value of the patient and well-directed labours of the Committee have been fully recognized in *Southern* India."

The Hon'ble BÁBÚ PEÁRI MOHAN MUKERJI said:—"After the very gratifying testimony which the hon'ble member in charge of the Bill has borne to the value of my humble labours in the Select Committee, it would be ungracious in me to view with indifference the impatience expressed by the hon'ble member in the concluding part of his speech with any proposal for a postponement of the immediate passing of the Bill. But I should be lacking in the duty which I owe as a responsible member of Your Lordship's Legislative Council, and the duty which I owe to my countrymen, if I hesitated to beg Your Excellency and this hon'ble Council to pause before taking up the amended Bill for consideration for the purpose of passing it. Reserving to myself therefore the right of making a substantive motion on the subject, if necessary, I submit in the interests of all concerned that the amended Tenancy Bill should not be taken up for consideration by this hon'ble Council on the present motion of the hon'ble member in charge of the Bill. It is necessary to allow sufficient time to hon'ble members for studying the Bill, and the voluminous literature on the subject, before the Council might be expected to give to a discussion of its different provisions that intelligent consideration which its importance deserves, and also sufficient time to the public and to the parties interested for submitting their views and criticisms on the measure. The Bill has undergone considerable modifications since the Preliminary Report of the Select Committee was submitted last year; so many as 45 sections have been expunged, 13 new sections have been added, 21 sections have been thoroughly re-cast, and large modifications, both verbal and material, have been made in a number of other sections. The changes made in the Bill affect questions of paramount importance, and it cannot be expected that hon'ble members have been able in barely a fortnight's time to master the details of the revised Bill, and to judge of the justice and expediency of the various additions, omissions and modifications, considered by themselves and with reference to their bearings on the general scheme of legislation. This fact must have forcibly

pressed itself upon Your Lordship's attention at the last sitting of the Council, when an hon'ble member, himself an eminent lawyer and the ornament of his profession, entertained serious doubts as to the correct meaning of the provision about enhancements of rent by registered contract, and put upon it a meaning contrary to that given to it by the hon'ble member in charge of the Bill. The time usually given to the gestation and maturation of important legislative measures is never thrown away. Considering that a much less important measure, the Transfer of Property Act, was before this hon'ble Council for full five years before it was passed in 1882, that there are even now three Bills, one to amend the law relating to Court-fees, the other to amend the law relating to Civil Courts, and the third to declare the extent of testamentary powers of Hindus and Bhuddists, which have been before the Council since 1881, I feel confident that hon'ble members will not grudge the time required to bring to a satisfactory termination a measure which immeasurably exceeds in importance any of these other measures, and which will, for weal or for woe, affect the destinies of more than 50 millions of the people of these provinces. The necessity of giving hon'ble members and the public further time for the consideration of the revised Bill is the greater as it proceeds on lines very different to those on which the Bill was modified and presented to the public last year; and nothing shows this more clearly than the Report of the Select Committee and the Dissents recorded by a large majority of the hon'ble members who sat on that Committee. Exception has been taken to the revised Bill on the ground that the rights it confers on non-occupancy-raiyats would practically convert them into occupancy-raiyats, that the restrictions it imposes on enhancement of rent would virtually make enhancement of rent more visionary than real, and that the power it gives the Local Government to order wholesale reductions of rent on grounds other than those mentioned in the Bill was opposed to the assurance given by Government when the Bill was introduced in Council that the *status quo* was not to be disturbed; while, on the other hand, it has been alleged that the Select Committee have omitted or materially modified several provisions which formed the keystone of the original scheme, and that the present outcome is scarcely a settlement of the many important questions relating to the law of landlord and tenant. In the face of such radical alterations in the Bill, it is due to those whose interests would be so greatly affected by the measure that they should be allowed an opportunity of examining the Bill in its present form, and of submitting to your Excellency in Council their views regarding it. It is for the observance of no technical form of procedure that I presume to make this proposal. The recommendation made by the Select Committee, that the revised Bill should not be re-published—a recommendation, by the way, which is wholly incompatible with the Report itself—amounts to a virtual denial to the people of a privilege which they have enjoyed since 1862—the privilege, namely, of being allowed an opportunity of submitting to Government their views and wishes regarding a legislative measure which vitally affects their interests. The question engaged the attention of Your Lordship's illustrious predecessor, and His Lordship, in communicating his views to the Government of Bengal through the Secretary in the Legislative Department, observed: 'He (the Governor General) is on the contrary, fully sensible that it is the duty of the Government to give the largest practicable amount of publicity to legislative proceedings, and to afford the public every opportunity of examining them and expressing an opinion upon them, and he is satisfied that more can be done in this respect than is done at present.' But only a very limited publicity will have been given to it if the revised Bill be not translated in the different vernacular languages and published in the local Gazettes. Although the present measure is unquestionably the most important scheme of legislation that has come before this hon'ble Council since its establishment, a vast majority of the landholders and the whole body of raiyats will have no opportunity given them of examining the provisions of the revised Bill and offering their opinions upon them. In the face of the provisions contained in Bill No. II, the changes made in the sections regarding tenures and registration of transfers of tenures, the new limitations imposed upon enhancement of rent in Court and out of Court, the additional protection given to subletting, the power given to the Local Government to order a reduction of existing rents in certain

cases on grounds other than those recognised by law, the new section regarding contracts and a number of other provisions would come as a surprise upon most landholders if the Bill be not re-published; while the raiyats would discover with disappointment that the long-promised provisions for attaching to land a legal status independent of the length of possession of the holder, for a free sale and mortgage of occupancy-holdings and for village tables-of-rates defining the maximum limits beyond which there could be no enhancement of rent, find no place therein. Your Lordship is well aware that the progress of the Bill is watched with the greatest anxiety and interest by all classes connected with the land in these provinces. Memorials adopted in crowded meetings of raiyats have poured in from different parts of the country, expressing their greatest consternation at the provisions for survey and record-of-rights and other sections of the Bill. They have even made bold to submit that, although actuated by the best intentions, the legislature, in its ignorance of their actual condition and relations with their landlords, will cause their ruin by the measure which it purposes to give them. Petitions have likewise poured in from landholders assembled at meetings in different parts of these provinces, submitting that there is no necessity whatever for substantive changes in the law on the lines on which the Bill has been drafted, that the Bill makes inroads upon vested rights of property guaranteed by law, and respected by preceding Administrations for nearly a century, that most of them have come to the possession of estates by purchase for large and valuable considerations, and that the proposed measure would, therefore, impose upon them, to use the words of John Stuart Mill, 'a penalty for having worked harder and saved more than their neighbours.' The landholders have repeatedly implored Your Lordship and Your Lordship's illustrious predecessor, with a persistency which has its apology only in the strength and sincerity of their convictions, to satisfy yourselves by the strictest enquiry that they have used with the greatest moderation their powers of eviction and settlement of rent, and that the condition of the raiyats in these provinces is one of growing prosperity. They have gone farther At a meeting held at the Town Hall on the 29th of December, 1883, perhaps the largest, certainly the most influential, ever held in this city, they unanimously carried a resolution which I shall read to your Lordship: 'That if the deprivation of the landholders of their just rights, inherited from generation to generation, confirmed by the Permanent Settlement, and consecrated by a century of British rule, be deemed essential to the welfare of the tenantry, the Government be solicited to consider the justice of allowing the zamíndárs to surrender their estates on receiving such compensation in money as will, when invested in Government securities, produce a permanent return equal to their present income.' In compliance with that resolution they submitted a memorial to the Government of India. Could anything indicate more strongly their sense of the injustice involved in the measure and their feelings towards it? Your Lordship will be pleased to see that the landholders of Bengal and Behar, numbering among them those whose manorial possessions date from days long anterior to the date of the Muhammadan conquest, have come forward in a body with a memorial declaring their readiness to forego the allurements of their position and social consideration, and to forego all hopes of future profit, and praying the Government of India to be allowed to surrender their estates in return for such security in money which would bring them their present income. It is not, however, the parties interested in the measure who alone consider the proposed changes in the present land law wholly unnecessary and altogether unsuited to the country. The hon'ble the Chief Justice of Bengal has, with the authority due to his eminent position, declared that he sees no 'such necessity as justifies the Government of Bengal in depriving the landlords of Bengal of their rights and privileges in the manner proposed by the new Rent Bill.' And, again:—'It seems to me inconsistent with the good faith of the British nation, which the Native community have hitherto had reason to respect, to deprive the zamíndárs of the rights and position which they have acquired under the Permanent Settlement.' No less defined is the opinion of the hon'ble Justice Field, who by his masterly Digest of the Rent Law, the prominent part he took in the labours of the Rent Commission, and the pre-Raphaelite minuteness with which he has delineated the land systems of different countries

in his admirable work, has established a claim to speak with the highest authority on the subject. He says :—'I think we ought not to interfere with existing rights which have been the creation of our own administration operating upon the natural progress of the country. I think that no case has been made out for disturbing the landmarks of property. It must be borne in mind, as I have more than once pointed out, that a large proportion of the present proprietors are *bonâ fide* purchasers for valuable consideration, men who have paid their money for property sold at revenue sales, and in execution of the decrees of the Civil Courts, upon the faith of the existing state of things and the rights created by our laws and by our own action or inaction.' Other high officers of State have also denied the necessity of the measure now before this hon'ble Council. When the very necessity of the measure is denied by trusted and responsible officers of Government, the desirability of re-publishing the Bill with a view of giving the public and the parties interested an opportunity of examining the material modifications made in it by the Select Committee becomes imperative. The only argument that has been advanced by the Government of Bengal and by the hon'ble Member in charge of the Bill in favour of hurrying it forward through the Council is one based on the desirability of setting at rest the unsettled condition of the public mind on this question, and of preventing the further growth of expectations in the minds of raiyats which are not destined to be realised. But where is the urgency of passing a measure which, to use His Honour the Lieutenant-Governor's own words contained in his dissent, 'inadequately meets the necessities of the case which called for legislation,' and which is scarcely 'a final settlement of the many important principles connected with a Tenancy Bill in the Lower Provinces of Bengal.' The cause of this unsatisfactory termination of the labours of the Select Committee is not far to seek. Government have undertaken to make extensive amendments in the land laws of the country without having at their disposal facts and figures which alone could have shown whether they are necessary. I cannot more graphically describe the ignorance which prevails on the subject than in His Honour's own words. Speaking from his presidential chair at a meeting of the Bengal Council on the necessity of a patwarí law, His Honour is reported to have said :—'The object of the Bill is to get at the facts connected with the agricultural economy of the country. For the last ninety years we have been endeavouring without any success to arrive at these facts. Everybody complains; those who have been discussing the Rent Bill for the last six or seven years complain; gentlemen who come to India to make enquiries about it complain; the zamíndárs themselves, and the raiyats, if they could speak, also admit that neither the Government nor the zamíndár nor the raiyats have any positive knowledge of the facts which exist in regard to their relations to one another as regards their own property.' The argument based on what are called the necessities of the case falls, therefore, to the ground. Is then the present law so very defective as to call for immediate action on the part of this hon'ble Council, notwithstanding the numerous modifications made by the Select Committee? I shall answer the question by reading to Your Lordship a statement from the despatch of the Government of India to Her Majesty's Secretary of State: 'A great part of the evils we describe,' they said, 'is unquestionably due to defects in administration rather than to defects in the law.' I lay the greatest stress on this statement as one which conclusively shows that there is no necessity whatever for passing the amended Bill without giving it due publicity beforehand.

"I would beg Your Lordship to view the question in another light. The Bill, as amended by the Select Committee, differs widely from the scheme of legislation submitted to Her Majesty's Secretary of State for India by the Government of India, and from the scheme which received the sanction of His Lordship. The scheme of the Government of India was summarised in 13 proposals mentioned in paragraph 108 of their despatch, which, with Your Lordship's permission, I shall examine shortly *seriatim*. The first was—'To restore the great body of the raiyats of Bengal to the position which they held under the ancient land law and custom of the country.' But, far from giving the raiyats the benefits of the ancient land laws, the Bill contemplates the repeal of

the very sections of Regulation VIII of 1793 which define the relative rights of landholders and raiyats under the Permanent Settlement, and as regards customs no attempt whatever has been made to ascertain their nature and scope, or to formulate them into statutory provisions. The second proposal was—'To effect this restoration by declaring that the occupancy-right, carrying with it the privilege of a legal rent, shall attach to all raiyati land, and shall be enjoyed by all settled raiyats, nomad raiyats and under-raiyats being excluded.' The section of the Bill which contained this provision has been expunged, evidently in deference to the opinion of Her Majesty's Secretary of State. The third proposal was—'To accept the proposals of the Lieutenant-Governor for the re-establishment, rectification and enforcement of the parganá rates, subject to certain modifications, of which the chief relate to the framing of principles of assessment, to the securing the benefit of improvements to those who make them, to avoiding class restrictions in respect to the enhancement of rent, and to permitting applications in certain cases for a complete settlement of estates.' The Bill contains no provision whatever for the re-establishment of parganá rates, and the provisions permitting application for settlement of estates form part of the chapter on survey and record-of-rights. The 4th proposal was—'To empower the Local Government to maintain the Collector's tables of rates for periods extending from 10 to 30 years.' The provisions embodying this proposal have been expunged from the Bill. The 5th proposal was—'To declare that no contract shall debar a raiyat from acquiring a right of occupancy in raiyati land.' But, instead of restricting freedom of contract in one particular, the Bill provides for such restrictions in 13 different particulars. The 6th proposal was—'To render the occupancy-right transferable, not, indeed, by summary sale without decree, but by sale in execution of decree and by private sale.' This has been abandoned, and the matter left to custom as at present. The 7th proposal was—'Except as above, to impose no restriction on the mortgage of the right.' This also has been abandoned. The 8th proposal was—'To secure to occupancy and other raiyats due compensation for their improvements.' This I find is the first proposal to which due effect has been given in the Bill. The 9th proposal was—'To reserve to the Government the fullest power of interposition to prevent the growth of a pauperised cottier class.' This refers to the evils which might be brought about by the transfer of raiyati holdings by sale or mortgage to landjobbers or moneylenders, and is therefore a mere corollary of the proposal regarding transfer of occupancy-holdings which has been abandoned. The 10th proposal was—'To discourage subletting by certain expedients, of which the most important is a limitation of the amount of rent recoverable from under-raiyats.' The provisions of the amended Bill, on the contrary, would encourage subletting and give great protection to sub-lessees. The 11th proposal was—'To provide for the more speedy realization of arrears of rent, when the rates are undisputed, by a modified method of distraint and an abbreviated procedure, as recommended by the Lieutenant-Governor of Bengal.' No summary procedure whatever for the speedy realization of rent has been given, and the institution of distraint has been virtually abolished. Instead of giving facilities for the recovery of rent, the Bill will immensely add to the difficulties of the landholders in this respect. It provides for meddling with the simplest transactions between the landlord and tenant, and makes a reference to the Courts and Revenue-officers obligatory for the ultimate regulation of every bargain relating to land; and whereas the present law provides for the aid of executive officers for only a single purpose, namely, measurement of land, there are more than 50 sections in the amended Bill which provide for executive interference on the part either of the Local Government or of their Revenue-officers. The inevitable effect of such provisions would be to annihilate the landholder's prestige in his estate, and thereby throw insuperable obstacles in the way of his recovering his rents. I shall read to Your Lordship in this connection the statements made before the Parliamentary Committee in 1832 by one who has denounced the wisdom of the Permanent Settlement in no measured terms—I mean James Mill. He says—'To draw from the raiyats the duties or contributions which they owe is well known to be a business of great detail and difficulty, requiring the strictest vigilance and most minute and persevering applications. Anything

which strikes at the credit of the zamíndár, farmer or other functionary by which this duty is performed immediately increases the difficulty by encouraging the raiyat in the hope of defeating the demand by evasions, cunning, obstinacy or delay.' The 12th proposal was 'To authorise remissions or suspensions of rent where there has been a remission or suspension of land-revenue.' The Bill contains no such provision. The 13th and last proposal was—'To take up the question of introducing throughout Bengal the system of village records and field surveys, commencing with the Patna Division.' And this is the second out of 13 proposals which has been fully embodied in the amended Bill, although it was one the difficulties attending the carrying out of which were clearly pointed out by Her Majesty's Secretary of State. The amended Bill, therefore, is in many important particulars at variance with the proposals which, with modifications in only one material point, received the sanction of Her Majesty's Secretary of State. Whether under such circumstances Your Lordship would consider it desirable to submit the amended Bill for the consideration of Her Majesty's Secretary of State for India is a question which it is for Your Lordship alone to decide, but I beg leave to submit that that question acquires additional importance from the fact that the landholders of Bengal and Behar took express exception to the correctness of the statements of fact and law contained in the despatch of the Government of India on which the sanction of Her Majesty's Secretary of State to the introduction of the Bill in Council was based. That despatch assumed that 'the right of Government to fix at its own discretion the amounts of the rents upon the lands of the zamíndárs had never been denied or disputed,' whereas such a right is not only disputed, but it was distinctly disproved by the researches of Sir John Shore and disclaimed by the authors of the Permanent Settlement. The despatch declared that the rights of raiyats were not ascertained and defined at the time of the Permanent Settlement, whereas it is well known that those rights formed the subject of a searching enquiry for 20 years before the settlement was made, and that they were clearly defined in Regulation VIII of 1793. It gave extracts from the evidence of Holt Mackenzie before the Parliamentary Committee of 1832, showing the desirability of legislation on the subject of tenant-rights, but it ignored the important statement made by him that 'if done without their (zamíndárs') consent, we must, I apprehend, interfere by a new law, and be prepared to give the zamíndárs compensation or allow a reduction of revenue.' It declared that before 1859 the zamíndárs had no right to enhance rents, on the grounds of rise in price of produce, and that the institution of distraint was an offshoot of the Regulations—statements which require no formal refutation. These and other statements formed the subject of a memorial, dated the 17th of November, 1883, by the landholders of Bengal and Behar to Her Majesty's Secretary of State; and His Lordship was pleased to observe, with reference thereto, that he 'can find nothing therein which would justify his assenting to its prayer that further legislative proceedings in connexion with the Bill should be stayed in order to enable him to re-consider the principles on which the Bill has been framed.' His Lordship adds that 'the most careful attention be given to the arguments of the memorialists when he receives *the Bill as finally settled*.' Your Lordship is well aware that as soon as a Bill has been passed by this hon'ble Council and has received the assent of Your Lordship, it ceases to be a Bill, and becomes, to use the language of the Indian Councils' Act, 'a Law or Regulation' notwithstanding the power of disallowance vested in Her Majesty's Secretary of State. The concluding portion, therefore, of His Lordship's remarks has raised a hope in the minds of the landholders that, before the Bill is taken up by this hon'ble Council for the purpose of passing, it would be sent to Her Majesty's Secretary of State for his consideration. Whatever foundation there might be for such a hope, I earnestly entreat Your Lordship and this Honourable Council to order a re-publication of the Bill before it is taken up for consideration, and that Your Lordship will not press forward, without further and due publicity, a measure which is at utter variance with the scheme which was sent up to Her Majesty's Secretary of State and with the instructions contained in the despatch of the Secretary of State, which the landholders look upon as a measure which in the absence of any necessity makes serious inroads upon vested rights of property, which the raiyats themselves regard with great consternation, and which landholders and raiyats

alike, and not a few of the responsible officers of State, regard as a measure possessing a much greater claim than any other measure that could be devised to the title of 'A Bill for the promotion of litigation in Bengal and Behar.'"

The Hon'ble RAO SAHEB VISHVANATHA NARAYAN MANDLIK said:—"My Lord, in this matter I propose to follow a moderate course, as I think it will be the best under the circumstances; for this I have my reasons, which I now propose to give. The Bill, together with the Select Committee's Report, as well as the dissents, have now been before us for two weeks, and a comparative study thereof, along with the Bill in its previous stages, has been a task of very great difficulty to me. The cause of this may be partly seen from the review that has been just submitted by the Hon'ble Sir Steuart Bayley. The hon'ble members who have followed him have had, with one exception, the advantage of being on the Select Committee for more than a year. If my remarks appear, therefore, somewhat cursory and disconnected, that circumstance arises from the necessities of the case. The mass of district papers, unindexed, has to be looked into each time from a differently placed standpoint. This is, however, not my only difficulty. Questions of principle have been introduced into the discussion in the Committee, and by different members of the Committee in their dissents; and they also arise in the papers circulated to the members of this Council and in the speeches of my hon'ble colleagues who have preceded me. In justice, therefore to myself, and to the Government of India, whom I am bound to help with such little light as I may be able to throw on the subject, and to their officers, who have worked hard to give their opinions as well as a variety of information about their respective districts, I must dwell for a few moments on the whole matter now before us.

"The legislature of India can only follow a safe and sound course. The question now before us directly affects 58 out of 217, or more than a fourth, of the revenue or judicial districts of British India, and indirectly about twice as many more. The Permanent Settlement is not in question now, and cannot be. I know, my Lord, I am here treading on delicate ground. But I have my views on the subject, and the Government of India has now finally approved of the principle. The Permanent Settlement is the sheet-anchor of the Government and the people, and we hope that when all the conditions are fulfilled (be it two, or be it three, conditions), it will be introduced in its own time throughout the empire as the best political and economical measure that can be devised. Neither party to this present contest refer to it, except as a means of getting rid of their own difficulties. I allude to it now, because it has been introduced into the discussions both here and outside, and because these discussions have caused unrest for which I see no sufficient cause and which ought not to be lightly indulged in.

"The brief history of the present Bill may be thus given. In 1859 the Occupancy Act was passed, recognising heritable but untransferable occupancy-right under certain circumstances. This was repealed in 1869 by a Bengal Council Act. Still the rent difficulty was not overcome. Zamíndárs could not recover rents. This was admitted by the Government of Bengal and by the Government of India in 1877-78. How is this got over? This is what the Divisional Commissioners say. The Commissioner for the Presidency Division says the zamíndárs had 'a good right to expect a very much more substantial relief' in regard to the recovery of rents. He holds that the Bill, if passed into law, is not likely to end in a satisfactory solution of the questions at issue. The Burdwan Commissioner is opposed in a manner more pronounced; so are those of Dacca and Chittagong; the latter would urge the non-extension of the measure to his district. The Commissioner of the Rajshahye Division is altogether opposed to the Bill, and thinks that while the raiyats of Bengal have been the stronger, and the Lieutenant-Governor in 1877 thought that a Bill for the proper recovery of rents was required, something else which was not then considered necessary has taken the place of the Rent Bill. He shows that rent-suits have increased by the grant of occupancy-rights, presumably to improvi-

dent people. This he shows by extracts from the report of the Deputy Co sioner of Darjeeling, formerly District Judge, &c., in the Sonthal Pargan

"Again, the Board of Revenue consider that the rents are lower than they were in the beginning of the last century. And this would rather in that we must look chiefly to a good rent-recovery law, abolition of illegal and the partition of all partible properties for our help.

"In face of these facts, it is hard to say that the present Bill does p additional facilities for the recovery of rents on which the payment *jamá* depends, and which was asked for and promised. After having s the matter, I must say that to me the natural solution of rent difficulties a to be the amendment of Act X of 1859 and not its repeal. We ought to ha complete statistics placed before us. I do not now advocate taking addi evidence. The reasons for this will be seen from my subsequent rema know the Government of Bengal complain (letter dated 27th Septe 1883) 'it is a misfortune that Bengal is so absolutely destitute of a r of-rights.' And the hope is there expressed that 'when such record is lished disputes will be impossible.' I regret I cannot join in the expr of the latter hope. Disputes do not depend on the mere character of records. Their causes are deeper and varied, and I may say that the g the complexity of legislation, the pressure of population on the means of s tence, and, in some measure, the advance of modern civilisation itself, the will be the quantity of litigation. Historical experience completely suppo in this position. But my present complaint is of a more practical cha and relates to matters like eviction, distraint and others which we shall soo to consider when going into detail. And the complaint is based upon t istence of the present law beginning from Regulation VIII of 1800 and c up to Bengal Act VII of 1876. These laws were passed for securing som statistics; and we ought to have máuzawár or village registers, and parga or district registers, prepared under them. They would have given a quantity of information about all the lands in each district, their situa dimensions, holders and other particulars. From these, valuable inform about the state of the people could have been gathered. I extract a spe from the papers handed up by the Commissioner of the Patna Division, show that within the last 80 years in the Gya district each estat been split up into six and even more portions, and the number of propr has increased from 18 to 24-fold.[b]

[a] Mr. Oldham estimates that about 80 per cent. of the civil suits in the Sonthal Parganás are instit money-lenders to recover advances made to raiyats, a large majority of whom have occupancy-rights, following figures for the year 1883 compare litigation in the three districts just mentioned:—

District.	Population.	Number of civil suits instituted.	Number of civil ex of decree instituted.
Sonthal Parganás	1,568,093	7,351	4,253
Dinagepore	1,514,346	5,188	2,518
Rajshahye	1,338,638	2,674	1,930

Further on, he observes—

"I have no figures showing the number of civil suits in the Sonthal Parganás before such provisions in the Bill were introduced, but Mr. Oldham's statement that they greatly increase litigation seems suffici

"Lastly, Messrs. Livesay, Newbery, Ruddock, Dalton and Tute, and I would point to the following for 1883 as showing that litigation for the recovery of rent has not been decreased by the provisions of t though Mr. Oldham here again thinks that without transferability there would not be nearly so man suits, as fewer money-lenders who quarrel with the zamíndárs would become occupancy-raiyats:—

District.	Number of rent-suits instituted.	Number of execution instituted
Sonthal Parganás	3,892	2,805
Dinagepore	3,902	1,620
Rajshahye	1,978	853"

[b] *Extract from enclosure of Commissioner's Report No. 484 R., dated 7th July, 1883, page 11 (n*

"In the 24-Parganás, which are now comprised in the district of Gya, the total number of estates was 744, and the number of proprietors 1,160; in 1871 the number of estates was 4,411 and the nu registered proprietors 20,453. In 80 years, therefore, each estate has, on a average, been split up into si where there was formerly one proprietor, there are now 18 (Statistical Reporter, Volume XII, page 12 1790, there were 1,232 separate estates on the rent-roll of the Patna district, as then constituted, held b registered proprietors. Including a net total of 777 new estates obtained by transfer from the Gya distr number of estates on the rent-roll of the district amounted in 1870-71 to 6,075. The number of registe prietors had increased to 37,800. Allowing for the increase in the size of the district by the addition Behar sub-division, the number of estates under the Patna collectorate had quadrupled since the original ment in 1790; and where there was formerly one proprietor, there are now probably 20 (Statistical R Volume XI, page 187). In the district of Tirhoot the figures are more marked. In 1790 there wer estates held by 1,939 registered proprietors. In 1871 the number of estates was 11,500 and the nu registered proprietors 73,416 (Statistical Reporter, Volume XIII, page 168). So long ago as 1789 Mr. remarked on the insignificant size of the Behar estates and the poverty of their owners. If subdivis gone on thus rapidly with estates, it is hard to expect a different state of things in case of transferabl pancy-holdings."

"This is one example in regard to the case of the proprietors as the one I gave before is in regard to occupancy-tenants. As a very considerable number of these are said to exist in Bengal, such information would have cleared up many difficulties in regard to recovery of rent and other matters. None of the dissents, so far as I can see, supplies any help in this direction. All zamíndárs could supply statistics, and ought, I think, to have been called upon to do so.

"Turning, therefore, necessarily to the divisional reports, the state of matters is not quite reassuring. Some officers would rather work the present law more strictly and stop the illegal ábwábs. Others think the new law not at all necessary, and have proposed a provision empowering the Local Government to introduce it into any locality at its discretion.

"As far as I have been able to gather, the Commissioners oppose the Bill, first, as unnecessary, and as going beyond the necessities of the case; and secondly, because it will not produce the results anticipated, but will injure vast interests without any compensating public good, and end in injurious litigation to the detriment of all parties. Some Collectors would have a moderate Bill. Such being the state of matters, I am sorry I am not able to follow the line taken up by those hon'ble colleagues who complain of the present Bill as not conceding all they claim for the tenants. The evidence of the District Officers is quite the other way, and I think it should not be set aside except on very strong grounds sufficient to override their weighty representations. His Honour the Lieutenant-Governor has a fourfold complaint against the Bill. The Hon'ble Mr. Reynolds thinks that, if anything, this is a law which cannot last long. The Hon'ble Mr. Amír Alí is also dissatisfied for the non-extension of occupancy-rights to classes who the district authorities think are not generally entitled to them; while the Hon'ble Mr. Gibbon thinks that complete transferability ought to have been enacted instead of its being left to Courts and custom. Again, I see a demand made in some quarters for what is called spirited legislation. To persons who ask for such legislation I again refer to the valuable reports of our district authorities. These are entirely opposed to such a course. Indeed, it seems to me that those who advocate such a course are hardly aware of the gravity of the occasion or the seriousness of results Social and economic changes, to be stable, must be slow, and must come from within. Does the evidence before us warrant such a proceeding? I am bound to say no. I would rather that the energy wasted on such attempts at seeking spirited legislation were more usefully employed in training cultivators, say, over given areas, to be more hard-working, self-reliant, truthful, God-fearing men. Their example would be more efficacious than a cart-load of invectives against vested interest of any kind, and will certainly produce a moral revolution which the Government above all others would be the first to recognize.

"The Government of India, in the Irrigation papers published in October, 1871, lay down a well-known caution in regard to the evils produced by periodic settlements. The principles which underlie those observations (*vide* Minute of Lord Mayo and other papers) appear to be that frequent interference in the private affairs of the people must produce evil. Here, on the contrary, the call upon the Government seems to be not to desist, but to come and interfere on almost every conceivable occasion, either through the Revenue or the Judicial Department. Nothing is to be settled, it would seem, out of Court and by private agency. I am sorry to see the unqalified assertion of such a principle. The Hon'ble Mr. Evans has already drawn attention to it, and I hope some substantial improvement may yet be made in this matter during the progress of the Bill.

"Again, the divisional authorities speak of considerable increase of establishments as one of the inevitable results of this legislation. Thus, in regard to Division Chittagong, the Commissioner says that litigation has increased since the last Act, and the tenants are evidently no better (see tables previously quoted). Evidently more complicated provisions will necessitate new establishments. In Rajshahye the new provision as to deposit of rents will require new establishments. In the Dacca Division, the demarcation of khámár lands (which is considered objectionable there and elsewhere), will require heavy establishments. Dacca, my Lord, is in East Bengal, of the character of whose people the

Hon'ble Mr. Evans has told us at the last meeting, and you may usefully consu the records.

"Taking yet another view of the case, our colleagues, the Hon'ble th Mahárájá of Durbhunga and the Hon'ble Peári Mohan Mukerji, are both di satisfied with the whole work, and I believe it is now clear that the measure is n suited to the circumstances of Behar. Will it benefit Bengal? I fear the ev dence before me does not permit of my giving an unqualified answer in th affirmative. As I have said before, the Local Government has not supplied u with such statistics as the present laws enjoin the keeping of. Were it feasibl and useful at this stage, I should have agreed to receive further evidenc But we are not now experimenting on inert matter which obeys certain natur laws, and with which you can repeat your experiments almost regardless c time. Such a method of experiment is not applicable to the subject before u The state of the parties affected is, no doubt, undergoing some change; an yet it cannot be said that it has gone on so long as to have produced new com binations which the district officers have not already reported upon An there is a certain subordinate official agency to which I would not now refe for further reports. I shall briefly explain what I mean by this observatio Thus a subordinate officer in Bengal submits a report which to me is quite curiosity. He allows two days only to respectable gentlemen in his sul division to submit their opinions. His own report is simply ludicrous. He h gone through the Bill, which, he says, provides necessary safeguards agai the zamíndárs; he ventures to remark that more than sufficient privileges hav been granted to the tenants; he would rather have seen a simple speedy mode c recovery of arrears and protection of tenants from illegal exactions and harra ing enhancements. When saying this he forgets tha he has already co sidered the Bill sufficient in these respects. As if, however, thinking he ha been doing too much, he again condemns the Bill as tending to create multipl city of intermediate tenures detrimental to actual cultivators of the soil, and likely to prove of doubtful expediency and productive of litigation. The comes the final touch. He says:—'*The Bill is a very complete one, and I a unable to offer any suggestion.*' The fact seems to be that the writer has n confidence in himself; how can he expect that others should confide in him?

"I am unable, my Lord, to say how the multiplication of such evidenc will be of any value, and there are some more specimens of it on both sides. I fact, some raiyati petitioners in Orissa have already picked up a kind of phras ology which is scarcely parliamentary. I would, therefore, not be a party t ask for further evidence on this occasion. We cannot artificially isolate th subjects of our inquiry; and there have been no violent social or economi changes which can have altered the social and economical institutions of Beng or the character of its people since the last district reports were framed wit in one year. If there were any such changes, the Local Governmen would doubtless have sent up all the materials to this Council.

"Pursuing the same subject and working at it from another point of vie we must see what we have really to do. The legislation of 1859, as amende in 1869, the proceedings of the Commission of 1881, and the discussions tha have been now going on for three years, are all before us. And it seem to me the point that is being lost sight of is this. Are we now going t construe for the first time the Regulations of 1793, or those Regulations alon with all amendments up to this date as viewed by the conduct of all the partie concerned, namely, the Government, the landed proprietors and the tenants? good deal has been said on both sides in regard to customs, but I take it, as rule sanctioned by high authority, that a custom cannot be acknowledged as basis of legislative action unless it has been consciously acted upon by th people as a rule of their conduct in the practices of every-day life. Unless it so, I fail to see on what foundation it is to stand, and unless it has a founda tion I should be chary of accepting it as a guide. Mr. Longfield, in his pap on 'The Revenue of Land in Ireland,' printed in the collection of essays publishe under the sanction of the Cobden Club, gives the following criterion for judgin

of property in land, and this I think may be safely taken as a guide in this discussion. He says:—

'The rights of the present owners do not depend upon the truth of any theory respecting the origin of proprietorial rights. It is a rule of natural justice that says that, if I encourage a stranger to buy from a wrongful owner property that is really mine, I cannot justly press my own claims against the purchaser. This is the case with land in every settled country. The present owners either themselves purchased the land or derived their rights under those who purchased it with the sanction of the community represented by the authority of the State. In many cases the State itself received part of the purchase-money from stamp-duties on the purchase-deeds.'

"Again, a high authority has laid down (Kent on American Law) that to complete the right to property the right to the thing and the possession of the thing must be united.

"What, then, are we now to do? I have tried to give a brief view of the Bill of 1883 taken by some of the leading officers who are in the same position as I am now, but who have the actual work of the administration on their hands, but I fear I have not done them justice for want of time. If we examine the Bill, we have to see what mischiefs it will suppress, and what remedies will be advanced by it. Viewed in this light, it seems to me that the *khudkásht* raiyat should have been allowed to remain undisturbed. *Khudkásht* is a well-known term, and, if necessary, its equivalent might have been simultaneously given, but neither the 'settled raiyat' nor the 'resident raiyat' supplies its place. *Khudkásht* contains its own definition, and its attributes have a well-known history of their own.

"In respect to another subject I have a few words for this occasion. Though the present is not, strictly speaking, a revenue law, it will indirectly affect the revenue administration of the country, and it occurs to me that now that the subject has been exhausted threadbare, there ought to be no artificial restrictions on the quantity of zamíndári or raiyatwári holdings. If nine-tenths of Bengal are now under cultivation, and the remaining tenth is waste, it cannot affect any tenant if the proprietors of that waste land were allowed to work it, or to sell it or to contract with lease-hold tenants so as to reduce it into cultivation. That they have allowed it to remain uncultivated is a circumstance that has contributed to their own loss. That it has not been put on their rent-roll is, I conceive, because no rent has been derived by letting it, either by *batai* or cash rates. It therefore could not appear as cultivated land, either in their own or the Government registers, but why should there be a legislative prohibition to the proprietor making it his *khás* land, which it substantially is, and still more why its reclamation should be clogged with unnecessary restrictions is what I cannot see. When this and such like arguments are urged, one is referred by the Bengal Government to customs of former Governments for power to do so. On proper occasion, nobody advocates the non-exercise of superintending powers by our own Government within constitutional limits. But I am supported by high authority in protesting against an improper application of such examples. A constitutional and well-administered Government like our own can hardly set up the effete administration of Bengal in the 18th century as a model before us to copy. The provisions which are themselves cited in another part of the paper in connection with a similar example were repealed as being *obsolete* so long ago as 1876. The process of comparison is therefore, I must say with great deference, logically vicious.

"If there was any fair scheme applicable to both sides allowing such land to be converted into raiyatwári holdings on a graduated scale to be agreed to on both sides, I should have been prepared to take such improvement as a good start and some tangible good might have been attempted. This portion of the Bill is not favourably reported upon in the district papers before us.

"In regard to homestead lands, I think, unless such lands are connected with the raiyat's agricultural land of the village, mere outsiders should not be allowed to hold them. This is, I believe, the customary law, and as the native community is situated, it is, I think, a salutary provision. Neither the landlord nor the cultivating raiyat should be permitted to dissociate the one from the other. Neighbours' quarrels in matters of adjoining lands are the worst

in any country, but when to other difficulties social and religious ones a added, the cup overflows to the detriment of the whole village communi I trust, therefore, that this subject, along with others, will be duly consider The papers referring to Behar on this subject are important and deserve ca ful consideration.

"Another subject on which I am bound to express my opinion in this pl is the restriction on the freedom of contracts generally. Over a wide count containing 68 millions of inhabitants, the Government of India has doubtl had before it cases of localities or of a class or classes from which this libe may, on due cause being shown, be sometimes withdrawn; and when we member that under the infancy of the land law (and in several parts of t country the law as it stands now), does not permit of transfer of occupancy-ho ings by contract, I may accept the present measure as a tentative solution the difficulty so far as the tenants are concerned. But, on the other hand, w regard to waste lands on which nobody has settled, I should prefer all contra being left free as heretofore, subject to the equitable jurisdiction of Courts of l This view is also supported by the evidence of the district authorities. occurs to me that while one side to this controversy would deny anything wh will affect their rent-roll, the other cannot make up their minds to distingu what is well known throughout India as *sudmilwa* or right of dominion a tenancy. I am bound to say here at once that I agree with neither. T Bengal Revenue-officers do not support such a contention. Why is the leg lature to attempt to square the zamíndár to fit into some new imagin official circle?

"There are some other matters of which proper notice may be taken wl they come up for discussion. While the Bill enacts several new provisions of l of questionable utility, and which will increase not only the work of dist officers, but introduce a larger interference of State agency into the priv affairs of the people than is either necessary or desirable, no positive provisi as its seems to me, has been made for relieving large classes both of tenants a landholders, who I think ought to be relieved. It appears clear from the pap before us that sub-letting is the standing evil to which a large amount of sufferings of the Bengal raiyat may fairly be attributed. This may be s particularly by referring to paragraphs 14 to 17 of Mr. Cotton's memorandu prepared for the President of the Select Committee on the Tenancy Bill, whi according to His Honour the Lieutenant-Governor, merits every attenti Mr. Cotton says:—

'In one respect, however, the cultivators of the soil undeniably are placed at a disadv age by the practice of sub-letting, for it is a peculiarity of the system, although t tenures and under-tenures often comprise defined tracts of land, a common custom i sublet certain aliquot shares of the whole superior tenure, and in consequence the tenant any particular village of an estate are often required to pay their rents to two, or more t two, and often to many different, landlords.'

"Although, as Mr. Cotton remarks, following the historian Hallam, t such a result is by no means unnatural, still that it is not a necessary res may I think be safely inferred from the papers before us. Thus the report the Officiating Collector of Shahabad in regard to *jhuzáshta* holdings is in t connection valuable as showing that in places like Bhojpur those who cu vate their own lands on these tenures are very well off. I know that it is correct to generalise from limited data, because property both acts and is ac upon by those who hold it; but if it is intended, on proper occasions, to help creation of small properties with distinct responsibilities and with provisions actual sub-divisions amongst the sharers, I think opportunity may now be ta to enact some provisions which would be an improvement on the present st of things.

"As regards our present course I would have voted for temporary re being given to places like Mymensingh and Dacca by passing special meas to meet their cases. There is enough of material before us to support suc course. But this I fear would now be impracticable. It is now nearly si seven years that the subject has been before either the Government of Ben or the Government of India, including the deliberations of this Council, and

are given to understand that it will not conduce to the cause of good government if the matter be left in this state till the Council meets again here in December next. The Bengal Government as represented in this Council does not ask for delay in the minutes now before us, although those minutes do not accept the present Bill as a final settlement. The proprietory interest, as represented by the Hon'ble the Mahárájá of Durbhunga and Hon'ble Bábú Peárí Mohan, request re-publication, and if this were not a virtual postponement for a whole year I should have voted for that course. As it is, any extension of time which can conveniently be allowed to them may, I think, be granted; but if that cannot be, then I hope the Council will consider and discuss all that has to be said *pro* and *con.* for all the interests concerned are equal objects of conservation to the British Government. While I have given my reasons for the course I am going to adopt, I regret I am not disposed to concur in the remarks either here or outside in regard to the opposition of our zamíndár colleagues. The case of the Mahárájá of Durbhunga is as good as proved. If it were not, I still think both he and the Hon'ble Bábú Peárí Mohan are bound to state all their objections. The district authorities show what they will suffer, and it is quite natural they should feel it; and if they do, I think we ought to be glad to hear them. They are representatives of a very large and important class. I do not think that it will be just to tax the present landed proprietors of Bengal with the shortcomings, if any, of their predecessors, because I think the progress of legislation as well as the papers now before us make it pretty clear that on the whole they have done their work well. But now comes another agency into greater prominence, and with the light which is thrown on their condition from both sides, it is clear that neither has arrived at its goal.

"What then are we to do? The Bengal Government calls for immediate action. This is supported by the hon'ble member in charge, who I feel sure will not rush into any extreme course. A few of the district papers move on the same lines. Though not inclined in favour of the Bill of 1883, they counsel legislation under some of the heads laid down in the Bill on which they favour us with their remarks. My duty therefore is clear; that is to make the most of what we have and not to postpone for another year.

"My Lord, I have already taken more time than I had proposed to myself. I am quite sensible of the imperfections which there may be in my work, but I can assure Your Lordship and my colleagues that I have devoted more hours to it than one is usually credited with doing in this climate. If there are any sides of the question on which light can be thrown, nobody would be more glad to learn than myself, but I have a right to say that I have done my best under the circumstances, and having made these remarks I beg to say that I shall vote with the hon'ble member in charge for the further consideration of the Bill in detail."

The Hon'ble MR. REYNOLDS said:—"I desire to support the motion that the Council should now proceed to take this Bill into consideration. I do not mean by this to express my approval of all the provisions of the Bill. The dissent which I have recorded from the Report of the Select Committee is sufficient to show that in some particulars of great importance the Bill seems to me to fall far short of being an adequate or a satisfactory measure. But, in my opinion, the faults of the Bill lie mainly on the side of defect. It fails to supply any sufficient check on the improper exercise of the extensive powers which it puts into the hands of the landlords. It must be supplemented by further legislation for the protection and security of the tenant, and I have little doubt that the experience of a few years will show the necessity for such legislation to be imperative. Till that protection is afforded, I can only regard the Bill as a well-intended, but incomplete, measure; a measure to be praised rather for what it aims at, than for what it effects; a measure marking, it may be, a stage upon the journey, but leaving the country still a long distance from the desired goal. Holding these views, I still think that I can consistently vote in favour of the motion before the Council. If the principles which the Bill as originally introduced was intended to establish had been repudiated, or its objects had been formally abandoned, I should look upon the question in a very different light. In that case, instead of

voting to take the Bill into consideration, I might have been more disposed to for dropping it altogether. But the difference between myself and the hon member in charge of the Bill is not of this serious character. It is a differe of degree, not a difference of kind. I do not understand that the hon member has, in any way, receded from the position which he took up in speech on the 13th of March, 1883, when the Bill was referred to the Se Committee. He apparently believes that the Bill in its present form rede the pledges which were given when it was introduced, or at least that it as far in that direction as is justified by the evidence laid before the Se Committee. In this belief I do not agree, but this need not prevent my senting to discuss the details of the Bill as an instalment of the legisla necessary to a final settlement of the question. An affirmative vote on motion seems to me to imply that it is desirable to legislate upon the subj and that the provisions of the amended Bill do not go beyond the limits the power of interference which the Government reserved to itself at settlement of 1793; and further, that the general lines upon which the is drawn, and the objects at which it aims, are just and reasonable, and accordance with the wants of the country. It seems to me that the I insufficient as I consider it to be, does satisfy these conditions, and I am, th fore, prepared to assent to its being taken into consideration by the Counci

"I willingly and thankfully acknowledge that the Bill contains m valuable improvements upon the present law. It lays down principles to gu the Courts in determining whether a tenant is a tenure-holder or a raiyat provides a simple procedure for the registration of the transfer of tenu it does something towards strengthening the position of the occupancy-raiy it simplifies and facilitates suits for the enhancement of rent: it establishes admirable system for the commutation of rents payable in kind: it prescri excellent rules for instalments, receipts and interest on arrears: it encoura improvements: and it protects the interests, both of the parties and the gen public, in cases of disputes between co-sharers. The chapter on the preparat of a record-of-rights contains provisions which will be equally useful to la lords and to tenants. The sections on the record of private lands will put a s to that illegal misappropriation of village lands as khámár which has b too often practised in Behar. The rules for the protection of sub-tenants w the interest of the superior holder is relinquished or transferred, the restricti upon such contracts as are opposed to the objects of the law, the po given to apply for a judicial determination of the incidents of a tenancy— these are, in my opinion, points in which the Bill applies useful and equita remedies to evils for which the existing law does not adequately provide.

"It is therefore the more to be regretted that a measure which contain much that is good should be marred by defects which not merely detract fr its usefulness, but which may result in aggravating the mischief which the is intended to counteract, and in turning what should be the raiyat's protect shield into an instrument of exaction and oppression. The opportunity again been afforded us which was neglected in 1793 and misused in 1859, opportunity of placing the relations of landlord and tenant on a secure a permanent basis; of defining the rights and obligations of each; of ensuring, accordance with immemorial usage, fixity of tenure at fair rents to all culti tors of the village lands; and of facilitating the landlord's recovery of his d so long as he restricts his demands upon the tenant within equitable lim It is to be feared that, once more, the opportunity will be suffered to p by. This Bill, by confining the right of occupancy to the village in wh the tenant has held land for 12 continuous years, fails to give the occupan raiyat that fixity of tenure to which he is justly entitled. The sections relat to the enhancement of an occupancy-raiyat's rent give the landlords a sure a speedy means of enhancing rents, without providing any sufficient check the levy of further enhancements in those areas in which rents are already high as the land can properly bear.

"If the protection given to the occupancy-raiyat is thus insufficient, defects of the Bill, as regards the non-occupancy-raiyat, are still more cons cuous, and are likely to lead to results still more deplorable. The non-oc

pancy-raiyat is entitled to full consideration at our hands, for he is really the offspring of our own legislation. We have been told time after time, by the landlords and their advocates, that the occupancy-raiyat is the creature of Act X of 1859. Never was a statement more inaccurate, or indeed more directly opposed to the fact. The occupancy-raiyat dates from a time whereof the memory of man runneth not to the contrary. But never till 1859 was it the law in Bengal, that a resident raiyat cultivating village lands to which he had been duly admitted, which he had held for ten or eleven years, and for which he was willing to pay the established rent, could be ejected from his holding at the pleasure of his landlord by a mere notice to quit. It is the non-occupancy-raiyat who is really the creature of Act X of 1859.

"The Bill not only does practically nothing for this class of tenants, but in some respects it puts them in a worse position than they occupy now. It was left to the Courts to deduce from Act X of 1859 the doctrine of the landlord's power to eject, and the deduction seems to have been made for the first time in 1874, but it is now proposed to embody in the Statute-book a distinct recognition of this power. Under the present law, the zamíndár can prevent the accrual of the right of occupancy by merely shifting the raiyat from one field to another: under the Bill, he will be tempted to evict him from the village altogether. A tenant so completely at the mercy of his landlord, must evidently submit to any demand of rent which the latter may think fit to make. Even if he is allowed to acquire a right of occupancy, he will only be permitted to do so on payment of an excessive rental: and, under the operation of the rule regarding the prevailing rate, this excessive rental will be used as a lever to raise the rents of all occupancy-raiyats in the village. The evil consequences of leaving the class of non-occupancy-raiyats unprotected were clearly foreseen and forcibly pointed out by the Government of India in its despatch of the 17th October, 1882, to the Secretary of State: and it is, therefore, a matter for surprise as well as for regret that the amended Bill leaves such raiyats practically without any protection either as to the amount of their rent or as to the security of their tenure of the land. The established principle referred to by the Court of Directors in 1792, as the maxim alike of the Moghul and of the British Governments, that 'the cultivator of the soil duly paying his rent should not be dispossessed of the land he occupies,' seems to have been lost sight of. In a previous passage of the same letter, the Court of Directors had plainly declared that the object of legislative interference by the Government between landlord and tenant should be 'to prevent the raiyats being improperly disturbed in their possession, or loaded with unwarrantable exactions.' But this Bill allows the raiyat to be ejected at the mere caprice of his landlord and it gives him no adequate security against the most exorbitant demands of rent. The extension of the right of occupancy to the great mass of settled cultivators has been put forward, time after time, by successive authorities as one of the principal objects at which legislation on the rent-question should aim. The Famine Commission and the Government of Bengal have urged, in language as strong as it is possible to use, the great importance of this extension: the Rent Commission proposed to give a qualified right after only three years' occupation: the Government of India, in 1882, went even further than this, and recommended that the right of occupancy should be declared inherent in the status of every cultivator of raiyati land. The hon'ble member in charge of the Bill is still prepared, I imagine, to maintain the principles laid down in that despatch to the Secretary of State. But I would ask him to consider what extension of the right of occupancy is to be looked for from a measure which leaves the landlords the fullest power to prevent its accrual over all lands in which it has not already been acquired, and over lands in which it now exists, but which may hereafter revert to the landlords by purchase, by death without heirs, or by abandonment by the occupancy-tenant. I would ask him to ponder the serious warning with which the 8th paragraph of that despatch concludes, that 'the old series of litigation, enhancement, and ejection will recommence; and in the course of another generation the percentage of land thus acquired will be sufficient to render necessary a re-opening of the whole question, and will inevitably involve fresh interference on the part of Government.' I would ask him to reflect that out of 67,578 occupancy-holdings

transferred by private sale during the past year, no less than 16,500, or ab
25 per cent., were purchased by zamíndárs or traders: and then to say whet
the warning conveyed in that paragraph is not likely to be more than justif
by the working of this Bill.

"These, then, are the faults I find in the Bill: first, that though it p
the occupancy-raiyat in a stronger position than he now holds, it d
not give him complete security of tenure: secondly, that it greatly incre
the facilities for the enhancement of his rent, without laying down
ultimate limit beyond which enhancement is in no case to go: and third
that the protection it gives the non-occupancy-raiyat is altogether inadequ
The hon'ble member in charge of the Bill, to whom I listened with
greatest admiration, and whose speech was equally distinguished by
lucidity of its statements and the fairness of its arguments, will not deny t
in all these three particulars the Bill in its present form is a far weaker meas
than the Bill which was referred to the Select Committee. He has contend
it is true, that the Bill is a much better measure than I have represented it
be. He noticed, in particular, the points of the settled raiyat, the prevail
rate, the gross-produce limit, and the position of the non-occupancy-raiy
and on all these points I am willing to admit that he adduced reasons
considerable force in favour of those conclusions of the Select Commit
which are embodied in the Bill. As the motion actually before us is mer
the preliminary motion that the Bill should be taken into consideration, I
not desire to discuss these questions in detail on the present occasion. E
of them will come before the Council in connexion with amendments,
which notice has already been given. I will only say now that, whate
may be urged in support of the Select Committee's decision upon eacl
these points, what the Council has to look at is the effect of the Bill
a whole. There may have been unanswerable reasons for maintain
the prevailing rate, or for striking out the gross-produce limit, but the gen
result of the rejection of the proposals of the Bengal Government on these
other cognate matters has been, in my opinion, to leave the raiyat with
adequate protection for his rights. And when the hon'ble member quotes
as an authority for the abandonment of the provisions for compensation
disturbance, I think it only fair to myself to point out that I objected to th
provisions, because I thought compensation for disturbance an insuffici
check. I thought it probable that the raiyat would not take his compensat
and go, but would submit to the enhancement and remain. My objections
not disposed of by the removal of the check, without the substitution of a
thing more effective in its place. On the whole, I am not prepared to wi
draw the opinion I have already expressed in my recorded dissent, that the
gives the landlords a power which is not sufficiently controlled or limited,
that the exercise of this power will naturally lead to results inconsistent w
those rights of the tenants which the Bill was designed to maintain,
disastrous to the agricultural interests of the country.

"The nature of the further legislation, which will be necessary to supp
ment and complete this Bill, is a point upon which I do not propose to to
to-day. I shall have an opportunity of noticing it hereafter, when the mot
for the passing of the Bill is submitted to the Council. At present, I de
only to make it clear that my assent to the proposal to take the Bill into c
sideration does not imply my acceptance of the Bill as containing any meas
of completeness or finality. With this understanding, I am prepared to v
for the motion, and I would add that I see no advantage in the proposal t
the discussion should be deferred, or the Bill re-published. The Bill, as p
lished 12 months ago, is substantially the same measure as that which co
before the Council to-day. It has been subjected to the fullest criticism,
those who think it goes too far, equally with those who think it does not
far enough, are not in the least likely to modify their views by putting off
debate for a few weeks or months. Experience alone will show how
measure will work, and in what direction its amendment will be necessary.
the results of that experience I am content to appeal. No one, indeed, wo
rejoice more than myself if my apprehensions should prove to be unfound
But it is my earnest conviction that this Bill will not prove a final or a sa

factory measure ; and, as the Select Committee have not consented to introduce the safeguards which I believe essential to its success, I think it better for the country that the question should not remain in its present state of debate and suspense, but that the measure which commends itself to the majority of the Council should come into early operation, and should be tried by the logic of facts and by the test of results."

The Hon'ble MR. HUNTER said :—" My Lord, I am one of the members of the Select Committee who have not been able to give an unqualified support to this measure. On the second reading of the Bill, two years ago, I felt it my duty to take exception to three of its main proposals. I objected, in the first place, to interfering by statute with the landlord's right to make his own bargain with a new tenant : in the second place, to the produce limit on rent : and in the third place, to the excessive compensation for disturbance. During the passage of the Bill through the Select Committee, these provisions have been expunged, new proposals which seemed to me equally objectionable have been rejected, and it is with much regret that I find myself still compelled to dissent from the report of a body, whose fairness I recognise, and one which has, in my opinion, fought a good fight against extreme proposals from both sides. My regret has been increased by hearing an hon'ble member make use of my dissent in support of a motion which raises the general issue as to the necessity of legislation, and which would postpone legislation for the present. I myself do not understand how any one who listened to the statements made in this Council on the 12th of March, 1883, on behalf of the Government of Bengal and on behalf of the Government of India, can think it either right or expedient that that general issue should now be raised. The Bill came before the Council with the assurances of three Lieutenant-Governors of Bengal that a legislative adjustment of the land question had become necessary for the tranquility and good government of these provinces. These assurances were supported by the opinion of the most experienced district officers and by a great body of information collected by a special Commission. The Government of India had, after further inquiry, given its deliberate assent to the necessity for legislation—an assent which carried with it the sanction of the Secretary of State. But if doubts still remained in the mind of any member as to the sufficiency of the grounds on which the necessity for legislation had been admitted, I think that the papers placed before us in the Select Committee must have completely removed those doubts. I will refer to only one such paper. Mr. Finucane shows that in a tract in which the rents were excessive, over one-fifth of the cultivators absconded into Nepaul in the course of two years; and that nearly fifth of the arable land went out of cultivation. From another tract, in which the rents were still more excessive, one-third of the population absconded, and an almost similar proportion of the land became waste. Why did these British subjects, some 30,000 in number I am told, fly across our frontier to Native territory ? Mr. Finucane's report supplies an answer. 'I noticed people,' he says—'by hundreds, sometimes digging in the field for roots which they gathered for the purpose of eating them. Every year people eke out the scanty meals that their means allow them to provide for themselves by digging for roots. The circumstance attracts no special attention. It is not necessarily a sign that the poorer classes are in distress. And yet I can vouch for the fact from personal experience that the bread or cake made of this root (*chechaur*) is the most disgusting compound a man can put into his mouth : and medical officers have pronounced it to be most indigestible, utterly devoid of any nourishment, and provocative of the most irritating bowel complaints.' My Lord, this description, I am thankful to say, applies only to particular tracts. I do not wish to generalise from it : still less do I desire to infer from it that the Bill now before the Council provides the only or the best remedies for the agricultural distress which Mr. Finucane's report reveals. But I do say that even if we were to reject the repeated assurances by the Government responsible for the tranquility of the country, and if we were to question its assertion that legislation is now necessary for the preservation of peace, yet these and similar statements before the Council most clearly show that legislative interference is necessary in the

interests of humanity. Whatever may be my differences in points of detail i regard to the particular remedies proposed, and steady as my opposition h been to what I considered extreme proposals for curtailing the landlord's right I think that the native landholders in now raising the general issue as to t necessity for legislation, have adopted a course indefensible in itself, and calcu lated to do a moral injury to their cause.

"As regards their specific contention for the republication of the Bill, would ask them what new points are there in the revised measure, which hav not already been submitted during a full year to public discussion by t preliminary report of the Select Committee, or by the letter of the Gover ment of Bengal six months ago? I have listened carefully to the speeches the Hon'ble Peári Mohan Mukerji and the Mahárájá of Durbhunga—in t expectation that some such points would be specified. I have heard that out of the 196 sections did not appear in the Draft Bill. But I have not hea any really new point specified. The truth is that the work of the Select Com mittee during its second session has chiefly been to reject the extreme proposal after those proposals had been duly submitted to public discussion by its prel minary Report; and not to insert new provisions of its own. Where a ne provision has found entrance into the Bill, it has almost invariably been frame upon old lines. The result of the republication of the Bill, would now be, n to submit new points to public discussion, but to resubmit to public discussi the decisions of the Select Committee upon the old points which have durin the past year been amply and publicly discussed.

"My Lord, I have thought it right to state at some length my objections raising afresh the general issue as to the necessity for legislation, because shall have to raise several particular issues in regard to the exact form legislation now proposed. First of all, while I believe that some legislation h become necessary, I do not think that the Council has been placed in the be position to effectively legislate. For, as I have urged in my written dissen the legislature is asked to deal with the entire relations of landlord a tenant in Bengal, without being furnished with any body of cross-examin evidence to guide its deliberations. I agree with the hon'ble member in charg of the Bill that the process of hearing and cross-examining witnesses in t various districts might have led to agitation. But the absence of cross-e amined evidence has, in my opinion, intensified and prolonged the present f more serious agitation. In a country where the expression of opinion unrestrained, and where each of the great interests is powerfully repr sented in the Press, it is impossible to enter on a measure affecting t rights of large and influential classes without exciting opposition and agitati of a most determined character. The best way to encounter such an agitati is to meet it with facts, and the examination of witnesses is the ordinary a only practicable procedure for collecting a body of facts which can be reli on in a conflict of interests, such as is involved in this Bill. I agree with t Hon'ble Sir Steuart Bayley, however, that when the measure reached the Sele Committee, the time had gone past for a peripatetic Commission to tak evidence; and I also think that, with the agitation now at full flood, such Commision would find it very difficult to arrive at the truth.

"If I believed it likely that a delay would enable the Government to colle really important information, or would add materially to the data now before t Council, I should vote for the postponement. But whence is such information come? If one thing has been made clear by the labours of the Select Committee, is the extremely meagre and uncertain character of rural statistics in these pr vinces. The Bengal Government is endeavouring by legislation in its own Counc to provide machinery for increasing its knowledge, and for dealing with the a ministrative difficulties to what insufficient knowledge has given rise. But seven years must elapse before the machinery can be brought into working order an produce practical results. Meanwhile we have exhausted all the sources information which are at present available to the Bengal Government. It h been my business, during the past fifteen years, to acquaint myself with t statistics of each province of India, and to study the sources from which the are derived. More than any other officer of Your Lordship's Government have had to deplore the inadequacy of the information which we possess f

Bengal. I may, therefore, be permitted to say that all the classes of really ascertained facts known to me in regard to Bengal have been fairly used and are now exhausted. I hope that before many years elapse, those facts will have been supplemented by a mass of new information obtained under the Acts now passing through the Bengal Council. But I see no possibility of obtaining that new information within any period, say of six months, during which this Bill could be postponed. Statistics cannot be run up in a night, unless indeed they are to tumble down next morning. If the Bengal Government were to attempt, in the midst of the present agitation, to institute a statistical enquiry on a large scale throughout Bengal, it would merely be deceiving itself and misleading the public. We have not only exhausted all sources of information now available, but we have heard the views of every class and interest which claims to be affected by the measure. A further postponement would prolong the rural agitation in a most undesirable manner: but it would yield no compensating body of new facts.

"The Select Committee has with much patience threaded its way through the conflicting statements submitted to it. The result has in some cases been the rejection of what seemed to me useful proposals. For example, the sale of the occupancy-tenure, which had at one time the approval of the Select Committee, no longer finds a place in the Bill. It appeared expedient to legalise such sales, not on theoretical grounds, much less from an abstract love of any three letters of the alphabet, but simply because such sales had grown into an established custom in Bengal, and because it would save litigation and prevent extortion, if we gave to such transactions the express recognition of the law. But when the incidents to which the custom was subject came to be discussed, there was no evidence to guide the Committee. Some members maintained that the custom of sale was subject to a fee to the landlord for registering the transfer. Others contested this position; one member thought the fee should be as high as 25 per cent., another thought that there should be no fee at all. In the end the right of sale was dropped out of the Bill, chiefly because no agreement could be come to in respect to the conditions to which the sale should be subject. I regret this result, and I shall give my support to the Hon'ble Mr. Amír Alí's amendment for re-introducing the provision, if he sees his way to attach a substantial fee for the landlord to the exercise of the right by tenant. The position of the hon'ble gentleman and myself in this matter affords a good illustration of our position and that of several other dissenting members in regard to many provisions in the Bill. We dissent not because we disapprove of the measure as a whole, but because each of us wanted to get a little more of his own way in the Bill than he has been able to get. If any one infers from the number of dissents that a majority of the Select Committee is opposed to the Bill as a whole, he will be very completely undeceived when the votes on the motion at present before the Council are recorded.

"I regret, however, to have to call attention to what I conceive to be a fundamental source of weakness in the Bill, arising from its attempt to apply one set of minute provisions for the regulation of rent to two provinces in which the relations of landlord and tenant are so widely dissimilar as in Bengal and Behar. In Behar, owing to over-population and to the consequent competition for land, the difficulty is to secure a sufficient share of the crop to the cultivator. Throughout large areas in Bengal the difficulty is for the landlord to realise his rent. Yet the profound economic differences between agricultural relations in Bengal and in Behar find no recognition in the Bill. Throughout the two years' labour of the Select Committee we were perpetually struggling in the meshes of this fundamental error. In my opinion, the result has been to tie our hands in providing perfectly effective remedies for the tenant in Behar, and for the landlord in parts of Bengal. The Bill has accomplished something for both, but not enough for either.

"It is also, I think, defective in another important respect. The root of the agrarian difficulty in Bengal is over-population. 'I consider,' says Mr. Finucane, in describing the wretched condition of the Behar peasantry, 'that it is only the redundant population of Behar which has brought things to this pass,' and the minute sub-division of estates 'creating a number of proprie-

tors whose name is legion.' The Bill attempts to alleviate the evils arising the peasantry from a too keen competition for the land by placing restrictic on the enhancement of rent. Such restrictions, when effective, are necessar made by curtailing the rights of the landlords. But there are two other mea of dealing with over-population, namely, the reclamation of waste lands, a the shifting of the people to unoccupied tracts. With regard to reclamati of waste lands, I shall, in submitting an amendment to the Council, shew tl the Bill not only gives no new encouragement for such undertakings, but tl it places the proprietor, who himself reclaims waste lands, in a worse positi than before. With regard to assisted migrations or shifting of the people unoccupied tracts, I acknowledge that it would be unreasonable to expect a specific provisions in the present Bill. But I hope that the Government m see its way to reconsider this aspect of the question. The waste land uncul vated but capable of cultivation in Bengal and the two provinces immediat adjoining on the east and west is equal to the whole land under crops in Gr Britain and Ireland, and large areas of this waste land are to be found cl on the outskirts of some of the most overcrowded tracts, especially Beh The experiment which the Government has hitherto made to prom and assist the migration of the people to unoccupied or sparsely habited tracts have been few in number and inconclusive as to their resu But such enterprises have been conducted on a considerable scale by p vate enterprise in several parts of the country. I shall cite only two su undertakings. In Birdpur, in the Gorakhpur District, over 23,000 pers have been settled on 250 reclaimed villages, on a tract which forty years a was swamped and heavy jungle; while the success of the new Sonthal colon in Assam shows how much can be effected by State aid combined with priv organisation. The Government has rendered migration possible by openi up railways, but experience shows that the mere possibility of transport d not suffice to make the people move on. This Bill, in attempting to mitig the evils of over-population by placing restrictions on the enhancement rents, tries to remedy what is really a national difficulty at the cost of a pa cular class. I admit that the legislature is justified in regulating the monop in land which over-crowding and over-competition for holdings create in fav of the landlords. The permanent remedy for over-population is not, howev to be found in artificial restrictions upon rent, but in adding to the cultiva area, by encouraging the reclamation of waste lands, and by assisting people to migrate to unoccupied tracts.

" While, however, I believe that the Bill fails to do all that it might h accomplished, owing to the absence of properly-sifted evidence, and to the f damental error of attempting to prescribe one set of regulations for two al gether dissimilar provinces, I acknowledge that it does much towards solution of the questions with which it deals. In the first place, it makes old law a reality—a reality for the tenants as regards the enforcement their occupancy-rights within the entire village; a reality for the landlo as regards the enhancement of rent, when such an enhancement can equitably claimed; and a reality for both landlord and tenant as regards ascertainment of rent actually due. I am no unqualified admirer of the Bi but if it had done nothing more than give reality to the uncertain and unwo able provisions of the old law, I should consider myself bound to give it, a whole, my support. It has been able, however, to do much more than tl It has developed the occupancy-cultivator with all his old uncertainties as to maintenance of his rights into the settled raiyat. It has given to the sett raiyat a clearly-defined area within which no man can defeat his right to h his land as long as he pays a fair rent. It has placed a limit to the enhan ment of his rent out of Court, and it has given him what amounts to a sta tory lease for fifteen years if his rent is enhanced by a suit in Court. Of less importance are the provisions which render null and void any contr which would prevent the growth of the right of occupancy, or interfere w the enjoyment of the incidents of that right. To the ordinary cultiva it has also secured advantages of great value. In the first place, it gi to every cultivator the presumption that he possesses the right of oc pancy in his holding, until the contrary is shown. This presumption is

strict accordance with the facts, if, as has been stated and not contested, that something like nine-tenths of the cultivators of Bengal are at present entitled to claim those rights. The importance of this presumption has been well shown by the hon'ble Mr. Evans in the present debate: and so far as the ordinary cultivator is concerned, the Bill would, in my opinion, have justified its existence, if it had done nothing more than create this presumption in his favour. It has also, however, provided safeguards against his sudden ejectment from his holding, and against the unreasonable enhancement of his rent. Unless the ordinary cultivator himself consents to an enhancement, his rent can only be raised by a suit in which the Court shall determine what is a fair and equitable rent. The rent thus determined cannot be again enhanced for a term of five years; so that, while the Bill practically secures judicial leases for fifteen years to the occupancy-tenant, it also provides what amounts to a judicial lease for five years for the ordinary cultivator.

"My Lord, these are substantial changes in the existing law in favour of the cultivator. We may regret that these changes afford no general protection to the under-tenant, and no special remedy for the particular circumstances of Behar. But we have the satisfaction of knowing that every one of the changes in favour of the cultivator which the present Bill makes in the old law is justified by the facts, and that the Bill, as revised by the Select Committee, errs by defect rather than by excess. The Hon'ble Sir Steuart Bayley has very fully shown what the measure effects for the other great class affected by it, namely, the landholders. I acknowledge the increased facilities which the Bill provides for the realisation of rent by extending the system of registration, and by creating a new procedure for the record of rights and settlement of rents. But just as I regret that the Bill fails to make adequate provisions for the special needs of the cultivator in Behar, so I regret that it fails to give an adequate response to the demands of the landholders in Eastern Bengal. I do not think that the Bill can be accepted as a final settlement of the land difficulty in either province. I hope that amendments will be carried in this Council which will render the Bill more effective in the hands of both the landholders and the cultivator. But I accept the measure as an important and a valuable instalment towards the adjustment of land rights in Bengal, and I believe that, on the whole, it advances as far towards a final settlement of those rights as we are at present justified in going either by the condition of the country or by the ascertained facts."

The Hon'ble Mr. AMÍR ALÍ said:—"My Lord,—My views respecting this Bill are sufficiently indicated in the dissent which I have recorded, and were it not for a feeling that I am bound to lay before this Council at some length the reasons which induce me to support the present motion I should have abstained from trespassing on the time of this Council. If I prove too lengthy, my apology will be the proverbial long-windedness of the profession to which I belong.

"I had hoped that we had by this time passed out of the region of discussions concerning abstract principles and intangible theories. I had hoped that the question of the necessity for some legislation of this character had been sufficiently demonstrated by stern facts. The only subject which remained for determination at this stage was whether the Bill in its present form sufficiently covered the ground which it was intended to traverse—whether it fulfilled thoroughly the objects for which it was introduced? I do not propose to enter here into an examination of that somewhat abstruse question—given the necessity for legislation to regulate the relation of landlords and tenants in this country—whether the State has the power to do so or not; in other words, whether the State, by ensuring the zamíndárs against enhancement or variation of its own demands (and that in effect is the meaning of the Permanent Settlement), had abdicated in perpetuity its legislative functions to protect and safeguard the interests of another class—a much larger and more permanent class. If the contention of the landlords on this head is correct, the result necessarily follows that the Government of this country is an incomplete Government, that it has in fact established an *imperium in*

imperio, and that, so far as the raiyats are concerned, it has delegated all powers to the ever-shifting body of zamíndárs.

"The zamíndári argument reduced thus into plain language sounds son what absurd, and one can hardly suppose that the zamíndárs, or rather their ad cates, mean seriously all that they have urged against the power of legislati possessed by the State. Assuming, however, that the Permanent Settleme was a bar to the State ever interfering between the raiyats and the zamínd the fact that in 1859 the legislature did interfere with the acqui cence or consent of the landlords of that time has, I would contend, remov the bar. It is unnecessary for me to dwell much longer on this branch of t question, for my hon'ble friend Mr. Evans has completely demolished tl preposterous argument. However, one observation I would make. Whate may have been the position of the zamíndár under the Moghuls, whether was merely a rent-receiver of the territorial revenue of the State from t raiyats, as described by Mr. Harrington, or something more, the legislatu whilst settling the revenue payable to the State in perpetuity, expressly served to itself the right, which belonged to it as sovereign, of interposing authority in making from time to time all such regulations as might be necessa to prevent the raiyats being improperly disturbed in their possession or loac with unwarrantable exactions. That power, expressly reserved on that occasi has been exercised repeatedly, and it is trifling to contend that because the St a hundred years ago settled in permanency the revenue payable by the zam dárs, therefore, it abandoned all its duties and responsibilities towards m lions of its subjects.

"The question of necessity is one which is certainly deserving of great c sideration. With reference to this point I desire to say a few words. Sir the year 1870, the necessity for a thorough revision of the land-l has been forcing itself upon the minds of all thoughtful observers. T tension of feeling which had sprung up about that time between the zamínd and raiyats had occasioned considerable administrative difficulties. The zam dárs themselves had commenced to demand some change in the existing law, order to give them facilities for the realization of their legitimate rents, wh the raiyats complained of the arbitrary exercise of the powers of enhanceme and eviction. These difficulties were accentuated on one side by the confusion ideas relating to the subject of tenant-right, on the other by the extravag claims put forward by the new landlords, who were most tenacious of th rights to enhance the rents of their raiyats. It will be remembered that Act of 1859 had been passed with the object of providing some efficient safegua against the exercise of arbitrary power on the part of the landlords. Fr 1799 to 1859, as His Honour the Lieutenant-Governor remarked in his spe on the introduction of the Bill in Council, 'feudalism on the one hand, serfd on the other, were the principal characteristics of the land system of Beng The legislature no doubt endeavoured to maintain intact 'the constitutio claims of the peasantry,' but 'practically,' His Honour said, 'they were s merged in the usurpations and encroachments of the zamíndárs.' 'Act X of 18 undoubtedly effected some improvement in the position of the raiyats, but t rule for the acquisition of prescriptive occupancy-right by a twelve yea occupation of particular plots of land did more harm than good. And the r of enhancement based on the productiveness of the soil eventually beca a fruitful source of difficulty and trouble.

"In 1873, the Government for the first time awakened to the gravity the situation. The famous Pubna riots broke out in that year, and since th there have been periodical collisions between raiyat and landlord in differ parts of the province. In 1873, Sir George Campbell spoke thus about definitive settlement of the land question :—

'If the settlement is to be effective, it must not only get the zamíndárs out of t present difficulties, it must bind them for the future. It must settle all questions possession, measurement and rates, it must decide who is and who is not liable to enhan ment, and it must have power to prescribe a term—a good long term—for which its adjustm is to be binding, and the zamíndárs are not to be allowed to disturb the rates and arran ments made. No doubt this will be a serious undertaking, but it would be an effectual s

beneficial settlement if fairly and thoroughly carried out. The Lieutenant-Governor would not advocate interference unless it is carried to this point.'

"In 1875, Sir Richard Temple, who had taken the place of Sir George Campbell, again brought forward the proposal regarding the amendment of the substantive law, and invited the opinion of the British Indian Association on the subject. In a letter dated 10th of March, 1876, the Honorary Secretary of that body pointed out the defective character of Act X of 1859 in essential particulars, and the necessity for a radical amendment. Before this, in June, 1875, the British Indian Association had already represented that the struggle between zamíndárs and raiyats, due to the indefiniteness of their relations and the readiness of the raiyats to combine in withholding rent, could only be ended by a general revision of the rent law. In March, 1876, whilst the Agrarian Disputes Act was pending before the Bengal Council, our lamented colleague, Rai Kristodás Pál, urged that the indefiniteness of the principles of Act X of 1859 had brought suits for the adjustment of rents to a deadlock. It was in consequence of these repeated representations, and the urgency of the difficulties which had arisen both in Eastern Bengal and Behar, that Sir Richard Temple asked for leave to introduce a measure into the local Council; but before he could get a reply he was sent to Southern India to look after the relief measures. When Sir Ashley Eden assumed charge of the Lieutenant-Governorship of Bengal, he found affairs in this position. The zamíndárs, on one side, were calling out for facilities for the recovery and enhancement of rents; the raiyats, on the other hand, were asking for protection against illegitimate enhancement and eviction; whilst the officers of Government charged with executive administration were of opinion that some measure by which the existing tension of feeling could be removed should be taken in hand at once.

"It was in view of these signs and shadows of coming events that Sir Ashley Eden strongly urged upon the Government of India the advisability of settling the rent question definitely while the country was tranquil, while seasons were favourable and the people well off, and reason could make its voice easily heard, instead of allowing things to drift on until another famine or a second outbreak of the Pubna riots compelled the Government to take up the subject with all the haste and incompleteness that too frequently affect measures devised under circumstances of State trouble and emergency.

"This Bill, I mean the *original* Bill, was introduced with the object of definitely placing, so far as was possible, the relation of landlords and tenants on a satisfactory basis. The objects were distinctly defined in the speech of the hon'ble the Law Member—

"(1) To give reasonable security to the tenant in the occupation and enjoyment of his land, and (2) to give reasonable facilities to the landlord for the settlement and recovery of his rent.

"In order to attain the first object, it was proposed to make the following changes in the existing system:—

"(1) to extend the occupancy-right to all resident raiyats holding lands in a particular village or estate for more than twelve years;

(2) to make occupancy-rights transferable;

(3) to introduce a fixed maximum standard for the enhancement of rents.

"The disastrous and demoralising consequences resulting from the twelve years' rule of prescription are now recognised by all. It did away with the long-established distinction which had existed from the earliest times between the resident and non-resident raiyats, reducing them all to a dead level of uniformity; the raiyats claiming rights of occupancy being required under the existing law to prove that they have held for twelve years not merely in the village lands, but in everyone of the particular field or plots in respect of which the right was claimed. When it is borne in mind how frequently the twelve years' prescription is interrupted by a mere shifting of the fields, sometimes by eviction within the term, in other cases by the grant of terminable leases for short periods with the option of renewal, it will become apparent how difficult it is in

general for the raiyat to acquire a right of occupancy, or to prove it when is questioned. Considering the testimony which has been borne from all si of India to the prosperity of raiyats possessing occupancy-tenure, to their abili to withstand and make head against droughts and scarcities, to tide over general more successfully such disasters as were caused by the cyclones and t great tidal wave in Deltaic Bengal, it is unjust to charge us with being d trinaires and theorists in coming to the conclusion that a measure simplifyi and facilitating the proof of occupancy-rights is essential to the well-being the agricultural population of Bengal; in fact, in endeavouring to restore t occupancy-raiyats to their old position.

"The same fatality which overtook Act X of 1859 in Committee has fallen this measure. Owing to the same spirit of compromise which wrec that Act, most of the alterations which have been effected in the pres measure at its latest stage have been made, as admitted by the Hon' Mr. Evans, in favour of the zamíndárs, and some of the most important p visions for the security of the raiyat and the improvement of his condition h been abandoned, or so modified as to be of little advantage to him. We l expected that the measure now under discussion would give a legal validity a statutory sanction to the custom of transferability of occupancy-holdings; had hoped that the law relating to the enhancement of rents would be so mo fied that, supplying to the landlord a more workable method of enhanceme it would protect the raiyats from incessant harassment and perennial destitutic we had hoped that there would be a practical check imposed on rackrenti that some substantial guarantee would be given against the ejectment of n occupancy-raiyats, simply with the object of preventing their obtaining t interest in the soil which would induce them to improve their husbandry a their condition in life.

"The amended Bill falls far short of the just expectations of those w after all this agitation, would have liked to see a definitive settlement of t land question in Bengal.

"I shall have to say something with reference to each of these points wh I move the amendments which stand in my name. I desire, however, to rem in passing that I cannot help regarding the abandonment of the transferabil clauses as a serious misfortune. The custom of transferability had grown u many districts of Bengal and Behar, and was gradually extending itself throu out the province. It had also been conclusively proved that those raiyats who h a permanent alienable interest in all their holdings were more prosperous th those who had no such interest, that their cultivation was better, and that th were more capable of making head against scarcities and famines. In the face this evidence, to forego all the advantages gained after so much discussion, to le the right of transferability to custom in the present tension of feeling betw landlords and tenants, is to invite the zamíndár to contest the right every ti the opportunity occurs. The result of all this will be, firstly, to place a la proportion of the purchase-money in the pockets of the zamíndárs, and, in t second place, materially to retard the extension and growth of the custom transferability even where it has taken root. I am glad that my hon'l friend, Dr. Hunter, is willing to give his valuable support to my proposal for t re-insertion of the transferability clauses, and I think I shall be able, when I bri forward my amendment, to meet his views regarding the amount of fee whi ought to be paid by the raiyat. Probably my hon'ble friend will not obj to exempt those *guzáshtadárs* whose right is protected by long-established c tom from the payment of any fee.

"The objection against a gross-produce limit proceeds mainly on theo tical and *á priori* grounds. It has been said that if such a limit adopted, in every case of enhancement by contract, the registering offi will have to enter into a minute and difficult enquiry, and that the sa will be the case in Court. I maintain that this argument assumes t points. In the first place, it presupposes an insuperable difficulty in ma ing a fair rough average estimate of the yield of land and its value. Now venture to say there is no villager with any knowledge of cultivation w

has not a rough conception of the yield of produce and the value of the crop. In the second place, the argument against the gross-produce limit assumes that in the registered agreements to pay enhanced rents the parties do not or will not enter the quantities of land, its nature, capacity, &c. If the statement of these facts will not enable the registering officers to form some rough estimate of the produce limit, I am afraid the Local Government will have to improve its staff of registering officers.

"I may observe here that in the Punjab the land-revenue assessment is limited to the equivalent of one-sixth of the gross produce, and the system has been found to be extremely practicable. If it is practicable in the Punjab, why should it not be workable in Bengal?

"As regards the non-occupancy-raiyat, our contention that the protection which has been given to him by this Bill is utterly inadequate, is borne out by the frank avowal of the zamíndárs' representative that henceforth no non-occupancy-raiyat will be allowed to acquire the status of an occupancy-raiyat; such an avowal would hardly have been made if the guarantee given to the non-occupancy-raiyat against eviction had been adequate.

"If the extension of occupancy-rights among the raiyats be conducive to the general welfare of the community, then there can be little doubt that any loophole for perpetuating tenancies-at-will, for continuing the vicious system of shifting and eviction would be disastrous to the public weal. As population increases, as the demand for land becomes greater, the effort to exclude the possibility of acquiring occupancy-rights will be redoubled. At the same time I desire it to be distinctly understood, that I do not advocate the promiscuous extension of the occupancy-right to non-occupancy-raiyats. What I want to see is that the latter should be reasonably protected from perpetual harassment. This I submit has not been done efficiently by the Bill. At the same time I admit that the present measure is an improvement on the existing law. The acquisition of a right of occupancy by residence; the prohibition of contracts precluding the accrual of the right of occupancy; the restriction on enhancement out of Court; the validation of the raiyat's right to make improvements, constitute the most commendable features of the present Bill, and I accept it as the first instalment of the inevitable legislation which *must* follow sooner or later to settle the relations of the cultivating classes with their landlords more satisfactorily. My Lord, the hon'ble member in charge of the Bill has referred in kind terms to the services of the non-official members on the Committee. As far as I am concerned, it was a labour of love, for I cannot help taking a keen interest in this measure. The bulk of the peasantry in Eastern Bengal, numbering several millions of souls, belong to my faith, and naturally have a claim upon the Muhammadan member for the time being in Your Excellency's Council. In Eastern Bengal, the agrarian troubles are aggravated by religious differences and the fact that many of the zamíndárs are new-comers. The new landlords, generally speaking, have little or no sympathy with their peasantry, most of whom are Mussulmans. If the law gives them power, say, of enhancement or ejectment, it is worked without compunction and without mercy. I say this advisedly. The causes and character of the Pubna outbreak must be familiar to this Council, though apparently they have been forgotten outside this Council Chamber. They illustrate most strikingly the general nature of rent-disputes in Bengal. I will take the liberty to quote here a passage with reference to the outbreak from the Government of India's despatch to the Secretary of State, dated 21st March, 1882:—

'The affair originated in the Isafshahi parganá, formerly owned by the Rájás of Nattore. In the decay of that ancient family a part of its possessions was purchased by new-comers, whose relations with their raiyats and with each other appear to have been unfriendly from the first. Collections were raised by decreasing the standard of measurement and by imposing illegal cesses which were afterwards more or less consolidated with the rent. The raiyats never gave any written or formal consent to the conversion of these voluntary abwábs or cesses into dues which could be realised according to law. In time the rent-rates of Isafshahi came greatly to exceed those of neighbouring tracts.

'Two causes of the dispute were thus a high rate of collection compared with o parganás, and an uncertainty as to how far the amount claimed was due. A third cause the violent and lawless character of some of the zamíndárs, and of the agents of others. T had been affrays in which men were killed by spear-wounds. Swordsmen had been sen make collections, and cases of attack by clubmen and of kidnapping are mentioned in report.'

"It has been stated in this Council that the reasons for interfering Behar with the status of occupancy-raiyats are non-existent; that the prac of shifting is not resorted to there for the purpose of avoiding the accrual of right. This statement may be true in the case of considerate zamíndárs the Hon'ble the Maháráját of Durbhunga, who, whilst tenacious of their anci rights, respect and value the constitutional rights of the peasantry. But way of answer to his criticism on that portion of the Bill which aims at ing a certain degree of security to the occupancy-raiyat and towards facilitat the proof of his right, I would recall to his mind what the zamíndárs of S habad, at a meeting held on the 31st October 1880, at Arrah, said on subject:—

'At present landowners prevent the growth of occupancy-rights by granting lease five years only, or by changing the lands, or by managing so that a raiyat shall never hol the same rent for 12 years. In practice the last expedient is found sufficient, as the Cc find claims to occupancy-right not proved unless the raiyat can show that he held the s land for 12 years, by proving that he paid the same rent. Under the proposed law zam dárs would not suffer raiyats to remain for three years.'

"The Hon'ble Mr. Evans has urged that, if the circumstances of Behar w so exceptional as they were represented to be by the officers of Governm who had reported on the subject, there ought to have been two Bills, one Behar, another for Bengal. I admit that, if we had adopted this cou we would have been better able to deal with details; but on that princ there ought not to be two Bills, but four Bills—one for Eastern Bengal, anot for Central Bengal, a third for Northern Bengal, and a fourth for Behar; for conditions of rural economy in each of these tracts are dissimilar to each otl I doubt, however, whether the public or the people would have thanked legislature for such a course. Besides, the evils which the legislature des to remedy, the circumstances which it desires to direct and control are after all very different in either of these parts. The landlord everywl desires to recover his rent easily; the raiyat everywhere wants to allowed to live in peace; and the legislature has before this dealt with province as a whole. The limit of two annas on enhancement by private c tract has been strongly objected to. It is said that such a restriction is only opposed to all the principles of freedom of contract, but that it prove practically mischievous, as it will always drive the parties into Cc for obtaining a higher enhancement. My Lord, how far the rules of p tical economy are applicable to a country where the mass of the people from hand to mouth is a question which was answered effectually, though at cost of a million of lives, during the Orissa famine. The Bengal Governm on the occasion attempted to deal with the calamity which had overtaken country in strict accordance with the rules of political economy, but the res completely falsified the expectations entertained at the time from the appl tion of the economic nostrum. 'When political economy speaks of freedom contract,' were the memorable words of Sir Evelyn Baring used in this v hall, 'it means that free choice, dictated by intelligent self-interest, is the m efficient agent in the production of wealth.' Can any one who is acquain with the condition of the millions of raiyats, whose holdings do not aver more than two or three acres, and who pay a rent of less than five rupees a ye can any one who knows the circumstances under which this vast mass pauperised cottiers, living always on the verge of starvation, till the soil, that these men can exercise a free and intelligent choice in their contracts?

"My Lord, I am afraid I am encroaching too much on the indulgence of Council. But I cannot help being somewhat long, in spite of the charge prolixity that may be brought against me. Political economy is thrust dc one's throat at every turn of the question; indeed, so often, that I tempted to quote a passage from the master of political economists, whic hope will be taken to heart by the warmest upholders of zamíndári rights.

'Rent,' says Mill, 'paid by a capitalist who farms for profit and not for bread may safely be abandoned to competition; rent paid by labourers cannot, unless the labourers were in a state of civilisation and improvement, which labourers have nowhere yet reached and cannot easily reach under such a tenure. Peasant rents ought never to be arbitrary,—never at the discretion of the landlord; either by custom or law it is imperatively necessary that they should be fixed, and, where no mutually advantageous custom has established itself, reason and experience recommend that they should be fixed by authority.'

"My own view is that it is not only necessary to impose a limit upon private contracts, but that, in order to be efficacious, a similar limit should be introduced upon enhancements in Court; otherwise I believe the wholesome provision will become practically valueless.

"The remarks of the Hon'ble Bábú Peári Mohan Mukerji, that there is practically no non-judicial power of distraint given by the Bill for the realisation of rents, are perfectly true. Undoubtedly in the despatch to which both the hon'ble member and I myself have referred it was proposed 'to provide for the more speedy realisation of arrears of rents, *when the rates are undisputed*, by a modified method of distraint.' It must have escaped the notice of my hon'ble friend the importance to be attached to the expression 'when the rates are undisputed.' Is there any case in which the rates are not disputed? Probably, in some districts, or rather estates, bordering on Nepal and other frontier tracts, which give the raiyats a facility to disappear after raising their crops, a modified power of distraint might prove useful; but when the Committee came to consider the abuses to which this power is open and the oppressions practised under its guise, it was thought advisable not to leave to the zamíndár the power of distraint at his own free will and according to his own method. The provisions of Chapter XII are, I think, in accord with the Government of India's proposal in the despatch referred to.

"It has been contended that we have no cross-examined evidence furnishing, as it were, the groundwork over which the legislative structure has been built. A great deal of money has already been spent in various quarters in the course of these discussions, and probably, if the Select Committee had decided to hear cross-examined evidence, a little more would have been put into the pockets of lawyers. But whether evidence so collected would have been one iota more valuable than the testimony of competent officers and thoughtful observers is a question which I cannot answer. I have pointed out the features in the Bill which stand out as marked improvements over the existing law. I have also pointed out the features where it falls short—miserably short—of the just requirements of the present situation. I trust that, before the final vote is taken, the objectionable features in the Bill will be removed, the most important of them—the most dangerous—being the ground of enhancement based on increase in the prices of food-crops.

"This ground of enhancement, besides being open to various economical objections, furnishes the landlords with a most formidable and trenchant weapon for enhancement of rents, the use of which in many parts of Bengal and throughout Behar must prove ruinous at no distant date to those raiyats whose rents are already high enough. In defence of this proposal it has been put forward that enhancement on the ground of increase in prices does not take more of the crop from the raiyat; in other words, that it is the value of the crop expressed in larger terms owing to the diminished value of silver. This is undoubtedly a very specious argument, but in spite of its speciousness I maintain that it is extremely unfair to the raiyats. On examining the argument even on the basis of political economy, it is seen that it leaves out of consideration an increase in the necessities of a raiyat, and a larger expenditure on account of what he has to buy. Furthermore, it is clear that the allowance for cost of production may often prove totally insufficient. For these and other reasons, which I shall mention more particularly when I move my specific amendments, it seems to me that the effects of this ground of enhancement have hardly yet been realised to their fullest extent.

"As the question stands at present, I accept the Bill as a step in the right [illegible] looking at it in that light, and approving entirely of the

'Two causes of the dispute were thus a high rate of collection compared with ot parganás, and an uncertainty as to how far the amount claimed was due. A third cause the violent and lawless character of some of the zamíndárs, and of the agents of others. Th had been affrays in which men were killed by spear-wounds. Swordsmen had been sent make collections, and cases of attack by clubmen and of kidnapping are mentioned in report.'

"It has been stated in this Council that the reasons for interfering Behar with the status of occupancy-raiyats are non-existent; that the pract of shifting is not resorted to there for the purpose of avoiding the accrual of t right. This statement may be true in the case of considerate zamíndárs li the Hon'ble the Maháráját of Durbhunga, who, whilst tenacious of their ancie rights, respect and value the constitutional rights of the peasantry. But way of answer to his criticism on that portion of the Bill which aims at g ing a certain degree of security to the occupancy-raiyat and towards facilitati the proof of his right, I would recall to his mind what the zamíndárs of Sh habad, at a meeting held on the 31st October 1880, at Arrah, said on t subject:—

'At present landowners prevent the growth of occupancy-rights by granting leases five years only, or by changing the lands, or by managing so that a raiyat shall never hold the same rent for 12 years. In practice the last expedient is found sufficient, as the Cou find claims to occupancy-right not proved unless the raiyat can show that he held the sa land for 12 years, by proving that he paid the same rent. Under the proposed law zam dárs would not suffer raiyats to remain for three years.'

"The Hon'ble Mr. Evans has urged that, if the circumstances of Behar w so exceptional as they were represented to be by the officers of Governme who had reported on the subject, there ought to have been two Bills, one Behar, another for Bengal. I admit that, if we had adopted this cour we would have been better able to deal with details; but on that princi there ought not to be two Bills, but four Bills—one for Eastern Bengal, anot for Central Bengal, a third for Northern Bengal, and a fourth for Behar; for t conditions of rural economy in each of these tracts are dissimilar to each oth I doubt, however, whether the public or the people would have thanked legislature for such a course. Besides, the evils which the legislature desi to remedy, the circumstances which it desires to direct and control are after all very different in either of these parts. The landlord everywh desires to recover his rent easily; the raiyat everywhere wants to allowed to live in peace; and the legislature has before this dealt with t province as a whole. The limit of two annas on enhancement by private c tract has been strongly objected to. It is said that such a restriction is only opposed to all the principles of freedom of contract, but that it w prove practically mischievous, as it will always drive the parties into Cou for obtaining a higher enhancement. My Lord, how far the rules of po tical economy are applicable to a country where the mass of the people l from hand to mouth is a question which was answered effectually, though at t cost of a million of lives, during the Orissa famine. The Bengal Governme on the occasion attempted to deal with the calamity which had overtaken t country in strict accordance with the rules of political economy, but the resu completely falsified the expectations entertained at the time from the appli tion of the economic nostrum. 'When political economy speaks of freedom contract,' were the memorable words of Sir Evelyn Baring used in this ve hall, 'it means that free choice, dictated by intelligent self-interest, is the m efficient agent in the production of wealth.' But whether evidence so collected would have been one iota more valuable than the testimony of competent officers and thoughtful observers is a question which I cannot answer. I have pointed out the features in the Bill which stand out as marked improvements over the existing law. I have also pointed out the features where it falls short—miserably short—of the just requirements of the present situation. I trust that, before the final vote is taken, the objectionable features in the Bill will be removed, the most important of them—the most dangerous—being the ground of enhancement based on increase in the prices of food-crops.

"This ground of enhancement, besides being open to various economical objections, furnishes the landlords with a most formidable and trenchant weapon for enhancement of rents, the use of which in many parts of Bengal and throughout Behar must prove ruinous at no distant date to those raiyats whose rents are already high enough. In defence of this proposal it has been put forward that enhancement on the ground of increase in prices does not take more of the crop from the raiyat; in other words, that it is the value of the crop expressed in larger terms owing to the diminished value of silver. This is undoubtedly a very specious argument, but in spite of its speciousness I maintain that it is extremely unfair to the raiyats. On examining the argument even on the basis of political economy, it is seen that it leaves out of consideration an increase in the necessities of a raiyat, and a larger expenditure on account of what he has to buy. Furthermore, it is clear that the allowance for cost of production may often prove totally insufficient. For these and other reasons, which I shall mention more particularly when I move my specific amendments, it seems to me that the effects of this ground of enhancement have hardly yet been realised to their fullest extent.

"As the question stands at present, I accept the Bill as a step in the right direction, and in looking at it in that light, and approving entirely of the

principles which it embodies, I vote for the motion that the consideration the Bill should be proceeded with without delay.

"With reference to the motion for the re-publication of the Bill, I desire mention that, had I believed any possible object would be gained by suc course, that the zamíndárs or raiyats would become by delay more willing make concessions to each other, I might have been inclined to vote for the po ponement of the consideration of the Bill until next session. As it is, I beli a postponement will keep the country in a state of feverish excitement, intens still further the bitter feelings existing between the two classes, and prove of avail to anybody."

The Hon'ble MR. GIBBON said:—"My Lord, with reference to the ame ment proposed by the Hon'ble Peári Mohan Mukerji, that the Bill be re-p lished, and that the consideration of the measure be deferred for at least th months, I must, I am sorry to say, oppose the amendment. The state of country is such, the agitation for and against the measure is becoming so wi spread, I am convinced that it leaves only two courses open to Your Excellenc Government—either to proceed with the measure, or to abandon it for ever; a third course will be fraught with danger to the public peace, as well as ruin to the interests of both landlords and tenants. For six years the provisions the Bill have been in some shape or another subjected to public criticism; ev alternative proposal, every impossible crotchet, has been discussed and thresl out; and, although the Bill may contain a few sections that were not contai in the draft Bill submitted to the Committee, it contains no provisions that h not already been subjected to public criticism.

"I am sure no arguments could be adduced for or against any of its pr sions that are not contained in the mass of correspondence already submitted

"Believing such to be the case, I cannot realize what good purpose is to served by the delay asked for. On the contrary, in the interests of the landlo more so than in the interests of the tenants, delay is to be deplored. We h nothing to gain by the delay, much to lose. Judging from what I see a hear around me and in my work, I believe further delay, more indecisi means ruin.

"The fears of the zamíndárs have been excited fully as much by the ma crude proposals from time to time submitted as from anything contained in Bill. Their fears of the measure, their public utterances, are having their eff on the minds of their tenants, and we must not be surprised if their tena measure their own gains by the estimate placed by the zamíndárs on their o losses.

"The raiyats believe that the Bill will give them fixity of tenure with any reference to the means by which they may acquire possession of the la a right to sub-divide and transfer their holdings piecemeal; freedom fr enhancement; freedom from payment of rents; a general right to appropri other peoples' property. We now require something definite, something fir to recall us to our senses. If the proposal of the hon'ble member is carried, may expect to see the tenants acting up to the tenor of their convictions, de ing all law, following the bent of their inclination.

"The Courts are at present blocked with litigants, but unless something decided upon quickly the work the Government officials are now required to will be child's play in comparison with the work that would be cast upon th

"If the Bill is not proceeded with or abandoned, Your Excellency's Gove ment must be prepared to substitute one of a very summary nature. Y Excellency's Government must be prepared to manage half the zamíndáris the country, for I am quite sure that if the present agitation is allowed to p ceed unchecked we will not be able to manage them for ourselves.

"The only means of checking this agitation is to let us know at once best and worst we have to expect under the Bill.

"If I understood the Hon'ble Mahárájá Bahádur correctly, he would even at this stage of our proceedings delay the progress of the measure until a Commission of Enquiry has been held. A Commission issued now with the declared intention of basing legislation on its report would have a most demoralizing effect on the country; it would divide the country into two hostile camps, bespattering each other with mud; few among us would see the end of it; all would regret the result.

"My Lord, with reference to the subject-matter of the Bill, so much has been said on almost every one of its provisions that little is left for me to say. For me to attempt to improve on the many admirable arguments adduced in support of the views I hold I conceive to be an impossible task—also a needless one to attempt to refute, in one set speech, the many arguments with which I differ—a waste of time—with so many amendments on the notice-paper,—an amendment, sometimes two or three, on every important section in the Bill. I may hope that ample opportunity will be afforded us of discussing our respective differences to some better purpose hereafter.

"With reference to the much-disputed point as to whether the Bill in any manner infringes the terms of the Permanent Settlement, or whether the Government, in now legislating as it is about to do, only acts up to the powers it reserved to itself in the Regulations, I have no wish to enter at any length. I would only say that, in my opinion, with the exception of section 18, which does to all intents and purposes transfer the proprietary right in the soil from one class of persons to another, the Select Committee, and through it the Government, have carefully kept within its powers. The Bill, with the exception of this one section, does nothing to interfere with the proprietary right in the land, but it does overmuch to regulate the landlord's dealings with his tenants.

"I will now try to confine the few remarks I wish to make to those portions of the Bill which are to regulate our business transactions, which instruct us in the manner we are to conduct ourselves towards our tenants, and the difficulties we shall have to contend against in following its instructions—points which it appears to me have been lightly passed over or not gauged at their true significance. The Bill as it stands will do all the hon'ble member in charge of it has declared it will do to secure to the tenant the uninterrupted enjoyment of his legitimate rights; it has made the position of the raiyat, both occupancy and non-occupancy, impregnable; and in one most important respect it will effect more for them than the hon'ble member has taken credit for; by a small and as yet little noticed change made in the procedure free the country from wholesale enhancement under pressure.

"The alteration I refer to is the substitution of immediate suit for the present practice of issuing 'notices of enhancement through the Courts months previous to the introduction of the suit.' The practice of issuing notice of enhancement through the Courts has done more to facilitate wholesale enhancement of rents of estates than any other provisions of the present law. Notice of enhancement has necessitated present legislation and made this Bill possible. This change about to be made in the procedure will, I am sure, be beneficial; its effects will, I hope, be far-reaching; it will, I hope, make the restrictions placed on voluntary enhancement under section 29 unnecessary.

"That legislation is to a certain extent, as provided by the Bill, necessary, there can, I think, be no doubt; but whether in the early stages of the controversy the alteration of a few sections in the present law would not have proved sufficient may, I think, be allowed to be an open question. We will admit that you have gone too far to recede: you must proceed, and we, both landlords and tenants, are wise if we accept the inevitable with a good grace. But with reference to this Bill many hon'ble members, many persons who have taken part in this controversy, when they fail to meet the argument that it is not suited for Bengal, fall back upon the argument that it is required in Behar. Nothing is too bad to say of Behar; no restriction is too severe to be placed on our actions. If the measure is required for Behar and is not required for Bengal, we should withdraw that Province from the sphere of its operations. If the Council are of opinion that the Bill is required in Behar and not in

Bengal, we should drop it for Bengal and proceed with it only with reference Behar. For my part I am happy in believing that we in Behar are no better, worse, than our brethren in Bengal; that our tenants are not the down-trodd poverty-stricken men they are often depicted; and I would fain hope that, wh some among us set aside the spectacles through which we are looking, a judge with our own eyes, our tenants will be found in every way as well and as independent a class as any in Bengal. For my part I am convinc that, if any portion of this Bill is unsuited for Bengal, it is equally unsui for my province. That the rents of whole estates have been unduly enhanc I admit, but that my province is rackrented as a province I deny. I deny a that there is any necessity for the severe restrictions to be placed on volunta adjustment of rents under section 29, and in placing such restrictions on we are acting contrary to the declared principles of the Bill.

"Although I am strongly opposed to indiscriminate enhancement of ren I am equally opposed to severe restrictions being placed on the landlord's rig to enhance where enhancement is fairly due. I am still more opposed to u necessary obstacles being placed in the way of a mutual adjustment of ren or, for that matter, in the way of voluntary enhancement out of Court.

"All such unnecessary restrictions only hamper the good men among u they will be evaded by the worldly-wise.

"My Lord, three more gaps must be filled up before the restriction in t section will be effectual, and to stop these gaps some of the best portions of t Bill must be revised.

"With reference to section 29, the Hon'ble Mr. Evans has shown t Council more clearly than I am able to do the difference between adjustme of rents and enhancement of rents. He has quoted the Malynuggur case as case in point. If I understood him correctly, he submitted it in support of t planters' contention 'that an adjustment of rents should be allowed when o party to the agreement declines to continue to fulfil the conditions under whi the tenancy was previously held.'

"If I understand the case correctly, it was hardly a case to the point; it w a case in which it suited one party to the agreement to set aside the conditio under which the tenancy was held, and the party who found it convenient set aside the conditions of the tenancy claimed an enhancement of rents the ground that he had cancelled a condition of the tenancy which he no long found it convenient his tenants should fulfil.

"As to the rights of the different parties under the present law I have concern. I would only point out that this case in no way represents our clair our claim is represented better under section 51, which says :

'If a question arises as to the amount of a tenant's rent or the conditions under which holds in any agricultural year, he shall be presumed, until the contrary is shown, to hold at t same rent and under the same conditions as in the last preceding agricultural year.'

"The practical effect of this will be that the Courts will find the conditio of a tenancy are equally binding on both parties, and that the person w sets aside the conditions without consent shall make good the other's loss by re-adjustment. All we claim is that the party who finds it convenient to s aside the conditions of a tenancy shall not be placed in a position to retain the advantages minus any onerous or compensating conditions.

"Section 29 will have the mischievous effect attributed to it by t Hon'ble Mr. Evans; its effects could only be redeemed by the Governme declaring that all suits for enhancement may be brought free of cost. Th I deem to be impossible. Many urgent representations have been made Committee and out of it to cheapen costs of suits.

"It has been recommended to reduce court-fees and to expedite the hea ing of suits—both very necessary. At present we are put to great expense a needless loss of time by the delays in the hearing of our suits; our witness are obliged to travel long distances only to be sent back. The lessening court-fees is not sufficient; it is necessary to reduce process-fees also.

"I do not know how many of the hon'ble members here present are aware that if I procure a decree against a tenant for arrears of rent, if his holding consists of ten pieces of land, he must pay an attachment fee of Rs. 2 for each piece and also a further fee of Rs. 2 on each piece as a fee on sale. Such fees are exorbitant, and they fall on the judgment-debtor. Unless such are remedied, the provision of the Bill which substitutes sale of holding for ejectment after decree will be cruel.

"For all sums under Rs. 100 the judgment-debtor has to refund 65 per cent. of the principal as costs of the plaintiff; he has to stand all his own costs plus sale-fees if the holding is sold.

"The changes the Bill will necessitate in our modes of transacting business are very great. Receipts must be kept in counterfoil, with severe penalties attached for neglect to deliver; agreements must be registered; all accounts must be kept in bound books; a suit for pattá and kabúliyat has been set aside and an application for a declaration of conditions under section 158 substituted; the landlord must no longer neglect to deliver a receipt; and other changes too numerous to mention have been made—all improvements in a way; but the penalties for omission and commission are so severe, so many opportunities will be afforded for worrying the landlords, that the Bill if hastily or harshly administered may be turned into an engine of oppression. It must be remembered that to carry out the instructions of the Bill in their entirety the habits of a lifetime must be discarded. In attempting to follow your rules we shall require all your sympathy—much forbearance. Throughout the discussion much stress has been laid upon the necessity of compelling the landlords to keep their accounts in bound books, much discredit has been cast upon their mode of keeping accounts, but no one has thought it necessary to enquire if it has even been made possible to do otherwise than as we now do. When we keep our accounts in bound books they are called for in evidence not only in our own cases but in the interests of others; our servants have to take them to Court half a dozen times before their evidence is taken; our books are detained in or out of Court for days together; some of my books are detained for months; we are at the mercy of our opponents and of the Courts.

"I will leave the Hon'ble Council to judge of what use such books are to us when returned.

"The remedy we must leave to others to provide. All I can say is that, as the accuracy of the landlords' accounts will depend upon the punctuality with which they are written, it becomes a matter of the first importance that the present state of affairs be not allowed to continue; if it does, our second state will be worst than our first; the landlord will be compelled to keep two sets of books, one for himself and one for the Courts.

"Under the Bill a registered document is in many instances absolutely necessary; in all instances it will carry greater value than an unregistered one. The Hon'ble Mr. Evans has quoted the authority of the Board of Revenue to prove how difficult it is to induce tenants to register. I myself am a strong advocate of registration; registration should be encouraged in every way possible, but it remains for the Government to make registration possible. The Select Committee has called the attention of the Government to the necessity of expediting and cheapening registration: at present registration is in some cases almost prohibitory, in some cases quite so; at present every tenant must waste at least 48 hours of his time besides having to travel long distances; documents are impounded or returned for the most trivial errors; and if such is the case when registration is the exception and not the rule, what will it be when registration is made compulsory? Under the Bill there is no enhancement of the rents of a bhaoli tenure, and rightly so; the initial rent will be the rent for all time to come; but under the law a bhaoli agreement cannot be registered; should a dispute arise as to the rate of the tenant's rents, he must prove his right to hold under section 51 or pay at the rate others are paying. Another change is about to be made in the procedure, and I hope it will prove itself to be a beneficial one, but again all will depend upon the cost of the application.

"An application under section 158 to declare the terms and nature of a t ancy is to be substituted for the time-honoured but cumbersome practice suit for the interchange of documents. There is nothing in the Bill to proh their interchange; on the contrary, they are made necessary at every step, they cannot be sued for. The change is a good one and practical, but it take us some time to understand. If the cost is not made prohibitory, it sho benefit both parties: as it is to be a simpler mode of proceeding I hop will be a cheaper one. Under the Record-of-rights and Settlement chapter m good will, I hope, be effected; vast and exceptional powers are given to Government under it; but those powers, as they are intended to meet exceptic cases, we may, I think, trust the Government to exercise them only in case grave necessity. I believe this chapter, as it stood in the draft Bill, created m uneasiness, greater consternation, among the landlords than any other portio the Bill. I hope when they fully realize the great changes that have b made in this chapter by the Select Committee they will be re-assured.

"Much as the Bill will do for the position of the raiyat in respect to position he will stand in to his landlord, it does nothing for him with resp to his credit with his banker. It omits transferability from among the i dents attached to an occupancy-holding; on this point it leaves the law a stands.

"I regret that the Government does not see its way to legalizing and c trolling transfers of holdings. I do not now intend to re-open the question. believe it would be a hopeless task to attempt to carry such an amendment the Bill against the solid vote of the Government. I believe the measure soon force itself on the attention of the Government, when they will have review their present decision. By forcing on a discussion now I should weal my case. I am strongly of opinion that legalized transferability of the wh holding is the only valid restriction that can be effectually put on the s division of holdings which is now going on all over the country, which landlords are in some instances encouraging, in others are powerless to prev

"There is only one other subject that I would wish to refer to. I will t cease from monopolizing the time of this Hon'ble Council. I refer to the ma of contracts. A great outcry has been raised against the Government for p hibiting a tenant from contracting himself out of certain rights attached t tenancy. Although it is to my interest as a trader to support free contract this matter I have voted with the majority of the Select Committee.

"Under the Contract Law a contract to be valid must be made with free consent of parties, for a lawful consideration and for a lawful object.

"As well as I am able to remember, their representatives in or out of Cou have never claimed a right to make a contract with their tenants for lawful c sideration; all they have ever claimed is a right to induce their tenants to s away acquired rights under the shadow of a renewal of leases, or to debar th from acquiring prescriptive rights in the future. With reference to the ot important and equally weighty matters contained in the Bill, such as prev ing rates, under-raiyats, non-occupancy-raiyats, settled raiyats, presumptic proprietors' zirát land, merger, &c., and with reference to the gross-prod limit which has been omitted from among its provisions, I will reserve wha have to say until the specific amendments come under the discussion of Y Excellency's Council.

"Before I cease, I would refer to a remark which fell from the Hon Mr. Goodrich, that no provision has been made for the acquisition of land charitable purposes. I think, if, the Bill is seen to, it will be found that sec 84 provides for this; but I am sorry the majority of the Committee did not their way to adopting my suggestion to include the acquisition of land irrigation-purposes in the section. If it is possible to acquire land for the purpose, it is possible to acquire it for the other."

His Honour THE LIEUTENANT-GOVERNOR said:—"My Lord, I do not th I should have attempted to say anything at the present stage of the discus had it not been that I have been referred to by very many speakers who h

preceded me. We have had very appropriately an exhaustive statement from the hon'ble member in charge of the Bill, who has given us a full history of the proceedings since this Bill was last before the Council. We have had speeches also from most of the members of the Council—certainly from all on the Select Committee—dealing at length with the details and principles of the measure; and in these speeches we have had laid bare, at least I trust so, the thoughts and intents of the heart of each speaker as to the main issues with which we shall have to deal in the further consideration of the Bill. I think I shall best consult the wishes of my hon'ble colleagues in Council, and certainly my own convenience, if I limit what remarks I have to make upon the present occasion to the practical issues which have been raised by the speech of the Hon'ble the Mahárájá of Durbhunga, and by the speech of my hon'ble friend to the left who ably represents the British Indian Association and the zamíndárs of Bengal. All or most of the other points to which allusion has been made in the course of this debate will arise on a consideration of the various amendments which are upon the notice paper; and for myself I would prefer to deal with these in detail as they arise rather than by the running commentary of a general statement.

"Now the definite questions which are immediately before the Council are contained in the addresses of the Hon'ble the Mahárájá of Durbhunga and the Hon'ble Bábú Peári Mohan Mukerji. The Mahárájá says the Bill should be abandoned because it is a bad one; and the latter contends that the Bill has been imperfectly and insufficiently considered, and that therefore it should be postponed for re-publication. Anticipating the formal notice which stands in his name on the paper, he wishes that the postponement should be for three months, but we are all aware that that practically means a postponement for nine months or one year.

"The Mahárájá condemns the Bill, because, to use his own words, it was 'discredited and disowned by the Select Committee' on account of their want of unanimity as shown by the many dissents; and secondly, that the zamíndárs and raiyats are not agreed in regard to it; and lastly, that it is, of course, a gross breach of the solemn promises made by the Government in the Permanent Settlement. Now I do not think that the absence of union in the views of the Select Committee need distress the Mahárájá so much as it appears to do. We are dealing here with a very large measure; indeed, we may say that no larger measure has been under the consideration of the Government since the days of the Permanent Settlement. It is a measure also involving very deep and abstruse questions—questions which go back to a period even before the time of the Permanent Settlement; and it is complicated with innumerable details in all the relations between the landlord and tenant. It seems to me, having regard to the character of the legislation contemplated, impossible to have expected that union and unanimity in the opinions of the Committee which the Mahárájá so strongly desires. For, if we look at the composition of that Committee, we see at once what a variety of different local experience and interests they represent. You have the representatives of landlords of both sections of this great province of Bengal, of the landlords who have and own property both in Bengal Proper and in Behar, the circumstances and conditions of which vary in many important particulars. Then you have the hon'ble member from the North-Western Provinces, who brings to the consideration of the problem a very practical knowledge of the land system which exists in those provinces. We have also traditions of the Board of Revenue influentially represented by the Hon'ble Mr. Reynolds; the statistical research and information which have affected so many of our decisions in the person of Dr. Hunter; and the special usages and customs in which the Muhammadan community are interested; and lastly, not least, the influential opinion and support which my hon'ble friend Mr. Gibbon has brought to bear upon the whole subject, speaking in the interests of European planters, and as himself the manager of extensive landed properties.

"Having regard, then, to the constitution of the Committee, and to the well-known and admitted fact that there are wide differences in the circumstances of different parts of the province, the demands for a complete unanimity in the Report seem to me unreasonable.

enquiry was, I believe, not nearly so long as the time which has been give to this Bill. It is clear from the records of the day that Lord Cornwall intended at first to make a decennial settlement as an experimental measure o which a permanent settlement might be based; but so impatient was he t secure the enactment of the measure before his period of office expired, that h passed it before even the assent of the Court of Directors had been obtaine to his proposals; so that what was intended in the first instance to b only a decennial settlement came into operation as a permanent settlement I am, however, attacked by the hon'ble member (Bábú Peári Mohan Mukerji as to what took place in my own Council with regard to a Bill for the appoint ment of kanungos and patwárís, in the course of the discussion upon whicl I expressed the opinion that great darkness prevailed with regard to all th relations of landlords and tenants; and he asks, with reference to this, how ca I press forward a Bill of this character, while I plead the existence of such gross general ignorance upon all material facts bearing upon the subject? I need not enter here into a discussion of the merits of that Bill. It is acknowledged to be a measure subsidiary to this Bill. If the chapter in this Bill which relates to the survey and record of rights falls through, the Patwárí Bill in the Bengal Council will not be proceeded with. But it must be obvious to every one that if a cadastral survey and preparation of a record of rights is to form a material part of the present legislation,—and I would sooner abandon many parts of the Bill than that,—there must be some recognised agency to record the changes which take place from time to time, or else the results of that survey and record will be thrown away in a few months. Now, when I complain of the darkness and ignorance which prevail as to the relations between landlords and tenants, I allude to those kinds of facts of which no one has given us a more direct and practical illustration than the hon'ble member himself. The members of the Select Committee will remember that when we were dealing with some questions as to providing a form of receipts for rent in connection with this Bill—a form which was to show the name of the tenant, the quantity of land he held, and possibly the boundaries of it, the rent he paid, and simple details of that nature—the hon'ble member opposed the proposal on the ground that not one zamíndár in a hundred would be able to give such information. I say that if the zamíndárs do not know the names of their tenants, and the land they hold, and what rent they pay, we are in grosser darkness than I could have conceived possible. Now a survey and record of rights would give authoritative information on all such points as these. But the possession or non-possession of that knowledge certainly does not affect the merits of a measure like this, whose primary object is to declare and establish the rights of tenants in their relations to the zamíndár, and to try and secure to them greater fixity of tenure, and to afford them some protection against continuous and unlimited enhancements. The issue here which the hon'ble member raises, and which he has a perfect right to raise, is that the Government has no business to attempt any such thing; but the right or wrong of Government intervention depends altogether on the interpretation of the Regulations on which the Permanent Settlement was framed. We all know that there is a great deal of difference in opinion regarding that important settlement. The zamíndárs contend that in dealing with this Bill as we are doing we are depriving them of those rights which were guaranteed to them by the British Government in the beginning of this century; and the argument is used that, as the claim of the zamíndár to do just as he likes with his own is indefeasible, they will accept nothing else and nothing less. I never could admit the validity of such a plea. The contention is a very one-sided view of the Permanent Settlement, for I think that, if you examine Regulations I to VIII of 1793, you will find that there is nowhere throughout them anything more in the way of a promise than the single promise that the public demand on the land should be limited in perpetuity. The reasons for adopting that principle we know, because they are recorded in the Regulations. That promise, notwithstanding grievous provocations, has been kept for all these 90 years, and it will remain inviolate. But I assert most strongly that to urge that the whole Permanent Settlement was passed in the interests of the zamíndárs is a very one-sided aspect of the case. For, apart from the very strong reservation which the Government recorded at

the time that it would, whenever it thought fit, legislate for the protection of the cultivator, we have express mention in those Regulations of the positive rights of the raiyats. It may be true, as the hon'ble and learned member (Mr. Evans) said the other day, that the settlement of rents between the raiyats and zamíndárs was, in 1793, a matter to some extent of contract. But two things in this connection have to be borne in mind—that the competition in those days was for raiyats to clear and cultivate the land, and the zamíndárs naturally had a motive for leniency; and secondly, there was, as found in the Regulations, the absolute barrier against undue exactions of the parganá rate which was known and respected in every district.

"I know that the zamíndárs in dealing with interpretations regarding the Permanent Settlement are very unwilling that any reference should be made to contemporary history. They have openly said so in a public document. For my own part I do not see how we can avoid a reference to contemporary opinion when we have to interpret an important Act like the one under notice; and we are justified in looking to what eminent men of the time said on this point. There is valuable evidence on the subject scattered among the pages of contemporary writings, and I will read to the Council some extracts bearing upon the issue to which I have referred:—

'Sir Philip Francis, in a Minute written in 1776, considered that the rate of assessment per bígha should be fixed for ever upon the land, no matter who might be the occupant.

'Warren Hastings wrote in the same strain on 1st November 1776—"Many other points of enquiry will also be useful to secure to the raiyats the permanent and undisputed possession of their lands, and to guard them against arbitrary exactions,"—the term "exactions" from raiyats signifying in that day the levy of more than the established parganá rate of rent.

'Sir John Shore, in the same spirit, was not content that the Permanent Settlement should be with the zamíndár alone. He observed: "And at present we must give every possible security to the raiyats as well as, or not merely, to the zamíndár. This is so essential a point that it ought not to be conceded to any plan." The Court of Directors on 19th September, 1792, approving of these views, recognised it as an object of the Perpetual Settlement that it should secure to the great body of the raiyats the same equity and certainty as to the amount of their rents, and the same undisturbed enjoyment of the fruits of their industry, which we mean to give to the zamíndárs themselves. Twenty-seven years later, the Court, on 15th January, 1819, deliberately re-affirmed:—"We fully subscribe to the truth of Mr. Sisson's declaration that the faith of the State is to the full as solemnly pledged to uphold the cultivator of the soil in the unmolested enjoyment of his long-established rights, as it is to maintain the zamíndár in the possession of his estate, or to abstain from increasing the public revenue permanently assessed upon him."'

"Nothing, it seems to me, could be more conclusive of the privileges and position of the raiyats than these statements. They indicate at least the intentions of those in authority when the Permanent Settlement was made, and it was a misfortune for the country that they were not carried out at the time. The agitation which has been going on now for several years brings the case to a climax, and demands a final settlement on the lines of this Bill. I shall certainly support the motion that the Bill be taken into consideration, and shall oppose most strongly any motion for postponement. I am quite certain that we incur a risk in putting off the final settlement of this question; and I trust the zamíndárs will understand that it is the settled policy of the Government that the right of the raiyat to hold his land is as clear and undisputable so long as he pays a fair and reasonable rent, as is the right of the zamíndár to hold his estate so long as he pays his revenue."

The Hon'ble MR. ILBERT said:—

"MY LORD,—I do not propose at this stage of the debate to discuss point by point the objections which have been brought against the particular provisions of this measure. But there are two criticisms of a general character about which I should like to make some remarks, and I shall have a few words to say on the question of urgency, which, though it is raised more directly by the motion which stands in the name of my hon'ble friend Bábú Peari Mohan Mukerji, has been discussed in connection with the motion now technically before the Council. Of the two criticisms to which I have referred, one is that the Bill has been so changed by the Select Committee as to have lost its fundamental characteristics, and the other is that the Bill

as now revised does not possess those qualities of completeness and finality which are essential to good legislation.

"I do not wish to minimize or underrate the importance of the changes which this measure has undergone, not merely since the date of its first preparation by the Rent Commission, but since the date of its introduction into this Council; but I do undertake to say that those changes are fully explained and justified by the circumstances under which the Bill was prepared and introduced, and by the nature of the subject-matter with which it deals, and that they do not in any way warrant the charge that the Bill in its present form involves a departure from the principles on which it was originally based, or that the Select Committee have lost sight of or abandoned the objects which the Government of India had in view.

"This Bill, as we all know, took its origin in a draft which was framed by the Bengal Rent Commission. Now, what was the nature and scope of the task which the Rent Commission undertook? It was a task of no ordinary magnitude. It was a task singularly arduous, ambitious and comprehensive. They undertook to frame a law of landlord and tenant which should be applicable to the whole of Bengal and Behar, with certain exceptions. They proposed to make important alterations in that law. They undertook, in so doing, not merely to amend the existing Acts and Regulations, but to repeal them and to re-enact them in a consolidated form with the necessary modifications. And last, but not least, they proposed to codify the whole of the judge-made law on the relations of landlord and tenant in the Lower Provinces. In short they undertook, at one and the same time, to amend, to consolidate and to codify. Now, in dealing with so difficult and delicate a subject as the law of landlord and tenant, an ordinary legislator thinks himself fortunate if he achieves with some degree of success any one of these three objects: that he should be able to achieve them all is more than any mortal is entitled to expect. Accordingly, when the Government of India came to consider from the point of view of practical legislation the Bill submitted to them by the Bengal Government,—which was in fact the Rent Commission Bill with sundry modifications,—one of the first conclusions at which they arrived was that it would be desirable to drop so much of it as merely codified existing law, and to leave the measure one of amendment and consolidation. I will not trouble you at length with the reasons which led me among others to this conclusion—a conclusion about the soundness of which I have never had any doubt. They were reasons which did not involve the slightest disparagement of the admirable work which had been done by the learned author of the Digest of the Law of Landlord and Tenant in Bengal, and did not imply any scepticism as to the value of codification, or as to the importance of continuing the great work which has been commenced for India by the framers of our codifying Acts. Shortly stated, the reasons were these. Apart from any doubt which we might feel as to the expediency or possibility of attempting to present in a code the effect of judicial decisions on subordinate rules or propositions of law, it was clear that up to this time the process of codification had only been applied with success to those portions of the English common law which are suitable to the circumstances of India; the general principles of the English law of landlord and tenant had quite recently been codified by my learned predecessor Mr. Whitley Stokes in that chapter of the Transfer of Property Act which relates to leases; and the legislature on passing that measure into law had expressly declared that this chapter—the chapter relating to leases—is not suitable to the relations which exist between landlord and tenant in the Mufassal. Furthermore, we held that, even if the law with which we had to deal admitted of codification, it was of the first importance to simplify and reduce in bulk as much as possible the long and complicated measure which had been laid before us by the Government of Bengal. Accordingly, as I have said, the merely codifying portions of the Bill were dropped, and, as I hold, wisely dropped; but the mere fact that this measure once professed to be a Code has given it an appearance of completeness and finality which was always illusory, and which has had an unfortunate effect.

"Even in its reduced form the Bill was sufficintly long and complicated, and was in a shape—I am speaking merely of form and not of substance—was in

a shape which would have made an English Minister reluctant to submit it to Parliament. For it is a received maxim of English legislation that when you have important changes to make in the law—changes which are likely to encounter much opposition or to invite much discussion—you should not attempt to combine the two processes of amendment and consolidation, because by so doing you divert the attention of Parliament and the public from the real issues before them. You raise questions which have been already settled or are of minor importance, and you thus materially impede and embarrass the passage of the measure through the House.

"In this country, where the machinery of legislation works more easily and smoothly, it has always been held—whether it will continue to be so held if we have many more such notice-papers as that which has been laid on the table with reference to this Bill I cannot say, but at all events it has always been held—up to this time that the advantages to the public of consolidation outweigh what may be called the tactical disadvantages of presenting a too widely extended front for opposition and criticism; and accordingly we have, as a general rule, whenever we have had to make extensive changes in the law, applied the process of repeal and re-enactment. The Government of India did not think that they would be justified in the present instance in departing from this practice, but at the same time I am bound to confess that in the course of the discussion of this measure I have found abundant reason for appreciating the practical wisdom of the English rule. For there can be no doubt that the form in which this Bill has come before the public has tended to obscure the main issues which are raised by the present legislation, and has roused many of those ghosts of buried controversies which still hover and shriek round the Permanent Settlement Regulations and Act X of 1859. Let us endeavour to abstract our minds from those parts of the Bill which merely reproduce existing law, and those parts which embody miscellaneous amendments of minor importance, and consider what were the main defects in the existing law which the Rent Commission proposed to remedy, and what were the main remedies which they proposed to apply for the removal of these defects. The main defects were two: first, that the existing law gave, or appeared to give, to the raiyat rights which he could not prove; and secondly, that the law gave, or professed to give, to the zamíndár remedies which he could not enforce. Whether, by reason of any deliberate policy of shifting tenants' holdings, or by reason of local customs of cultivation, or by reason of the absence of proper landmarks, but at all events in fact the raiyat was unable to prove that kind of twelve years' occupation which was necessary to give him occupancy-rights under Act X of 1859. And the zamíndárs found the process of recovering their rents through the Courts tedious, and the process of enhancement through the Courts unworkable. Want of adequate legal security for the raiyat, want of adequate legal facilities for the landlord—those were two substantial defects which were made the subject of repeated complaints before the Commission. And at the same time that the Rent Commission admitted that there were in the existing law these defects, which impaired its efficiency as a law and prevented it from achieving the objects which it was intended and expected to achieve, the Famine Commission, looking at the subject from a somewhat different point of view, came to much the same conclusion with respect to one of these defects, and pointed out that the absence of adequate legal security for the tenant had produced and was producing disastrous economical effects.

"These, then, were the practical problems which the Rent Commission—sitting, not as codifiers or as consolidators, but as amenders of the law—had to solve:—whether they could devise in the interest of the tenants more effectual checks against liability to capricious eviction and excessive rackrenting; whether they could devise in the interest of the landlords more effectual facilities for the ascertainment and recovery of their just dues. Reasonable security for the tenant, reasonable facilities for the landlord—these were the two things which they had to endeavour to provide. Suggestions for attaining these objects poured in upon them in great abundance, and from very different quarters. It was their duty to consider these suggestions; to sift

them carefully; to view them in the light of different interests and different experiences; to recommend them for adoption if they appeared to be reasonable and practicable; to reject them if they appeared to be unreasonable or impracticable. And that, Sir, is the history of this measure from its first inception to the present time. The process which has been continuously applied to it has been a careful sifting of numerous suggestions which have been put forward with the view of meeting certain specific evils. The Government of Bengal took up the suggestions of the Rent Commission, made them the subject of a very careful examination, and then transmitted them with modifications to the Government of India. The Government of India examined with equal care the suggestions laid before them by the Government of Bengal, and, with the approval of the Secretary of State, embodied in the Bill which was introduced into this Council such of them as appeared to afford a reasonable prospect of working with success. That in the course of this process the measure should have undergone considerable modification is no matter for surprise, but at the same time is no ground of blame to the Rent Commission, no cause for imputation against the Government of India or the Select Committee of this Council. The Rent Commission would have been much to blame if, in the exercise of the duties imposed upon them, they had rejected any suggestion which appeared on the face of it to be reasonable: the Government of India would have been equally to blame if they had not incorporated in their original Bill such of the proposals laid before them, as, with the information then at their disposal, seemed to offer a fair prospect of meeting the requirements of the case; the Select Committee would have been still more to blame if they had obstinately stuck to these proposals, or had adopted any alternative suggestions which might be subsequently made by the Bengal Government, after further inquiry and examination had thrown grave doubts on their fairness or feasibility.

"There is another circumstance which has not a little obscured the real nature of the changes which have from time to time been made. In the course of the discussions which take place on a measure of this nature ranging as it does over a considerable ground, and affecting a great variety and number of interests, it always happens that some particular proposal assumes a factitious importance, and comes to be described, in varying metaphors, as the keystone or core or kernel of the Bill. I always distrust these phrases. They usually mean that some particular feature of a measure has happened to strike the imagination of some particular writer or set of writers, to coincide specially with his or their sympathies or prepossessions, or to assume exceptional prominence from some one point of view, and when it disappears or assumes a less prominent position a cry is raised that the measure is irretrievably ruined, and that it is no longer of any value.

"There have been a good many keystones and cores and kernels of the Rent Bill. There was a time, in the earlier discussions of this measure, when the proposal most in vogue was a proposal which not unnaturally found favour in zamíndári quarters, a proposal to devise some kind of summary procedure for the recovery of rents. This was to be the be-all and end-all of legislation on the subject of landlord and tenant. 'Give us back our Huftum and our Punchum,' said the zamíndars, 'and all will be well. Or, at all events, if you can not do that, put the raiyat who is sued for rent in the same position as if he had signed a bill of exchange, that is to say, had agreed in writing to pay a specified sum of money to a specified person at a specified time.' This was a form of 'facility' which was much discussed by the Rent Commission, and the conclusion to which they came about it was substantially the same as that which was subsequently arrived at by the Government of India. I spoke at such length on this topic in obtaining leave to introduce the Bill that I may be pardoned for not dwelling on it at any length on the present occasion. The conclusions to which we came were in short these; not that the difficulties complained of by the landlords were non-existent, but that the remedies suggested were superficial; that while the rights involved are obscure and uncertain, and the facts difficult to ascertain, no mere tinkering of procedure would provide a method of judicial de

termination which should be at once speedy and just. But at the same time I expressed a hope that when the measure came to be fully discussed other expedients for simplifying the procedure might be devised. In the course of the long discussions which have since taken place sundry suggestions for that purpose have been made; some of these were brought before the Select Committee by my lamented friend the late Rai Kristodás Pál; others have been embodied in a paper written by Bábú Mohini Mohan Roy, who was himself a Member of the Rent Commission; others again have been communicated to me privately by my friend the Mahárájá Sir Jotíndra Mohan Tagore. The Select Committee have not overlooked or disregarded any of these suggestions. On the contrary, they have given them their most careful attention. We invited judicial officers to examine them and express their opinions upon them, and we specially referred them for the consideration and opinion of the Calcutta High Court. But the replies which we have received have been unfavourable to these suggestions. We have been told, and told on the highest authority, that they could not be adopted without serious risk of failure of justice. Under these circumstances it was impossible for us to endorse recommendations which had by the authority most competent to express an opinion upon them—I mean the Judges of the Calcutta High Court—been unanimously and decisively condemned. It would have been a satisfaction to the Members of the Select Committee, as it would have been a satisfaction to the Hon'ble Judges, if we had been able to accept any of the suggestions put forward for the simplification of procedure and the removal of the means too often employed by raiyats to harass their zamíndárs. But in the face of such strong and authoritative expressions of opinion that these suggestions were dangerous or impracticable, we could not take upon ourselves the responsibility of recommending their adoption Some minor amendments of procedure we have indeed proposed, and I believe that they will be found useful as far as they go. But I fully agree with the deliberate opinion of the Rent Commission and of the High Court that it is in other quarters than the amendment of procedure that the true remedy for difficulties in the realization of rents is to be found. Some of these remedies can, as the Judges point out, be provided by executive action; means of providing others are supplied by this Bill; and it is to the machinery that we propose to provide for the ascertainment and recording of obscure and disputed facts and rights that the zamíndárs, if they are properly advised, should, I believe, look for a removal of the difficulties which they now experience in enforcing their rights.

"On this point, then, the views of the Select Committee are in complete accordance with those of the Rent Commission and with those which the Government of India entertained and expressed on the introduction of this Bill.

"But with respect to other matters I freely admit that, in the course of the deliberations which have taken place on this measure, the Select Committee have found themselves compelled to drop certain proposals to which at one time considerable importance was attached by their authors, and from which considerable advantages were expected to accrue. Take, for instance, the proposals as to the preparation of tables of rates. These proposals formed a very prominent feature of the Bill which was submitted to the Government of India by the Bengal Government, and they were incorporated by the Government of India in their original Bill, though not without expressions of great doubt as to their feasibility. There was a great deal to be said for these proposals, and, if they had proved capable of being carried out, they would have simplified many questions and removed many difficulties. Therefore, I think the Government was fully justified in inserting them in the Bill which was laid before this Council two years ago, and that they were entitled to a fair trial before being rejected as unworkable. The Bengal Government did give them a fair trial; they deputed special officers to try and prepare tables of rates on the lines indicated in the Bill; and the result of their inquiries and experiments was to satisfy both the Bengal Government and the Select Committee that the expectations once based on this particular scheme were not likely to be realized. Very similar has been

the fate of the gross-produce limit. This particular proposal did not, my memory serves me rightly, figure very largely in the earli discussions on this measure; it was adopted by the Rent Commissio but without, as it appears to me, any adequate examination or consideration the difficulties by which it was attended; it formed also part of the proposa embodied in the Bill introduced by the Government of India; but whilst I d find in the papers and speeches relating to the Bill indications of doubt as the possibility of imposing any such general limit, or as to the propriety of th particular limit proposed, I do not find anything to show that it was regarde two years ago as being an essential feature of the measure. It was not until comparatively late epoch that it attained the dignity of being described as th 'core' of the Rent Bill. Now, it must be admitted that it would be eminentl satisfactory if we could devise some form of ultimate barrier against which th waves of rackrenting should ineffectually dash; and when the subject was di cussed in the Select Committee—and it underwent a very full and thorough discussion before the Committee—there was a strong feeling on the part of th majority of the members in favour of imposing such a limit, if only a fair an workable limit could be devised. But when we proceeded to examine the fac and figures on which the particular fractional limit proposed in the Bill wa based, we considered them insufficient to warrant the inferences drawn fro them, and at the same time we were informed by the Bengal Government tha to fix the limit at any other fraction would be to provide an ineffectual prote tion against that form of rackrenting which it was the object of the limit t counteract. Under these circumstances we reluctantly came to the conclusio that this was a form of check which we were not in a position to impose.

"Take, again, those provisions of the Bill which have been the subject more and hotter controversy than, perhaps, any other of its provisions. mean those which relate to the transferability of the occupancy-right. Th object of the Rent Commission, the object of the Bengal Government in th earlier drafts of the Bill, the object of the Government of India in the Bill two years ago, was to recognize and legalize a practice which, whether for goo or for evil, either had grown up or was fast growing up in all parts of thes Provinces, but to surround it with such checks and limitations as might be con sidered necessary or advisable for the purpose of preventing it from being use to the detriment either of the zamíndár or of the raiyat. That, I repeat, was th object which we all had in view: we wished to recognize and confirm existin customs, to give them the express sanction of the law, but at the same time to giv them a reasonable shape. We found, however, that the existing customs wer so multiform that it would be impossible to devise any one general form of leg check on the right of alienation which might not reasonably be charged wit causing hardship to the zamíndár in one part of the country, and hardship to th raiyat in another; and, this being so, the conclusion at which the majority of th Committee, after many intermediate experiments and suggestions, ultimatel arrived was that, if varieties of custom were to be recognized at all, they had bette be recognized in their entirety, and that the balance of advantages was in favou of leaving the custom, at all events for the present, unregulated by any expres provision of law. In arriving at this conclusion individual members of the Com mittee, as would naturally be the case, reached the same goal by different path The question was an eminently arguable one, and was one as to which both th advocates of the zamíndárs and the advocates of the raiyat were much divided i their views,—I know for instance that the view taken of it by my hon'bl friend the Mahárájá of Durbhunga differed materially from that taken by m hon'ble friend Bábú Peári Mohan Mukerji,—and it had to be determined wit reference not only to the consideration whether the right of transfer was i itself a good thing or a bad thing, but with reference also to such consideration as whether the advantages of having a positive and definite but inelastic rul outweighed the disadvantages incidental to an elastic but uncertain custom whether the mahájan purchaser of whom so much has been heard was reality or a bugbear, and last, but not least, whether any discouragemen which might be imposed on the practice of sale would not operate as a encouragement of the practice of sub-letting. It was under the influence all these different considerations that we came to the conclusion that wit

regard to this particular matter the natural check imposed by custom and usage would probably operate better than any artificial checks which could, under existing circumstances, be imposed by law, and that the safer and more prudent course would be to abstain, at all events for the present, from positive legislation.

"There is no foundation for the suggestion that such a change as this involves a radical departure from the principles of the original Bill. Nor is there any foundation for the suggestion that we have by any of the provisions of the Bill as now revised violated any pledges which we gave on the introduction of this measure. We have been told that the power given to reduce rents in cases where a special settlement is made is inconsistent with the assurance that was given that there would be no reduction of existing rents. Now it is important to be accurate about what was actually said and written with reference to this point. On looking at our despatch of 17th October, 1882 (paragraph 17), I find that we explained our intention to be that a raiyat should not be at liberty to sue for a reduction of rent on the *sole* ground that it exceeds that indicated by the table of rates. The assurance was that rents were not to be reduced solely on the ground of their being above those shewn in the table of rates, and I need hardly point out that the Bill contains no provision inconsistent with this assurance.

"In my own speech on obtaining leave to introduce the Bill I referred specially to this point. What I said was this :—

'On a comparison of the provisions for enhancement with the provisions for reduction, it might be said that they have a somewhat one-sided appearance. The landlord can use the table of rates for the purpose of levelling up; the tenant cannot use it for the purpose of levelling down. But it must be remembered that the principle on which the Bill is framed is to proceed as far as practicable on the basis of existing rents, and that nothing is further from our intention than to bring about a general reduction of rents. Whether under exceptional circumstances and in special areas—such, for instance, as the area in Behar, where we learn from recent reports that the average rates all round have been enhanced by 500 per cent. in the last 43 years, whilst the area under cultivation has actually decreased, and the rise in prices during the same period has been at most 73 per cent.—it may not be necessary to take steps, if not for a reduction, at least for a re-adjustment of the rates of rent, is a separate and difficult question on which I will not enter now. But I repeat that proposals for a general reduction of rents form no part of the Bill.'

"I fail to discover in the Bill as now amended anything which is in the slightest degree inconsistent with any of the statements which I have just quoted. What we intend by the section to which reference has been made is that in very special and exceptional cases special and exceptional powers should be exercised.

"My Lord, I will not go through the other changes which have been made in this Bill since its introduction. The changes themselves, and the reasons for making them, have been fully and completely explained by my hon'ble friend Sir Steuart Bayley, and I have nothing to add to his exposition. I have listened sympathetically to the expressions of regret which have fallen from the lips of several hon'ble members for some of those changes; but I have heard nothing which has satisfied me that the grounds on which they were made were not good and sufficient, or that the arguments which have weighed with the majority of us in the Select Committee are likely to produce a different effect when brought forward in Council. What I wish specially to guard against is any confusion between means and ends, between matters of principle and matters of detail. Where we have seen fit to modify our views we have modified them not with respect to the general principles by which our legislation should be guided, not with respect to the objects at which we ought to aim, but with respect to the particular means which it may be necessary, expedient or advisable to adopt for the purpose of attaining those objects. The objects which we had in view in introducing this legislation were the objects which we have in view now, namely, the provision of reasonable security for the tenant, of reasonable facilities for the landlord. As to the particular form and degree of the securities or facilities which the circumstances of the case justify or require, that is a question with respect to which we may justifiably modify our views in the light of further experience and inquiry. We have given a little more in one direction, a little less in another; but the

general scope and tendency of our proposals remains what it was. Thus dealing with the occupancy-raiyat we have lessened the area over which h rights may be acquired, but we have, at the same time, facilitated the proof the rights to which he is entitled within that area. We have removed some the checks to which enhancement of his rent was subjected, but at the sam time we have tightened others, and have extended the period during which h is to have absolute immunity from all enhancement. Again, in dealing wi the landlord, we have declined to adopt suggestions which have been ma to us for taking away from him any ground of enhancement through t Courts to which, from long usage or otherwise, he may reasonably clai to be entitled. We have declined to adopt any suggestion which would have h the effect of making any of those grounds unworkable, and thus of perpetuati what has been justly described as a public scandal; we have endeavoured to gi the landlord a right which could be honestly enforced through the machinery the Courts and not dishonestly abused as an engine of oppression out Court; and we have endeavoured to assist the Courts by indicating somewh more clearly than under the present law the circumstances under which, a the limitations subject to which, the landlord's remedy is to be applied.

"With reference to these and several other provisions of the Bill, the questi has usually been a question not of principle but of degree—a question where v should draw the line between conflicting claims, and, as is usual with bounda disputes, our decision has not been accepted with satisfaction by either part The question which you are entitled to ask is, 'What is the net result of o proposals?' Do they give too much or leave too much to one side or to t other? The question is *not*. 'Does the Bill satisfy the expectations, reasonab or unreasonable, of one party or of the other party?' but does it—to use a phra to which some of our critics appear to entertain an insuperable objection—do it afford a fair and equitable solution of an exceptionally difficult proble a fair and equitable compromise between claims which are conflicting a irreconcileable? What we have endeavoured to frame has been not a landlor Bill, nor a tenant's Bill, but a just Bill. We have endeavoured to give su stantial security to the tenant without restricting more than is necessa the powers of the landlord. We have endeavoured to give reasonable fa lities to the landlord without weakening more than is inevitable the cu tomary privileges of the tenant. Whether and how far we have succeed in our endeavour is a question which I leave to persons of cool and dispa sionate judgment to determine. After hearing the vehement and angry denu ciations by which we have been assailed on either side, they will, I am dispos to think, come to the conclusion that the Government of India has not discharged the duty which was imposed upon it of acting as a just a impartial arbiter between conflicting claims.

"I deny, then, that the Bill which is now laid before you involves departure from the principles by which the Government of India w guided in its introduction. What foundation is there for the oth charge to which I have referred, that it is wanting in completeness a finality? 'I had hoped,' says His Honour the Lieutenant-Governor, his minute of dissent, 'that the legislation now in hand would ha carried with it some measure of finality'; 'but,' he goes on, 'in its prese outcome there is scarcely the assurance which had been expected of a fin settlement of many important principles connected with a Tenancy Bill in t Lower Provinces of Bengal.' 'I am unable,' says my hon'ble friend M Reynolds, 'to regard the Bill in the form which it has now assumed as adequate and final settlement of the question raised in this great controversy

"Sir, in one sense I admit the charge. That the Bill is one-sided, I den that it is not complete or final I will admit. But I will go furth and say that any Bill of this kind which claimed for itself the chara teristics of completeness and finality would carry its condemnation on i face. Look at the social and economical condition of Bengal at the prese day. What are its most striking features? Are they not transformatio transition, growth and change? Here, as elsewhere in India, and here perha more than anywhere else in India, you find the past and the present, o

things and new, brought into sudden and violent contact with each other, with results which are often unexpected, and which, unless there is some intervention to temper the shock, may be disastrous. You have been told with truth—and the truth is one which cannot be too often repeated or too strongly insisted on—that the Bengali raiyat is not the same thing as the English farmer, that the Bengali zamíndár is not the same thing as the modern English landlord, that the rules which govern, and should govern, the relations of zamíndár and raiyat are not those rules of the law of landlord and tenant with which the modern English lawyer is most familiar.

"The Bengali raiyat is not the same thing as the English farmer; he is something widely different from him. But he presents many curious and instructive points of resemblance to the English customary tenant of some six or seven centuries ago. The rights and powers claimed by the zamíndár are not unlike those once claimed by the feudal lord of the manor; the privileges, duties and liabilities of the raiyat resemble in some important particulars those which once belonged to the English customary tenant, and which were gradually developed into the status either of the free-holder or of the copy-holder. In the phrase which is still technically applied to the English copy-holder, namely, that he holds 'at the will of the lord according to the custom of the manor,' we discern echoes of the controversies which once raged round the customary tenant of the English manor, and which still rage round the position of the Bengali raiyat—controversies in which the assertion of high proprietary rights on the part of the landlord is set against the assertion of strong customary privileges on the part of the tenant. If we were to pursue the investigation further we should find equally suggestive analogies. The bewildering multitude of tenures with local variations of nomenclature and incidents finds its parallel in the multitude of subordinate interests in land which are recorded on the Domesday survey, the English record of rights of the eleventh century. Again, it is well known that there is no point in English legal history which is more obscure than the question of the extent to which, and the circumstances under which, alienation of land was legally recognised and actually took place before the 15th century. But in the midst of this obscurity one fact is clearly established, namely, that such alienation as took place assumed the form not of sale but of sub-infeudation or sub-letting, and that the extent to which this sub-letting was carried was distasteful to the superior landlords. We know that at the instance of the great lords a famous statute was passed to stop sub-letting; we know that while the intention of the statute was to stop sub-letting its effect was to legalize free sale, that it enabled the fee-simple tenant to alienate his interest without consulting his lord, and that it has since become the foundation of the modern English law of the sale of land. If there had been a Hansard in the days when the Statute 'Quia Emptores' became law, he might perhaps have supplied us with an additional arsenal of arguments for and against the comparative merits and demerits of sub-letting and free sale.

"However, I do not intend to weary the Council with any elaborate historical disquisition. My object in touching on these analogies between the past and the present is not to demonstrate—what has been demonstrated to satiety—that the application of the modern English landlord and tenant law to the relations of zamíndár and raiyat would be both an anachronism and a political blunder, but also to illustrate some of the exceptional difficulties which surround any attempt either to declare or to amend the law bearing on those relations. For to say that the Bengali raiyat is still living in an age which to us Englishmen has become an age of the past, is to present only one side of the picture. There is another side to it. Side by side with the landlord who exercises, and is content to exercise, his old customary seignorial rights so far as they are compatible with the modern system of Government, we have the auction-purchaser who has bought his rights as a commercial speculation, and thinks only how he can turn them to the best advantage. Side by side with the hereditary tenant, cultivating and living on his land in the old traditional fashion, we have the enterprising planter, who has got his lease and wishes to work it so as to extract from the

land the greatest possible profit in the smallest possible time. The mode theory of competition rents is jostling the old practice of customary rates; t new fashion of terminable leases is threatening to displace ancient occupanc rights. The thirteenth century is being brought face to face with t nineteenth century, and is striving with more or less success to understa and accommodate itself to its ways. The cultivator for subsistence giving way before, or developing into, the cultivator for profit; those w have hitherto walked in the dim twilight of custom are emerging into the ha and fierce glare of law as administered by the Courts. The ideas, habits a customs of widely different ages and widely different civilization are bei thrown into a common crucible, and are assuming new and strange forms. V cannot arrest this process of change; we cannot predict with certainty the ra at which it will progress or the direction which it will take if left to itse All that we can do is to endeavour by such means as are at our disposal to gui it in the right direction; to ease off the abruptness of the transition from t old to the new, from an age of feudalism to an age of industrialism; to brid over the interval between status and contract; to prevent custom from bei ousted too violently by competition; to see that rules of law based on commerc transactions between hard and keen men of business are not applied to t ignorant and unlettered peasant before he is able to understand them or to u them.

"Can we afford to stand aside and let things drift, trusting that they m somehow come out right in the end? Such may be a policy which would co mend itself to some of the influential classes in this country, to men of the stro hand and the long purse; such is not a policy which the British Government India has ever ventured, or can ever venture, to adopt; such is not our conc tion of the duty which we owe to the millions whom Providence has confid to our care. We are responsible for the introduction into this country forces which threaten to revolutionize and disintegrate its social and economi system; we cannot fold our hands and let them work in accordance with natu blind laws. We must, to the best of our ability, endeavour to regulate a control their operations, and in so doing it is inevitable that we should oc sionally interfere in a manner and to an extent which, to those whose stitutions have not, for long ages, undergone the strain imposed by forei conquest or foreign immigration, may not unnaturally appear difficult justify or explain.

"That in so doing we should be charged with ignoring or violating the la of political economy is a matter of course. We do not ignore or violate th laws. On the contrary, the whole of our action as a State in legislation this kind is based on a recognition and appreciation of the laws which gulate the production and distribution of wealth, just as the whole of action as a State in dealing with famine is based on the recognition and app ciation of the laws, so far as they are discoverable, which regulate the recurre of famines. We do not ignore those laws, but we proceed on the view that th operation is capable of being modified and controlled by human action.

"Assuming, then, that interference is justifiable and necessary, what kind interference is possible and expedient, what kind of legislation is suitable the circumstances with which we have to deal? Must we not admit, are we always being compelled to admit, that it is a legislation of opportunis For a transitional period final legislation is neither appropriate nor possil What we have to do is to establish a *modus vivendi*, a working arrangeme not merely between conflicting interests, but between the customs, hab ideas and ways of different ages and different forms of civilization. legislation must contain much that is in the nature of expedients, adju ments, compromises; it will inevitably contain provisions which be to political economists a stumbling-block, and to lawyers—I will say even law-lords—foolishness, but which, for all that, may be based on good so common sense.

"Again, whilst fully acknowledging the necessity—the urgent necessit of interference on some points, we can afford to admit the wisdom of n

interference on others. There are some proposals about the expediency and suitability of which we can make up our minds with reasonable certainty; there are others about which we do not see our way so clearly, and with respect to which we should prefer to wait a while. There may be points—I frankly admit that there are points—with respect to which the provisions of this Bill are imperfect and incomplete, and with respect to which we are leaving our successors to supplement our task. But the fact that we are unable to do all that we might have wished to do is no reason why we should not do what we can; the fact that there are evils for which no suitable remedy has yet been found is no reason for delaying to apply to other evils such remedies as may appear to be suitable; to admit that the range of human prevision is limited is no unmanly confession of impotence; to acknowledge that the morrow will have its task is no ground for putting off the task of the day.

"What the Council have to consider as practical men is, not whether this is an ideally perfect measure, not whether it is a final settlement of questions between landlord and tenant in Bengal, not whether it is likely to usher in a millennium either for the zamíndár or for the raiyat, but whether it represents a step in advance, whether it does anything substantial towards removing admitted defects in the existing law, whether it does not give some substantial form of security to the tenant, some reasonable facilities to the landlord. It is because I believe that the measure, however it may fall short of ideal perfection, does embody substantial improvements in the existing law, that I commend it to the favourable consideration of the Council.

"One word in conclusion on the question which, though it is not technically raised by the present motion, has been appropriately discussed upon it—the question whether we should now proceed with the consideration of this measure or should defer its consideration until the expiration of a certain interval after the Bill has been re-published. The period of delay for which Bábú Peári Mohan Mukerji asks is a period of three months, but we all know that this practically means a delay of not less than a year, and therefore the question before the Council will be whether they will hang up the measure for another year, and thereby, amongst other things, condemn the officers of the Bengal Government and their own Committee to a re-commencement of what my friend the Lieutenant-Governor has properly described as their Sisyphean tasks; the former of piling up reports which are written in the summer, edited and annotated in the autumn, discussed in the winter, and shelved in the spring; the latter of renewing, under circumstances which involve a lamentable sacrifice of valuable time, discussions, the renewal of which is only rendered possible by the fact that the human memory is incapable of retaining, for more than a very limited time, the vast store of facts and arguments which have accumulated round this Bill.

"Now on what ground is this motion based? Is it on the ground that the public have not had sufficient time to consider the points of difference between the Bill which was published with the Preliminary Report, and the Bill which has now been laid on the table. My hon'ble friend Bábú Peári Mohan Mukerji has referred to the Resolution which was issued rather more than two years ago with reference to the desirability of giving greater publicity to legislative measures. That Resolution issued from my Department, and therefore I am in a special manner responsible for it. I concur entirely in every word that it contains, and I have done, and shall continue to do, all in my power to give effect to the principles on which it insists. If, therefore, the procedure which we now propose to adopt were in any manner inconsistent with that Resolution, I should be justly chargeable with inconsistency. But it is not inconsistent with that Resolution. The answer to the suggestion that no sufficient time has been given for the consideration of the Bill as now amended has been supplied by my hon'ble friend Sir Steuart Bayley, and it is this, that the alterations which have been made in the Bill since the date of its last publication are almost entirely in the nature of excision and reduction, and that we have not added any new matter of such importance as to require the opinion of the public upon it. Or is the motion before the Council based on

the wider ground that the information laid before the Select Committee is not sufficient to justify their recommending the adoption of any such proposals as those embodied in the Bill? On this point, again, I need only refer to what has been said by my hon'ble friend Sir Steuart Bayley as to the exceptionally searching and exhaustive nature of the inquiries and reports on which our conclusions are based, and express in the most emphatic manner my concurrence with his opinion that the constitution and procedure of the Select Committees of this Council are entirely unsuitable for that kind of examination of witnesses which has been suggested. That there are depths of this vast subject which we have not fathomed to the bottom, that there are tracts which we have left unexplored, nobody denies; what we do say is that the information before us was sufficient, and sufficiently tested, to enable us to come to certain definite conclusions on certain important points, and that it is upon those conclusions that our recommendations are based. My hon'ble friend the Mahárájá of Durbhunga claims the support of the majority of the Select Committee for the motion for delay, and says that the majority of them signed dissents from certain more or less important recommendations of the Report, and therefore must be taken to have dissented from the specific recommendation that the Bill be passed as now amended. The fallacy is obvious, and the accuracy of the assertion is easily put to the test. It will be tested shortly by the vote which is to be given on Bábú Peári Mohan Mukerji's motion. I am one of those members of the Select Committee whose signature to the Report is conspicuous by the absence of a decorating star, but on the question whether there should or should not be further delay in the prosecution of this measure I appeal with confidence to the majority of the Select Committee. To the unflagging assiduity with which the members of that Committee have devoted themselves to their arduous labours no one is more willing to testify and render grateful acknowledgment than their chairman. That they should respond with alacrity to an invitation to a renewal of their labours one could hardly expect, unless indeed they belong to that exceptional class of mortals whose conception of Heaven is that of a place where congregations ne'er break up, and the sittings of Select Committees never end. But in all seriousness I apprehend that their reply would be that the information laid before them, though not complete, was sufficient for the practical purposes they had in view; that further information would not be likely to bring more united counsels; that they had completed their task, whether well or ill, at all events to the best of their ability; and that another year's delay would not be likely either materially to enlarge their knowledge, or materially to modify their conclusions.

"As for those hon'ble members to whom the privilege or penance of sharing in the deliberations of the Committee has not been extended, and who must therefore content themselves with a broad and general view of the measure which is laid before them, I would ask them merely to consider whether the measure may not, in its present shape, be fairly regarded as a substantial and honest piece of work, and whether the advantages which might possibly arise from further enquiry and discussion are not far outweighed by the disadvantages necessarily incidental to the prolongation for an indefinite period of a state of uncertainty, tension and irritation which is in the highest degree prejudicial to the interests of landlord and tenant alike."

His Excellency THE PRESIDENT said:—"I do not think it necessary that I should trouble the Council with any observations of my own at this stage of our proceedings. I shall have ample opportunity, when we come to discuss the several points in this Bill with respect to which amendments are to be moved, of expressing my opinion in regard to them. I will therefore content myself by saying that, although it is likely that during the course of our deliberations this Bill will be considerably improved in many of its particulars, I have no hesitation whatever in giving to its general features my cordial and sincere support. I have convinced myself that it is, as my hon'ble colleague has just said, a very honest and conscientious piece of work. I am quite certain that those who have engaged in advancing it to its present stage have been actuated by the sole desire of doing equal justice to all those interests which are dealt with under the Bill. It cannot be seriously

urged that this Council has not a right to legislate in the direction proposed. It so happens that I became Under-Secretary of State for India while the legislation which resulted in Act X of 1859 was still under discussion, and I then came to the conclusion, which further examination has only confirmed, that it would be idle to contend that legislation of this description is any invasion whatever of the rights accorded to the zamíndárs under the Permanent Settlement. If I thought that any clause of the Bill interfered with rights which have been granted to any class of Her Majesty's subjects in India by the Imperial Government, I certainly would not be found among its supporters; but, on the contrary, I believe that this Bill is in perfect harmony with those principles which inspired the authors of the Permanent Settlement; and I am quite certain that hereafter, when the present controversies have subsided, even those who consider their interests most injuriously affected by what it is proposed to do will acknowledge that this legislation has benefitted the agricultural interests of the country. With regard to the special point which is before us, namely, whether or not the present Bill should be hung up for another year, I can only say that, in the presence of the all but unanimous opinion which has been delivered by my colleagues in favor of proceeding at once to the immediate consideration of the Bill as amended by the Select Committee, it would be impossible for me, even if I myself did not share that opinion, to undertake the responsibility of delaying a measure, the postponement of which, I am told by so many persons competent to speak with authority on the subject, would be so disastrous. In conclusion I may observe that I for one have listened with the greatest interest and pleasure to the discussion which has taken place. Although I have certainly done my best to acquaint myself with all the facts and arguments bearing on this question as far as they are contained in the voluminous literature connected with the subject, this is the first occasion on which I have had the advantage of hearing it discussed by persons so capable of handling it. I have been specially struck with the moderation, the ability, the temper and with the eloquence with which my several colleagues have placed us in possession of their respective views, and I may be permitted to add that the Native members of this Council were certainly not those who have shown the least ability in dealing with the question."

The motion was put and agreed to.

The Hon'ble BABU PEARI MOHAN MUKERJI moved that the Bill as amended by the Select Committee to which it was referred be re-published, and that the consideration of the measure by the Council be deferred for at least three months from the date of its re-publication.

He said the hon'ble members of the Council were already in possession of the reasons why he considered such a course desirable. If the opinion of hon'ble members was that the republication of the Bill at that stage was inexpedient, he would ask whether His Excellency the President could not see his way to put off the consideration of the amendments on the provisions of the Bill for two or three weeks, with a view to enable hon'ble members who were not members of the Select Committee to study the amended Bill, and to enable English-knowing landlords and tenants to give their opinions on the subject.

The Hon'ble Sir STEUART BAYLEY pointed out that the proposition of the hon'ble mover of the amendment simply amounted to this, that the postponement of the Bill for two or three weeks meant its postponement for one year. This, he presumed, was open to the same objection as the first amendment. As had also been pointed out by the Hon'ble Mr. Gibbon, any postponement of the measure would lead to the continuance of the agitation against the Bill. For these reasons he would ask the Council to reject the amendment.

The amendment was put and negatived.

The Council then adjourned to Wednesday, 4th March.

R. J. CROSTHWAITE,
Offg. Secretary to the Government of India,
Legislative Department.

Abstract E.—Statement of Net Revenue and Expenditure	63

FINANCIAL STATEMENT for 1885-86.

Preliminary.

Prelimi

1. The Financial Statement for the ensuing year will present but little of special attraction so far as any new development of our fiscal system is concerned. But on the other hand, to those who have followed with attention the course of Indian finance during the last few years, the year 1885-86 will prove of much interest. As being the fourth year in which a Budget has been framed on the basis of the anticipations embodied in the reforms which culminated in 1882-83, it enables us, when viewed with the three years preceding it, to judge what, in the presence of considerable difficulties and apart from extraordinary emergencies, the outcome of the measures taken in 1882-83 may, on the whole, be said to have been. In a later part of this Statement I shall have occasion to go at greater length into this subject; but this much may be said in these preliminary remarks, that, in my judgment, we now may assume that, very exceptional circumstances apart, the expectations of my predecessors, who believed that the normal and healthy increase of revenues would be found to balance the ordinary expenditure, and in that confidence abolished the import duties and lowered the salt tax, have been fulfilled. In the course of this Statement we shall find that the three years 1882-83, 1883-84, 1884-85 have between them, if we take in the case of the two former years the Accounts, and, in the latter year, the Revised Estimates, given us a surplus of revenue over expenditure of about £1,378,000; that although in any one year its surplus may be abnormally large, or in the succeeding year there may be even some apparent deficit, these are variations largely attributable to irregularities of Land Revenue collection incidental to our fiscal administration, which in no way necessarily indicate uncertainty or irregularity in our sources of receipt, when viewed as a whole; that we can sustain such severe losses as a partial failure of the opium crop, a temporary stagnation of the railway traffic, arising from dullness in our wheat trade, or a serious falling off in our Customs duties, or that we can provide for unforeseen expenditure, such as payments necessitated on an excessive opium crop may produce, but that these losses or requirements leave us, as they found us, with our resources unimpaired, and without any causes of anxiety as to our capability in the future of meeting similar emergent demands. This much will be seen on the brighter side of the subject. On the other, however, attention will be drawn to the consequences of depression in trade, and of a further depreciation in the value of silver. It will be noted that for the first time in our financial history we have been compelled to adopt a rate of exchange no higher than 1*s.* 7*d.*, and if we have not had to add to our estimates the corresponding sum of £440,000 as a gross increase to our loss by exchange, it is only because there will be, for reasons to be presently explained, a very considerable decrease this year in the Secretary of State's Bills, which enables us to shew in 1885-86 an apparent economy under the head of exchange; an economy, however, which must not be taken as indicating any real corresponding improvement. As far as the future is concerned, little or no ground will be found to exist for allaying our apprehensions: and this at a time when we have embarked upon extensive and costly measures for the improvement and development of our communications, and when the course of events beyond our frontiers is raising questions which seem likely

Sufficienc revenues by the ref 1882-83 a preceding effect of circumsta those refe

to disturb, more or less seriously, the calculations of those who are charged the financial administration of this country. While, therefore, it will probabl conceded that the measures of reform which I have alluded to have been justified by the experience acquired since their introduction, it will possibly questioned whether the *status* which they established will prove sufficient in of the further trials which seem to be awaiting us, and of the necessities of situation, whether connected with the state of our currency, or with the meas necessary for the development and protection of the country. The experi which we shall gain during the ensuing year as to the effect upon our estimat the several considerations I have indicated will, probably, be invaluable in ad to the means at our disposal for forming a final opinion upon this point; a p which obviously depends, not in the least on the adequacy or otherwise of financial resources provided us in their relation to the state of affairs which exi at the commencement of the decade, but on the consideration whether affair not passing into a new phase which was then, though not unforeseen, less immin which could not therefore be taken into immediate consideration; but wh should it now arrive, must be met on the lines of the policy then adopted, ar conformity with the principles by which it was inspired. I hope, in the cours this Statement, so to handle the material before me as to illustrate and to den strate the appositeness of the preceding remarks, and to make clear to any who reads it with moderate attention, what our resources during the three y which it treats of have been, or are likely to be; how far they are capabl meeting the calls which in ordinary course experience shews we must expect; whether, in view of the further obligations we have undertaken, or which the in silver or other circumstances are forcing upon us, our resources may be pected to prove as sufficient in the years immediately ensuing, as in the t years which it will be the business of this Statement to review.

The Accounts of 1883-84.

	£
Revenue	71,727,421
Expenditure	70,339,925
Surplus	1,387,496

2. The appropriation audit report, published in the *Gazette of India* of 1 March 1885, gives in great detail the explanations necessary to arrive at a understanding of the surplus here exhibited; but as the surplus of the Bu Estimate for that year was taken at £457,000 and that of the Revised Estin at £271,400 only, it is desirable to add a few remarks explanatory of the g difference between the actual surplus and the several forecasts above enumera There was an increase of £1,595,300 under the principal heads of revenue which the main item was Land Revenue, about £569,200. This sum was colle in Burmah, Madras, and Bombay in 1883-84, greatly in advance even of estimates of January and February 1884, at the end of the year, and in ordi course would have fallen into 1884-85, (an incident, as will be presently s which, however favourable to the surplus of 1883-84, has mainly contrib to bring about a deficit in the Revised Estimates of 1884-85). The Op revenue was £356,500 better than the estimate, and owing to the very s crop of the year, there was a decrease of £310,600 on Expenditure. Exc Stamps, and Forest revenue, between them, were better by £439,000 than estimates. Post Office, Telegraph, and Mint gave an improvement of £58, owing to short expenditure on capital account of telegraphs, and the abs

Large exhibited surplus partly due to collection of land revenue ordinarily falling due in 1885-86; partly to method of accounting for certain sums connected with the Sindh, Panjab, and Delhi Railway

tion of copper coin bringing a large gain to the Treasury. Under Miscellaneous an arrear of £130,000 was paid on account of interest from the Bombay Port Trust. Productive Public Works shewed a better revenue account by £687,400, due to the prosperous trade of the year, which, however favourable circumstances may have been, it would have been obviously imprudent fully to take credit for in the estimates. Under Public Works not classed as Productive there was a gain of £362,500, arising from the transfer of certain Provincial Railways in Bengal and in the North-Western Provinces from Ordinary to Productive, and the per contra transfer of Madras Harbour Works from Productive to Ordinary. The sum of £325,000, which in the Revised Estimates, as explained in my Budget Statement for last year, was written off against revenue by a credit to capital, being the loss in past years on the Indus Flotilla of the Sindh, Punjab, and Delhi Railway, and which balanced the gain above mentioned, has been since removed from the Revenue Account under instructions from the Secretary of State, thereby relieving the estimates of 1883-84 of that charge. Under Military Estimates there was a saving of £178,600; but, as a million sterling was paid to the English War Office on account of arrears of non-effective charges, the real saving was converted into an excess charge of £821,400, while the exchange rose to £290,700 above the estimates, as the Secretary of State took the occasion of a favourable market to increase the number of bills drawn by him. These explanations cover, generally, the increase of the surplus shewn in the Accounts over that exhibited in the Budget and the Revised Estimates. The difference between the Budget Estimate and the Accounts requires perhaps less explanation; but if it is asked why the Revised Estimates, made at a date comparatively late, and but shortly before the close of the year, were so wide of the mark, the answer is to be found in the accelerated payment of £569,200 Land Revenue above mentioned, and in the orders of the Secretary of State under which, after the close of 1884-85, £325,000 on account of the Indus Flotilla were removed from the debit to Revenue.

Revised Estimates, 1884-85.

3. The Budget and Revised Estimates for 1884-85 are as follows:—

Budget Estimates.

	£
Total Revenue	70,560,400
Total Expenditure	70,241,100
Surplus	319,300

Revised Estimates.

Budget Revised 1884-85

	£
Total Revenue	69,991,200
Total Expenditure	70,707,400
Deficit	716,200

4. The past year, so far as can be seen on the Revised Estimates and until its accounts are finally closed, has presented us, not with the surplus of £319,300, but with a deficit of £716,200. *Deficit*

5. It has been already mentioned that the unexpected payment in March 1884 of Land Revenue amounting to £569,200 swelled the surplus of 1883-84 to the prejudice of the ensuing year, and that the calculations on which the estimates of 1884-85 were framed have been thrown out to this extent; an extent, approximating to the deficit on the Revised Estimates of that year. *Effect in 1883 ordina in 1884*

Before the year closes considerable further expenditure will have to be incur on account of the proposed Camp to be formed at Rawal Pindi for the recept of the Amir of Kabul; and we have provided for this in our Revised Estimate

6. Apart from this, however, to those who have watched the course of tra during the past year, it will be matter of little surprise that the small surp of the Budget was not realised. There have been several causes contributi towards this result. They may be grouped under the two main heads "Trade" and "Revenue and Expenditure." Under the first fall the exports wheat, and consequently the railway earnings; and the exports of rice, a consequently the Customs duties. Under the latter fall Land Rever and Opium. The combination of a good harvest in England, and of large stoc in America, depressed the price of wheat during the later part of the year 18 and early in the second half of the calender year it became obvious that export trade in wheat, which during the last two years had been continua increasing, must suffer a temporary re-action. The rice trade had begun shew signs of depression since the commencement of 1884, and never recove itself during the financial year. I have given, in a later part of this Stateme figures indicating the comparative fall in prices and in the export of wh and rice, but at present I confine myself to dealing with the financial resu which have been brought about by these causes. They may be briefly summ up as follows in a comparative form :—

xceptional ifficulties in 884-85.

Net Gain to State .	1,079,240	452,800	768,2

7. We have here a total decrease in the Revised, as compared with t Budget Estimate, of £885,940. This loss is wholly derived from the depressi

in trade, which could not be foreseen at the time of the Budget. The East Indian Railway gross earnings were £580,000 short of the Budget; those of the Rajputana-Malwa State Railway, £47,500; of the guaranteed lines the Oudh and Rohilkhand Railway Revised Estimate of net receipts is £175,000, against a Budget Estimate of £250,000; the Sindh, Punjab, and Delhi gives £390,000 Revised Estimate, against an estimate on the Budget of £480,000. To the direct losses on the State Railways must be added a temporary decrease in Land Revenue in Madras and in Bombay, brought about by suspension of revenue in certain districts of those Provinces, owing to partial failure of the rains in 1884. These sums are severally estimated at £271,600 for Madras, and £72,300 for Bombay. Credit has been taken for them in 1885-86; but as, on the one hand, the year 1884-85 was mulcted of about £569,200, by which, as above explained, the year antecedent benefited, so, on the other, it has been obliged to resign to the succeeding year, 1885-86, the above amount of £343,900, which ordinarily would have been collected within its term, and placed to the credit of its receipts. Finally, we were called upon to meet the largest expenditure on account of payment for opium which has ever, so far as I know, been incurred in India. The outturn of the crop was large beyond all experience, and we found ourselves compelled to add, in the course of the year, no less than £593,600 to our Budget Estimate on this account. Although, eventually, by the great increase to our opium reserves, which threatened in the commencement of 1884-85 to fall abnormally low, we shall benefit by this extraordinary stock, the benefit will be for future years; the burden is thrown on 1884-85. Adding together the several losses under the several heads above enumerated of Customs, Railways, Land Revenue, and opium, we have a total of £1,823,440. To this, again, must be added the sum of £118,500 which we contributed from revenue towards capital expenditure on account of the construction of the Sindh-Pishin-Sibi Railway. I shall have more to say presently regarding the assignment of grants from revenue for capital expenditure on railways; but I draw attention to this grant here, because the active resumption of work on that Railway had not been proposed, and could not be foreseen at the time the estimates of 1884-85 were framed. If it is permissible in any way to congratulate oneself over the figures of a deficit, we have ground for satisfaction that in spite of these abnormal losses and charges the constant and steady increase in other branches of our revenue has enabled us to compensate in large measure for the disagreeable results which awaited us on the estimates made under the several heads I have specified. Taking, moreover, the years 1883-84 and 1884-85 together, we find, as explained in my 2nd paragraph, that, whatever the one year may have gained at the expense of the other, the revenues proper to either, looked at as a whole, suffice to meet the expenditure. The results of the financial administration have continued, in effect, to justify the conclusions indicated in the opening sentences of my Financial Statement for 1884-85. I have to return to this matter; but enough has been stated already, I think, to make it obvious that, unforeseen difficulties notwithstanding, the normal receipts have been equal to the normal expenditure. Presently, when I take up in detail the results under the minor heads of the estimates, it will be seen where normal growth of revenue has assisted us in meeting abnormal losses, and I reserve any further remarks I have to make on the subject, until I come to deal with those figures. It need only be added here, in general terms, that, on the whole, the season having been a good one, the increase in our Salt, Stamp, and Excise revenues has continued to give the results anticipated; State Railways have done well; there have been considerable economies under "Army" and other heads. On the other hand, it should not escape notice that exchange, which we had taken at £3,538,100, is shewn in the Revised Estimates at £3,253,900, or £285,200 less than

Further suspens. Land R. and abr. Opium ture.

Compens effects of of reveni other hea

Secretary of State's drawings exceptionally small in 1884-85.

the estimated figure. The Secretary of State was enabled to supplement bills by drawing on resources at his disposal in England. In judging not me of the budgetary surplus or deficit of any particular year, but of the aspect, larger view, of our financial condition during the past year, of the claims w we have to meet, and of the resources which are at our disposal, this fact r be borne in mind; especially at a time when, as we shall presently see, the change is assuming proportions which threaten to interfere seriously with arrangements by which we had secured our equilibrium.

Course of trade during 1884-85.

8. Passing from the financial effect of the depression in the wheat and trade, and the excessive expenditure in opium, I think it is desirable to ga together here the main figures which illustrate the course of trade during year, and its present prospects, as well as those indicating the large increas our opium stores and the cost at which it has been acquired.

9. With the growth of its railway enterprise the Government of Ind becoming more and more deeply interested in the progress of Indian trade, it is not without good reason that the departments of Commerce and of Fina have been linked together in Indian administration. So large a proportion of revenue is derived from railways, and if the estimates and forecasts which h been framed for the future should be verified, so large an increase from same source may in the course of time be looked for, while, on the other h our obligations in regard to the cost of construction are assuming such g proportions, that the direct interest of this Government in the development o export trade, from the point of view of the resources which it derives im diately therefrom, is, to say the least of it, no less than that which it ha the other main branches of its revenue. For this, if for no other reason, s analysis of the returns of trade during the preceding year seems necessaril

Growing importance to India, from a financial point of view, of its trade viewed in connection with its railway receipts. Some analysis of its trade returns necessarily forms part of this Financial Statement.

form part of a Financial Statement, indicating as they do not only the ca which may have led to any increase or falling off in the estimates of year, but assisting us in forming a forecast as to what are the probabilitie the year about to ensue. I have given above a résumé of the financial ef produced by the stagnation in trade under which we are now suffering; and figures which I am about to tabulate, and for which I am indebted to Mr. O'Co the Assistant Secretary in the Department of Commerce, whose excellent rep on Indian trade place annually before the public in the clearest form all poss information on the subject, will show how those effects have been brought ab and, I am afraid, will yield for the moment but little ground for hoping that may expect any speedy return of the period of prosperity with which we favoured in the years 1882 and 1883, and more especially in the latter y The annexed table shows for the years 1882-83, 1883-84, and ten month 1884-85 the quantity and value of exports of some of the principal article Indian merchandise.

Comparative annual tables of exports, 1882-83, 1883-84, ten months, 1884-85.

Exports of certain Indian Products by sea to other countries for the years 1882-83 1883-84 and for the ten months (April to January) of 1884-85.

11. It will be seen that while in tea, hides, skins, jute goods (bags), and seeds, there has been improvement, on the other hand, in most of our important exports, in raw cotton, rice, wheat, sugar, raw jute, the decrease has been steady and serious, and the decline has, in most cases, been coincident with the marked decline in prices in the English markets which commenced in the third quarter of 1884. Prices, indeed, for most of our large staples commenced to shew symptoms of decline from the beginning of 1882, but the decline was interrupted from time to time by temporary upward movements, which gave an immediate impetus to trade, and it is only since the middle of last year that the downward movement has been accelerated, and has continued without interruption to the present time. There seems some indication, however, that the decline in prices has reached its lowest limit. There are some grounds for hoping that for many of the articles enumerated in these tables prices will presently reach a level which may favour a more active resumption of trade. It will be seen that in the several quarters of which a comparative table is given, tea has risen in quantity and in value from 45,850,651 lbs., of the value of R2,95,76,166, to 52,631,980 lbs., of the value of R3,34,75,726; hides and skins

from 612,413 cwt. to 660,436 cwt., and from ₹3,11,55,908 to ₹3,30,14,256; jute has fallen from 6,895,209 cwt. to 6,307,460 cwt., and from ₹3,94,58 to ₹3,54,45,638; jute bags have risen from ₹1,03,10,500, through a year of g depression, to ₹1,11,87,966; seeds from 10,412,302 cwt. to 14,018,021 c and from ₹5,61,95,792 to ₹8,12,24,696; while raw cotton has fallen f 4,161,804 cwt. to 3,818,059 cwt., and from ₹11,04,18,596 to ₹10,08,98,5 and rice has fallen from 17,644,834 cwt. to 11,396,951 cwt. and f ₹4,74,99,946 to ₹3,92,57,416; wheat has risen, though in contrast with the t of 1883-84 the rise indicates anything but prosperity, from 10,856,705 to 11,965,436 cwt. and from ₹4,67,15,865 to ₹4,84,73,851; sugar, fin has fallen from 1,125,514 cwt. to 1,046,942 cwt. and from ₹71,06,031 ₹52,75 151.

Wheat, sugar, jute, indigo.

Since January there has been some revival in wheat; but supplies are large, and so long as the prospects of further supplies are fair, it would be, to the least, sanguine to hope that trade will resume its former activity. At the pre price in Calcutta, ₹2-6-6 per maund, with a freight of 35*s.* a ton through Canal, wheat can be landed in England at about 34*s.* per quarter, excha being taken at 1*s.* 7*d.* London prices for Indian wheat are about 35*s.* quarter. But as exports increase freight advances, and prices in England h a tendency to fall; so that although, in fact, a difference of a farthing in change makes a difference of a little over 1 per cent. in the prices down, these other elements have always to be taken into consideration. The in the price of sugar has been due to the enormous extension of the beet c in Germany and in Austria, caused by the protective laws enforced in those c tries; prices have been gradually declining for some considerable time, but fall was very rapid after the middle of 1884. Exports from Bengal, which been increasing largely, fell almost to nothing, and large consignments of c sugar came to the Province from Java, while even some beet sugar was impor The fact of imports of sugar into Bengal from Java, Austria, and the Un Kingdom, illustrates the condition of our sugar market. Jute has reached lowest price touched during the period for which the tables have been made With the diminution in the wheat and rice trade there is a diminished demanc local manufacture, and a larger surplus of jute to export. The great declin price commenced in the middle of 1884 and has continued steadily down to present. Jute goods have fallen in value with a diminished local demand for t and surplus stocks remaining over from the heavy outturn of the mills in 1 have been exported in greatly increased quantities for speculative markets. price of gunny bags is regulated by the general condition of trade, especiall the grain trade, and these will not give better values until other articles re The price of indigo depends mainly upon the quantity and quality of the c in Bengal and the North-Western Provinces, and fluctuates from year to with little reference to other considerations; hence indigo has been omi from these tables.

From the subjoined table of prices will be gathered the great fall in sent prices, as compared with 1882, in wheat. The rates of exchange and freights ruling in the several months specified are added; and viewed in c junction with the increasing stagnation of trade during that period, they th some light on the contention of which a good deal has been lately heard a fall in exchange, inasmuch as it stimulates trade, is in itself a source increased revenue to the Government of India. It may be, no doubt, in fav able markets, but it certainly does not of itself suffice to sustain trade as aga the competition of crowded markets, and in the presence of low prices. C paring the exchange ruling in 1884 with that of 1883, when the trade was i greatest activity, we find that for the first 8 months of the former year, wher

Comparative table of prices of wheat, rates of exchange on Secretary of State's Bills, and Canal freights from Calcutta.

decline in exports first made itself felt, exchange was decidedly more favourable. It is, to say the least, very questionable whether, other things remaining equal, for the £440,000 which the loss of ½*d.* in exchange will cost us, we shall derive at present any adequate return in the stimulus of increased exports, and the revival of more active railway traffic.

Great as the falling off has been, the Indian imports into England amou to 12·8 per cent. of the whole quantity imported, against 10·9 per cent. in 1 and 13·9 in 1883. Compared with the Russian trade of last year, the Inc imports contrast favourably.

13. The prospects of the rice trade continue to be doubtful; the st on hand in London were estimated (*Economist* of January 3, 1885) in the years closing with 1884 as follows :—

ice trade ; stocks hand.

	Tons.
December 1880	29,730
,, 1881	52,800
,, 1882	24,840
,, 1883	54,900
,, 1884	33,900

rices of Rice in urope ; competi- on of Saigon ; mparative figures Saigon exports Europe.

14. Prices have continuously fallen, and were very lately lower than at former period, prices for Rangoon rice to arrive being quoted in London February 7 :—

		s.	d.		s.	d.
1882	per cwt.	8	9	to	9	1½
1883	,,	7	9	to	8	3
1884	,,	7	3	to	7	9
1885	,,	7	3	to	7	4½

The effect on rice of the excessively low price of maize, potatoes, sugar, has been aggravated by the relations at present existing between Governments of France and of China. Saigon rice, instead of looking for

market in China, is now diverted to Europe, and the following table shews the increase of exports of Saigon rice to Europe during the last two years. The figures are taken from returns furnished by Her Majesty's Consul at Saigon :—

	1882-83.	1883-84.	1884-85.
	cwt.	cwt.	cwt.
1st Quarter	2,628,900	3,299,100	3,414,520
2nd ,, ...	1,405,560	2,095,600	2,579,280
3rd ,, ...	1,965,740	(Not received)	837,140
4th ,, ...	2,832,760	3,344,400	...

15. Siam and Japan are also entering the European market and exporting increasing quantities of rice. The temporary depression of the Burmah rice trade is due, unquestionably, however, not to competition, partial failure of corps, or low prices in Europe only, but in a great measure to over-speculation and excessive competition in 1883-84. With a revival of trade in Europe, and with a more sound and less speculative conduct of trade operations, we may hope for material improvement in the rice trade, which, for the moment, however, continues in a state of depression only too faithfully reflected in our returns of Customs duties.

Comp Siam Prosp prove rice t

16. Turning from the interest which the Government of India in its capacity of an extensive owner of railways, or as the guarantor of the main Indian lines, is compelled in an extraordinary degree to feel in the development of the trade of the country, I proceed to give a view of another of those relations which, as I pointed out in paragraph 120 of my last year's Statement, it occupies outside the sphere of the ordinary operations of Governments. The following few facts shew how it was that we were called upon to meet the heavy excess expenditure, the figures of which have been given in my paragraph 7 in relation to our opium monopoly. The area under opium in 1883-84 was not, I believe, exceptionally large, but from causes connected with the atmospheric peculiarities of the season, the outturn was quite exceptional. The average yield per beegah in the Behar Agency was 5 seers 15½ chittacks, against 2 seers 12 chittacks in the preceding year, which, however, was a year exceptionally bad, while in the Benares Agency it was 6 seers 7½ chittacks against 4 seers 1½ chittacks. The last estimate of the Behar Agency produce was 47,766 maunds, the gross weight of opium received, at 80-tola weight, was 55,379 maunds. In the Benares Agency, from figures furnished by the Opium Agent, it would seem that the outturn compared with that of the preceding ten years, was as follows :—

Opiu 1883-8 rison with t previo

	Maunds.
1873-74	43,000
1874-75	39,201
1875 76	60,113
1876-77	61,561
1877-78	45,380
1878-79	56,636
1879-80	45,475
1880-81	45,505
1881-82	51,449
1882-83	42,213
1883-84	67,037

We had estimated, on account of Opium expenditure, for a sum of £2,352,900, we actually have had to pay a sum of £2,946,500. The storing of this largely increased quantity of opium led to no little difficulty in the Benares Agency,

and after the closing of the season's factory weighments, additional accon modation had to be furnished. The result, however prejudicial to our estimat of 1884-85, will enable us materially to increase our opium reserve. Th prospects of the season now drawing to a close are again reported goo but there is no reason to suppose that the return will be equal to that of th preceding year.

; progressive mption steady noderate.

17. In paragraph 16 of last year's Financial Statement is given a compar tive table of the consumption of salt for the 11 corresponding months of each ye from 1874-75 as compared with the previous year, and it was shewn that in th 11 months from 1st March 1882 to 31st January 1883, and from the 1st Mar 1883 to 31st January 1884 the increased consumption as compared with the corre ponding months of 1881-82 amounted to 2,576,000 maunds. The consumptic for the corresponding months of last year, namely, from 1st March 1884 t 31st January 1885 is 27 792,000 maunds, or 718,000 maunds in excess of th corresponding period of the preceding year. We have taken for our estimat a figure £72,000 in excess of the Budget Estimate of last year, and £61,700 i excess of the Revised Estimates. The increase of consumption continues to b steady, but not excessively large.

ngs Banks; ase in De- ors.

18. On the 31st March 1884 the number of depositors in District and Pres dency Savings Banks was 91,981 against 88,836 on the same date of the previou year, or shewing an increase of 3,145 depositors. The increase occurred amon the natives :—

	Europeans and Eurasians.	Natives.	Total
	No.	No.	No.
31st March 1883 . . .	20,232	68,604	88,836
„ *1884* . . .	20,037	71,944	91,981
	— 195	+ 3,340	+ 3,145

These figures indicate a growth of the provident habits of the people c this country.

The balance at the credit of the depositors on the 31st March 1884 wa £3,028,200 against £3,113,700 on the corresponding date of the previous year, c shewing a decrease of £85,500. This decrease is due, no doubt, to the openin of the Post Office Savings Banks.

ss of Post Savings s.

19. The Post Office Savings Bank system continues to be a marked succes At the end of March 1883 the total number of Savings Bank Accounts wa 39,121, by the end of March 1884 it had risen to 84,848, and now at the clos of January 1885 it stands at 116,528. The balance at the credit of depositor at the end of March 1883 was R27,96,796; by the end of March 1884 it ha risen to R75,14,454, and now, at the end of January 1885, it stands a R1,26,10,610. Of the 84,848 accounts open at the end of March 1884, 8,41 were accounts in the names of Europeans and Eurasians, while 76,438 wer accounts in the names of natives of India. Of the total number of account open at the end of January 1885, 12,617 stand in the names of Europeans an Eurasians, and 1,03,911 in the names of natives of India.

Post Office Savings Banks (within the limits of the Presidency towns were opened at Madras on 1st April 1883, and at Calcutta and Bombay on th 1st May 1883. At the close of March 1884 the number of accounts standin in the books of these Banks was 6,361, and the balance at the credit of deposit ors R4,95,277. At the close of January 1885 the number of accounts is 10,78 and the balance at the credit of depositors R10,10,028. There is every reason therefore, to be satisfied with the results. Out of the total number of depositor

at the end of March 1884, 1,19(were Europeans or Eurasians and 5,170 natives of India. Of the total number now shewn, 1,972 are Europeans and Eurasians and 8,814 natives of India.

The Presidency Savings Banks comprise a certain number of Sub-Savings Banks at small offices in the vicinity of Presidency towns as well as at the various town Sub-Offices, and the figures now given include the accounts at all these Sub-Offices.

Post (Insur(experi

20. The Life Insurance scheme for persons in the employ of the Post Office was introduced on the 1st February 1884, and has therefore been in force for a year up to the end of January 1885. The number of such persons who have insured their lives during this period is 339, and the total amount for which their lives have been insured is ₹4,89,675. Of these, 37 were Europeans and Eurasians and 302 natives of India.

During the first year of the scheme only about 3 per cent. of Post Office servants above the grade of postmen have taken advantage of it, and the scheme cannot therefore be said to have been an unqualified success hitherto. But in Madras, Bombay, and especially in Bengal, where English ideas and education are more wide-spread than in the rest of India, there is reason to believe that it is being appreciated. In Bengal 134 natives insured their lives, and in Madras 54. On the other hand, in the whole of the North-Western Provinces, Oudh, and the Punjab there were only 28 natives of the country willing to make use of the scheme.

Impo and s

21. The net imports of gold and silver during ten months of 1884-85 and for each year since 1880-81 are given below. Attention was drawn in last year's Financial Statement to the annual absorption of gold by India. The year 1883-84 is the highest point reached since 1869-70.

Year.	Gold.		
	Imports.	Exports.	Net imports.
	₹	₹	₹
1880-81	3,68,10,576	1,68,586	3,66,41,990
1881-82	4,85,63,920	1,24,078	4,84,39,842
1882-83	5,09,51,324	16,42,639	4,93,08,685
1883-84	5,46,94,568	61,412	5,46,33,156
1884-85 (10 months)	4,57,55,811	7,29,476	4,50,26,335

No in

22. Stock Notes have shewn no sign of improvement. Up to the end of December 1883 £190,400 worth of Stock Notes had been issued; at the close of 1884 the figure stood at £200,113. The subject has been under the consideration of the Government of India, who are about to address the Secretary of State upon it with a view of taking such measures as may possibly facilitate the use of the notes. It would be premature at present, until we know what the views of the Secretary of State are, to enter into any detailed discussion of this subject, which must be reserved for the ensuing year.

l notes as to ce, above ', in the and Revised es of

23. I proceed now to give the customary explanations under those heads where the receipts and the expenditure of the Revised Estimates shew considerable difference from the estimates taken in the Budget. Where the difference, whether increase or decrease, is not more than £10,000, I think it unnecessary to record here any explanation.

24. *Land Revenue* (*I*); Decrease, £341,900. This is a net decrease, due mainly to Madras (£271,600) and Bombay (£72,300). The large reduction under Madras was owing to the exceptional character of the rainy season in 1884-85. Not only had the south-west monsoon in certain districts failed, but the north-east monsoon was very deficient in the northern part of the Presidency, while, on the other hand, it was accompanied in the south by serious floods. Hence considerable remissions and suspensions of land revenue have been brought about. In Bombay a similar failure of the monsoon in the Southern Mahratta country has led to postponement, in part, of the demand. These are the suspensions of land revenue spoken of in paragraph 7.

25. *Opium* (*II*); Increase, £255,800. This is due in part to the fact that the opium sales having produced an average of ₹1,295-15-11 per chest, against ₹1,250, the figure taken in the estimates; and secondly, to a sale of 198 chests more than it was originally proposed to place on the market. The increased ratio of sales took place from the 1st January in the present year. There were delivered by Mr. Rivett-Carnac's Agency 2,268 maunds of Malwa opium, at a consistence of 90 per cent., being equivalent to the setting free of 1,712 chests of provision opium at 70 per cent. consistence. The amount of reserve at the close of 1885 is estimated at 18,297 chests.

pal heads of e.

26. *Salt* (*III*); Increase, £21,100. This is mainly due to an increase of £85,300 in Bengal, and £20,000 in Bombay, against which, however, has to be put a decrease of £93,200 in Madras. The decrease in Madras is attributed to diminished consumption of east coast salt; secondly, the large extension of sales under the credit system, of which the effect will be to transfer to 1885-86 revenues which would otherwise have been collected in 1884-85; thirdly, the substitution of excise salt for monopoly salt, and the consequent omission from both the expenditure and revenue sides of the accounts, of the cost of manufacture, which under the monopoly system the Government used to pay to manufacturers, recovering it subsequently with the duty; hence the only real decrease is that arising from decrease of consumption of East Coast salt.

27. *Stamps* (*IV*); Increase, £45,000. *Excise* (*V*); Increase, £216,600. The increase under these heads is general and normal, in years of average prosperity, and calls for no particular remarks.

28. *Provincial Rates* (*VI*); Increase, £53,600. This increase is the net result of increases and decreases in the several Provinces. The principal of these are, first, an increase of £66,000 in the Punjab, due to the circumstance that the assets of the Patwari's Fee Fund, (an incorporated Local Fund) have been transferred from under Land Revenue to this head; and, secondly, to a decrease of £22,400 in Madras due to postponement of collection of cesses to that amount till the ensuing year 1885-86.

29. *Customs* (*VII*); Decrease, £259,500. This is the net result of a decrease of £194,500 in British Burmah, £75,000 in Bengal, and an increase of £10,000 in Bombay. The cause of this decrease has been sufficiently explained in previous paragraphs of this Statement.

30. *Registration* (*X*); Increase, £15,200. This is due to the same cause as *Stamps* and *Excise*, namely, to general prosperity throughout the country during the year, and calls for no particular remark.

31. *Mint* (*XIV*); Increase, £61,800, due to coinage of a larger quantity of silver than was anticipated, and to a gain arising out of a greater quantity of copper passing into circulation than was expected at the time the Budget was framed. *Post Teleg Mint*

32. *Law and Justice* (*XV*); Decrease, £53,800, being mainly due to diminished receipts from the sale of jail manufactures, and from Magisterial fees and fines.

33. *Marine* (*XVII*); Decrease, £28,000. Of this, £20,000 is due to the falling off in Dockyard services and supplies to other Departments. A reduction of £3,700 is also made in the Burma Estimates, owing to short receipts from sale of vessels and stores, freight, passage, tonnage, &c. Under Bengal a reduction of £5,000 is made owing to short pilotage receipts, arising from the slackness of trade. *Recei Depa*

34. *Scientific and other Minor Departments* (*XX*). The increase is £12,100; it is general and represents larger receipts than originally anticipated under Botanical gardens, experimental farms, sales of cinchona, and the other remaining subordinate heads of revenue.

35. *Interest* (*XXI*); Increase, £47,300. Of this £23,100 occurs in England and £24,200 in India. The increase in England is due to the temporary investment at favourable rates of the surplus cash balances owing to the loan of three millions which was issued in May 1884 not being required for the discharge of debentures till August. The increase in India is due to interest on over-drawals of capital by guaranteed railways.

36. *Miscellaneous* (*XXIV*); Increase, £63,300. This is always an uncertain figure, and the above increase is mainly due to the receipts from lapsed deposits being expected to reach a higher figure than was foreseen in the Budget. *Mis*

37. *State Railways, Gross earnings* (*XXV*); Decrease, exclusive of the East Indian Railway, £7,300. This is the net result of a series of figures of which the chief are, an increase of £10,000 in the Burma State Railways, £10,000 in the Eastern Bengal State Railway, and £97,500 in the Indus Valley State Railway, against a decrease of £47,500 in the Rajputana-Malwa Railway, £7,500 in the Nagpore and Chhatisgarh State Railway, £23,500 in the Northern Bengal State Railway, and £22,600 in the Calcutta and South-Eastern State Railway. The increase in Burma is due to additional mileage opened on the Sittang Railway, on which the receipts also have proved better than was expected. On the Eastern Bengal State Railway the improvement is due to the following causes. After the preparation of the original estimate it was resolved to amalgamate the Calcutta and South-Eastern State Railway and the Poradaha-Damukdia Section of the Northern Bengal State Railway with the Eastern Bengal State Railway; the figures of the Revised Estimates, therefore, represent the transactions of the combined undertakings. This estimate also includes a special credit of £29,500 on account of the estimated share of the assets of the Fire Insurance and Flotilla Reserve fund of the late Eastern Bengal Guaranteed Railway, credited to the Imperial Government. The increase in the Indus Valley State Railway is owing to the development of the wheat and seed traffic on that line. With regard to the decreases, that of the Rajputana Railway is due to loss of traffic in consequence of breaches on the line and on the Bombay, Baroda, and Central India Railway during the monsoon; to slackness of the wheat trade; and to a reduction of the rate of charge against the Rewari-Ferozepore State Railway for hire of rolling-stock. The decrease on the Nagpore-Chhatisgarh Railway is ascribed chiefly to the slackness of the grain market, and to reduction in the rates for carriage of grain and salt. The decrease in the Northern Bengal State Railway is due to the transfer of the Poradaha Section of the line, as already explained, and to the reduction of the charge levied for crossing the Ganges on the opening of the extension of the *Reven Produ Works*

same section to the new Ghat at Golabnagar. The decrease in the Calcutta and South-Eastern State Railway is due to its amalgamation with the Eastern Bengal State Railway from the 1st July 1884, and while the Revised Estimate represents receipts only up to the 30th June, the Budget Estimate of 1884-85 was based on a whole year's transactions. On the East Indian Railway there is a decrease of £580,000. This formidable decrease is due to the stagnation in the wheat trade which has formed the subject of preceding remarks.

38. *Guaranteed Railways, Net traffic receipts (XXVI)*; Decrease £239,000. This is the net outcome of the following figures:—

	Increase.	Decrease.
	£	£
(1) Eastern Bengal Railway	...	73,000
(2) Madras Railway	45,000	...
(3) South Indian Railway	...	6,000
(4) Bombay, Baroda, and Central India Railway .	...	10,000
(5) Great Indian Peninsula Railway . . .	...	30,000
(6) Oudh and Rohilkund Railway . . .	...	75,000
(7) Sindh, Punjab, and Delhi Railway . .	...	90,000

(*1*) *Eastern Bengal Railway.*—The figures are for the three months April to June 1884-85, the line having been taken over by Government from 1st July. The decrease on the Budget resulted from a decline in traffic, and from heavy outlay in excess of Budget provision on establishment and other charges, found necessary in connection with closing the Company's accounts and transactions.

(*2*) *Madras Railway.*—The improvement is due to the traffic being fairly good, and to an expected reduction of £25,000 on account of expenses.

(*3*) *South Indian Railway.*—Disastrous floods along this line caused several breaks in it, and interrupted the traffic for a comparatively long period. The disappointment of Budget expectations is due to these causes.

(*4*) *Bombay, Baroda, and Central India Railway.*—Breaks in the line during the last monsoon have brought about a reduction compared with the Budget Estimate.

(*5*) *Great Indian Peninsula Railway.*—The decrease is due to the Budget provision for expenses being insufficient by £50,000.

(*6*) *Oudh and Rohilkhund Railway.*—The traffic not having proved as good as it was expected it would prove, combined with the circumstance of the line being extended at a later date than was anticipated, has resulted in the Revised Estimates taking a lower figure than the Budget of 1884-85.

(7) *Sind, Punjab, and Delhi Railway.*—The Revised Estimate of receipts is £80,000 worse than the Original Estimate of the year. The goods traffic fell off considerably from June to September 1884, owing chiefly to the low price of wheat in Europe. Of the decrease of £80,000 the major part of £50,000 is however, nominal, and is thus explainable—

1st,—£30,000 is due to a change in the system of accounting for receipts and charges on account of mileage and demurrage by which the *net result* is now shewn on the receipt or charge side of the Account, as the case may be instead of the gross amounts being shewn on both sides of the Account, as formerly.

2nd,—£15,000 is due to a reduction in the rates for carriage of revenue stores. These changes have led to a corresponding reduction in charges. In the Revised Estimate of expenses £10,000 in excess of the Budget Estimate of 1884-85 have had to be provided to meet the cost of carrying out extensive renewals of permanent way and carriage and wagon stock. These renewals are expected to cost over £80,000, and but for this special and unforeseen expenditure

there would have been a satisfactory reduction over and above the nominal reduction due to the change in system already referred to.

39. *Irrigation and Navigation (direct receipts)* (*XXVII*); Increase £105,500. Compared with the Original Estimate the Revised shews an improvement of £105,500, being the net result of the following differences :—

	Increase.	Decrease.
	£	£
Bengal	...	5,000
N.-W. P. and Oudh	76,400	...
Punjab	36,100	...
Madras	...	2,300
Bombay	300	...

The decrease in Bengal is ascribable to a falling off in the water-rates and Navigation receipts on the Orissa and Midnapur Canals. The increase in the N.-W. P. and Oudh is due to the exceptionally favourable rabbi season of 1883-84 and a good kharif season in 1884-85.

In the case of the Punjab the increase represents the net balance of an increase on the Western Jumna Canal, and of a falling off on the Bari Doab and Sirhind Canal. The increase on the Western Jumna Canal is due to the area of irrigation being increased because of scanty rainfall during the rabbi season of 1883-84, and the early part of the kharif season of 1884; while the falling off on the Bari Doab and Sirhind Canals is the result of irrigation being less than was anticipated. The decrease in Madras is due chiefly to the falling off of Navigation receipts from tolls and license fees. The increase in Bombay is trifling and does not call for any special remarks.

40. *Portion of Land Revenue due to irrigation* (*XXVIII*); Increase £13,600: being the net outcome of figures in which the only notable increase is £16,600 in Madras, caused first by the completed channels of the Sangam Anicut project having been brought into operation for the first time, during the year; secondly, to the extension of irrigation in the Godavery and Kistna Delta systems; and thirdly, to the rate of calculation of charges in the Civil Department having been reduced from 7·2 to 5 per cent.

41. *State Railways* (*XXIX*); Increase £38,200: mainly due to £17,500 under the Rewari-Ferozepore State Railway, arising from the extension of the line to Ferozepore, and to the fact of the Fazilka branch having been opened earlier than was expected; and to £22,500 on the Sind-Peshin State Railway, due to the conveyance of labourers and large quantities of material for the northern section of this line, formerly known as the Candahar State Railway.

42. *Southern Mahratta Railway* (*XXX*); Increase £32,500, due to an extension of traffic.

43. *Interest on Ordinary Debt*; (1) Increase, £241,100. Of this increase £199,400 occurs in England, and is due chiefly to the payment of £184,200 on account of discount on the issue in 1884-85 of India 3 per cent. stock of 3 millions, and to the charge for interest on this loan (estimated at £67,500 in 1884-85). On the other hand, there is (1) a decrease of £31,500 in interest on Debentures, owing to £5,000,000 only having been renewed instead of £6,906,500, as provided in the original estimate; (2) a decrease of £15,000 on temporary loans; and a decrease of £4,000 in the payments of outstanding dividends. The small difference under India calls for no special remark.

44. *Opium* (*6*); Increase, £593,600. This occurs principally in Bengal, and is due to the exceptionally large crop of 1883-84. Explanation has already been given in the body of the Statement in regard to this increase.

45. *Salt* (7); Decrease £62,100. The saving is due to a reduction salary, establishment and contingent charges, and in charges for manufactu purchase, and freight. In Madras the gradual supersession of the monopoly the Excise system has also resulted in diminished expenditure. In Bomb the saving occurs chiefly in the salt establishment for Portuguese India.

46. *Provincial Rates* (10); Increase £58,400. This arises almost who in the Punjab, and is due to the transfer from "5. Land Revenue" to this he of the charges debitable to the Patwaris Fees Fund.

Office, Telh, and

47. *Telegraph* (16); Decrease £33,500. The saving occurs in the Indi Telegraph Department, and is due chiefly to restricted outlay on works, and savings in establishments.

48. *Law and Justice* (19); Decrease £84,900. The decrease occurs almost all the provinces, and is due principally to cheapness of grain and limited expenditure on jail manufactures followed by diminished receipts.

es and ises of Civil tments.

49. *Police* (20); Increase £11,900. The Central Provinces, Burma, a Madras shew a saving. The other provinces provide for small increases to me the growing requirements of the Department. The decrease in the Central Pr vinces amounts to £17,000, and is chiefly due to the revised scale of salari sanctioned in re-organising the Police establishment not having been introduced early as was expected.

50. *Marine* (21); Decrease £29,700. This is made up of decreases in Inc and increase in England. The decrease in India amounts to £42,700 and occu chiefly in expenditure on account of dockyard services and supplies, followed diminished receipts. The increase in England is due to charges on account repairs of the steamer "Tenasserim."

51. *Education* (22); Decrease £26,400. This occurs in small amounts almost all the provinces, and is due to excessive provision in the original estimat

52. *Political* (25); Increase £167,800. The increase is mainly due to t following items:—

	£
Arrear payment of Amir's subsidy	29,800
Afghan Delimitation Commission	120,000

llaneous Civil es.

53. *Territorial and Political Pensions* (27); Decrease £26,600. T variations occur in small amounts in all the provinces except the North-Weste Provinces and Oudh, where there is a decrease of £10,000 due to the origin estimate of the year having been taken at too high a figure.

54. *Stationery and Printing* (30); Decrease £37,100. The charg under this head are expected to fall short of the amount they were original expected to reach, by £37,100. Of this amount a saving of £14,300 occu in India, the saving under England being £22,800. In England the saving due to less outlay on stores.

ıe Relief nsurance.

55. *Famine Relief* (32); Increase £12,000. This figure is thus di tributed—

	£
Bengal	5,000
Madras	2,000
Bombay	5,000
	12,000

No provision was made in the original estimates. But in Bengal, t prevalence of scarcity in the western districts; in Madras, devastating floo in South Arcot and some of the southern districts; and in Bombay expect distress in the Kaladgi district, render the small assignments made, necessary.

56. *Protective Works, Railways* (*33*) ; Decrease, £240,500. The decrease is due to the refund to the Government of the North-Western Provinces and Oud of the contribution of £250,000 made from Provincial balances towards the construction of the Jhansi-Manickpur Railway, and the consequent curtailment of expenditure to that extent.

57. *Protective Works, Irrigation* (*34*) ; Decrease £39,500. This figure is made up thus :—

	£
Bengal, Increase	40,000
India (General and Political) Decrease	55,200
Madras ditto	7,200
Bombay ditto	17,100
Net .	39,500

The increase under Bengal is due to an additional grant sanctioned during the year for expenditure on the Orissa Coast Canal. The decrease under India (General and Political) represents the unutilised portion of the reserv held by the Department of Public Works to meet any applications for additional grants that might be made during the course of the year. The decrease in Madras is due to slow progress of work, for want of labour, on the Rushikulya project. The decrease in Bombay is due to short expenditure on the Nira Canal and the Mhaswad Tank, owing partly to the scarcity of labour and partly to the question of the waste weir of the Mhaswad Tank remaining unsettled till late in the year.

58. *Reduction of Debt* (*35*); Increase, £18,000. This is due to a re-adjustment of the grants under the several heads subordinate to the major head "Famine Relief and Insurance" in order to make up the total grant to £1,500,000.

59. *State Railways* (*working expenses*) (*36*) ; Increase, £33,600. The increase is due to the following causes : in the Rajputana-Malwa State Railway to the heavy renewals, to repairing the breaches on the line, and to charges now made under contract with the Bombay Baroda and Central India Railway for working this line ; in the Nagpur-Chatisgarh Railway, to heavy expenditure incurred in repairing flood damages ; in the Burma State Railways, to the transfer to the Revenue Account of the maintenance charges of the new lengths of the Sittang Valley Railway originally included in the Capital Accounts, in the Tirhoot State Railway, to extensive renewals of sleepers and permanent-way ; in the Northern Bengal State Railway to extensive renewals of sleepers and ballast and repairs of vessels. There is, however, a large decrease of £17,500 in the working expenses of the Indus Valley State Railway owing to a reduction in the expenditure of the Locomotive Department chiefly under fuel.

60. *East Indian Railway* (*Working expenses*); Decrease, £161,200 :—

	£
Working expenses	120,000
Surplus profits, and contribution to the provident fund . .	41,200
TOTAL .	161,200

The reduction in the working expenses is due to reduced traffic and to a curtailment of outlay on renewals, &c., and that in surplus profits to a reduction in the net profits of the line.

61. *Guaranteed Railways* (*Surplus profits, Land and Supervision*) (*37*) ; Decrease, £34,900. The decrease occurs principally in Bombay and Bengal (£10,800) owing to a larger credit expected from the Southern Mahratta Railway

45. *Salt* (7); Decrease £62,100. The saving is due to a reduction in salary, establishment and contingent charges, and in charges for manufacture, purchase, and freight. In Madras the gradual supersession of the monopoly by the Excise system has also resulted in diminished expenditure. In Bombay the saving occurs chiefly in the salt establishment for Portuguese India.

46. *Provincial Rates* (10); Increase £58,400. This arises almost wholly in the Punjab, and is due to the transfer from "5. Land Revenue" to this head of the charges debitable to the Patwaris Fees Fund.

ffice, Tel- and

47. *Telegraph* (16); Decrease £33,500. The saving occurs in the Indian Telegraph Department, and is due chiefly to restricted outlay on works, and to savings in establishments.

48. *Law and Justice* (19); Decrease £84,900. The decrease occurs in almost all the provinces, and is due principally to cheapness of grain and to limited expenditure on jail manufactures followed by diminished receipts.

and s of Civil ents.

49. *Police* (20); Increase £11,900. The Central Provinces, Burma, and Madras shew a saving. The other provinces provide for small increases to meet the growing requirements of the Department. The decrease in the Central Provinces amounts to £17,000, and is chiefly due to the revised scale of salaries sanctioned in re-organising the Police establishment not having been introduced as early as was expected.

50. *Marine* (21); Decrease £29,700. This is made up of decreases in India and increase in England. The decrease in India amounts to £42,700 and occurs chiefly in expenditure on account of dockyard services and supplies, followed by diminished receipts. The increase in England is due to charges on account of repairs of the steamer "Tenasserim."

51. *Education* (22); Decrease £26,400. This occurs in small amounts in almost all the provinces, and is due to excessive provision in the original estimate.

52. *Political* (25); Increase £167,800. The increase is mainly due to the following items:—

	£
Arrear payment of Amir's subsidy	29,800
Afghan Delimitation Commission	120,000

neous Civil

53. *Territorial and Political Pensions* (27); Decrease £26,600. The variations occur in small amounts in all the provinces except the North-Western Provinces and Oudh, where there is a decrease of £10,000 due to the original estimate of the year having been taken at too high a figure.

54. *Stationery and Printing* (30); Decrease £37,100. The charges under this head are expected to fall short of the amount they were originally expected to reach, by £37,100. Of this amount a saving of £14,300 occurs in India, the saving under England being £22,800. In England the saving is due to less outlay on stores.

Relief urance.

55. *Famine Relief* (32); Increase £12,000. This figure is thus distributed—

	£
Bengal	5,000
Madras	2,000
Bombay	5,000
	12,000

No provision was made in the original estimates. But in Bengal, the prevalence of scarcity in the western districts; in Madras, devastating floods in South Arcot and some of the southern districts; and in Bombay expected distress in the Kaladgi district, render the small assignments made, necessary.

56. *Protective Works, Railways* (*33*); Decrease, £240,500. The decrea is due to the refund to the Government of the North-Western Provinces and Ou of the contribution of £250,000 made from Provincial balances towards the co struction of the Jhansi-Manickpur Railway, and the consequent curtailment expenditure to that extent.

57. *Protective Works, Irrigation* (*34*); Decrease £39,500. This figure made up thus :—

	£
Bengal, Increase	40,000
India (General and Political) Decrease	55,200
Madras ditto	7,200
Bombay ditto	17,100
Net .	39,500

The increase under Bengal is due to an additional grant sanctione during the year for expenditure on the Orissa Coast Canal. The decrease und India (General and Political) represents the unutilised portion of the reser held by the Department of Public Works to meet any applications for addition grants that might be made during the course of the year. The decrease i Madras is due to slow progress of work, for want of labour, on the Rushikulya pr ject. The decrease in Bombay is due to short expenditure on the Nira Canal an the Mhaswad Tank, owing partly to the scarcity of labour and partly to th question of the waste weir of the Mhaswad Tank remaining unsettled till late i the year.

58. *Reduction of Debt* (*35*); Increase, £18,000. This is due to a re-adjus ment of the grants under the several heads subordinate to the major head " Famin Relief and Insurance " in order to make up the total grant to £1,500,000.

59. *State Railways* (*working expenses*) (*36*); Increase, £33,600. The in crease is due to the following causes: in the Rajputana-Malwa State Railway t the heavy renewals, to repairing the breaches on the line, and to charges now mad under contract with the Bombay Baroda and Central India Railway for workin this line; in the Nagpur-Chatisgarh Railway, to heavy expenditure incurred i repairing flood damages; in the Burma State Railways, to the transfer to th Revenue Account of the maintenance charges of the new lengths of the Sittan Valley Railway originally included in the Capital Accounts, in the Tirhoot Stat Railway, to extensive renewals of sleepers and permanent-way; in the Northern Bengal State Railway to extensive renewals of sleepers and ballast and repair of vessels. There is, however, a large decrease of £17,500 in the workin expenses of the Indus Valley State Railway owing to a reduction in the expen diture of the Locomotive Department chiefly under fuel.

60. *East Indian Railway* (*Working expenses*); Decrease, £161,200 :—

	£
Working expenses	120,000
Surplus profits, and contribution to the provident fund . .	41,200
TOTAL .	161,200

The reduction in the working expenses is due to reduced traffic and to curtailment of outlay on renewals, &c., and that in surplus profits to a reductio in the net profits of the line.

61. *Guaranteed Railways* (*Surplus profits, Land and Supervision*) (*37*); Decrease, £34,900. The decrease occurs principally in Bombay and Bengal (£10,800) owing to a larger credit expected from the Southern Mahratta Railway

Company on account of Supervision, and £13,600 to the payment of surplus profits, as the Eastern Bengal Railway did not earn a surplus during the half-year ending 30th June 1884.

62. *Irrigation and Navigation; working expenses* (*38*); Increase £19,700. This occurs as follows:—

	£	£
Imperial Decrease	5,100	
Provincial Increase	24,800	
Net increase .		19,700

The decrease under Imperial is the net result of savings in establishment charges in the Punjab and increases in Madras, where additional expenditure has been incurred for repairing the flood damages on the Godavary and the Cauvery Delta systems.

The increase under Provincial occurs principally in the North-Western Provinces and Oudh, where additional outlay has been necessary for repairing the damages done by heavy floods to the Nadrai Aqueduct on the Lower Ganges Canal.

63. *Charges in respect of Capital* (*39*); (*a*) Interest on debt. Increase £10,400. The increase here is chiefly due to provision on account of interest on the debentures and debenture stock of the Eastern Bengal Railway.

(*b*) *Annuities in purchase of Guaranteed Railways* (*including Sinking Funds.*)—Decrease £34,500. This decrease is nominal, as it is due to the issue of India Stock in redemption of a further portion of the Annuity of the East Indian Railway not provided for in the original estimate, and to change in the date of the payment of the Annuity of the Eastern Bengal Railway.

(*c*) *Guaranteed Railways Interest.*—Decrease, £17,800. This occurs in England, and is due to capital subscribed not having been paid up as early as was expected.

e on rks not roduc-

64. *State Railways* (*Capital Account*) (*40*); Increase, £24,400. This is composed of a decrease of £17,500 under Imperial, and of an increase of £41,950 under Provincial. The saving in Imperial is due to transfer of grant from this head to "43. Frontier Railways" to meet outlay on the Northern Section of the Punjab Northern State Railway. The excess under Provincial is due to transfers sanctioned during the year from "46. Civil Buildings, Roads and Services," to this head.

65. *Southern Mahratta Railway* (*42*). The increase is £58,800, of which £27,800 falls under interest payments and £31,000 under working expenses.

66. *Frontier Railways* (*43*); Increase £211,700. During the year additional grants amounting to £450,000 and transfers from other grants were sanctioned for the vigorous prosecution of these Railways. From the consolidated grant thus arrived at a portion has been transferred to "Expenditure on Productive Public Works, Capital Account."

67. *Irrigation and Navigation* (*44*); Increase £29,900. This occurs principally in the Provincial Section of the estimates, and is due to additional grants having been sanctioned by the Chief Commissioner of British Burma, and by the Government of Madras during the year.

68. *Military Works* (*45*); Increase £50,400. The increase is chiefly due to additional grants sanctioned for the Aden defences, and to the refund of an excess payment on account of the Army Head Quarter Offices, Simla.

69. *Civil Buildings, Roads and Service* (*46*); Increase £103,700. The increase occurs in all the provinces in the Provincial section of the estimates, and is due to additional grants sanctioned during the year.

70. *Army.*—Decrease £128,400. The gross Budget figures we £16,098,600. The Revised Estimate is £15,970,200. The decrease £128,400. This is due in part to the actual strength of British troops havi been below the established strength; to the withdrawal, early in the seasc of two regiments of British infantry for service in Egypt, in anticipation of th transfer to England in the ordinary course of relief; to favourable prices; continued savings in medical supplies and services; and to reduced charges f railway and other transport, the estimate for which was too high. On the oth hand the Zhob Valley expedition is estimated to cost £60,000.

71. *Exchange on transactions with London (49).* The amount provided the Revised Estimate of 1884-85 is below that assigned in the Budget Estima of 1884-85 by £285,200. The following table compares the original and prese figures. The + entries represent gain, and the — entries loss by exchange:—

	Budget, 1884-85.	Revised, 1884-85.
	£	£
Secretary of State's Bills . . .	—3,807,700	—3,337,100
Advances for Suakim Expedition .	...	—75,000
Hong-Kong Bills	—30,000	—50,600
Guaranteed Railways . . .	+147,200	+150,200
East Indian Railway . . .	+135,100	+98,100
Rajputana-Malwa Railway . .	...	+16,800
Southern Mahratta Railway . .	—93,000	—136,700
Military, Public Works, and Civil .	+110,300	+81,400
TOTAL	—3,538,100	—3,252,900

The reduction of exchange under the Secretary of State's Bills is due the following cause. When the Budget of 1884-85 was framed, the Secreta of State fixed his drawings at £16,500,000 true sterling, the rate of exchan adopted being 1*s.* 7½*d.* the rupee. During the course of the year, however, owi to an unexpected receipt of £1,704,400 on account of capital of Southe Mahratta Railway, and owing to the expected recovery of £325,000 true ste ling on account of advances now being made in India towards the Suaki expedition, as well as to other causes, the Secretary of State has been able relieve his drawings on India by £2,704,700. The present estimate of Coun Bill drawings is £13,795,300 true sterling, and the rate of exchange at whic these drawings have been taken is 1*s.* 7·3*d.* The provision on account of advanc towards the Egyptian expedition is the exchange at 1*s.* 7·5*d.* the rupee on th expected recovery in England of 40 lakhs of rupees advanced from the Indi treasuries.

Budget Estimates, 1885-86.

72. The Budget Estimate for 1885-86 is as follows:—

	£
Revenue	72,090,400
Expenditure	71,582,300
Surplus	508,100

The surplus presented for 1885-86 is, it will be seen, £508,100. To est mate, however, the real significance of this surplus attention must be directe to two points, which are material to a proper comprehension of the significanc of the figures here presented.

In paragraph 58 of his Financial Statement for 1880-81, Sir John Strachey spoke as follows:—

"When the serious character of the financial obligations of the State in times of famine had been recognised, it became the duty of the Government of India to make sure that the public resources were adequate to meet the fresh strain imposed upon them. Upon careful enquiry we came to the conclusion that we must contemplate a liability from famine amounting, in loss of revenue and actual expenditure, to, on an average, £15,000,000 in ten years. It was clear that this liability must be included among our ordinary obligations, and that it would have been a fatal error to go on increasing the public debt to meet charges which must periodically occur. To enable us to discharge the liability thus estimated, we determined to aim constantly at a surplus of £1,500,000, supplemented by a further surplus of £500,000 to provide for extraordinary and abnormal demands other than famine, as, for example—to name the most serious of such demands—for war."

on the the bove

Happily the most serious of such demands has not been made upon us, but in connection with our military position in India we decided, in the course of last year, to improve our communications, whether by railway or by road, upon our North-Western frontier; and, with the concurrence of the Secretary of State, we have determined to devote annually to capital expenditure a certain amount from our revenues until such time as our railway communications are completed. This year we have so devoted in all, inclusive of £85,000 for harbour defences, a sum of £585,000, besides an addition of £100,000 to the ordinary grant for roads, to be expended on certain frontier roads. This sum we may claim to look upon as equivalent, in its nature, to the surplus indicated in Sir John Strachey's remarks as desirable to have at our disposal for extraordinary and abnormal purposes such as those to which this sum is to be now applied. I mention this here, as it were *in limine*, because otherwise, in exhibiting the estimated surplus, the nature of our proposed transactions during the ensuing year may be misunderstood, and the conclusion may be formed that our revenues have been confined to normal expenditure unconnected with capital charges, such as those I am describing. It appears to me a matter for very great satisfaction that we have been enabled to devote a portion of our revenues to the execution of the policy indicated in the paragraph I have above quoted. All difficulties notwithstanding, we have been enabled to look to our revenue resources to meet demands which are extraordinary and abnormal, and to enable us to devote to them funds which were designed especially for emergencies of this nature. I shall enter presently more into detail on this matter, for it is closely connected with the main feature of the year which I am about to explain; but, for the reasons I have given, I deem it necessary to place these remarks in juxtaposition, as it were, to the balance above indicated. The second point to which attention must be directed is that, if we are to exclude from our surplus the grant from revenue for capital purposes, the surplus actually exhibited does not arise from an increase of revenue over expenditure; but from the fact that our expenditure, so far as it is effected in pounds sterling in England by means of sums made available there to the Secretary of State, is not represented at its exchange value in our accounts. In other words, the loss by exchange on £2,225,000 sterling is not entered in the accounts presented with these statements; and as that figure amounts to £585,000, by this amount are we, in effect, understating what should be regarded as our liabilities of expenditure. If we include on the one hand £585,000, the grant for railways and certain harbour defences, being capital expenditure, in our revenue expenditure, and exclude £585,000 from our surplus as representing the unexhibited loss on exchange, we arrive at about an equilibrium of revenue and expenditure. This much premised, I may go on to examine the nature of the provisions for the coming year.

73. The main features of the coming year are four: *first*, that it will give an effect, in the Budget, to the measures recommended, at the instance of the Government of India, by the Parliamentary Committee, for the construction of railways, with such further development as the circumstances of the time render imperative. *Secondly*, that it compels us, owing to the temporary stagnation of the wheat and rice trade, to take estimates for our railway and customs receipts at a considerably lower figure than those which in a normal year we should look for. *Thirdly*, that we have been compelled, owing to the fall in the value of silver, to take so low a rate of exchange as 1*s*. 7*d*. for our exchange. *Finally*, that we have devoted the sum of £500,000 above mentioned from our revenues for the improvement of our railway communications, besides certain further subsidiary sums for frontier roads and the defences of Aden and of certain harbours in India.

74. The report of the Parliamentary Committee on Indian Railways has been long since published, and contains a great deal of matter which has no direct bearing upon the financial questions discussed in this Statement. But the Committee have made certain recommendations, which are in part still under the consideration of the Government of India and of the Secretary of State, and which, whatever may be the decision finally arrived at in regard to them, will have a very considerable effect upon our finances. I propose to summarise the recommendations to which I allude, and to point out, so far as can at present be seen, in what direction they will modify the arrangements hitherto existing, and what are the means which we possess to enable us to meet them from our resources. Briefly, the arrangements hitherto existing were these. Railways were divided into two classes, Productive and Protective; capital expenditure on the former, which were of a remunerative character, was from loan; on the latter, which were for protection against famine, and not necessarily remunerative, expenditure was from what is known as the Famine Insurance grant. The annual limit to loan expenditure of all kinds was £2,500,000, fixed by a Parliamentary Committee in 1879, in which was included expenditure on canals; the annual expenditure on Protective lines was £500,000. There was no formally sanctioned programme, whether as to works, or the time within which works were to be executed. These were the arrangements existing when the Parliamentary Committee of 1884 met; it remains to indicate the points on which that Committee proposed modifications. *Firstly*, the Committee recommended that the technical distinction which has been hitherto made between Protective and Productive lines should not be maintained. They proposed, therefore, that railways needed for protection from famine, or for the development of the country, be made as required, whether they be technically considered Protective or Productive. But they were strongly of opinion that the bulk of the lines made should be self-supporting. *Secondly*, they were of opinion that a careful forecast having been made of future requirements for Public Works over a considerable term of years, such a scale of expenditure upon railways should be adopted as could reasonably be maintained. *Thirdly*, they were of opinion that the amount proposed to be spent in railways by the Government of India during the next six years was moderate, and that, looking to the experience of past years and to present prospects there is very fair ground for expecting that an extension of the railway system in India on the scale proposed would have most beneficial effects. *Fourthly*, with regard to the recommendation of the Government of India that interest on the sum of £11,250,000 to be spent on Productive and Protective Railways should be partly provided by hypothecating £200,000 of the annual Famine grant above specified, they were of opinion that any such application of any portion of that grant would be entirely contrary to the purposes for which the fund was created, and they could not

concur in this suggestion. *Finally*, while expressing an opinion that the present limit of borrowing fixed by the Committee of 1878-79 at £2,500,000 might safely be enlarged, they thought the full responsibility of deciding upon the amounts to be borrowed from year to year, should rest with the Secretary of State in Council. They wished, in conclusion, most emphatically to endorse the declaration of the Government of India that the proposed extension of railways should not involve additional taxation.

t of their re-nendations.

75. The practical effect of these conclusions will be somewhat as follows Railways, whether Protective or Productive, whether, that is to say, railways solely designed as safeguards against the effect of famines, or whether partly or in whole projected with the view of opening up or connecting the centres of production or of trade, will alike be charged, so far as is necessary, to loan expenditure. Hitherto the latter only have been so charged, expenditure on Protective railways having been limited to the £500,000 annually available from the Famine Insurance grant, and to such small sums as could be spared from Revenue. The forecast having been made, it will be necessary to provide funds for its execution; but, so far as concerns capitalising from the Famine grant any portion of the funds necessary for payment of interest to the Companies to whom it was proposed to confide, under a guarantee certain important railways, the proposal must be abandoned, and the sum of £500,000 hitherto spent in construction of Protective railways, will continue to be contributed from Revenue to Capital expenditure. The interest to be paid on account of the new guaranteed railways, therefore, as well as any additional interest to be paid in consequence of extension of the limits of our annual loans, will be furnished from the general resources at the disposal of the Government of India. The resources to which we had hoped to turn to assist us in part in this obligation, have been, so far as they depended on the partial capitalisation of the Famine Insurance grant, denied us; while, on the other hand, the Parliamentary Committee have endorsed the declaration of the Government of India that the development of its railways is not to be carried out at the expense of further taxation. Apart, however, from the scheme of railways which was laid before the Parliamentary Committee, the Government of India has since thought it necessary to propose, and the Secretary of State has approved, the carrying out of a scheme to strengthen our Railway communications on our North-Western frontier, the cost of which, inclusive of the Sibi-Quetta Railway, will amount to not less than £5,200,000. The cost of the railways remaining at the commencement of 1885-86 to be constructed during the ensuing five years by Government as distinct from those which it is desired to make over to Companies, is estimated, inclusive of extra capital for open lines, at about £19,000,000, the total of the two classes of communications thus amounting to £30,250,000.

To assist us in carrying out our proposed increased Railway expenditure the recommendations of the Parliamentary Committee that the limit of annual loan should be raised above the limit hitherto prescribed, has, of course, received the attention which it deserved, and the matter is still under reference to the Secretary of State, who has not as yet given a final decision as to the amount which, in the discretion left him, he desires to fix. Besides the sum to be so raised by loan, in respect of capital expenditure, which from its magnitude we may put in the first line, we have further, in the second place, the annual grant of £500,000 above alluded to as hitherto devoted from the Famine Insurance Fund to Protective railways; and in the third place, we are desired by the Secretary of State to estimate in our Budget for such available surplus as it may be possible annually to provide. On this point, again, it has been found necessary to make a further reference to the Secretary of State; and it will be sufficient

for the present to say that in the ensuing year the sum of £500,000, as stated in paragraph 74 of this Statement, has been placed at the disposal of the Public Works Department for Railway capital expenditure. As to the liabilities which these three combined sources of expenditure will throw upon our Budget Estimates, we cannot speak with certainty until the decision of the Secretary of State is received, as to the limit within which the annual loan is to be fixed during the term of the execution of the proposed works. Until that sum is known, it is obviously useless to hazard any forecast as to the annual amount which we shall be called upon to set aside on our estimates to meet the interest on our own loans. Then there will be the annual grant of £500,000 to be provided from the Famine Insurance Fund. Next will come an annual grant from our revenues of such amount as they can provide. Finally, there will still remain, in the fourth line, to be met from our revenues, the interest required on the guarantee to be given to the Companies through whose agency it has been proposed to construct certain important lines. The net interest to be so paid has been calculated by the Accountant General, Public Works Department, as follows:—

	£
1st year	85,000
2nd „	157,500
3rd „	210,000
4th „	250,000
5th „	255,000
6th „	160,000

In his evidence before the Parliamentary Committee, Mr. Westland, Comptroller-General of Accounts, whose judgment on matters connected with Indian finance merits the most respectful attention, estimated that the Government of India, after providing for the interest on its own proposed loans and for the projected guarantees, and for the grant from the Famine Insurance Fund, but exclusive of any other regular grants from revenue for capital expenditure, could estimate for a surplus of £480,000 on a safe calculation of the Revenue and Expenditure, and at a low forecast of opium. He left out of his calculation arrangements with the Civil Funds which might be expected to have the immediate effect of relieving the Revenue Account for many years to come of about £200,000 or £250,000, and arrangements for the payment of non-effective charges to the War Office which would relieve the Revenue Account, for a few years at least, of £400,000 or £500,000. Mr. Westland, as above stated, included in his figures the entire reservation (since endorsed by the Parliamentary Committee) of the £1,500,000 Famine Insurance; and he finally explained that the surplus of £480,000 above stated might be reasonably expected to increase by about £414,000 every year; but he added that every farthing fall of exchange cost Government directly about £220,000, so that if exchange were to fall a farthing every year, the annual amount on the present financial position would be reduced from £414,000 to £194,000. It should be remembered, he added, that a fall of exchange tends in itself to increase revenue, presumably by stimulating the export of our Indian produce, and therefore the receipts of our railways.

76. Since Mr. Westland gave his evidence, the estimate of the exchange has fallen, not one, but two farthings, a sum equivalent, at his calculation, to £440,000, or more than the first year's annual increase which he estimated. There has also been added, as above explained, to the original scheme of the Government of India, an estimate of £5,200,000 for frontier railways, necessitating large grants from revenue; so that on the one hand our requirements have considerably increased, while, on the other, the annual estimated increase of surplus has, for the present year, been absorbed. Should exchange remain stationary, and by the revival of trade and the normal expansion of our revenues, should the annual increment

Effect on India revenues of rail proposals subse quent to those mitted to the liamentary Committee, and the fall in exchange.

of the surplus which in the calculation above referred to was anticipated, be realised, our position at the commencement of the ensuing year will be certainly stronger than at present; but if we are further to obtain the indirect benefit from the late fall of exchange which is shadowed in Mr. Westland's remarks, it will be necessary that the price of wheat should so far rise in Europe as to stimulate a return of activity in the export of our wheat, and in the operations of our railways. Should we, on the other hand, be compelled to take, on our estimates, a lower rate of exchange than 1*s.* 7*d.*, and should the stagnation of our export and our rice trade continue, the normal surplus indicated in Mr. Westland's calculations, let alone any possible annual increase thereto, will be matter of extreme doubtfulness. The above calculations, moreover, assume that in other respects the administration of the country will call for no considerably greater expenditure than that which at present is regarded as our normal expenditure. How far this assumption may be verified it is at present impossible to conjecture. We have since judged it necessary, for example, to add to our revenue grants for railway and other capital expenditure. To the criticism that will naturally be made that if, in one direction, increased expenditure is forced upon the Government of India, it should seek to restore the balance by economies in other quarters, the answer must be made that, in urging upon the authorities in England the economies resulting from a study of the Report of the Army Commission, the Government of India, though unhappily with but little success, did, in fact, adopt the course above indicated. The reasonableness and the expediency of its recommendations become more evident at a time when, in regard to the very Military estimates which already weigh so heavily on our resources, there are grounds for apprehending fresh demands for further increase. Apart from this, however, it requires perhaps to be again pointed out that under the system of Provincial contracts in which the several provinces have assigned to them for a term fixed charges and corresponding revenue, there are but few branches of expenditure reserved to the Government of India over which it exercises undivided control. It may, in a time of calamity, insist on temporary reductions; but it would be against the whole spirit of its arrangements, if it sought to acquire for itself increased resources during the term of contract at the expense of the revenues assigned to the Provinces, unless in case of pressing necessity. Such as are the sources of expenditure within the Government of India's direct control, they are of a nature which renders reduction peculiarly difficult; as, like the Post Office and the Telegraphs, they grow with the growth of the necessary requirements of the country, or with the extension of our Railway system; or, like the Mint, are almost beyond the power of Government to check, depending as they do on the ebb and flow of the precious metals; or are, finally, as in the case of works of irrigation or Protective Railways, essential to success in that vital struggle against famine and the financial losses which famine entail to which the Government of India is deliberately committed. What I have now said will, I think, be sufficient to shew that while in circumstances such as those which at this moment exist, and in spite of the recent heavy fall in exchange, there may be no reason to apprehend in the immediate future any insufficiency of our resources as estimated on the basis of the reforms introduced by Sir John Strachey and Sir Evelyn Baring, it would be more than hazardous to affirm that, in view of the possibilities threatening us at the commencement of 1885-86, there is at present no cause for anxiety. The Government of India is constantly called upon to entertain projects of various kinds, tending to reduction of taxation. No one is more anxious than I am to equalise the burden of taxation, and especially to lighten it on the classes—unhappily the large majority in this country—to whom taxation, however light, is necessarily onerous; but we are compelled, both from the necessities and the advantages of our position, to take in the whole financial

horizon, and if difficulties present themselves to us which are invisible to a more restricted survey, we can but deplore, while admitting in the abstract the cogency of much that is urged upon us, our inability to meet the views pressed upon our consideration. We have, indeed, during the present year, as in paragraph 2 of my last year's Statement I promised, taken the question of Court-fees into consideration, and we have consulted the several Local Governments as to modification in the Court-fee duties. We are not yet in possession of all their replies, but it is obvious that when, in the course of the ensuing year, we take up the subject for disposal, we shall have to give weight not only to the merits of this particular question, but to its relation to taxation of other kinds. We shall have, moreover, to consider this, and kindred proposals, in their relation to the necessities of our position, should there be reason to apprehend that we may be called upon to provide upon our estimates for considerably reduced assets resulting from further loss by exchange, or for consideraby increased expenditure. I can at present in no way indicate what our position on this important point is likely to be; it is one of the objects of this Statement to place before the public the materials for forming such an opinion as can be at present formed, so that it may frame its own conclusions; but I think it will at least be apparent, from what I have said, that when we are simultaneously called upon by one to lower the scale of our Court-fees, by another to abolish the License Tax, by a third to abolish the Export Duties upon rice, we cannot but feel that these representations are made without adequate information as to their probable effect on the budgetary equilibrium of the country. I hope that the remarks which I have recorded above, and those which in the course of this Statement I shall have to make, will in some degree assist the public to understand what are the difficulties which await us in dealing with suggestions for reduction of taxation, or even for such redistribution of taxation as sacrifices on the whole any proportion of the resources now at our command. In the course of the ensuing year the final conclusions to be adopted on the Report of the Parliamentary Committee will have been settled. During the course of 1885-86 it may be expected that on the one hand we shall be in a better position to judge as to the prospects of a return of our hitherto active export trade, and of our position in regard to exchange, and on the other, to estimate the full amount of the liabilities which are likely to be entailed by the prosecution of our Railway schemes, as well as to gauge the pressure of exigencies, the final outcome of which it is not at present possible correctly to estimate.

Financial relations of the Government of India with the Provincial Governments and Administrations.

77. While treating of the subject which has been dealt with in the above remarks, it is desirable that I should add a few words in regard to the financial relations of the Government of India with the several Local Governments and Administrations, as regulated by the terms of the Provincial contracts. It was not to be expected that a series of arrangements based, at the best, on the experience of comparatively few years, and on conditions on the whole so uncertain as those which surround the financial administration of India, should have presented no points to criticism, or offered no unforeseen difficulties. All allowance made, however, it may be confidently stated that the several Provincial contracts which are now entering on the fourth year of their quinquennial term, have proved to be equitable, and to have been founded upon calculations which leave the Governments severally concerned a margin of revenue over expenditure sufficient for their wants. The balances temporarily held by the Local Governments during the Afghan War were repaid them, in the course of the year 1881-82, to the amount of £670,000, as explained in my last Financial Statement. In some cases the existence of these balances has led the local authorities to embark upon a scale of expenditure which, as the balances approached exhaustion, it has been found impossible to maintain; and it is conceivable that the

Provincial finances would have been, on the whole, conducted with greater economy had there not occurred to them this windfall, bringing with it almost inevitably an inducement to increased expenditure in view of the various wants and necessities which never fail to be urged on the several Governments and Administrations. It was mainly with the object of guarding against the possible effects of too sanguine a view of its resources, which the existence of these balances was likely to encourage, that the Government of India, under instructions from the Secretary of State, fixed the minimum of balances for each province indicated in paragraph 109 of last year's Financial Statement. This element of risk notwithstanding, however, the system inaugurated by Lord Mayo, which has now fully taken root and become part of our system of local administration in India, has continued during the last three years to work greatly to the advantage of the several Governments who share in it. Friction has been reduced to a minimum; and if, as was inevitable, questions have from time to time arisen regarding the amount of assistance to be afforded by the Government of India to this or that Local Government in regard to some particular project or some reform involving an increased outlay of funds, they have given evidence of the existence of a spirit of mutual concession, which is in marked contrast to the relations existing in former times between the Supreme and the Provincial Governments under the centralised system of finance. In a few instances the Government of India, in view of its inability to concede all the assistance asked for, or to approve of the reduction of the balances to a sum lower than the amount settled in 1883, has found itself compelled, however reluctantly, to desire that the scale of expenditure should be reduced below the limits which in the opinion of the Local Government or Administration, although inconsistent with the maintenance of its balances, were advisable; or although not wholly refusing to contribute from our own resources to the urgent necessities placed before us, we have been unable to assent to the arguments presented for our consideration,—arguments having for their object such addition to the revenues placed at the disposal of the local authorities as must virtually have led to a revision of the terms of the contract into which, on behalf of their administration, they had entered. The considerations which I have exposed in the preceding pages will, I think, be held to have justified the rule of conduct adopted in these circumstances by the Government of India. They will show that if local authorities find themselves pressed occasionally to meet the expenditure which, in their reasonable desire for improvement, they consider essential, the Government of India has also burdens of its own to bear, which compel it to insist jealously on the maintenance of the relations into which it has entered with them, and which forbid it, even were such a course desirable, to entertain proposals having for their aim a review or revision of the arrangements completed in 1882-83. Nothing can be more true than what my predecessor in his Financial Statement for 1883-84 wrote—

"The contracts have not been made in any illiberal spirit. . . . . Under these circumstances the Provincial Government must look solely to the gradual development of their own resources, and to economy in their own administration, to provide whatever further funds may be required for services classed as Provincial. . . . It may be, and probably is, the case that in almost every Province of India the funds available are not commensurate with the work which sooner or later will require to be done. This is the normal condition of a country whose necessities are great, while the tax-paying power of its population is small. Under these circumstances, progress in many directions will possibly be comparatively slow; and it is inevitable, under all the conditions of Indian Government, that it should be slow. But what I particularly wish to point out is that the Government of India cannot at present make any further grants from Imperial funds in order to ensure more rapid progress. Indeed in some respects it may be said that the Provincial Governments are in a better position to provide whatever funds may be required than is the case with the

Imperial Government. For the reasons which I have already given an element of stability is imported into Provincial Finance which Imperial Finance cannot at present possess. Not only do the three* points to which I have alluded constitute dangers which are wholly borne by the Imperial Government of India—not only does the fourth danger (famine) materially affect Imperial as well as Provincial Finance, but if any further fiscal reforms are to be made—and there are several which it would be very desirable to make—any loss of money which may accrue from their execution must be borne by the Imperial Treasury.

78. In the economies which the Government of India is itself compelled to exercise will be found, in fact, the justification of its insistence on an economical administration elsewhere; while the uncertainty to which its own sources of supply are subject, no less than its liability to be called upon at one and the same time for increased expenditure in various different directions, compel it to entertain with the utmost reluctance proposals having for their object any further alienation, during the term of the contracts or afterwards, of however small a portion of its own revenues. In my opinion this necessity is not without its advantages; for so long as it may be hoped that the Government of India is in a position to offer further resources, the expectation that it will do so when a sufficient case is put before it, will continue to be entertained. Nothing is more likely to encourage a prudent and economical treatment of their finances by the Provincial Governments than a clear understanding, such as I have endeavoured to convey, as to the position of the central Government itself. As I have already indicated, these remarks, so far as they refer to applications for assistance, must not be held to have any general application to the provincial authorities viewed as a whole; for the Government of India has, on the contrary, just cause to be grateful to them for the judgment with which they have husbanded their resources, and the economy with which their affairs are conducted. Nor, even in the instances which I have more specially in mind in making these remarks, have I the desire to convey the idea that there has been, in the management of local finances, any but the most loyal wish to improve the position of the Province, or to make any criticism other than that this wish has in those cases led to an inclination to work on the lines of the contract with a degree of energy which was beyond the bounds of prudence. My object is rather to explain that, while I am aware that in one or two instances the revenues assigned to the local authorities may have been found to have been less favourable than in the majority of cases, this fact alone, when the circumstances of the Government of India itself are taken, as they must be, into consideration, is not sufficient ground to justify us in acceding to the grant of increased revenues, or in admitting further liability which in truth we are not in a position to assume. If there is one thing more important than another in the conduct of Indian finance, it is that the Government of India, which is always at the best surrounded by uncertainties, should at least have the certainty that for a term of years it has settled its relations with the Local Governments. That is the only condition on which it can with confidence examine its own position, and ascertain the adequacy or otherwise of the resources at its own disposal. This consideration (which I may take this opportunity of saying is, to my mind, all important) must especially be adopted as the guiding principle of our financial administration at a moment when the difficulties which I have been treating of are assuming greater proportions; and when a fall in the exchange, which a few years ago would have been looked upon as absolute ruin to our finances, and which, in truth, is a burden greater than they can continue to bear, is to be met and provided for, concurrently with a stagnation in trade, and the necessities imposed on us by the deliberate resolve to incur, for the protection of our people from famine, and for the greater security of our frontiers, very considerably increased expenditure.

The Governm of India comp to adhere stric to the terms of Provincial co tracts.

* NOTE.—War—Opium—Exchange.

ease in Customs duties in -86.

79. I pass now to the second of the three heads which I have indicated in paragraph 73, namely, the effect upon our estimates of the present stagnation in the rice trade. As I have already dwelt at some length on the prospect of this trade so far as they are at present known to me, I think it will be sufficient to give here a few figures which will show at a glance what is the sacrifice of revenue to which, until that trade returns, we must be content to submit. The receipts from our customs in the Budget Estimates, the Accounts, and the Revised Estimates of the years 1882-83, 1883-84, 1884-85, and 1885-86, have been severally as follows :—

	Budget Estimates.	Accounts.	Revised Estimates.
	£	£	£
1882-83 . . .	1,181,000	1,296,119	
1883-84 . . .	1,255,100	1,187,266	
1884-85 . . .	1,289,500	———	1,030,000
1885-86 . . .	1,175,000		

It will be seen from these figures that in the 1884-85 Revised Estimates there has been taken a figure lower by £151,500 than any hitherto shewn, whether in the Budget or in the Accounts; while, although in the estimate of the ensuing year we have thought ourselves justified in adding considerably to the Revised Estimates of 1884-85, believing the depression of the rice trade to be at its lowest, the figure we have taken is below any which, whether in the Budget or the Accounts of previous years, has hitherto been shewn.

80. I come now to the third of the four points indicated in paragraph 73 as constituting the main features of the coming year, namely *Exchange.* A glance at the following figures, which give the annual result of exchange in transactions with London during the years 1871-72 to 1883-84, with the Revised Estimate of 1884-85 and the estimates of 1885-86, will convey some notion of the burden imposed on our finances by this growing difficulty, and will show what a monstrous cautle exchange cuts out from the resources at our command.

exchange.

Year.	Loss by exchange.	Average rate of Secretary of State's Bills.
	£	s. d.
1871-72	428,920	1—11·12
1872-73	691,287	1—10·81
1873-74	879,411	1—10·35
1874-75	785,820	1—10·22
1875-76	1,355,861	1— 9·64
1876-77	2,059,311	1— 8·49
1877-78	1,554,922	1— 8·79

1879-80	2,926,403	1— 8·
1880-81	2,716,809	1— 7·95
1881-82	3,556,700	1— 7·89
1882-83	3,081,433	1— 7·52
1883-84	3,838,756	1— 7·54
1884-85 Revised Estimate	3,252,900	1— 7·3
1885-86 Budget „	3,573,600	1— 7·

81. It is explained, in the course of this Statement, why the loss by exchange in 1884-85 and again in 1885-86 is apparently less than in some of the previous years, namely, that the Secretary of State has been able to furnish himself with funds in England which assisted in keeping down the total amount of his bills. But for this, in the ensuing year 1885-86, we should have had to estimate for loss by exchange at a figure certainly not less than £4,000,000. Unless exchange improves during ensuing years, we must regard ourselves as liable to have to

make provision upon our Budgets for an item of little less than four millions in excess of that which at the commencement of the last decade we were called upon to meet. The highest point reached by the Secretary of State's bills and telegraphic transfers during 1884-85 has been 19·85 in May last, and the lowest 18·92 in February. I append a table shewing the bills drawn each month, with the concurrent produce in sterling, and the rate of exchange, as well as the amount drawn on telegraphic transfers, the sterling equivalent, and the rate at which they were obtained.

Result of Secr of State's dra during 1884-

Critical positi of silver.

82. Since June last, when the rate began to decline, there has been no prospect of recovery. The time is probably approaching when this question of the fall in the value of silver will come more prominently before public attention. The policy of the President of the United States in favour of a temporary suspension of the coinage of silver has been unequivocably pronounced; and although there exists considerable doubt as to how far that policy will be endorsed by the American Legislature, the uncertainty which for the present must continue to hang over the question will maintain the depression of exchange. In the next place, the Conference of the Latin Convention is about to meet, and on the measures taken in consequence of the deliberations of the Conference, the immediate future of silver must greatly depend. Speculation on the subject in a Statement of this nature would be idle; but there seems no reason to hope that we have as yet seen the worst of our difficulties under the head of exchange; and if causes which are operating unfavourably to it, whether connected with trade or with the decision which may be taken by the Latin Convention or the American Legislature, are accentuated, it seems clear that the Government of India, unless it is able to obtain the attention of other Governments to its own views upon the question, may be called upon shortly to choose between deficit, or measures involving some degree of increase in taxation.

Grant from Revenues for railways.

83 The fourth and last item to which I have drawn attention in paragraph 73 is the grant of £500,000 for our railways, provided especially with a view to assistance in so much of our contemplated expenditure as is connected with the improvement of our frontier communications. It has always been hitherto the policy of the Government of India to meet demands of this nature, so far as they can be met, from its revenue: revenue failing, the Government of India is prepared to have recourse to borrowing. The remarks made by Sir John Strachey in paragraph 49 of his Financial Statement for 1880-81, express so entirely and succinctly my own opinion on this subject, that I may be allowed to quote them here. He says,—

"The reasons for which it is right to provide for the charges of the war out of current income apply equally, and indeed with greater force, to the charges for the frontier railways.

Although they will permanently benefit the country, it is plain that we could not construct them with borrowed money on the grounds on which we borrow for productive public works, and that their cost must be included among our ordinary charges. If, however, we could not have paid for them out of our ordinary revenue, it would have been quite right to borrow for their construction. I should have said this because the works are absolutely necessary, and because the political and financial evils of borrowing would be less serious than those involved by fresh taxation. I should not have defended borrowing for these railways on the ground that they will benefit posterity as well as the present generation. That is a matter about which I know nothing; but I know that posterity will have quite enough to do in bearing its own burdens."

from e for r Defences.

84. The amount of the annual grant from revenue must in future obviously depend on the annual condition of our finances. All that I can say at present is that for my own part I am extremely desirous to devote as much as possible from revenue to the construction of railways, of which the portion which concerns our frontier communications must remain in great part unproductive. To the same class of grants belongs the item of £15,000, which we have devoted to the improvement of the defences of Aden; and a further item of £70,000 which we have placed at the disposal of the Military Department as a first instalment to be expended in the defence of our harbours. That we should have been able, in spite of the second and third of the four considerations which I have enumerated in paragraph 74, to make these additional grants, is evidence of the elastic nature of our revenues; but in view to all that has been said as to our financial prospects, I should be sorry to commit myself to an assurance that our revenues will continue to permit us to devote as much annually to the completion of the several works indicated, although no effort will be spared to enable this to be done. Meanwhile the following figures shew what has been the State or Guaranteed expenditure under the Revised Estimate in 1884-85, and what are our estimates for 1885-86. The Budget Estimate for 1884-85 was ₹6,59,19,000 only; being ₹73,44,100 less than the Revised Estimate of that year, which, again, is ₹1,96,87,100 in excess of the Revised Estimate of 1883-84. The difference between the Revised Estimates of 1883-84 and the Budget Estimate of 1885-86 is therefore no less than £2,701,100 conventional sterling.

Expenditure on Railways during 1884-85 and 1885-86 on State responsibility.

	Revised Estimate, 1884-85.	Budget Estimate, 1885-86.
(1) *Directly expended by Government*—	₹	₹
Charged to Loan	3,08,06,000	2,76,62,000
Ordinary State Railways	*8,05,000	†29,38,000
Charged to Protective Grant	89,81,000	50,00,000
East Indian Railway (excluding converted annuities)	29,50,000	34,00,000
Eastern Bengal Railway (excluding debentures)	9,30,000	28,00,000
Charged under Frontier Railways	13,87,000	50,00,000

(2) *Expenditure by Companies on the responsibility of Government*—		
Guaranteed Railways	1,31,11,000	1,73,19,000
Southern Mahratta Railway	1,19,87,600	1,64,68,000
TOTAL	2,50,98,600	3,37,87,000
GRAND TOTAL	7,09,57,600	8,05,87,000

* Excluding expenditure on Surveys and miscellaneous charges, amounting to ₹11,06,500.
† Ditto Ditto Ditto ₹10,42,000.

85. I think I have given now such a general view of the situation as it presents itself to us in making our estimates for the ensuing year, that it will be unnecessary to dwell further on the subject taken as a whole, and I may pass to the detailed explanations which it is usual to embody in the Budget Statement with regard to the increases and decreases under specific heads. I shall endeavour to make these as short as possible, and indeed, it seems to me that the custom of marshalling these figures in the body of this Statement, is one which, with exception, perhaps, as to figures treating of subjects of unusual interest, will in future be more honoured in the breach than in the observance. Where the amount of increase or decrease is less than £10,000, no explanation will be offered in the following remarks.

Explanation details of di between Rev Estimate, 18 and Budget mate, 1885-8

86. *Land Revenue (I)*; Increase, £787,900. Compared with the Revised, the Budget Estimate for 1885-86 shews an increase of £787,900, made up chiefly of £25,400 under British Burmah, £76,900 Punjab, £407,700 Madras, and £270,000 Bombay.

Principal H of Revenue.

In the case of Burmah increased revenue is expected from capitation tax and from other miscellaneous sources. In the Punjab the increase is due to collection of revenue in suspense, and to revision of settlements. In Bombay and Madras the increase arises to a considerable extent from arrears of collections, suspended owing to the partial failure of crops in 1884-85.

87. *Opium (II)*; Increase, £175,500; due to the expected recovery of our opium revenue from the depression of 1884-85. Of this net difference, an increase of £236,800 occurs under Bengal, and a decrease of £59,400 under Bombay. The number of chests to be sold in the calendar year 1885 is 49,992; due notice will be given of the amount which it is proposed to sell in the year 1886. The price taken for 1885-86 is rather less than 1,250 per chest, the average of the year 1884-85 having been 1,296. The Malwa opium scheme introduced, as explained in last year's Statement, by Mr. H. Rivett-Carnac, continues to work satisfactorily; 2,500 maunds at 90° consistence will be bought this year, against 2,268 in 1884-85.

88. *Salt (III)*; Increase, £50,000.—The Budget for 1885-86 shews an improvement over the Revised of 1884-85 of £50,000. This difference is arrived at as shewn below :—

	Increase.	Decrease.
	£	£
Burmah	...	8,500
Bengal	...	30,000
Madras	88,500	...
	88,500	38,500
Net increase .	50,000	

With regard to Burmah it is expected that the large stock that will be laid in, in 1884-85, will render replenishment on an extensive scale unnecessary in 1885-86, and that in that year local manufacture will remain stationary. Hence the reduction in revenue.

In the case of Bengal it is thought better not to place the Budget at as high a figure as the Revised Estimate.

With regard to Madras the larger estimate for 1885-86 is based principally on an anticipated increase of sales of East Coast salt, and on an anticipated increase of consumption generally.

89. *Stamps (IV)*; Increase, £55,400. The increase occurs chiefly in Bengal and in the North-Western Provinces and Oudh. In Bengal it is due to an

expected increase in revenue resulting from the passing of the Bill for the registration of permanent tenures. In the North-Western Provinces and Oudh it is due to the transfer to this head from Land Revenue and Law and Justice of Revenue Record Fund and Criminal Record Fund receipts, which used to be received in cash, but which are now recovered in stamps. In the Punjab, allowance has been made for the further progress in revenue of which the actuals of past years justify the expectation in 1885-86.

90. *Excise* (*V*); Increase, £56,500. This occurs mainly in Madras, where it is anticipated that Toddy farms and Arrack farms in rented districts will yield an augmented revenue.

91. *Provincial Rates* (*VI*); Increase, £62,900.

In the Central Provinces an improvement of £6,800 is expected from the Patwari cess, being the result of administrative reforms that are in progress. In Assam the revenue will, it is anticipated, yield £13,000 more, because of the rates being doubled in Sylhet. Slight increases are also expected in districts where there are waste land grants.

In the North-Western Provinces, owing to a re-arrangement in the Village Watch circles, and to an increase in the number of watchmen in Oudh, higher revenue is expected in 1885-86. Madras and Bombay shew an improvement of £22,500 and £14,200, respectively. As these rates are raised from land, they are affected in the same way, and, generally, to the same extent, as receipts under Land Revenue. The remarks made under "I. Land Revenue" at paragraph 86 against Madras and Bombay apply also to the head Provincial rates.

92. *Customs* (*VII*); An improvement in trade is expected to yield an increase of £145,000, compared with the Revised Estimate. The Revised Estimate of 1884-85 was however taken at a figure considerably below the Budget of that year.

93. *Forest* (*IX*); Increase, £78,700. The increase may be ascribed generally to expected increased demand for timber, and to the development of timber operations.

ce, Telnd Mint.

94. *Post Office* (*XII*); Increase, £41,300. This is due to an anticipated increase in the sale of ordinary postage stamps, and to an expected increase in receipts on account of Money Orders, the growth of the revenue under both heads justifying the advance in the estimates.

95. *Mint* (*XIV*); Decrease, £39,000. This is a very uncertain head, and difficult to estimate. A reduction of £39,000 is made because it is not considered safe to expect that silver to the same extent will be coined in 1885-86 as in 1884-85.

by Civil nts.

96. *Law and Justice* (*XV*); Increase, £31,200. This head shews an improvement of £31,200 compared with the Revised. Nearly the whole of the increase occurs under Bengal and the North-Western Provinces and Oudh, where larger receipts are expected from sale of Jail manufactures and from the hire of convicts.

97. *Interest* (*XXI*); Decrease, £31,000. Of this £23,100 occurs in England and £7,900 in India. In 1884-85, owing to the favourable state of the money market, the loan of £3,000,000 required for the discharge of debentures in August was issued in England in May, and during the interval the available portion of the abnormally swollen cash balance was invested on terms which were at the time unusually favourable. For 1885-86 only normal receipts have been estimated for. The decrease in India occurs in interest on overdrawals of Railway capital.

98. *Receipts in aid of superannuations, &c.* (*XXII*). The increase is £51,000, and is almost entirely due to credits of subscriptions towards the Bengal

Civil Fund. No final arrangement for the taking over of this Fund has yet been made, but the question is being considered, and the contingency is provided for in the Estimates.

99. *Miscellaneous (XXIV)*; Decrease, £48,900. This is an uncertain head, and one for which it is difficult to make an estimate a year in advance. In preparing the Revised Estimate of 1884-85 it was found that certain receipts which were expected to fall in would justify the Budget of that year being raised by £63,300. It is not considered safe at present, however, to put the Budget figure of 1885-86 at more than £14,400 above the Budget figure of 1884-85. *Miscellaneo*

100. *State Railways (Gross Earnings) XXV.* The Budget Estimate of 1885-86 provides for an improvemet of £682,100 compared with the Revised Estimate of 1884-85. This improvement is in large part nominal, being indebted for £300,000 to the inclusion of the Sindh, Punjab, and Delhi under State Railways for the last quarter of the year. The main results are:— *Revenue fr Productive Works.*

	Increase.	Decrease.
	£	£
Rajputana-Malwa	172,500	...
Umeria Colliery	13,700	...
Nagpur and Chhattisgarh	10,000	...
Burma	60,000	...
Eastern Bengal	110,000	...
Tirhoot	12,000	...
Naraingunge-Dacca-Mymensingh . . .	18,500	...
Cawnpore-Achneyra	25,000	...
Indus Valley	...	45,000
Sindh, Punjab, and Delhi	300,000	...

Rajputana-Malwa State Railway.—The Budget Estimate for 1885-86, £1,475,000, includes the estimated earnings of the Rewari-Ferozepore State Railway, hitherto shewn under the non-productive head of Account, XXIX. State Railways. The inclusion in the present estimate of the transactions of this line explains the large difference between the Revised Estimate for 1884-85 and Budget Estimate for 1885-86. A small improvement in the traffic has also been allowed for.

Umeria Colliery.—No provision was made in 1884-85. But it is expected that the colliery will earn £13,700 during 1885-86.

Nagpur and Chhattisgarh State Railway.—An increase of £12,500 is allowed for during 1885-86, owing to the better prospects of the grain traffic.

Burma State Railways.—The Budget Estimate for 1885-86 is placed at £60,000 higher than the Revised Estimate for 1884-85, owing to an additional length of 81 miles on the Sittang Railway expected to be opened for traffic on the 1st April next, as well as to provide for development of traffic generally.

Eastern Bengal State Railway.—An increase of £110,000 is provided for during 1885-86. A full year's earnings will accrue instead of the transactions of nine months only. The prospects of the traffic next year are good, and it is hoped that the estimate will be fully realised.

Tirhoot State Railway.—The Budget Estimate provides for an increase of £12,000 during 1885-86, which, it is believed, will be realised, as the Hajeepore extension will be opened for the whole twelve months, against five months in 1884-85. Moreover a further short length of line is likely to be opened during the year.

Naraingunge-Dacca-Mymensingh Railway.—An improvement of £18,500 is provided for during 1885-86 owing to an additional length of 75·62 miles expected to be opened about 1st August next.

Cawnpore-Achneyra State Railway.—The Budget Estimate for 1885-86 provides for an increase of £25,000. This will, in all probability, be realised, as in the previous year the Farakhabad-Hathras and Jumna Bridge sections were only opened from the 1st July 1884, or for nine months of the year only, while in 1885-86 a whole year's earnings of these sections are provided for.

Indus Valley State Railway.—The line altogether is doing remarkable well, and judging from present prospects, the Revised Estimate is placed at £705,000. This figure, it is believed, will be fully realized. It is not considered advisable, at present, owing to the uncertainty of the wheat traffic, to place the receipts of 1885-86 at a higher figure than £660,000.

Sindh, Punjab, and Delhi Railway.—The Budget Estimate for 1885-86 provides for the estimated earnings of the last quarter of that official year under *State Railways.*

East Indian Railway (gross earnings). The Budget Estimate for 1885-86 provides for an improvement of £280,000 on the Revised Estimates. It is believed that to this extent trade will revive during next year. The estimate, it will be observed, is £300,000 less than the Budget Estimate of 1884-85.

101. *Guaranteed Railways (net traffic receipts) (XXVI).* This head shows a decrease of £14,000. Excluding the Eastern Bengal Railway, which became a State Railway from the 1st July 1884, and under which a net issue of £1,300 was provided in the Revised Estimate of 1884-85, the rest of the differences are given below :—

	Increase.	Decrease.
	£	£
Madras Railway	...	25,000
South Indian Railway	25,000	...
Bombay, Baroda, and Central India Railway .	30,000	...
Oudh and Rohilkhund Railway . . .	45,000	...
Sind, Punjab, and Delhi Railway . . .	...	70,000
Great Indian Peninsula Railway . . .	...	20,000

Madras Railway.—The Budget Estimate for 1885-86 is £25,000 worse than the Revised Estimate for 1884-85. The receipts during 1885-86 are entered at the same figure as the Revised Estimate. The expenses, however, are placed at £25,000 more than in the Revised Estimate.

South Indian Railway.—An improvement of £30,000 has been provided for in the Budget Estimate. The estimates for 1885-86 place the gross revenue at £20,000 more than the Revised Estimate which, there is every reason to believe, will be realised, as the traffic is steadily improving. Heavy expenditure in connection with the restoration of the bridges and works damaged by the floods of this year will have to be met in 1885-86.

Bombay, Baroda, and Central India Railway.—In the Budget Estimate for 1885-86, an increase of £30,000 is provided for, as compared with the Revised Estimate for 1884-85. This is due to the additional traffic expected.

Oudh and Rohilkhund Railway.—An improvement in the traffic may reasonably be looked for during 1885-86, and an additional length of line will, it is expected, be opened for traffic during the year. The Budget Estimate shews a net improvement of £45,000 compared with the Revised Estimate of 1884-85.

Sind, Punjab, and Delhi Railway.—The Budget Estimate provides for the transactions of the first nine months of the official year only, *viz.*, from 1st April to 31st December 1885. As the line will very probably be taken up by Government on the 1st January 1886, the transactions for the remainder of the year are allowed for under *State Railways;* and hence a decrease £70,000 compared with the Revised Estimate for 1884-85. The figures entered in the Budget are normal, and do not call for any special remark.

102. *Irrigation and Navigation* (*Direct Receipts*) (*XXXI*). The Budget Estimate for 1885-86 shews a decrease of £173,400 compared with the Revised Estimate for 1884-85 :—

	Increase.	Decrease.
	£	£
Punjab	...	13,100
Madras	300	...
Bombay	1,300	...
Bengal	...	...
North-Western Provinces and Oudh . . .	...	161,900
Total . .	1,600	175,000
	173,400	

The decrease in the Punjab is the net result of a reduction in the estimated receipts by Civil Officers on account of owner's rates on the Western Jumna Canal, counterbalanced to some extent by increase in revenue due to the opening of the Chenab Canal, and of increased irrigation and better rabbi crops expected from the operations of the Bari Doab and Sirhind Canals.

The small increase of £300 in Madras is due chiefly to the increased revenue expected from the Kurnool Canal.

The expected increase in Bombay is due chiefly to anticipated realisation of arrears of previous years on account of certain Canals; to expectation of a sufficient supply of water in the Hathmati Canal; and to extension as well as to the probable increase in the water-supply from the canal furnishing the town of Poona.

The decrease of £161,900 in the North-Western Provinces and Oudh is the result of the failure of the Nadrai Aqueduct, Lower Ganges Canal, as until such time as the new works are completed, only about half the required supply can be passed down from the head works at Narora.

103. *State Railways* (*XXIX*). The Budget Estimate for 1885-86 shews a decrease of £85,900 as compared with the Revised Estimate for 1884-85, and consists mainly of an item of £87,500, decrease in the Rewari-Ferozepore State Railway. No provision has been made in 1885-86 for this railway, because the estimated earnings of the line for that year are included in those of the Rajputana-Malwa State Railway, under "XXV. State Railways." *Public Work classed as Pr tive.*

104. *Subsidised Railways* (*XXX*) Southern Mahratta Railway. The Budget Estimate for 1885-86 provides for an improvement of £67,500, because the line now open will be worked for 12 months, and an additional length of 103 miles will, it is expected, be opened early in April.

105. *Civil Buildings, Roads and Services* (*XXXIII*). The Budget Estimate for 1885-86 shews a decrease of £68,600. Nearly the whole of the decrease occurs under India, General, and under Bengal. In the case of the former the Revised Estimate of 1884-85 contains an abnormal receipt of £23,100 on account of arrears of previous year's contributions for roads in Scindia's territory realised in 1884-85. With regard to Bengal, where the decrease is £41,300, the Revised Estimate for 1884-85 provides for an abnormal receipt of £46,000 realised from the East Indian Railway Company on account of the value of Railway Offices in Fairlie Place, Calcutta. The remainder of the decrease in Bengal is due to an expected decline in ferry receipts.

106. *Interest on ordinary debt, 1885-86*; (1) Decrease, £388,200. This arises as follows :— *Expenditur Interest.*

	£
England	166,000
India	222,200
TOTAL .	388,200

The saving in England would have been more but for a provision of £60,000 on account of inte[illegible]

of discount which had to be paid in 1884-85 on the three million 3 per cent. stock raised in that year. In 1885-86 £90,000 have been provided representing interest on the 3 per cent. India stock issued in 1884-85 and for which only £67,500 were provided in that year. On the other hand decreases occur under interest on Temporary Loans and Debentures, the former owing to repayment of the loan, and the latter to the conversion of the 4 per cent. Debentures, amounting to 5 millions, into 3½ per cent. Debentures.

The decrease in India amounts to £222,200, and is due principally to the transfer of capital from the ordinary to the productive portion of the Account, on account of the capital expenditure on State Railways and Irrigation.

107. *Interest on other obligations*; Decrease £63,400. Of this £62,600 occur in India and £800 in England. In India a saving £84,000 arises out of new arrangements with the Bengal Civil Fund, and an increased charge of over £20,000 for interest on Savings Bank Balances.

108. *Assignments and Compensations* (*4*); Increase, £16,400. This occurs principally in Bombay, where provision has been made for the award of compensation to be paid for the closing of salt works in Goa.

demands on enues.

109. *Opium* (*6*); Decrease, £468,300. The Revised Estimate for 1884-85 includes a provision of £593,600 in excess of the Original Estimate chiefly because of the exceptionally heavy outturn of the opium crop of 1883-84. The estimate of 1885-86 has been fixed for a smaller outturn.

110. *Salt* (*7*); Increase, £32,700. The increase occurs chiefly under India (General), and Bombay and is due to increased provision on account of establishments, salt purchase, and freight.

111. *Excise* (*9*); Increase, £20,100. The increase is general, but in Bengal an excess of £10,300 has been provided to give effect to the recommendations of the Excise Commission.

112. *Forest* (*13*); Increase, £28,100. The increase is general and occurs in all but the North-Western Provinces and Oudh, where there is a decrease of £21,900 on account of charges for the Collection of Timber.

ice, Tel- and

113. *Post Office* (*15*); Increase, £35,100. The increase occurs chiefly in the "conveyance of mails" and is partly due to larger provision on account of the pay of overseers, runners, &c., for the Road establishments.

114. *Telegraph* (*16*); Increase, £51,300. The increase occurs principally in England, £33,900. The increase is due to a larger amount of stores being necessary to meet the growing requirements of the Department.

and Ex- f Civil sents.

115. *Law and Justice* (*19*); Increase, £145,600. The increase is general, and occurs in all the provinces of British India. The increase in Bengal amounts to £49,300, and is chiefly due to the appointment of three new Judges to the High Court and to expected increased outlay on raw material, &c., for Jail manufactures. The increase in the North-Western Provinces and Oudh, amounting to £22,100, is chiefly due to the formation of a separate office for the Legal Remembrancer; to the transfer of Distrainers (Kurk Amins) charges to this head from the head Personal Deposits; to the transfer of Criminal Court Record Fund Charges from 5 Land Revenue; and to full provision for Jail supplies and services, and for Jail manufactures. In the Punjab the increase is £33,600, and is provided to meet the salaries of the newly appointed Divisional and District Judges with their establishments, and to cover the higher rates of salary to Deputy and Assistant Commissioners under the re-organisation scheme of the Punjab Commission.

116. *Police* (*20*); Increase, £49,900. The increase is distributed over most of the Provinces. In the North-Western Provinces and Oudh, the increase amounts to £15,100, and is due chiefly to extra provision for Clothing and for Village Police.

117. *Marine* (*21*); Increase, £35,300. This arises chiefly under India, General, and is due to the addition of the *Canning* to the Marine establishment

Bombay Dockyard, and repairs to the Hydraulic Lift preparatory to its being made over to a private Company.

118. *Education* (*22*); Increase £81,300. The increase is general, and is due to the spread of education. In the North-Western Provinces and Oudh an increase of £14,800 is provided to meet additional expenditure on Inspection, Normal and Local Schools, Grants-in-aid, &c. In Bombay the increase amounts to £35,000, and for the most part represents new grants to Primary Schools within municipal limits.

119. *Medical* (*24*); Increase £30,100. The increase is general, and is due to the growing requirements of the Department.

120 *Political* (*25*); Decrease £84,200. The decrease is chiefly due to a reduction of £60,000 in the provision for the Afghan Delimitation Commission, and to the absence of arrear payments on account of the Amir's subsidy.

121. *Scientific and other Minor Departments* (*26*); Increase, £45,500. The increase occurs chiefly under India (General), and Bombay. Under India (General) the increase amounts to £20,800, and is due to larger provision for survey charges. Under Bombay the increase of £10,500 is on account of the Indian and Colonial Exhibition of London and the Fine Arts Universal Exhibition of Antwerp.

Miscellaneous Civil Charges.

122. *Superannuations, Allowances and Pensions* (*29*); Increase £106,000. In India a decrease of £23,000 is expected. In England larger payments to the extent of £129,000 are anticipated on account of annuities due to Government taking over the Bengal Civil Fund in 1885-86.

123. *Miscellaneous* (*31*); Decrease £15,000. This occurs chiefly in India, (General) and is due mainly to the absence of provision for special payments made in 1884-85 on account of compensation for damage and detention of Petroleum in Calcutta.

Famine Relief and Insurance.

124. *Protective Works, Railways* (*33*); Decrease £398,100. The Revised Estimate for 1884-85 included £388,100 unappropriated in 1883-84 and re-allotted in 1884-85. No such re-allotment occurs in 1865-66, for which year only the fixed portion of the annual grant has been assigned.

125. *Reduction of Debt* (*35*). The increase of £360,400 is due to the reduction in the grant for Railways, which sets free a corresponding sum for reduction of debt.

Expenditure on Productive Public Works (Revenue Account).

126. *State Railways* (*Working Expenses*) (*36*); Increase £436,700. The increase is the result of a series of figures, of which the following are the principal items:—

	Increase. £
Rajputana-Malwa Railway	147,500
Burma Railway	38,000
Eastern Bengal Railway	52,500
Naraingunge-Dacca-Mymensing Railway	18,500
Cawnpore-Achneyra Railway	12,500
Sindh, Punjab, and Delhi Railway	180,000

Rajputana-Malwa Railway.—The increase is partly nominal, representing the expenses on account of the Rewari-Ferozepore line hitherto shewn under the non-productive head of account, *viz.*, 41. State Railways Revenue Account. An increase of £17,500 occurs on account of the surplus profits for the half-year ending 30th June 1885, payable to the Bombay, Baroda, and Central India Railway for the working of the line. The additional expenditure provided under this Railway will be set off to some extent by credits in the Civil Accounts under Superannuation Allowances and Pensions, Stationery and Printing, Miscellaneous and Police. The credits on these accounts are roughly estimated at £40,000.

Burma Railway.—The additional assignment is due to an additional mileage of 81 miles being expected to be opened on the Sittang Railway from 1st April 1885, and to an anticipated expansion of traffic.

The increase under *Eastern Bengal Railway* amounts to £52,500, and is due to the amalgamation with this line of the Calcutta and South-Eastern Railway and of the Poradaha-Damukdia section of the Northern Bengal State Railway. Increased provision has also been made for expenditure owing to larger estimated traffic.

Naraingunge-Dacca-Mymensing Railway.—An additional length of 75·62 miles is expected to be opened about 1st August next, and the increase in the Budget is to meet outlay on this extension.

Cawnpore-Achneyra Railway.—The increase provides for increased mileage; for sleeper renewals; and for improving the assignment of certain portions of the Cawnpore-Farakhabad section of the line.

Sindh, Punjab, and Delhi Railway.—This line will probably be taken over by Government on the 1st January 1886. The Budget Estimate for 1885-86 provides for the estimated expenses of the last quarter of that year.

East Indian Railway Working expenses.—Decrease, £64,800. The decrease is due to a reduction of expenditure on account of renewals, and to a falling off in the payment on account of surplus profits, due to the falling off in the revenue of the 2nd half of 1884 and the 1st half of 1885.

127. *Guaranteed Railways* (*Surplus profits, Land and Supervision*) (37); Increase, £20,900. The increase is brought about by the necessity for provision in Madras of £15,300 on account of land required for the Beypore-Calicut Extension.

128. *Irrigation and Navigation.*—Increase, £11,300. The increase is due to additional capital outlay on the several projects.

129. *Charges in respect of Capital* (*39*); (*a*) *Interest on Debt; State Railways;* Increase, £137,300. The increase is chiefly due to gradual increase in the capital expenditure on State Railways.

East Indian Railway.—Increase, £18,900. An increased provision is made to cover the charge on account of interest on India stock and interest on Capital, Capital advance, and Stores suspense accounts.

(*b*) *Annuities in purchase of Guaranteed Railways* (including Sinking Funds).—Increase, £96,700. The increase is due to a full year's provision having been made in 1885-86 on account of the annuity for the Eastern Bengal Railway, against provision in the Revised Budget of 1884-85 for only the payment of the proportion of the annuity due on the three months ending 31st October.

130. *State Railways, Capital Account* (*40*); Increase, £206,900. The increase is due to provision being made on account of the Lucknow-Sitapur-Kheri Line, the construction of which has been sanctioned by the Secretary of State.

penditure on blic Works not ssed as Productive.

131. *State Railways* (*working and maintenance*) (*41*); Decrease, £56,000. The decrease is chiefly due to the expenses of the Rewari-Ferozepur Line having been transferred to 36. State Railways, and included under Rajputana-Malwa Railway.

132. *Subsidised Railways* (*42*); Decrease, £51,200. This is the net result of the following changes:—

	Increase.	Decrease.
	£	£
Guaranteed Interest		36,400
Subsidy	6,500	...
Payments for Land	...	21,300

Under guaranteed interest the decrease is due to the cessation of payments on this account to the Bengal Central Railway and to the Rohilkhund-Kumaon Railway from 1st January 1885. The increase under "Subsidy" represents the payments to the Rohilkhund-Kumaon Railway and to the Assam Railway. The decrease under payments for land is the amount by which the requirements under this head in 1885-86 are expected to fall short of the payments in 1884-85.

Southern Mahratta Railway.—Increase, £73,000. Of this £24,000 occurs in interest charges and £49,000 in working expenses. The former is due to additional provision being made to cover the interest on the additional capital raised by debentures, and the latter to provision being made for an additional length of 103 miles which it is expected will be opened for traffic early in April.

133. *Irrigation and Navigation* (*44*). The decrease amounts to £75,000, and occurs as follows:—

	£
Imperial	30,500
Provincial	45,600
	76,100
Local (increase)	1,100
Net decrease	75,000

The decrease is due to the Government of India not being able to provide a larger sum than £525,000 for total outlay in 1885-86, from imperial resources and to a heavy reduction in the grant for Provincial Public Works in Burma. There is an increase of £9,900 in Bengal, due chiefly to an increase of expenditure on the Orissa Coast Canal which is approaching completion.

134. *Military Works.*—Increase, £117,100. The Budget for 1885-86 provides (1) fixed annual grant of one crore of rupees; (2) one and half lakhs in addition for the Aden defences; (3) seven lakhs for Bombay Defences; and (4) the lapse of the current year's grant, ₹55,000.

135. *Civil Buildings, Roads, and Services* (*46*). This is a net increase of £47,500 due to the addition of £100,000 to the estimates, being the grant for frontier roads.

136. *Army* (*47*); Decrease, £204,800.

The net estimated cost of the army in India for the financial year 1885-86 (excluding war charges and receipts) is £14,881,000, or a little below £15,000,000, which may be considered to be about the normal military expenditure in India and in England. The above sum provides for the estimated cost of the British army serving in India, the sanctioned number at the present time being more nearly complete than it was at any time during the five years immediately preceding the Afghan War. Dealing alone with army expenditure in India, there is a net increase of £36,200, which is explained by the fact that under the grant for regimental pay, allowances, and charges there is an increase of £48,600, due to the rate of exchange for the pay of British troops in 1885-86 having been fixed at 1*s.* 7½*d.*, the rate for 1884-85 being 1*s.* 8*d.* There is also a large increase in the purchase of country-brewed beer, which will be supplied to all but three stations in Bengal, and which is slowly superseding English beer in the Madras and Bombay presidencies. The increase is counterbalanced by a corresponding reduction in the Home charges. Under the head of "ordnance establishments, stores, and camp equipage", there is an increase of £22,115, consequent on the outturn of small-arms ammunition at the factories having to be largely increased to replace reserves which it was found necessary to condemn.

There is an increase of £36,169 "miscellaneous services," chiefly consequent on the provision of £20,000 for land required in connection with the new redoubts in course of construction at Lucknow. The grant for volunteers, consequent on the growth of the movement, and revised rates of pay for sergeant instructors, shows an increase of £13,975, while on the other hand there is a reduction under the head of commissariat establishments, supplies, and services of £28,532, which is due to favourable prices of supplies, and anticipated saving in railway and transport charges owing to reduced rates and a small relief. As regards the home charges, the gross estimate for 1885-86 is lower than that of any year since 1873-74. This is due partly to a reduction in the pension charges for British troops, and partly to reduced demands for stores. The charges for the Indian troop service are also very low. The estimated charge for stores is lower than it has been for nineteen years. The decrease is due partly to the economical administration of the several departments, and partly to the substitution of country products and manufactures and malt-liquor for stores hitherto imported from England. From both points of view the reduction is satisfactory.

Whatever may be the case in the future, at the close of 1884-85 the total net military charges in India and England were lower than they have been at any time during the past ten years, and this has been effected without prejudice to efficiency or any reduction in the authorised aggregate strength of the army, and notwithstanding that the non-effective and superannuation charges have in recent years largely increased. But for these and additional expenditure caused by changes of organisation in the British army the Government of India are in no way responsible. This fact, however, does not lessen the uncertainty which prevails with regard to what the demands on the above account may amount to, and they are, in consequence, a source of considerable anxiety to those who are responsible for army expenditure in India.

ndian ployed in ition to

137. The Indian Government will continue to bear the ordinary charges of the troops who have been or who may be sent to the Suakim expedition. All extraordinary charges—all charges, that is to say, other than those which would have been, in ordinary course, incurred had these troops remained in India—will be defrayed by the English Government.

138. *Exchange on Transactions with London* (*49*). Compared with the Revised Estimate of 1884-85, the Budget Estimate of 1885-86 shews an increase of £320,700. The figures of both years are compared below. The entries with + against them represent Gain, and those with — represent Loss.

	Revised Estimates, 1884-85	Budget Estimates, 1885-86
	£	£
Secretary of State's Bills . . .	—3,337,100	—3,624,700
Expedition to Suakim	—75,000	—118,800
Hong-Kong Bills	—50,600	—41,900
Guaranteed Railways	+150,200	+136,300
East Indian Railway	+98,100	+121,800
Rajputana-Malwa Railway . . .	+16,800	+25,000
Southern Mahratta Railway . . .	—136,700	—158,600
Military	+7,000	+13,900
Public Works and Civil . . .	+74,400	+73,400
TOTAL .	—3,252,900	—3,573,600

The Secretary of State's drawings have been fixed at £13,773,700 against £13,795,300 in the Revised, the rate of exchange adopted for 1885-86 being 1*s.* 7*d.* against 1*s.* 7·3*d.*, the rate taken in the Revised. The Secretary of State's

drawings have been taken at the figure quoted above on the assumption that £2,225,000 true sterling will be raised in England by way of loan, and that £481,200 (the equivalent of 60 lakhs of rupees at 1*s.* 7·25*d.* the rupee) will be recovered in England on account of sums advanced in India towards the expedition to Suakim.

Concluding remarks on estimates.

139. Having brought the analysis of the financial situation, such as it presents itself, and of the detailed figures explaining variations between the Revised Estimates and Budget Estimates for 1884-85 and the Revised Estimates for 1884-85 and Budget Estimates for 1885-86, to a close, it remains only briefly to sum up our situation. The remarks made in the Preliminary paragraph have been, I trust, sufficiently illustrated in the course of this Statement. The prospects of our revenues, the heavy demands which they have been called upon to bear, and the liabilities to which we may yet be exposed, require no further explanation. The year commences with a surplus which is more less considerable according as the grants for capital expenditure are included in or excluded from our calculations. If during the ensuing year we are not called upon to submit to any material increase of expenditure, the estimates, based as they are on a very low rate of exchange and a very moderate calculation as to the revival of our trade, may, I think, be trusted to bear the test of trial. Should trade revive or exchange become more favourable, we shall have resources ample to meet our estimated expenditure. On the other hand, it is impossible to say whether additional expenditure may not in the course of the year have to be provided for, exceeding the limits of any addition which our revenues may reasonably hope to derive from the strengthening of our railway receipts or from the improvement in our exchange. To put it in other words, heavily as we are weighted from the two causes above indicated, there is no reason why our resources should not fully suffice to meet all normal expenditure during 1885-86. But if abnormal expenditure, whether of a temporary or permanent kind, is forced upon us, our estimates, even should they be strengthened by a more favourable combination of exchange and trade, may very probably prove unequal to meet it. It is to be hoped that the financial prosperity, the good harvests, and the undisturbed peace, which have of late years been accorded to us will continue. But it is necessary to state clearly the position in which, owing to the concurrence of a variety of unfavourable conditions, we find ourselves placed, in order that considerations which inevitably presented themselves when the estimates were being framed may be fully explained to the public, and that we may not be charged, should difficulties increase upon us, with having taken too sanguine a view of our position.

Ways and Means.

140. In the Financial Statement for 1884-85 it was anticipated that the Secretary of State would draw during 1883-84 £17,800,000 true sterling; that the balance in Indian Treasuries on 31st March 1884 would be £12,440,000; that the Secretary of State would draw during 1884-85 £16,500,000 true sterling; that assistance must be obtained during the year to the extent of £2,500,000, either by loan raised in India or by reduction of the drawings of the Secretary of State; and that the year would close on 31st March 1885 with a balance in the Indian Treasury of £11,010,850.

The Secretary of State actually drew in 1883-84 £17,599,805 true sterling, and the year 1884-85 opened with a balance in Indian Treasuries of £13,199,926, being £759,926 in excess of the estimate.

No loan was raised in India during the year, and the Secretary of State reduced the estimated amount of his drawings, so that his total drawings for

It is expected, if the Secretary of State should draw the amount he proposes to draw, that the year 1885-86 will open with a balance in Indian Treasuries of £11,920,000; that the Secretary of State will require during the year £16,804,900 true sterling; and that if he were to draw the whole amount from India during the year, the amount in the Indian Treasuries would require to be supplemented by a loan of £3,500,000 (350 Lakhs of Rupees). The amount available for reduction of debt under the grant for Famine Relief and Insurance in 1885-86 is, however, in round numbers £680,000, (68 Lakhs of Rupees) and it will obviously be best to take this amount to reduce borrowing, rather than in actual reduction of debt previously incurred. The total amount to be borrowed has for the purposes of the estimates been taken at 282 lakhs of rupees, equivalent to about £2,225,000 true sterling. The Government of India has urged on the Secretary of State the inexpediency of attempting to borrow 282 lakhs of rupees in India this year, and the Secretary of State has accepted this opinion and agreed to find the equivalent sum of £2,225,000 true sterling in England during 1885-86. But while the Government now announces its intention of borrowing in England, and of not borrowing in India this year, it must be distinctly understood that no pledge is given, and that the Government of India does not hold itself precluded by anything now said from borrowing, in case of necessity, in India, or partly in India and partly in England, whatever sums of money may hereafter be found necessary for the service of the year.

The total requirements of the Secretary of State in 1885-86 being £16,804,900 true sterling, and it being anticipated that of this amount £2,225,000 true sterling will be obtained by loan or otherwise in England, there will remain £14,579,900 true sterling to be remitted from India. Of this sum it is estimated that the Secretary of State will receive £806,200 true sterling on account of repayments by Home Government of advances made in 1884-85 and 1885-86 for the Suakim expedition, leaving £13,773,700 true sterling to be drawn by bills and telegraphic transfers during the year. The closing balance of the year in Indian Treasuries on 31st March 1886 is estimated at £10,204,526.

Summary. 141. The following is a summary of the chief points in the foregoing Statement:—

1. The Accounts of 1883-84 shew a surplus of £1,387,496. An analysis of the surplus shews it to be partly due to revenues collected in anticipation of the following year, 1884-85.

2. The Revised Estimate of 1884-85 shews a deficit of £716,200.

3. The causes of this deficit are, the stagnation of the export wheat and rice trade, the heavy expenditure connected with the extraordinary opium crop of 1883-84, the collection, in anticipation, of Land Revenue, above alluded to, the suspension of a considerable amount of Land Revenue in Bombay and Madras, until the year 1885-86, in consequence of the partial failure of the rains in the year 1883-84, and the grant of a considerable sum from revenue for capital expenditure on frontier Railways.

4. Statistics are given illustrating the great fall in exports in most of the Indian products during the year, and the abnormal expenditure on account of the opium crop.

5. The consumption of salt and progress of Savings Banks continue satisfactory, but Stock Notes shew no sign of improvement.

6. The net import of gold during 1883-84 was ₹5,46,33,156, being the largest import since the year 1869-70. In 10 months of 1884-85 the net import of gold has been ₹4,50,26,000.

7. The Revised Estimates of 1884-85 provided for drawings by the Secretary of State to the amount of £13,795,300, being £2,704,700 true sterling less than the Original Estimates of the year.

8. The surplus of 1885-86 is estimated at £508,100, but the estimates on which this surplus is framed include, on the one hand, a grant of £585,000 from Revenue for Capital Railway Expenditure and for Harbour Defences, and, on the other, they take credit for £585,000, being the nominal saving in exchange on estimated short drawings by the Secretary of State.

9. The net Opium Revenue for 1885-86 has been taken at £6,547,300.

10. The opium crop of 1885 promises well: the reserve on the 31st December 1884 was 2,296 chests. The probable reserve on December 31st, 1885, will be 18,297 chests.

11. Due notice will be given of the amount of opium to be sold during 1886.

12. In the Estimates of 1885-86 the rate of exchange has been taken at 1*s.* 7*d.*, and provision made for drawings by the Secretary of State to the amount of £13,773,700.

13. It is intended that the usual Public Works loan should be raised in England this year, but no pledge on the subject is given.

A. COLVIN.

March 17th, 1885.

Summary of Financial Statement, 1885-86.

THE Financial Statement for the year 1885-86 is published in the *Gazette* in the form of a Minute by Sir Auckland Colvin. The Minute commences by stating that the three years 1882-83, 1883-84, and 1884-85 have, between them, given a surplus of revenue over expenditure of about £1,378,000, and that, exceptional circumstances apart, the normal increase of revenues has been found to balance the ordinary expenditure, and has justified the abolition of the import duties and the lowering of the salt tax. On the other hand, attention has of late been drawn, even more seriously than in former years, to the consequences of a further depreciation in the value of silver. For the first time a rate of exchange no higher than 1*s.* 7*d.* has been taken, and the prospects of exchange for the future are by no means encouraging; hence, the question arises, whether the status established by the reforms above alluded to will prove sufficient in view of these, and of difficulties, which can be foreseen, connected not only with the state of the currency, but also with the measures necessary for the development and protection of the country. The Minute says—

"The experience which we shall gain during the ensuing year as to the effect upon our estimates of the several considerations I have indicated will, probably, be invaluable in adding to the means at our disposal for forming a final opinion upon this point; a point which obviously depends, not in the least on the adequacy or otherwise of the financial resources provided us in their relation to the state of affairs which existed at the commencement of the decade, but on the consideration whether affairs are not passing into a new phase which was then, though not unforeseen, less imminent; which could not therefore be taken into immediate consideration; but which, should it now arrive, must be met on the lines of the policy then adopted, and in conformity with the principles by which it was inspired."

The Accounts for 1883-84 show a surplus of £1,387,496. It is briefly explained that this surplus is partly due to increase of revenue over expenditure, but in considerable part to the collection of more than half a million of land revenue in 1883-84 which ordinarily would have fallen to 1884-85, and to the removal of £325,000 from the revenue accounts, under the orders of the Secretary of State, in connection with the Indus Flotilla and the Sindh, Punjab, and Delhi Railway.

The Revised Estimates for 1884-85 show a deficit of £716,200. This deficit is attributed in part to the accelerated payment of land revenue above mentioned, and in part to the fact that land revenue amounting to £343,900 which should have been ordinarily collected in 1884-85 has been suspended until the ensuing year on accouut of partial failure of the monsoon and consequent damage to the crops in the Presidencies of Bombay and Madras. For the rest the deficit on the Revised Estimates is partly due to the great falling off, during the year, in Railway receipts, especially those of the East Indian Railway, in consequence of the stagnation of the wheat trade. The East Indian Railway receipts were £418,800 less than were estimated. Customs also have fallen off by £259,500 owing to the depression in the rice trade. On the other hand, a sum of £593,600 larger than that which was estimated on account of opium expenditure, had to be provided during the current year, in consequence of the extraordinary yield of opium. Finally, there was provided from revenue during the year on account of capital expenditure on frontier railways the sum of £118,500. Attention is drawn to the fact that exchange, which had been taken at £3,538,100, is shown in the Revised Estimates at £3,252,900, or £285,200 less than the estimated figure, as the Secre-

tary of State was enabled to supplement his bills by drawing on the resources at his disposal in England.

The Minute enters at considerable length into the course of trade during 1884-85, and illustrates the decline in the quantity and value of exports of most of the principal articles of Indian produce, especially drawing attention to the depression of the wheat and the rice trade. After furnishing figures illustrating the abnormal quantity of the opium crop in 1884-85, and calling attention to the progressive increase in the consumption of salt, in deposits in Savings Banks, and the imports of gold, it passes on to an analysis of the detailed figures of the Revised Estimates of 1884-85 and thence to the Budget Estimates of 1885-86.

The Budget Estimates of 1885-86 are as follows :—

	£
Revenue	72,090,400
Expenditure	71,582,300
Surplus	508,100

The Minute explains that a sum of £585,000 has been allotted from revenue for capital expenditure on railways and for Harbour Defence Works, in the ensuing year, and that this sum would otherwise have formed part of the surplus of revenue over expenditure.

On the other hand, it points out that the figure of £585,000 has been omitted from the Estimates, as the drawings of the Secretary of State will be reduced this year by a sum yielding a saving of exchange to the above amount. This saving, however, is apparent only, arising from the fact that expenditure, so far as it is effected in pounds sterling in England by means of sums made available there to the Secretary of State, is not represented at its true exchange value in the year's accounts.

The Minute then goes on to say that the main features of the coming year are four :—

"*First,* that it will give an effect, in the Budget, to the measures recommended, at the instance of the Government of India, by the Parliamentary Committee, for the construction of railways, with such further development as the circumstances of the time render imperative.

"*Secondly,* that it compels us, owing to the temporary stagnation of the wheat and rice trade, to take estimates for our railway and customs receipts at a considerably lower figure than those which in a normal year we should look for.

"*Thirdly,* that we have been compelled, owing to the fall in the value of silver, to take so low a rate as 1*s.* 7*d.* for our exchange.

"*Finally,* that we have devoted the sum of £500,000 above mentioned from our revenues for the improvement of our railway communications, besides certain further subsidiary sums for frontier roads and the defences of Aden and of certain harbours in India."

It deals at considerable length with the four points above noticed, and then proceeds to an analysis of the detailed estimates of 1885-86.

The Railway and Customs Estimates have been framed with due regard to the present depression in trade. The number of chests of opium to be sold in 1886 will be announced hereafter. The prospects of the crop in the ground are good. The average price of Bengal opium has been taken at under R1,250 per chest. The opium reserve on the 31st December 1885 is estimated to be 18,297 chests.

The rate of exchange for 1885-86 has been taken at 1*s.* 7*d.* Provision is made for the remittance of £13,773,700 to the Secretary of State in 1885-86. The annual loan for Public Works will be raised in England, though no pledge is given.

It is stated that all expenditure connected with the expedition to Suakim, other than ordinary expenditure such as would have been borne had the troops remained in India, will be defrayed by the English Government.

The cash balance, including India and England, on March 31st, 1885, is estimated at £14,133,147, and on the 31st March 1886 at £12,900,647.

The Statement concludes its analysis of the financial situation in the following words :—

"The year commences with a surplus which is more or less considerable according as the grants for capital expenditure are included in or excluded from our calculations. If during the ensuing year we are not called upon to submit to any material increase of expenditure, the estimates, based as they are on a very low rate of exchange and a very moderate calculation as to the revival of our trade, may, I think, be trusted to bear the test of trial. Should trade revive or exchange become more favourable, we shall have resources ample to meet our estimated expenditure. On the other hand, it is impossible to say whether additional expenditure may not in the course of the year have to be provided for, exceeding the limits of any addition which our revenues may reasonably hope to derive from the strengthening of our railway receipts or from improvement in our exchange. To put it in other words, heavily as we are weighted from the two causes above indicated, there is no reason why our resources should not fully suffice to meet all normal expenditure during 1885-86. But if abnormal expenditure, whether of a temporary or permanent kind, is forced upon us, our estimates, even should they be strengthened by a more favourable combination of exchange and trade, may very probably prove unequal to meet it. It is to be hoped that the financial prosperity, the good harvests, and the undisturbed peace, which have of late years been accorded to us will continue. But it is necessary to state clearly the position in which, owing to the concurrence of a variety of unfavourable conditions, we find ourselves placed, in order that considerations which inevitably presented themselves when the estimates were being famed may be fully explained to the public, and that we may not be charged, should difficulties increase upon us, with having taken too sanguine a view of our position."

MILITARY SECRETARY'S OFFICE.

NOTIFICATIONS.

Calcutta, the 18th March 1885.

His Excellency the Viceroy and Governor General will leave Calcutta on Monday, the 23rd March 1885, and will probably arrive at Rawalpindi on Friday evening, March 27th.

His Excellency the Viceroy and Governor General will leave Calcutta on Monday, the 23rd March 1885, and will probably arrive at Rawalpindi on the 27th, halting *en route* at Allahabad for twenty-four hours on the 25th.

All covers intended to reach His Excellency the Viceroy and Governor General and Party* during His Excellency's journey should be addressed "Governor General's Camp" without the addition of any Post Town.

All communications connected with business of a mere routine nature should be sent as usual to the head-quarters of the several Departments.

His Excellency the Viceroy and Governor General will hold a Levée at Rawalpindi on the 27th March 1885 at 9-30 P.M.

All Civil and Military Officers and the Native Officers of the Native Regiments at Rawalpindi are invited to attend.

His Excellency will also be glad to receive other Gentlemen, who should submit their names to the Commissioner of Rawalpindi, who will issue cards of admission which should be shewn to the Aide-de-Camp in waiting before the Levée, if required.

All Officers and Gentlemen attending the Levée are requested to bring with them two cards with their names very legibly written upon them.

Officers and Gentlemen wearing uniform will appear in full dress; Gentlemen not wearing uniform in evening dress.

By Command,

WILLIAM BERESFORD, *Captain,*
Mily. Secy. to the Viceroy.

* H. M. Durand, Esq., C.S.I., Secretary to Government, Foreign Department.
D. Mackenzie Wallace, Esq., Private Secretary to the Viceroy.
Captain Lord William Beresford, V.C., Military Secretary to the Viceroy.
Lieutenant the Hon'ble C. Harbord, A.-D.-C.
Lieutenant A. G. Balfour, A.-D.-C.
Surgeon J. Findlay, M.B., Surgeon to the Viceroy.
J. McFerran, Esq.

HOME DEPARTMENT.

NOTIFICATIONS.—PUBLIC.

Calcutta, the 20th March 1885.

No. 444.—Under the provisions of Section 9 of Statute 24 and 25 Victoria, Cap. 67, the Governor General in Council is pleased to direct that His Excellency's Council shall assemble at Rawalpindi in the jurisdiction of the Lieutenant-Governor of the Punjab.

ESTABLISHMENTS.

The 17th March 1885.

No. 86.—The services of Mr. S. J. Douglas, C.S., Assistant Commissioner in Assam, are replaced at the disposal of the Government of Bengal, with effect from the 31st March 1885.

The 20th March 1885.

No. 91.—Mr. W. B. Jones, C.S.I., C.S., is permitted to resign Her Majesty's Bengal Civil Service with effect from the 27th January 1885.

No. 95.—Mr. C. H. T. Crosthwaite, C.S., Officiating Chief Commissioner, Central Provinces, is confirmed in that appointment, with effect from the 27th January 1885.

No. 100.—ERRATUM.—In Home Department Notification No. 159, dated the 17th June 1884, regarding the retirement of Mr. D. M. Gardner, late of Her Majesty's Bengal Civil Service, for "7th June 1884" read "10th June 1884."

MEDICAL.

The 20th March 1885.

No. 99.—On the retirement of Surgeon-General J. M. Cuningham, Surgeon-General and Sanitary Commissioner with the Government of India, the Governor General in Council desires to place upon public record his high appreciation of the eminent services rendered to the State by that officer.

In the Sanitary Department Dr. Cuningham's services extend over a period of 20 years, during fifteen of which he has been the Head of the Department. When the scheme for the re-organization of the Medical Services in India came into operation in March 1880, Dr. Cuningham was selected to fill the combined office of Surgeon-General and Sanitary Commissioner with the Government of India, the very onerous and responsible duties of which have been discharged to the entire satisfaction of the Government of India. During Dr. Cuningham's incumbency the Indian Medical Department has been remodelled in all its branches, with the result that departmental efficiency has been considerably increased, while a saving of expense to the State has at the same time been effected.

In his capacity as Sanitary Commissioner, Dr. Cuningham has also been instrumental in introducing many measures of great importance to the well-being of the people, and has afforded material assistance to the Government of India in dealing with many difficult questions which have from time to time come before it in connection with sanitary matters.

In his retirement Dr. Cuningham carries with him the warmest thanks of the Government of India for his long and distinguished services.

No. 101.—Deputy Surgeon-General B. Simpson, M.D., Inspector General of Civil Hospitals, Bengal, to be Surgeon-General and Sanitary Commissioner with the Government of India, with effect from the 29th instant, *vice* Surgeon-General J. M. Cuningham, M.D., who completes five years' tour of office on that date.

No. 103.—Deputy Surgeon-General A. J. Cowie to be Inspector-General of Civil Hospitals, Bengal, *vice* Deputy Surgeon-General B. Simpson, with effect from the date on which he may assume charge of his duties.

JUDICIAL.

The 16th March 1885.

No. 339.—The Honorable G. C. Paul, B.A., C.I.E., resumed charge of the Office of Advocate General for Bengal from the Honorable A. Phillips, on the forenoon of this day.

The 18th March 1885.

No. 350.—Under the provisions of Section 4 of Act XVIII of 1884 (The Punjab Courts Act, 1884), the Governor General in Council is pleased to make the following appointments in the Punjab Chief Court, consequent on the absence on privilege leave of Mr. R. T. Burney, C.S. :—

Mr. J. D. Tremlett, M.A., C.S., an Additional Judge of the Court, to officiate as Judge, *vice* Mr. Burney.

Mr. C. A. Roe, B.A., C.S., to officiate as Additional Judge, *vice* Mr. Tremlett.

No. 351.—Under the provisions of Section 4 of Act XVIII of 1884 (The Punjab Courts Act, to officiate as a Judge of the Punjab Chief Court, with effect from the date on which he may take over charge from Mr. H. M. Plowden, proceeding on furlough.

The 20th March 1885.

No. 357.—APPOINTMENT.—Mr. R. J. Crosthwaite, B.A., C.S., to be Judicial Commissioner, Central Provinces, *vice* Mr. C. H. T. Crosthwaite.

FORESTS.

The 20th March 1885.

No. 266 *F.*—Mr. J. W. Oliver, Deputy Conservator of Forests in British Burma, on deputation as Assistant Inspector General of Forests and Superintendent of Working Plans, is granted two years' furlough under Section 50, Chapter V, of the Civil Leave Code, with effect from the 21st March 1885, or any subsequent date on which he may avail himself of it.

Mr. Oliver's services are replaced at the disposal of the Chief Commissioner of British Burma, with effect from the date on which he avails himself of leave.

No. 271 *F.*—Mr. R. H. C. Whittall, Deputy Conservator of Forests of the 3rd grade in the Central Provinces, is appointed to act, until further orders, as Assistant Inspector General of Forests and Superintendent of Working Plans, with effect from the date on which he assumes charge of the duties of his appointment.

REVENUE AND AGRICULTURAL DEPARTMENT.

NOTIFICATION.—GENERAL.

Calcutta, the 20th March 1885.

No. 230—36-13 *G.*—During the absence of the Governor General in Council from Calcutta, the Assistant Secretary in the Military Department at the Presidency will have charge of that portion of the Revenue and Agricultural Department which is left in Calcutta.

E. C. BUCK,
Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.—GENERAL.

Fort William, the 16th March, 1885.

No. 511 *G.*—With reference to Foreign Department Notification, No. 443 G. of the 5th March, 1885, the recognition of the appointment by the Government of India of Mr. Hermann Berger as Acting Consul for the German Empire at Calcutta, has been confirmed by Her Majesty's Government.

The 17th March, 1885.

No. 532 *G.*—Lieutenant R. D. C. Davies, Political Assistant, 2nd Class, sub. *pro tem.*, and Assistant to the Governor-General's Agent in Rajputana, is appointed to be Assistant Cantonment Magistrate at Morar, with effect from the date of assuming charge, *vice* Colonel M. Proctor, retired.

No. 537 *G.*—It is hereby notified that Mr. A. B. Cobb, Vice and Deputy Consul-General for the United States of America at Calcutta, has assumed charge of the Office of Consul-General during the absence on leave of Mr. J. A. Leonard.

No. 540 *G.*—The services of Mr. W. Lee Warner, Bo.C.S., Officiating Under-Secretary to the Government of India in the Foreign Department, are replaced at the disposal of the Government of Bombay, with effect from the 17th March, 1885.

H. M. DURAND,
Offg. Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

LEAVE AND APPOINTMENTS.

Calcutta, the 20th March 1885.

No. 1434.—Babu Preonath Dutt, having been temporarily transferred to the Office of the Comptroller of India Treasuries, made over charge of his duties as Chief Superintendent in the Office of the Comptroller and Auditor General and assumed charge of his duties in the Office of the Comptroller of India Treasuries, after noon, on the 6th March 1885.

POST OFFICE.

NOTIFICATIONS.

Calcutta, the 20th February 1885.

CORRESPONDENCE FOR THE INDIAN FIELD FORCE, EGYPT.

An Indian Post Office will accompany the Indian Field Force proceeding on active service to Egypt. This office will be constituted a Head Office, and will be designated the "Indian Field Post Office—Egypt."

2. Correspondence intended for the Indian Field Force, Egypt, should be addressed as follows :—

"A. B.
Regiment, Ship, or Office,
Indian Field Force,
EGYPT."

No Post-town should be added to the address, and special care should be taken to insert the Regiment, Battery, Ship, or Office with which the addressee is serving.

3. Prepayment of correspondence intended for the Indian Field Force is compulsory.

4. The rate of postage for letters sent from India to Native Officers, Non-Commissioned Officers and men of the Native Army, and also for Camp-followers, is nine pie for each letter not exceeding one-half ounce, or 1½ tola in weight. The Camp-followers are either Regimental or belong to the Departments or special Corps named in the margin,* and letters addressed to them must show the Regiment, De-

EGYPT.		

5. No British troops are being sent from India to Egypt, but letters addressed to British Soldiers and Seamen, or to any of the privileged class mentioned in clause 190 of the *Indian Postal Guide*, who may be serving in Egypt, will be sent of course at the special rates, subject to the conditions laid down in that clause and the following clauses.

6. Articles intended for persons other than the above will be charged at the ordinary postage rates mentioned opposite to "Egypt" in the Foreign Post Schedule of the *Postal Guide*.

7. Official correspondence for the Indian Field Force will be governed by the same rules as ordinary private correspondence for Egypt. It should be prepaid by service postage labels under the superscription and signature prescribed in clause 353 of the *Postal Guide*.

8. Money orders will be exchanged with the Indian Field Force under the rules governing the exchange of Asiatic money orders (clauses 261 to 265 of the *Postal Guide*). The Bombay Post Office will be the office of exchange for money orders exchanged with the Indian Field Force.

9. Parcels may be forwarded to the Indian Field Force under the rules governing the despatch of foreign parcels from India. The Bombay Post Office will be the office of exchange for such parcels, which should be addressed in the same way as correspondence.

10. Insured and value-payable articles cannot be received for despatch to the Indian Field Force, Egypt. India Postal Notes will be sold, but not paid, by the Field Post Office.

The 13th March 1885.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance

	Without postage.	With postage.
For the Complete Series, *including postage* .		₹22 8
For the Calcutta Series . . .	₹10 0	₹12 8
„ each of the Madras, Bombay and Allahabad Series .	„ 6 0	„ 7 0
„ a part of the Calcutta Series purchased separately (*inclusive of postage in India*)		„ 2 0
„ a part of the Madras, Bombay and Allahabad Series purchased separately *inclusive of postage in India*) . .		„ 1 0

Persons desiring to subscribe for, or purchase, the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
„ Thacker & Co., Bombay.
„ Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
„ Curator of Government Books, North-Western Provinces and Oudh.
„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5—1, Council House Street, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*

CHAPTER XIII.

JUDICIAL PROCEDURE.

143. Power to modify Civil Procedure Code in its application to landlord and tenant suits.
144. Jurisdiction in proceedings under Act.
145. Náibs or gumáshtas to be recognized agents.
146. Special register of suits.
147. Successive rent-suits.
148. Procedure in rent-suits.
149. Payment into Court of money admitted to be due to third person.
150. Payment into Court of money admitted to be due to landlord.
151. Provision as to payment of portion of money.
152. Court to grant receipt.
153. Appeals in rent-suits.
154. Date from which decree for enhancement takes effect.
155. Relief against forfeitures.
156. Rights of ejected raiyats in respect of crops and land prepared for sowing.
157. Power for Court to fix fair rent as alternative to ejectment.
158. Application to determine incidents of tenancy.

CHAPTER XIV.

SALE FOR ARREARS UNDER DECREE.

159. General powers of purchaser as to avoidance of incumbrances.

SECTIONS.

160. Protected interests.
161. Meaning of "incumbrance" and "registered and notified incumbrance".
162. Application for sale of tenure or holding.
163. Order of attachment and proclamation of sale to be issued simultaneously.
164. Sale of tenure or holding subject to registered and notified incumbrances, and effect thereof.
165. Sale of tenure or holding with power to avoid all incumbrances, and effect thereof.
166. Sale of occupancy-holding with power to avoid all incumbrances, and effect thereof.
167. Procedure for annulling incumbrances under the foregoing sections.
168. Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.
169. Rules for disposal of the sale-proceeds.
170. Tenure or holding to be released from attachment only on payment into Court of amount of decree with costs, or on confession of satisfaction by decree-holder.
171. Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the tenure or holding.
172. Inferior tenant paying into Court may deduct from rent.
173. Decree-holder may bid at sale; judgment-debtor may not.
174. Application by judgment-debtor to set aside sale.
175. Registration of certain instruments creating incumbrances.
176. Notification of incumbrances to landlord.
177. Power to create incumbrances not extended.

CHAPTER XV.

CONTRACT AND CUSTOM.

178. Restrictions on exclusion of Act by agreement.
179. Permanent mukarrarí leases.
180. Útbandi, chur and dearah lands.
181. Saving as to service-tenures.
182. Homesteads.
183. Saving of custom.

CHAPTER XVI.

LIMITATION.

184. Limitation in suits, appeals and applications in Schedule III.
185. Portions of the Indian Limitation Act not applicable to such suits, &c.

CHAPTER XVII.

SUPPLEMENTAL.

Penalties.

SECTIONS.

186. Penalties for illegal interference with produce.

Agents and representatives of landlords.

187. Power for landlord to act through agent.
188. Joint landlords to act collectively or by common agent.

Rules under Act.

189. Power to make rules regarding procedure, powers of officers and service of notices.
190. Procedure for making, publication and confirmation of rules.

Provisions as to temporarily-settled districts.

191. Saving as to land held in a district not permanently settled.
192. Power to alter rent in case of new assessment of revenue.

Rights of pasturage, &c.

193. Rights of pasturage, forest-rights, &c.

Saving for conditions binding on landlords.

194. Tenant not enabled by Act to violate conditions binding on landlord.

Savings for special enactments.

195. Savings for special enactments.

Construction of Act.

196. Act to be read subject to Acts hereafter passed by Lieutenant-Governor of Bengal in Council.

SCHEDULE I.—REPEAL OF ENACTMENTS.

SCHEDULE II.—FORMS OF RECEIPT AND ACCOUNT.

SCHEDULE III.—LIMITATION.

Bengal Tenancy Act.

(*Chapter I.—Preliminary.—Secs. 1-3.*)

An Act to amend and consolidate certain enactments relating to the Law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal.

WHEREAS it is expedient to amend and consolidate certain enactments relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. (*1*) This Act may be called the Bengal Tenancy Act, 1885.

Commencement.

(*2*) It shall come into force on such date (hereinafter called the commencement of this Act) as the Local Government, with the previous sanction of the Governor General in Council, may, by notification in this behalf, appoint in the local official Gazette.

Local extent.

(*3*) It shall extend by its own operation to all the territories for the time being under the administration of the Lieutenant-Governor of Bengal, except the Town of Calcutta, the Division of Orissa, and the Scheduled Districts specified in the third Part of the First Schedule of the Scheduled Districts Act, 1874; and the Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, extend the whole or any portion of this Act to the Division of Orissa or any part thereof.

Repeal.

2. (*1*) The enactments specified in Schedule I hereto annexed are repealed in the territories to which this Act extends by its own operation.

(*2*) When this Act is extended to the Division of Orissa or any part thereof, such of those enactments as are in force in that Division or part, or, where a portion only of this Act is so extended, so much of them as is inconsistent with that portion, shall be repealed in that Division or part.

(*3*) Any enactment or document referring to any enactment hereby repealed shall be construed to refer to this Act or to the corresponding portion thereof.

(*4*) The repeal of any enactment by this Act shall not revive any right, privilege, matter or thing not in force or existing at the commencement of this Act.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context:—

(*1*) "Estate" means land included under one entry in any of the general registers of revenue-paying lands and revenue-free lands, prepared and maintained under the law for the time being in force by the Collector of a district, and includes Government khás maháls and revenue-free lands not entered in any register.

(*2*) "Proprietor" means a person owning, whether in trust or for his own benefit, an estate or a part of an estate.

(*3*) "Tenant" means a person who holds land under another person, and is, or but for a special contract would be, liable to pay rent for that land to that person.

(*4*) "Landlord" means a person immediately under whom a tenant holds, and includes the Government.

(*5*) "Rent" means whatever is lawfully payable or deliverable in money or kind by a tenant to his landlord on account of the use or occupation of the land held by the tenant:

In sections 53 to 68, both inclusive, sections 72 to 75, both inclusive, Chapter XII and Schedule III of this Act, "rent" includes also money recoverable under any enactment for the time being in force as if it was rent.

(*6*) "Pay," "payable" and "payment," used with reference to rent, include "deliver," "deliverable" and "delivery."

(*7*) "Tenure" means the interest of a tenure-holder or an under-tenure-holder.

(*8*) "Permanent tenure" means a tenure which is heritable and which is not held for a limited time.

(*9*) "Holding" means a parcel or parcels of land held by a raiyat and forming the subject of a separate tenancy.

(*10*) "Village" means an area included in a village map of the revenue-survey within the same exterior boundary, or, where no such maps have been prepared, such area as any officer appointed by the Local Government in this behalf may determine after local inquiry held on such notice as the Local Government considers sufficient for giving information to all persons interested.

(*11*) "Agricultural year" means, where the Bengalí year prevails, the year commencing on the first day of Bysák, where the Faslí or Amlí year

prevails, the year commencing on the first day of Asin, and, where any other year prevails for agricultural purposes, that year.

(*12*) "Permanent Settlement" means the Permanent Settlement of Bengal, Behar and Orissa, made in the year 1793.

(*13*) "Succession" includes both intestate and testamentary succession.

(*14*) "Signed" includes "marked" when the person making the mark is unable to write his name; it also includes "stamped" with the name of the person referred to.

(*15*) "Prescribed" means prescribed from time to time by the Local Government by notification in the official Gazette.

(*16*) "Collector" means the Collector of a district or any other officer appointed by the Local Government to discharge any of the functions of a Collector under this Act.

(*17*) "Revenue-officer" in any provision of this Act includes any officer whom the Local Government may appoint by name or by virtue of his office to discharge any of the functions of a Revenue-officer under that provision.

(*18*) "Registered" means registered under any Act for the time being in force for the registration of documents.

CHAPTER II.

CLASSES OF TENANTS.

Classes of tenants.

4. There shall be, for the purposes of this Act, the following classes of tenants, (namely) :—

(1) tenure-holders, including under-tenure-holders,

(2) raiyats, and

(3) under-raiyats, that is to say, tenants holding whether immediately or mediately under raiyats;

and the following classes of raiyats, (namely) :—

(*a*) raiyats holding at fixed rates, which expression means raiyats holding either at a rent fixed in perpetuity or at a rate of rent fixed in perpetuity,

(*b*) occupancy-raiyats, that is to say, raiyats having a right of occupancy in the land held by them, and

(*c*) non-occupancy-raiyats, that is to say, raiyats not having such a right of occupancy.

Meaning of "tenure-holder" and "raiyat".

5. (*1*) "Tenure-holder" means primarily a person who has acquired from a proprietor or from another tenure-holder a right to hold land for the purpose of collecting rents or bringing it under cultivation by establishing tenants on it, and includes also the successors in interest of persons who have acquired such a right.

(*2*) "Raiyat" means primarily a person who has acquired a right to hold land for the purpose of cultivating it by himself, or by members of his family, or by hired servants, or with the aid of partners, and includes also the successors in interest of persons who have acquired such a right.

Explanation.—Where a tenant of land has the right to bring it under cultivation, he shall be deemed to have acquired a right to hold it for the purpose of cultivation notwithstanding that he uses it for the purpose of gathering the produce of it or of grazing cattle on it.

(*3*) A person shall not be deemed to be a raiyat unless he holds land either immediately under a proprietor or immediately under a tenure-holder.

(*4*) In determining whether a tenant is a tenure-holder or a raiyat, the Court shall have regard to—

(*a*) local custom; and

(*b*) the purpose for which the right of tenancy was originally acquired.

(*5*) Where the area held by a tenant exceeds one hundred standard bíghás, the tenant shall be presumed to be a tenure-holder until the contrary is shewn.

CHAPTER III.

TENURE-HOLDERS.

Enhancement of rent.

Tenure held since Permanent Settlement liable to enhancement only in certain cases.

6. Where a tenure has been held from the time of the Permanent Settlement, its rent shall not be liable to enhancement except on proof—

(*a*) that the landlord under whom it is held is entitled to enhance the rent thereof either by local custom or by the conditions under which the tenure is held, or

(*b*) that the tenure-holder, by receiving reductions of his rent, otherwise than on account of a diminution of the area of the tenure, has subjected himself to the payment of the increase demanded, and that the lands are capable of affording it.

Limits of enhancement of rent of tenures.

7. (*1*) Where the rent of a tenure-holder is liable to enhancement, it may, subject to any contract between the parties, be enhanced up to the limit of the customary rate payable by persons holding similar tenures in the vicinity.

(*2*) Where no such customary rate exists, it may, subject as aforesaid, be enhanced up to such limit as the Court thinks fair and equitable.

Bengal Tenancy Act.

(*Chapter III.—Tenure-holders.—Secs. 8-15.*)

Enhancement of rent.

(*3*) In determining what is fair and equitable, the Court shall not leave to the tenure-holder as profit less than ten per centum of the balance which remains after deducting from the gross rents payable to him the expenses of collecting them, and shall have regard to—

(*a*) the circumstances under which the tenure was created, for instance, whether the land comprised in the tenure, or a great portion of it, was first brought under cultivation by the agency or at the expense of the tenure-holder or his predecessors in interest, whether any fine or premium was paid on the creation of the tenure, and whether the tenure was originally created at a specially low rent for the purpose of reclamation; and

(*b*) the improvements, if any, made by the tenure-holder or his predecessors in interest.

(*4*) If the tenure-holder himself occupies any portion of the land included in the area of his tenure, or has made a grant of any portion of the land either rent-free or at a beneficial rent, a fair and equitable rent shall be calculated for that portion and included in the gross rents aforesaid.

Power to order gradual enhancement.

8. The Court may, if it thinks that an immediate increase of rent would produce hardship, direct that the enhancement shall be gradual; that is to say, that the rent shall increase yearly by degrees, for any number of years not exceeding five, until the limit of the enhancement allowed has been reached.

Rent once enhanced may not be altered for fifteen years.

9. When the rent of a tenure-holder has been enhanced by the Court or by contract, it shall not be again enhanced by the Court during the fifteen years next following the date on which it has been so enhanced.

Other incidents of tenures.

Other incidents of tenures.

Permanent tenure-holder not liable to ejectment.

10. A holder of a permanent tenure shall not be ejected by his landlord except on the ground that he has broken a condition on breach of which he is, under the terms of a contract between him and his landlord, liable to be ejected:

Provided that where the contract is made after the commencement of this Act, the condition is consistent with the provisions of this Act.

Transfer and transmission of permanent tenure.

11. Every permanent tenure shall, subject to the provisions of this Act, be capable of being transferred and bequeathed in the same manner and to the same extent as other immoveable property.

Other incidents of tenures.

Voluntary transfer of permanent tenure.

12. (*1*) A transfer of a permanent tenure by sale, gift or mortgage (other than a transfer by sale in execution of a decree or by summary sale under any law relating to patni or other tenures) can be made only by a registered instrument.

(*2*) A registering officer shall not register any instrument purporting or operating to transfer by sale, gift or mortgage a permanent tenure unless there is paid to him, in addition to any fees payable under the Act for the time being in force for the registration of documents, a process-fee of the prescribed amount and a fee (hereinafter called "the landlord's fee") of the following amount, namely:—

(*a*) when rent is payable in respect of the tenure, a fee of two per centum on the annual rent of the tenure: provided that no such fee shall be less than one rupee or more than one hundred rupees; and

(*b*) when rent is not payable in respect of the tenure, a fee of two rupees.

(*3*) When the registration of any such instrument is complete, the registering officer shall send to the Collector the landlord's fee and a notice of the transfer and registration in the prescribed form, and the Collector shall cause the fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Transfer of permanent tenure by sale in execution of decree other than decree for rent.

13. (*1*) When a permanent tenure is sold in execution of a decree other than a decree for arrears of rent due in respect thereof, the Court shall, before confirming the sale under section 312 of the Code of Civil Procedure, require the purchaser to pay into Court the landlord's fee prescribed by the last foregoing section and such further fee for service of notice of the sale on the landlord as may be prescribed. XIV of 1882

(*2*) When the sale has been confirmed, the Court shall send to the Collector the landlord's fee and a notice of the sale in the prescribed form, and the Collector shall cause the fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Transfer of permanent tenure by sale in execution of decree for rent.

14. When a permanent tenure is transferred by sale in execution of a decree for arrears of rent due in respect thereof, the Court shall send to the Collector a notice of the sale in the prescribed form.

Succession to permanent tenure.

15. When a succession to a permanent tenure takes place, the person succeeding shall give notice of the succession to the Collector in the prescribed form, and shall pay to the Collector the prescribed fee for the service of the notice on the landlord and the landlord's fee

prescribed by section 12, and the Collector shall cause the landlord's fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Bar to recovery of rent pending notice of succession.

16. A person becoming entitled to a permanent tenure by succession shall not be entitled to recover by suit, distraint or other proceeding any rent payable to him as the holder of the tenure, until the Collector has received the notice and fees referred to in the last foregoing section.

Transfer of, and succession to, share in permanent tenure.

17. Subject to the provisions of section 88, the foregoing sections shall apply to the transfer of, or succession to, a share in a permanent tenure.

CHAPTER IV.

RAIYATS HOLDING AT FIXED RATES.

Incidents of holding at fixed rates.

18. A raiyat holding at a rent, or rate of rent, fixed in perpetuity—

(*a*) shall be subject to the same provisions with respect to the transfer of, and succession to, his holding as the holder of a permanent tenure, and

(*b*) shall not be ejected by his landlord except on the ground that he has broken a condition consistent with this Act, and on breach of which he is, under the terms of a contract between him and his landlord, liable to be ejected.

CHAPTER V.

OCCUPANCY-RAIYATS.

General.

Continuance of existing occupancy-rights.

19. Every raiyat who immediately before the commencement of this Act has, by the operation of any enactment, by custom or otherwise, a right of occupancy in any land shall, when this Act comes into force, have a right of occupancy in that land.

Definition of "settled raiyat".

20. (*1*) Every person who for a period of twelve years, whether wholly or partly before or after the commencement of this Act, has continuously held as a raiyat land situate in any village, whether under a lease or otherwise, shall be deemed to have become, on the expiration of that period, a settled raiyat of that village.

(*2*) A person shall be deemed for the purposes of this section to have continuously held land in a village notwithstanding that the particular land held by him has been different at different times.

(*3*) A person shall be deemed, for the purposes of this section, to have held as a raiyat any land held as a raiyat by a person whose heir he is.

(*4*) Land held by two or more co-sharers as a raiyatí holding shall be deemed, for the purposes of this section, to have been held as a raiyat by each such co-sharer.

(*5*) A person shall continue to be a settled raiyat of a village as long as he holds any land as a raiyat in that village and for one year thereafter.

(*6*) If a raiyat recovers possession of land under section 87, he shall be deemed to have continued to be a settled raiyat notwithstanding his having been out of possession more than a year.

(*7*) If, in any proceeding under this Act, it is proved or admitted that a person holds any land as a raiyat, it shall, as between him and the landlord under whom he holds the land, be presumed for the purposes of this section, until the contrary is proved or admitted, that he has for twelve years continuously held that land or some part of it as a raiyat.

Settled raiyats to have occupancy-rights.

21. (*1*) Every person who is a settled raiyat of a village within the meaning of the last foregoing section shall have a right of occupancy in all land for the time being held by him as a raiyat in that village.

(*2*) Every person who, being a settled raiyat of a village within the meaning of the last foregoing section, held land as a raiyat in that village at any time between the second day of March, 1883, and the commencement of this Act, shall be deemed to have acquired a right of occupancy in that land under the law then in force; but nothing in this sub-section shall affect any decree or order passed by a Court before the commencement of this Act.

Effect of acquisition of occupancy-right by landlord.

22. (*1*) When the immediate landlord of an occupancy-holding is a proprietor or permanent tenure-holder, and the entire interests of the landlord and the raiyat in the holding become united in the same person by transfer, succession or otherwise, the occupancy-right shall cease to exist; but nothing in this sub-section shall prejudicially affect the rights of any third person.

(*2*) If the occupancy-right in land is transferred to a person jointly interested in the land as proprietor or permanent tenure-holder, it shall cease to exist; but nothing in this sub-section shall prejudicially affect the rights of any third person.

(*3*) A person holding land as an ijárádár or farmer of rents shall not, while so holding, acquire a right of occupancy in any land comprised in his ijárá or farm.

Bengal Tenancy Act.

(*Chapter V.—Occupancy-raiyats.—Secs. 23-30.*)

Explanation.—A person having a right of occupancy in land does not lose it by subsequently becoming jointly interested in the land as proprietor or permanent tenure-holder, or by subsequently holding the land in ijárá or farm.

Incidents of occupancy-right.

idents of upancy-ht.

23. When a raiyat has a right of occupancy in respect of any land, he may use the land in any manner which does not materially impair the value of the land or render it unfit for the purposes of the tenancy; but shall not be entitled to cut down trees in contravention of any local custom.

Rights of raiyat in respect of use of land.

24. An occupancy-raiyat shall pay rent for his holding at fair and equitable rates.

Obligation of raiyat to pay rent.

25. An occupancy-raiyat shall not be ejected by his landlord from his holding, except in execution of a decree for ejectment passed on the ground—

Protection from eviction except on specified grounds.

(*a*) that he has used the land comprised in his holding in a manner which renders it unfit for the purposes of the tenancy, or

(*b*) that he has broken a condition consistent with the provisions of this Act, and on breach of which he is, under the terms of a contract between himself and his landlord, liable to be ejected.

26. If a raiyat dies intestate in respect of a right of occupancy, it shall, subject to any custom to the contrary, descend in the same manner as other immoveable property: provided that, in any case in which under the law of inheritance to which the raiyat is subject his other property goes to the Crown, his right of occupancy shall be extinguished.

Devolution of occupancy-right on death.

Enhancement of rent.

ancement ent.

27. The rent for the time being payable by an occupancy-raiyat shall be presumed to be fair and equitable until the contrary is proved.

Presumption as to fair and equitable rent.

28. Where an occupancy-raiyat pays his rent in money, his rent shall not be enhanced except as provided by this Act.

Restriction on enhancement of money-rents.

29. The money-rent of an occupancy-raiyat may be enhanced by contract, subject to the following conditions:—

Enhancement of rent by contract.

(*a*) the contract must be in writing and registered;

(*b*) the rent must not be enhanced so as to exceed by more than two annas in the rupee the rent previously payable by the raiyat;

(*c*) the rent fixed by the contract shall not be liable to enhancement during a term of fifteen years from the date of the contract;

Enhancement of rent.

Provided as follows—

(i) Nothing in clause (*a*) shall prevent a landlord from recovering rent at the rate at which it has been actually paid for a continuous period of not less than three years immediately preceding the period for which the rent is claimed.

(ii) Nothing in clause (*b*) shall apply to a contract by which a raiyat binds himself to pay an enhanced rent in consideration of an improvement which has been or is to be effected in respect of the holding by, or at the expense of, his landlord, and to the benefit of which the raiyat is not otherwise entitled; but an enhanced rent fixed by such a contract shall be payable only when the improvement has been effected, and, except when the raiyat is chargeable with default in respect of the improvement, only so long as the improvement exists and substantially produces its estimated effect in respect of the holding.

(iii) When a raiyat has held his land at a specially low rate of rent in consideration of cultivating a particular crop for the convenience of the landlord, nothing in clause (*b*) shall prevent the raiyat from agreeing, in consideration of his being released from the obligation of cultivating that crop, to pay such rent as he may deem fair and equitable.

30. The landlord of a holding held at a money-rent by an occupancy-raiyat may, subject to the provisions of this Act, institute a suit to enhance the rent on one or more of the following grounds, (namely):—

Enhancement of rent by suit.

(*a*) that the rate of rent paid by the raiyat is below the prevailing rate paid by occupancy-raiyats for land of a similar description and with similar advantages in the same village, and that there is no sufficient reason for his holding at so low a rate;

(*b*) that there has been a rise in the average local prices of staple food-crops during the currency of the present rent;

(*c*) that the productive powers of the land held by the raiyat have been increased by an improvement effected by, or at the expense of, the landlord during the currency of the present rent;

Bengal Tenancy Act.

(*Chapter V.—Occupancy-raiyats.—Secs. 31-36.*)

Enhancement of rent.

(*d*) that the productive powers of the land held by the raiyat have been increased by fluvial action.

Explanation.—"Fluvial action" includes a change in the course of a river rendering irrigation from the river practicable when it was not previously practicable.

Rules as to enhancement on ground of prevailing rate.

31. Where an enhancement is claimed on the ground that the rate of rent paid is below the prevailing rate—

(*a*) in determining what is the prevailing rate the Court shall have regard to the rates generally paid during a period of not less than three years before the institution of the suit, and shall not decree an enhancement unless there is a substantial difference between the rate paid by the raiyat and the prevailing rate found by the Court;

(*b*) if in the opinion of the Court the prevailing rate of rent cannot be satisfactorily ascertained without a local inquiry, the Court may direct that a local inquiry be held under Chapter XXV of the Code of Civil Procedure by such Revenue-officer as the Local Government may authorize in that behalf by rules made under section 392 of the said Code;

XIV of 1882.

(*c*) in determining under this section the rate of rent payable by a raiyat his caste shall not be taken into consideration, unless it is proved that by local custom caste is taken into account in determining the rate; and whenever it is found that by local custom any description of raiyats hold land at favourable rates of rent, the rate shall be determined in accordance with that custom;

(*d*) in ascertaining the prevailing rate of rent the amount of any enhancement authorized on account of a landlord's improvement shall not be taken into consideration.

Rules as to enhancement on ground of rise in prices.

32. Where an enhancement is claimed on the ground of a rise in prices—

(*a*) the Court shall compare the average prices during the decennial period immediately preceding the institution of the suit with the average prices during such other decennial period as it may appear equitable and practicable to take for comparison;

(*b*) the enhanced rent shall bear to the previous rent the same proportion as the average prices during the last decennial period bear to the average prices during the previous decennial period taken for purposes of comparison: provided that, in calculating this proportion, the average prices during the later period shall be reduced by one-third of their excess over the average prices during the earlier period;

(*c*) if in the opinion of the Court it is not practicable to take the decennial periods prescribed in clause (*a*), the Court may, in its discretion, substitute any shorter periods therefor.

Rules as to enhancement on ground of landlord's improvement.

33. (*1*) Where an enhancement is claimed on the ground of a landlord's improvement—

(*a*) the Court shall not grant an enhancement unless the improvement has been registered in accordance with this Act;

(*b*) in determining the amount of enhancement the Court shall have regard to—

(i) the increase in the productive powers of the land caused or likely to be caused by the improvement,

(ii) the cost of the improvement,

(iii) the cost of the cultivation required for utilizing the improvement, and

(iv) the existing rent and the ability of the land to bear a higher rent.

(*2*) A decree under this section shall, on the application of the tenant or his successor in interest, be subject to re-consideration in the event of the improvement not producing or ceasing to produce the estimated effect.

Rules as to enhancement on ground of increase in productive powers due to fluvial action.

34. Where an enhancement is claimed on the ground of an increase in productive powers due to fluvial action—

(*a*) the Court shall not take into account any increase which is merely temporary or casual;

(*b*) the Court may enhance the rent to such an amount as it may deem fair and equitable, but not so as to give the landlord more than one-half of the value of the net increase in the produce of the land.

Enhancement by suit to be fair and equitable.

35. Notwithstanding anything in the foregoing sections, the Court shall not in any case decree any enhancement which is under the circumstances of the case unfair or inequitable.

Power to order progressive enhancement.

36. If the Court passing a decree for enhancement considers that the immediate enforcement of the decree in its full extent will be attended with hardship to the raiyat, it may direct that the enhancement shall be gradual; that is to say, that the rent shall increase

hancement rent. yearly by degrees for any number of years not exceeding five until the limit of the enhancement decreed has been reached.

37. (*1*) A suit instituted for the enhancement of the rent of a holding on the ground that the rate of rent paid is below the prevailing rate, or on the ground of a rise in prices, shall not be entertained if within the fifteen years next preceding its institution the rent of the holding has been enhanced by a contract made after the second day of March, 1883, or if within the said period of fifteen years the rent has been commuted under section 40, or a decree has been passed under this Act or any enactment repealed by this Act enhancing the rent on either of the grounds aforesaid or on any ground corresponding thereto or dismissing the suit on the merits.

Limitation of right to bring successive enhancement suits.

(*2*) Nothing in this section shall affect the provisions of section 373 of the Code of Civil Procedure.

1882.

Reduction of rent.

ion of **38.** (*1*) An occupancy-raiyat holding at a money-rent may institute a suit for the reduction of his rent on the following grounds, and, except as hereinafter provided in the case of a diminution of the area of the holding, not otherwise, (namely) :—

Reduction of rent.

(*a*) on the ground that the soil of the holding has without the fault of the raiyat become permanently deteriorated by a deposit of sand or other specific cause, sudden or gradual, or

(*b*) on the ground that there has been a fall, not due to a temporary cause, in the average local prices of staple food-crops during the currency of the present rent.

(*2*) In any suit instituted under this section, he Court may direct such reduction of the rent s it thinks fair and equitable.

Price-lists.

39. (*1*) The Collector of every district shall prepare, monthly, or at shorter intervals, periodical lists of the market-prices of staple ood-crops grown in such local areas as the ocal Government may from time to time direct, nd shall submit them to the Board of Revenue or approval or revision.

Price-lists of staple ood-crops.

(*2*) The Collector may, if so directed by the ocal Government, prepare for any local area like rice-lists relating to such past times as the Local lovernment thinks fit, and shall submit the lists o prepared to the Board of Revenue for approval r revision.

(*3*) The Collector shall, one month before submitting a price-list to the Board of Revenue under this section, publish it in the prescribed manner within the local area to which it relates, and if any landlord or tenant of land within the local area, within the said period of one month, presents to him in writing any objection to the list, he shall submit the same to the Board of Revenue with the list. Price-lists.

(*4*) The price-lists shall, when approved or revised by the Board of Revenue, be published in the official Gazette; and any manifest error in any such list discovered after its publication may be corrected by the Collector with the sanction of the Board of Revenue.

(*5*) The Local Government shall cause to be compiled from the periodical lists prepared under this section lists of the average prices prevailing throughout each year, and shall cause them to be published annually in the official Gazette.

(*6*) In any proceedings under this chapter for an enhancement or reduction of rent on the ground of a rise or fall in prices, the Court shall refer to the lists published under this section, and shall presume that the prices shown in the lists prepared for any year subsequent to the passing of this Act are correct, unless and until it is proved that they are incorrect.

(*7*) The Local Government, subject to the control of the Governor General in Council, shall make rules for determining what are to be deemed staple food-crops in any local area and for the guidance of officers preparing price-lists under this section.

Commutation.

40. (*1*) Where an occupancy-raiyat pays for a holding rent in kind, or on the estimated value of a portion of the crop, or at rates varying with the crop, or partly in one of those ways and partly in another, either the raiyat or his landlord may apply to have the rent commuted to a money-rent. Commutation.

Commutation of rent payable in kind.

(*2*) The application may be made to the Collector or Sub-divisional Officer, or to an officer making a settlement of rents under Chapter X, or to any other officer specially authorized in this behalf by the Local Government.

(*3*) On the receipt of the application the officer may determine the sum to be paid as money-rent, and may order that the raiyat shall, in lieu of paying his rent in kind, or otherwise as aforesaid, pay the sum so determined.

(*4*) In making the determination the officer shall have regard to—

(*a*) the average money-rent payable by occupancy-raiyats for land of a similar description and with similar advantages in the vicinity;

Bengal Tenancy Act.

(Chapter VI.—Non-occupancy-raiyats.—Secs. 41—46.)

mutation.

(*b*) the average value of the rent actually received by the landlord during the preceding ten years or during any shorter period for which evidence may be available; and

(*c*) the charges incurred by the landlord in respect of irrigation under the system of rent in kind, and the arrangements made on commutation for continuing those charges.

(*5*) The order shall be in writing, shall state the grounds on which it is made, and the time from which it is to take effect, and shall be subject to appeal in like manner as if it were an order made in an ordinary revenue proceeding.

(*6*) If the application is opposed, the officer shall consider whether under all the circumstances of the case it is reasonable to grant it, and shall grant or refuse it accordingly. If he refuses it, he shall record in writing the reasons for the refusal.

CHAPTER VI.

NON-OCCUPANCY-RAIYATS.

Application of chapter.

41. This chapter shall apply to raiyats not having a right of occupancy, who are in this Act referred to as non-occupancy-raiyats.

Initial rent of non-occupancy-raiyat.

42. When a non-occupancy-raiyat is admitted to the occupation of land, he shall become liable to pay such rent as may be agreed on between himself and his landlord at the time of his admission.

Conditions of enhancement of rent.

43. The rent of a non-occupancy-raiyat shall not be enhanced except by registered agreement or by agreement under section 46:

Provided that nothing in this section shall prevent a landlord from recovering rent at the rate at which it has been actually paid for a continuous period of not less than three years immediately preceding the period for which the rent is claimed.

Grounds on which non-occupancy-raiyat may be ejected.

44. A non-occupancy-raiyat shall, subject to the provisions of this Act, be liable to ejectment on one or more of the following grounds, and not otherwise (namely):—

(*a*) on the ground that he has failed to pay an arrear of rent;

(*b*) on the ground that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or that he has broken a condition consistent with this Act and on breach of which he is, under the terms of a contract between himself and his landlord, liable to be ejected;

(*c*) where he has been admitted to occupation of the land under a registered lease, on the ground that the term of the lease has expired;

(*d*) on the ground that he has refused to agree to pay a fair and equitable rent determined under section 46, or that the term for which he is entitled to hold at such a rent has expired.

Conditions of ejectment on ground of expiration of lease.

45. A suit for ejectment on the ground of the expiration of the term of a lease shall not be instituted against a non-occupancy-raiyat unless notice to quit has been served on the raiyat not less than six months before the expiration of the term, and shall not be instituted after six months from the expiration of the term.

Conditions of ejectment on ground of refusal to agree to enhancement.

46. (*1*) A suit for ejectment on the ground of refusal to agree to an enhancement of rent shall not be instituted against a non-occupancy-raiyat unless the landlord has tendered to the raiyat an agreement to pay the enhanced rent, and the raiyat has within three months before the institution of the suit refused to execute the agreement.

(*2*) A landlord desiring to tender an agreement to a raiyat under this section may file it in the office of such Court or officer as the Local Government appoints in this behalf for service on the raiyat. The Court or officer shall forthwith cause it to be served on the raiyat in the prescribed manner, and when it has been so served it shall for the purposes of this section be deemed to have been tendered.

(*3*) If a raiyat on whom an agreement has been served under sub-section (*2*) executes it, and within one month from the date of service files it in the office from which it issued, it shall take effect from the commencement of the agricultural year next following.

(*4*) When an agreement has been executed and filed by a raiyat under sub-section (*3*), the Court or officer in whose office it is so filed shall forthwith cause a notice of its being so executed and filed to be served on the landlord in the prescribed manner.

(*5*) If the raiyat does not execute the agreement and file it under sub-section (*3*), he shall be deemed for the purposes of this section to have refused to execute it.

(*6*) If a raiyat refuses to execute an agreement tendered to him under this section, and the landlord thereupon institutes a suit to eject him, the Court shall determine what rent is fair and equitable for the holding.

(*7*) If the raiyat agrees to pay the rent so determined, he shall be entitled to remain in occupation of his holding at that rent for a term of five years from the date of the agreement, but on the expiration of that term shall be liable to ejectment under the conditions mentioned in the last foregoing section, unless he has acquired a right of occupancy.

(8) If the raiyat does not agree to pay the rent so determined, the Court shall pass a decree for ejectment.

(9) In determining what rent is fair and equitable, the Court shall have regard to the rents generally paid by raiyats for land of a similar description and with like advantages in the same village.

(10) A decree for ejectment passed under this section shall take effect from the end of the agricultural year in which it is passed.

Explanation of "admitted to occupation."

47. Where a raiyat has been in occupation of land and a lease is executed with a view to a continuance of his occupation, he is not to be deemed to be admitted to occupation by that lease for the purposes of this chapter, notwithstanding that the lease may purport to admit him to occupation.

CHAPTER VII.

UNDER-RAIYATS.

Limit of rent recoverable from under-raiyats.

48. The landlord of an under-raiyat holding at a money-rent shall not be entitled to recover rent exceeding the rent which he himself pays by more than the following percentage of the same, (namely):—

(a) when the rent payable by the under-raiyat is payable under a registered lease or agreement—fifty per cent.; and

(b) in any other case—twenty-five per cent.

Restriction on ejectment of under-raiyats.

49. An under-raiyat shall not be liable to be ejected by his landlord, except—

(a) on the expiration of the term of a written lease;

(b) when holding otherwise than under a written lease, at the end of the agricultural year next following the year in which a notice to quit is served upon him by his landlord.

CHAPTER VIII.

GENERAL PROVISIONS AS TO RENT.

Rules and presumptions as to amount of rent.

Rules and presumptions as to fixity of rent.

50. (1) Where a tenure-holder or raiyat and his predecessors in interest have held at a rent or rate of rent which has not been changed from the time of the Permanent Settlement, the rent or rate of rent shall not be liable to be increased except on the ground of an alteration in the area of the tenure or holding.

Rules and presumptions as to amount of rent.

(2) If it is proved in any suit or other proceeding under this Act that either a tenure-holder or raiyat and his predecessors in interest have held at a rent or rate of rent which has not been changed during the twenty years immediately before the institution of the suit or proceeding, it shall be presumed, until the contrary is shown, that they have held at that rent or rate of rent from the time of the Permanent Settlement:

Provided that if it is required by or under any enactment that in any local area tenancies, or any classes of tenancies, at fixed rents or rates of rent shall be registered as such on, or before, a date specified by or under the enactment, the foregoing presumption shall not after that date apply to any tenancy or, as the case may be, to any tenancy of that class in that local area unless the tenancy has been so registered.

(3) The operation of this section, so far as it relates to land held by a raiyat, shall not be affected by the fact of the land having been separated from other land which formed with it a single holding, or amalgamated with other land into one holding.

(4) Nothing in this section shall apply to a tenure held for a term of years or determinable at the will of the landlord.

Presumption as to amount of rent and conditions of holding.

51. If a question arises as to the amount of a tenant's rent or the conditions under which he holds in any agricultural year, he shall be presumed, until the contrary is shown, to hold at the same rent and under the same conditions as in the last preceding agricultural year.

Alteration of rent on alteration of area.

Alteration of rent in respect of alteration in area.

52. (1) Every tenant shall— *Alteration of rent on alteration of area.*

(a) be liable to pay additional rent for all land proved by measurement to be in excess of the area for which rent has been previously paid by him, unless it is proved that the excess is due to the addition to the tenure or holding of land which having previously belonged to the tenure or holding was lost by diluvion or otherwise without any reduction of the rent being made, and

(b) be entitled to a reduction of rent in respect of any deficiency proved by measurement to exist in the area of his tenure or holding as compared with the area for which rent has been previously paid by him, unless it is proved that the deficiency is due to the loss of land which was added to the area of the tenure or holding by alluvion or otherwise, and that an addition has not been made to the rent in respect of the addition to the area.

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 53–57.*)

tion of alter- area.

(2) In determining the area for which rent has been previously paid, the Court shall, if so required by any party to the suit, have regard to—

(*a*) the origin and conditions of the tenancy, for instance, whether the rent was a consolidated rent for the entire tenure or holding;

(*b*) whether the tenant has been allowed to hold additional land in consideration of an addition to his total rent or otherwise with the knowledge and consent of the landlord;

(*c*) the length of time during which the tenancy has lasted without dispute as to rent or area; and

(*d*) the length of the measure used or in local use at the time of the origin of the tenancy as compared with that used or in local use at the time of the institution of the suit.

(3) In determining the amount to be added to the rent, the Court shall have regard to the rates payable by tenants of the same class for lands of a similar description and with similar advantages in the vicinity, and, in the case of a tenure-holder, to the profits to which he is entitled in respect of the rent of his tenure, and shall not in any case fix any rent which under the circumstances of the case is unfair or inequitable.

(4) The amount abated from the rent shall bear the same proportion to the rent previously payable as the diminution of the total yearly value of the tenure or holding bears to the previous total yearly value thereof, or, in default of satisfactory proof of the yearly value of the land lost, shall bear to the rent previously payable the same proportion as the diminution of area bears to the previous area of the tenure or holding.

Payment of rent.

nent of

53. Subject to agreement or established usage, a money-rent payable by a tenant shall be paid in four equal instalments falling due on the last day of each quarter of the agricultural year.

Instalments of rent.

54. (1) Every tenant shall pay each instalment of rent before sunset of the day on which it falls due.

Time and place for payment of rent.

(2) The payment shall, except in cases where a tenant is allowed under this Act to deposit his rent, be made at the landlord's village-office, or at such other convenient place as may be appointed in that behalf by the landlord:

Provided that the Local Government may from time to time make rules, either generally or for any specified local area, authorizing a tenant to pay his rent by postal money-order.

(3) Any instalment or part of an instalment of rent not duly paid at or before the time when it falls due shall be deemed an arrear.

Payme rent.

Appropriation of payments.

55. (1) When a tenant makes a payment on account of rent, he may declare the year or the year and instalment to which he wishes the payment to be credited, and the payment shall be credited accordingly.

(2) If he does not make any such declaration, the payment may be credited to the account of such year and instalment as the landlord thinks fit.

Receipts and accounts.

Recei accou

Tenant making payment to his landlord entitled to a receipt.

56. (1) Every tenant who makes a payment on account of rent to his landlord shall be entitled to obtain forthwith from the landlord a written receipt for the amount paid by him, signed by the landlord.

(2) The landlord shall prepare and retain a counterfoil of the receipt.

(3) The receipt and counterfoil shall specify such of the several particulars shown in the form of receipt given in Schedule II to this Act as can be specified by the landlord at the time of payment:

Provided that the Local Government may, from time to time, prescribe or sanction a modified form either generally or for any particular local area or class of cases.

(4) If a receipt does not contain substantially the particulars required by this section, it shall be presumed, until the contrary is shown, to be an acquittance in full of all demands for rent up to the date on which the receipt was given.

Tenant entitled to full discharge or statement of account at close of year.

57. (1) Where a landlord admits that all rent payable by a tenant to the end of the agricultural year has been paid, the tenant shall be entitled to receive from the landlord, free of charge, within three months after the end of the year, a receipt in full discharge of all rent falling due to the end of the year, signed by the landlord.

(2) Where the landlord does not so admit, the tenant shall be entitled, on paying a fee of four annas, to receive within three months after the end of the year a statement of account specifying the several particulars shown in the form of account given in Schedule II to this Act, or in such other form as may from time to time be prescribed by the Local Government either generally or for any particular local area or class of cases.

(3) The landlord shall prepare and retain a copy of the statement containing similar particulars.

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 58—63.*)

's and 's.

58. (*1*) If a landlord without reasonable cause refuses or neglects to deliver to a tenant a receipt containing the particulars prescribed by section 56 for any rent paid by the tenant, the tenant may, within three months from the date of payment, institute a suit to recover from him such penalty, not exceeding double the amount or value of that rent, as the Court thinks fit.

Penalties and fine for withholding receipts and statements of account and failing to keep counterparts.

(*2*) If a landlord without reasonable cause refuses or neglects to deliver to a tenant demanding the same either the receipt in full discharge or, if the tenant is not entitled to such a receipt, the statement of account for any year prescribed in section 57, the tenant may, within the next ensuing agricultural year, institute a suit to recover from him such penalty as the Court thinks fit, not exceeding double the aggregate amount or value of all rent paid by the tenant to the landlord during the year for which the receipt or account should have been delivered.

(*3*) If a landlord without reasonable cause fails to prepare and retain a counterfoil or copy of a receipt or statement as required by either of the said sections, he shall be punished with fine which may extend to fifty rupees.

59. (*1*) The Local Government shall cause to be prepared and kept for sale to landlords at all sub-divisional offices forms of receipts with counterfoils and of statements of account suitable for use under the foregoing sections.

Local Government to prepare forms of receipt and account.

(*2*) The forms may be sold in books with the leaves consecutively numbered or otherwise as the Local Government thinks fit.

60. Where rent is due to the proprietor, manager or mortgagee of an estate, the receipt of the person registered under the Land Registration Act, 1876, as proprietor, manager or mortgagee of that estate, or of his agent authorized in that behalf, shall be a sufficient discharge for the rent; and the person liable for the rent shall not be entitled to plead in defence to a claim by the person so registered that the rent is due to any third person.

Effect of receipt by registered proprietor, manager or mortgagee.

.C.) of

But nothing in this section shall affect any remedy which any such third person may have against the registered proprietor, manager or mortgagee.

Deposit of rent.

61. (*1*) In any of the following cases, namely:—

Application to deposit rent in Court.

(*a*) when a tenant tenders money on account of rent and the landlord refuses to receive it or refuses to grant a receipt for it;

(*b*) when a tenant bound to pay money on account of rent has reason to believe, owing to a tender having been refused or a receipt withheld on a previous occasion, that the person to whom his rent is payable will not be willing to receive it and to grant him a receipt for it; *Deposit of rent.*

(*c*) when the rent is payable to co-sharers jointly, and the tenant is unable to obtain the joint receipt of the co-sharers for the money, and no person has been empowered to receive the rent on their behalf; or

(*d*) when the tenant entertains a *bonâ fide* doubt as to who is entitled to receive the rent,

the tenant may present to the Court having jurisdiction to entertain a suit for the rent of his tenure or holding an application in writing for permission to deposit in the Court the full amount of the money then due.

(*2*) The application shall contain a statement of the grounds on which it is made; shall state—

in cases (*a*) and (*b*), the name of the person to whose credit the deposit is to be entered,

in case (*c*), the names of the sharers to whom the rent is due, or of so many of them as the tenant may be able to specify, and

in case (*d*), the names of the person to whom the rent was last paid and of the person or persons now claiming it;

shall be signed and verified, in the manner prescribed in section 52 of the Code of Civil Procedure, by the tenant, or, where he is not personally cognizant of the facts of the case, by some person so cognizant; and shall be accompanied by a fee of such amount as the Local Government, from time to time, by rule, directs. XIV of 18

62. (*1*) If it appears to the Court to which an application is made under the last foregoing section that the applicant is entitled under that section to deposit the rent, it shall receive the rent and give a receipt for it under the seal of the Court.

Receipt granted by Court for rent deposited to be a valid acquittance.

(*2*) A receipt given under this section shall operate as an acquittance for the amount of the rent payable by the tenant and deposited as aforesaid, in the same manner and to the same extent as if that amount of rent had been received—

in cases (*a*) and (*b*) of the last foregoing section, by the person specified in the application as the person to whose credit the deposit was to be entered;

in case (*c*) of that section, by the co-sharers to whom the rent is due; and

in case (*d*) of that section, by the person entitled to the rent.

63. (*1*) The Court receiving the deposit shall forthwith cause to be affixed in a conspicuous place at the Court-house a notification of the receipt thereof, containing a statement of all material particulars.

Notification of receipt of deposit.

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 64-69.*)

(2) If the amount of the deposit is not paid away under the next following section, within the period of fifteen days next following the date on which the notification is so affixed, the Court shall forthwith—

in cases (*a*) and (*b*) of section 61, cause a notice of the receipt of the deposit to be served, free of charge, on the person specified in the application as the person to whose credit the deposit was to be entered;

in case (*c*) of that section, cause a notice of the receipt of the deposit to be posted at the landlord's village-office or in some conspicuous place in the village in which the holding is situate; and

in case (*d*) of that section, cause a like notice to be served, free of charge, on every person who it has reason to believe claims or is entitled to the deposit.

Payment or refund of deposit.

64. (*1*) The Court may pay the amount of the deposit to any person appearing to it to be entitled to the same, or may, if it thinks fit, retain the amount pending the decision of a Civil Court as to the person so entitled.

(*2*) The payment may, if the Local Government so direct, be made by postal money-order.

(*3*) If no payment is made under this section before the expiration of three years from the date on which a deposit is made, the amount deposited may, in the absence of any order of a Civil Court to the contrary, be repaid to the depositor upon his application and on his returning the receipt given by the Court with which the rent was deposited.

(*4*) No suit or other proceeding shall be instituted against the Secretary of State for India in Council, or against any officer of the Government, in respect of anything done by a Court receiving a deposit under the foregoing sections; but nothing in this section shall prevent any person entitled to receive the amount of any such deposit from recovering the same from a person to whom it has been paid under this section.

Arrears of rent.

Liability to sale for arrears in case of permanent tenure, holding at fixed rates or occupancy-holding.

65. Where a tenant is a permanent tenure-holder, a raiyat holding at fixed rates or an occupancy-raiyat, he shall not be liable to ejectment for arrears of rent, but his tenure or holding shall be liable to sale in execution of a decree for the rent thereof, and the rent shall be a first charge thereon.

Ejectment for arrears in other cases.

66. (*1*) When an arrear of rent remains due from a tenant not being a permanent tenure-holder, a raiyat holding at fixed rates or an occupancy-raiyat, at the end of the Bengali year where that year prevails, or at the end of the month of Jeyt where the Fasli or Amli year prevails, the landlord may, whether he has obtained a decree for the recovery of the arrear or not, and whether he is entitled by the terms of any contract to eject the tenant for arrears or not, institute a suit to eject the tenant.

(*2*) In a suit for ejectment for an arrear of rent a decree passed in favour of the plaintiff shall specify the amount of the arrear and of the interest (if any) due thereon, and the decree shall not be executed if that amount and the costs of the suit are paid into Court within fifteen days from the date of the decree, or, when the Court is closed on the fifteenth day, on the day upon which the Court re-opens.

(*3*) The Court may for special reasons extend the period of fifteen days mentioned in this section.

Interest on arrears.

67. An arrear of rent shall bear simple interest at the rate of twelve per centum per annum from the expiration of that quarter of the agricultural year in which the instalment falls due to the institution of the suit.

Power to award damages on rent withheld without reasonable cause, or to defendant improperly sued for rent.

68. (*1*) If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the defendant has, without reasonable or probable cause, neglected or refused to pay the amount of rent due by him, the Court may award to the plaintiff, in addition to the amount decreed for rent and costs, such damages, not exceeding twenty-five per centum on the amount of rent decreed, as it thinks fit:

Provided that interest shall not be decreed when damages are awarded under this section.

(*2*) If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the plaintiff has instituted the suit without reasonable or probable cause, the Court may award to the defendant, by way of damages, such sum, not exceeding twenty-five per centum on the whole amount claimed by the plaintiff, as it thinks fit.

Produce-rents.

Order for appraising or dividing produce.

69. (*1*) Where rent is taken by appraisement or division of the produce,—

(*a*) if either the landlord or the tenant neglects to attend, either personally or by agent, at the proper time for making the appraisement or division, or

(*b*) if there is a dispute about the quantity, value or division of the produce,

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 70-75.*)

the Collector may, on the application of either party, and on his depositing such sum on account of expenses as the Collector may require, make an order appointing such officer as he thinks fit to appraise or divide the produce.

(*2*) The Collector may, without such an application, make the like order in any case where in the opinion of the District or Sub-divisional Magistrate the making of the order would be likely to prevent a breach of the peace.

(*3*) Where a Collector makes an order under this section, he may, by order, prohibit the removal of the produce until the appraisement or division has been effected.

Procedure where officer appointed.

70. (*1*) When a Collector appoints an officer under the last foregoing section, the Collector may, in his discretion, direct the officer to associate with himself any other persons as assessors, and may give him instructions regarding the number, qualifications and mode of selection of those assessors (if any), and the procedure to be followed in making the appraisement or division; and the officer shall conform to the instructions so given.

(*2*) The officer shall, before making an appraisement or division, give notice to the landlord and tenant of the time and place at which the appraisement or division will be made; but if either the landlord or the tenant fails to attend either personally or by agent, he may proceed *ex parte*.

(*3*) When the officer has made the appraisement or division, he shall submit a report of his proceedings to the Collector.

(*4*) The Collector shall consider the report, and, after giving the parties an opportunity of being heard and making such enquiry (if any) as he may think necessary, shall pass such order thereon as he thinks just.

(*5*) The Collector may, if he thinks fit, refer any question in dispute between the parties for the decision of a Civil Court, but, subject as aforesaid, his order shall be final and shall, on application to a Civil Court by the landlord or the tenant, be enforceable as a decree.

(*6*) Where the officer makes an appraisement, the appraisement papers shall be filed in the Collector's office.

Rights and liabilities as to possession of crop.

71. (*1*) Where rent is taken by appraisement of the produce, the tenant shall be entitled to the exclusive possession of the produce.

(*2*) Where rent is taken by division of the produce, the tenant shall be entitled to the exclusive possession of the whole produce until it is divided, but shall not be entitled to remove any portion of the produce from the threshing-floor at such a time or in such a manner as to prevent the due division thereof at the proper time. *Produce-rents.*

(*3*) In either case the tenant shall be entitled to cut and harvest the produce in due course of husbandry without any interference on the part of the landlord.

(*4*) If the tenant removes any portion of the produce at such a time or in such a manner as to prevent the due appraisement or division thereof at the proper time, the produce shall be deemed to have been as full as the fullest crop of the same description appraised in the neighbourhood on similar land for that harvest.

Liability for rent on change of landlord or after transfer of tenure or holding.

Tenant not liable to transferee of landlord's interest for rent paid to former landlord, without notice of the transfer.

72. (*1*) A tenant shall not, when his landlord's interest is transferred, be liable to the transferee for rent which became due after the transfer and was paid to the landlord whose interest was so transferred, unless the transferee has before the payment given notice of the transfer to the tenant. *Liability for rent on change of landlord or after transfer of tenure or holding.*

(*2*) Where there is more than one tenant paying rent to the landlord whose interest is transferred, a general notice from the transferee to the tenants published in the prescribed manner shall be a sufficient notice for the purposes of this section.

Liability for rent after transfer of occupancy-holding.

73. When an occupancy-raiyat transfers his holding without the consent of the landlord, the transferor and transferee shall be jointly and severally liable to the landlord for arrears of rent accruing due after the transfer, unless and until notice of the transfer is given to the landlord in the prescribed manner.

Illegal Cesses, &c.

Abwáb, &c., illegal.

74. All impositions upon tenants under the denomination of *abwáb*, *mahtut*, or other like appellations, in addition to the actual rent, shall be illegal, and all stipulations and reservations for the payment of such shall be void. *Illegal cesses, &c.*

Penalty for exaction by landlord from tenant of sum in excess of the rent payable.

75. Every tenant from whom, except under any special enactment for the time being in force, any sum of money or any portion of the produce of his land is exacted by his landlord in excess of the rent lawfully payable, may, within six months from the date of the exaction, institute a suit to recover from the landlord, in addition to the amount or value of what is so exacted, such sum by way of penalty as the Court thinks fit, not exceeding

two hundred rupees; or, when double the amount or value of what is so exacted exceeds two hundred rupees, not exceeding double that amount or value.

CHAPTER IX.

MISCELLANEOUS PROVISIONS AS TO LANDLORDS AND TENANTS.

Improvements.

ovements.

Definition of "improvement."

76. (*1*) For the purposes of this Act, the term "improvement," used with reference to a raiyat's holding, shall mean any work which adds to the value of the holding, which is suitable to the holding and consistent with the purpose for which it was let, and which, if not executed on the holding, is either executed directly for its benefit, or is, after execution, made directly beneficial to it.

(*2*) Until the contrary is shown, the following shall be presumed to be improvements within the meaning of this section:—

(*a*) the construction of wells, tanks, water-channels and other works for the storage, supply or distribution of water for the purposes of agriculture, or for the use of men and cattle employed in agriculture;

(*b*) the preparation of land for irrigation;

(*c*) the drainage, reclamation from rivers or other waters, or protection from floods, or from erosion or other damage by water, of land used for agricultural purposes, or waste-land which is culturable;

(*d*) the reclamation, clearance, enclosure or permanent improvement of land for agricultural purposes;

(*e*) the renewal or re-construction of any of the foregoing works, or alterations therein, or additions thereto; and

(*f*) the erection of a suitable dwelling-house for the raiyat and his family, together with all necessary out-offices.

(*3*) But no work executed by the raiyat of a holding shall be deemed to be an improvement for the purposes of this Act if it substantially diminishes the value of his landlord's property.

Right to make improvements in case of holding at fixed rates and occupancy-holding.

77. (*1*) Where a raiyat holds at fixed rates or has an occupancy-right in his holding, neither the raiyat nor his landlord shall, as such, be entitled to prevent the other from making an improvement in respect of the holding, except on the ground that he is willing to make it himself.

(*2*) If both the raiyat and his landlord wish to make the same improvement, the raiyat shall have the prior right to make it, unless it affects another holding or other holdings under the same landlord.

In

Collector to decide question as to right to make improvement, &c.

78. If a question arises between the raiyat and his landlord—

(*a*) as to the right to make an improvement, or

(*b*) as to whether a particular work is an improvement,

the Collector may, on the application of either party, decide the question, and his decision shall be final.

Right to make improvements in case of non-occupancy-holding.

79. (*1*) A non-occupancy-raiyat shall be entitled to construct, maintain and repair a well for the irrigation of his holding, with all works incidental thereto, and to erect a suitable dwelling-house for himself and his family, with all necessary out-offices; but shall not, except as aforesaid and as next hereinafter provided, be entitled to make any other improvement in respect of his holding without his landlord's permission.

(*2*) A non-occupancy-raiyat who would, but for the want of his landlord's permission, be entitled to make an improvement in respect of his holding, may, if he desires that the improvement be made, deliver, or cause to be delivered, to his landlord a request in writing calling upon him to make the improvement within a reasonable time; and, if the landlord is unable or neglects to comply with that request, may make the improvement himself.

Registration of landlords' improvements.

80. (*1*) A landlord may, by application to such Revenue-officer as the Local Government may appoint, register any improvement which he has lawfully made or which has been lawfully made at his expense or which he has assisted a tenant in making.

(*2*) The application shall be in such form, shall contain such information, and shall be verified in such manner, by local inquiry or otherwise, as the Local Government from time to time by rule directs.

(*3*) The officer receiving the application may reject it if it has not been made within twelve months—

(*a*) in the case of improvements made before the commencement of this Act—from the commencement of this Act;

(*b*) in the case of improvements made after the commencement of this Act—from the date of the completion of the work.

Bengal Tenancy Act.

(*Chapter IX.—Miscellaneous Provisions as to Landlords and Tenants.—Secs. 81—86.*)

81. (*1*) If any landlord or tenant of a holding desires that evidence relating to any improvement made in respect thereof be recorded, he may apply to a Revenue-officer, who shall thereupon, at a time and place of which notice shall be given to the parties, record the evidence, unless he considers that there are no reasonable grounds for making the application, or it is made to appear that the subject-matter thereof is under inquiry in a Civil Court.

Application to record evidence as to improvement.

(*2*) When any matter has been recorded under this section, the record thereof shall be admissible in evidence in any subsequent proceedings between the landlord and tenant or any persons claiming under them.

82. (*1*) Every raiyat who is ejected from his holding shall be entitled to compensation for improvements which have been made in respect thereof in accordance with this Act by him, or by his predecessor in interest, and for which compensation has not already been paid.

Compensation for raiyats' improvements.

(*2*) Whenever a Court makes a decree or order for the ejectment of a raiyat, it shall determine the amount of compensation (if any) due under this section to the raiyat for improvements, and shall make the decree or order of ejectment conditional on the payment of that amount to the raiyat.

(*3*) No compensation under this section for an improvement shall be claimable where the raiyat has made the improvement in pursuance of a contract or under a lease binding him, in consideration of some substantial advantage to be obtained by him, to make the improvement without compensation, and he has obtained that advantage.

(*4*) Improvements made by a raiyat between the 2nd day of March, 1883, and the commencement of this Act shall be deemed to have been made in accordance with this Act.

(*5*) The Local Government may, from time to time, by notification in the official Gazette, make rules requiring the Court to associate with itself, for the purpose of estimating the compensation to be awarded under this section for an improvement, such number of assessors as the Local Government thinks fit, and determining the qualifications of those assessors and the mode of selecting them.

83. (*1*) In estimating the compensation to be awarded under the last foregoing section for an improvement, regard shall be had—

Principle on which compensation is to be estimated.

(*a*) to the amount by which the value, or the produce, of the holding, or the value of that produce, is increased by the improvement;

(*b*) to the condition of the improvement, and the probable duration of its effects;

(*c*) to the labour and capital required for the making of such an improvement; *Improvements.*

(*d*) to any reduction or remission of rent or any other advantage given by the landlord to the raiyat in consideration of the improvement; and

(*e*) in the case of a reclamation or of the conversion of unirrigated into irrigated land, to the length of time during which the raiyat has had the benefit of the improvement at an unenhanced rent.

(*2*) When the amount of the compensation has been assessed, the Court may, if the landlord and raiyat agree, direct that, instead of being paid wholly in money, it shall be made wholly or partly in some other way.

Acquisition of land for building and other purposes.

84. A Civil Court may, on the application of the landlord of a holding, and on being satisfied that he is desirous of acquiring the holding or part thereof for some reasonable and sufficient purpose having relation to the good of the holding or of the estate in which it is comprised, including the use of the ground as building ground, or for any religious, educational or charitable purpose, *Acquisition of land for building and other purposes.*

Acquisition of land for building and other purposes.

and on being satisfied on the certificate of the Collector that the purpose is reasonable and sufficient,

authorise the acquisition thereof by the landlord upon such conditions as the Court may think fit, and require the tenant to sell his interest in the whole or such part of the holding to the landlord upon such terms as may be approved by the Court, including full compensation to the tenant.

Sub-letting.

85. (*1*) If a raiyat sub-lets otherwise than by a registered instrument, the sub-lease shall not be valid against his landlord unless made with the landlord's consent. *Sub-letting.*

Restrictions on sub-letting.

(*2*) A sub-lease by a raiyat shall not be admitted to registration if it purports to create a term exceeding nine years.

(*3*) Where a raiyat has, without the consent of his landlord, granted a sub-lease by an instrument registered before the commencement of this Act, the sub-lease shall not be valid for more than nine years from the commencement of this Act.

Surrender and abandonment.

86. (*1*) A raiyat not bound by a lease or other agreement for a fixed period may, at the end of any agricultural year, surrender his holding. *Surrender and abandonment.*

Surrender.

Bengal Tenancy Act.

(*Chapter IX.—Miscellaneous Provisions as to Landlords and Tenants.—Secs. 87-90.*)

...der ...andon-

(*2*) But, notwithstanding the surrender, the raiyat shall be liable to indemnify the landlord against any loss of the rent of the holding for the agricultural year next following the date of the surrender, unless he gives to his landlord, at least three months before he surrenders, notice of his intention to surrender.

(*3*) When a raiyat has surrendered his holding, the Court shall in the following cases for the purposes of sub-section (*2*) presume, until the contrary is shown, that such notice was so given, namely: —

(*a*) if the raiyat takes a new holding in the same village from the same landlord during the agricultural year next following the surrender;

(*b*) if the raiyat ceases, at least three months before the end of the agricultural year at the end of which the surrender is made, to reside in the village in which the surrendered holding is situate.

(*4*) The raiyat may, if he thinks fit, cause the notice to be served through the Civil Court within the jurisdiction of which the holding or any portion of it is situate.

(*5*) When a raiyat has surrendered his holding, the landlord may enter on the holding and either let it to another tenant or take it into cultivation himself.

(*6*) When a holding is subject to an incumbrance secured by a registered instrument, the surrender of the holding shall not be valid unless it is made with the consent of the landlord and the incumbrancer.

(*7*) Save as provided in the last foregoing sub-section, nothing in this section shall affect any arrangement by which a raiyat and his landlord may arrange for a surrender of the whole or a part of the holding.

87. (*1*) If a raiyat voluntarily abandons his residence without notice to his landlord and without arranging for payment of his rent as it falls due, and ceases to cultivate his holding either by himself or by some other person, the landlord may, at any time after the expiration of the agricultural year in which the raiyat so abandons and ceases to cultivate, enter on the holding and let it to another tenant or take it into cultivation himself.

Abandonment.

(*2*) Before a landlord enters under this section, he shall file a notice in the prescribed form in the Collector's office stating that he has treated the holding as abandoned and is about to enter on it accordingly; and the Collector shall cause the notice to be published in such manner as the Local Government, by rule, directs.

(*3*) When a landlord enters under this section, the raiyat shall be entitled to institute a suit for recovery of possession of the land at any time not later than the expiration of two years, or, in the case of a non-occupancy-raiyat, six months, from the date of the publication of the notice; and thereupon the Court may, on being satisfied that the raiyat did not voluntarily abandon his holding, order recovery of possession on such terms, if any, with respect to compensation to persons injured and payment of arrears of rent as to the Court may seem just.

Surre ... and a ... ment.

(*4*) Where the whole or part of a holding has been sub-let by a registered instrument, the landlord shall, before entering under this section on the holding, offer the whole holding to the sub-lessee for the remainder of the term of the sub-lease at the rent paid by the raiyat who has ceased to cultivate the holding, and on condition of the sub-lessee paying up all arrears due from that raiyat. If the sub-lessee refuses or neglects within a reasonable time to accept the offer, the landlord may avoid the sub-lease and may enter on the holding and let it to another tenant or cultivate it himself as provided in sub-sections (*1*) and (*2*).

Sub-division of tenancy.

88. A division of a tenure or holding, or distribution of the rent payable in respect thereof, shall not be binding on the landlord unless it is made with his consent in writing.

Sub ... of t...

Division of tenancy not binding on landlord without his consent.

Ejectment.

89. No tenant shall be ejected from his tenure or holding except in execution of a decree.

Eje...

No ejectment except in execution of decree.

Measurements.

90. (*1*) Subject to the provisions of this section and any contract, a landlord may, by himself, or by any person authorized by him in this behalf, enter on and measure all land comprised in his estate or tenure, other than land exempt from the payment of revenue.

Me... me...

Landlord's right to measure land.

(*2*) A landlord shall not, without the consent of the tenant, or the written permission of the Collector, be entitled to measure land more than once in ten years, except in the following cases (namely) :—

(*a*) where the area of the tenure or holding is liable, by reason of alluvion or diluvion, to vary from year to year, and the rent payable depends on the area;

(*b*) where the area under cultivation is liable to vary from year to year and the rent payable depends on the area under cultivation;

(*c*) where the landlord is a purchaser otherwise than by voluntary transfer and not more than two years have elapsed since the date of his entry under the purchase.

Bengal Tenancy Act.

(*Chapter IX.—Miscellaneous Provisions as to Landlords and Tenants.—Secs. 91-98.*)

surements. (3) The ten years shall be computed from the date of the last measurement, whether made before or after the commencement of this Act.

Power for Court to order tenant to attend and point out boundaries.

91. (1) Where a landlord desires to measure any land which he is entitled to measure under the last foregoing section, the Civil Court may, on the application of the landlord, make an order requiring the tenant to attend and point out the boundaries of the land.

(2) If the tenant refuses or neglects to comply with the order, a map or other record of the boundaries and measurements of the land, prepared under the direction of the landlord at the time when the tenant was directed to attend, shall be presumed to be correct until the contrary is shown.

Standard of measurement.

92. (1) Every measurement of land made by order of a Civil Court, or of a Revenue-officer, in any suit or proceeding between a landlord and tenant, shall be made by the acre, unless the Court or Revenue-officer directs that it be made by any other specified standard.

(2) If the rights of the parties are regulated by any local measure other than the acre, the acre shall be converted into the local measure for the purposes of the suit or proceeding.

(3) The Local Government may, after local enquiry, make rules declaring for any local area the standard or standards of measurement locally in use in that area, and every declaration so made shall be presumed to be correct until the contrary is shown.

Managers.

agers. Power to call upon co-owners to show cause why they should not appoint a common manager.

93. When any dispute exists between co-owners of an estate or tenure as to the management thereof, and in consequence there has ensued, or is likely to ensue,

(*a*) inconvenience to the public, or

(*b*) injury to private rights,

the District Judge may, on the application in case (*a*) of the Collector, and in case (*b*) of any one having an interest in the estate or tenure, direct a notice to be served on all the co-owners, calling on them to show cause why they should not appoint a common manager:

Provided that a co-owner of an estate or tenure shall not be entitled to apply under this section unless he is actually in possession of the interest he claims, and, if he is a co-owner of an estate, unless his name and the extent of his interest are registered under the Land Registration Act, 1876.

(B.C.) of

Power to order them to appoint a manager if cause is not shown.

94. If the co-owners fail to show cause as aforesaid within one month after service of a notice under the last foregoing section, the District Judge may make an order directing them to appoint a common manager, and a copy of the order shall be served on any co-owner who did not appear before it was made.

Managers.

Power to appoint manager if order is not obeyed.

95. If the co-owners do not, within such period, not being less than one month after the making of an order under the last foregoing section, as the District Judge may fix in this behalf, or, where the order has been served as directed by that section, within a like period after such service, appoint a common manager and report the appointment for the information of the District Judge, the District Judge may, unless it is shown to his satisfaction that there is a prospect of a satisfactory arrangement being made within a reasonable time,—

(*a*) direct that the estate or tenure be managed by the Court of Wards in any case in which the Court of Wards consents to undertake the management thereof; or

(*b*) in any case appoint a manager.

Power to nominate person to act in all cases under clause (*b*) of last section.

96. The Local Government may nominate a person for any local area to manage all estates and tenures within that local area for which it may be necessary to appoint a manager under clause (*b*) of the last foregoing section; and, when any person has been so nominated, no other person shall be appointed manager under that clause by the District Judge, unless in the case of any estate the Judge thinks fit to appoint one of the co-owners themselves as manager.

The Court of Wards Act, 1879, applicable to management by Court of Wards.

97. In any case in which the Court of Wards undertakes under section 95 the management of an estate or tenure, so much of the provisions of the Court of Wards Act, 1879, as relates to the management of immoveable property shall apply to the management.

IX (B.C.) of 1879.

Provisions applicable to manager.

98. (1) A manager appointed under section 95 may, if the District Judge thinks fit, be remunerated by a fixed salary or percentage of the money collected by him as manager, or partly in one way and partly in the other, as the District Judge from time to time directs.

(2) He shall give such security for the proper discharge of his duties as the District Judge directs.

(3) He shall, subject to the control of the District Judge, have, for the purposes of management, the same powers as the co-owners jointly might but for his appointment have exercised, and the co-owners shall not exercise any such power

Bengal Tenancy Act.

(Chapter X.—Record-of-rights and Settlement of Rents.—Secs. 99-104.)

(4) He shall deal with and distribute the profits in accordance with the orders of the District Judge.

(5) He shall keep regular accounts, and allow the co-owners or any of them to inspect and take copies of those accounts.

(6) He shall pass his accounts at such period and in such form as the District Judge may direct.

(7) He may make any application which the proprietors could make under section 103.

(8) He shall be removable by the order of the District Judge, and not otherwise.

Power to restore management to co-owners.

99. When an estate or tenure has been placed under the management of the Court of Wards, or a manager has been appointed for the same under section 95, the District Judge may at any time direct that the management of it be restored to the co-owners, if he is satisfied that the management will be conducted by them without inconvenience to the public or injury to private rights.

Power to make rules.

100. The High Court may, from time to time, make rules defining the powers and duties of managers under the foregoing sections.

CHAPTER X.

RECORD-OF-RIGHTS AND SETTLEMENT OF RENTS.

Power to order survey and preparation of record-of-rights.

101. (1) The Local Government may, in any case with the previous sanction of the Governor General in Council, and may, if it thinks fit, without such sanction in any of the cases next hereinafter mentioned, make an order directing that a survey be made, and a record-of-rights be prepared, in respect of the lands in a local area by a Revenue-officer.

(2) The cases in which an order may be made under this section without the previous sanction of the Governor General in Council are the following (namely):—

(a) where the landlord or a large proportion of the landlords or of the tenants applies for such an order and deposits, or gives security for, such amount, for the payment of expenses, as the Local Government directs;

(b) where the preparation of such a record is calculated to settle or avert a serious dispute existing or likely to arise between the tenants and their landlords generally;

(c) where the local area is comprised in an estate or tenure which belongs to or is managed by the Government or the Court of Wards; and

(d) where a settlement of revenue is being made in respect of the local area.

(3) A notification in the official Gazette of an order under this section shall be conclusive evidence that the order has been duly made.

Particulars to be recorded.

102. Where an order is made under the last foregoing section, the particulars to be recorded shall be specified in the order, and may include, either without or in addition to other particulars, some or all of the following, namely:—

(a) the name of each tenant;

(b) the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy-raiyat, non-occupancy-raiyat or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure;

(c) the situation, quantity and boundaries of the land held by him;

(d) the name of his landlord;

(e) the rent payable;

(f) the mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise;

(g) if the rent is a gradually increasing rent, the time at which, and the steps by which, it increases;

(h) the special conditions and incidents, if any, of the tenancy.

Power for Revenue-officer to record particulars on application of proprietor or tenure-holder.

103. On the application of a proprietor or tenure-holder, and on his depositing or giving security for the required amount for expenses, a Revenue-officer may, subject to and in accordance with rules made in this behalf by the Local Government, ascertain and record the particulars specified in the last foregoing section with respect to the estate or tenure or any part thereof.

Procedure as to recording or settling rents.

104. (1) When, in any proceeding under this chapter, it does not appear that the tenant is holding land in excess of or less than that for which he is paying rent, and neither the landlord nor the tenant applies for a settlement of rent, the officer shall record the rent payable by the tenant, and the land in respect of which the rent is payable.

(2) When it appears that a tenant is holding land in excess of, or less than, that for which he is

Bengal Tenancy Act.

(*Chapter X.—Record-of-rights and Settlement of Rents.—Secs. 105-112.*)

paying rent, or either the landlord or the tenant applies for a settlement of rent, or in any case under section 101, sub-section (*2*), clause (*d*), the officer shall settle a fair and equitable rent in respect of the land held by the tenant.

(*3*) In settling rents under this section, the officer shall presume, until the contrary is proved, that the existing rent is fair and equitable, and shall have regard to the rules laid down in this Act for the guidance of the Civil Court in increasing or reducing rents, as the case may be.

Publication of record.

105. (*1*) When the Revenue-officer has completed a record made under this chapter, he shall cause a draft thereof to be locally published in the prescribed manner and for the prescribed period, and shall receive and consider any objection which may be made to any entry therein during the period of publication.

(*2*) After the expiration of this period the Revenue-officer shall finally frame the record, and shall cause it to be locally published in the prescribed manner, and the publication shall be conclusive evidence that the record has been duly made under this chapter.

Procedure in case of dispute as to entries in record.

106. If at any time before the final publication of the record under the last foregoing section a dispute arises as to the correctness of any entry (not being an entry of a rent settled under this chapter), or as to the propriety of any omission, which the Revenue-officer proposes to make or has made therein or therefrom, the Revenue-officer shall hear and decide the dispute.

Procedure to be adopted by Revenue-officer.

107. In all proceedings for the settlement of rents under this chapter, and in all proceedings under the last foregoing section, the Revenue-officer shall, subject to rules made by the Local Government under this Act, adopt the procedure laid down in the Code of Civil Procedure for the trial of suits, and his decision in every such proceeding shall have the force of a decree.

V of 1882.

Appeals from decisions of Revenue-officers.

108. (*1*) The Local Government shall appoint one or more persons to be a Special Judge or Special Judges for the purpose of hearing appeals from the decisions of Revenue-officers under this chapter.

(*2*) An appeal shall lie to the Special Judge from the decision of a Revenue-officer under this chapter, and the provisions of the Code of Civil Procedure relating to appeals shall, as nearly as may be, apply to all such appeals.

V of 1882.

(*3*) Subject to the provisions of Chapter XLII of the Code of Civil Procedure, an appeal shall lie to the High Court from the decision of a Special Judge in any case under section 106 as if he were a Court subordinate to the High Court within the meaning of the first section of that chapter:

V of 1882.

Provided that, if in a second appeal the High Court alters the decision of the Special Judge in respect of any of the particulars with reference to which the rent of any tenure or holding has been settled, the Court may settle a new rent for the tenure or holding, but in so doing shall be guided by the rents of the other tenures or holdings of the same class comprised in the same record as ascertained or settled under section 104.

Undisputed entries in record to be presumptive evidence.

109. (*1*) Every record made under this chapter shall distinguish between the disputed and the undisputed entries therein.

(*2*) Every undisputed entry in the record shall be presumed to be correct until the contrary is proved.

Time at which settlement of rent is to take effect.

110. When any rent is settled under this chapter, the settlement shall take effect from the beginning of the agricultural year next after the final publication of the record.

Stay of proceedings in Civil Court during preparation of record.

111. When an order has been made under section 101,—

(*a*) a Civil Court shall not, until the final publication of the record, entertain a suit or application for the alteration of the rent or the determination of the status of any tenant in the area to which the order applies; and

(*b*) the High Court may, if it thinks fit, transfer to the Revenue-officer any proceedings pending in a Civil Court for the alteration of any such rent or for the determination of any of the matters specified or referred to in section 102.

Power to authorize a special settlement in special cases.

112. (*1*) The Local Government, with the previous sanction of the Governor General in Council, may, on being satisfied that the exercise of the powers hereinafter mentioned is necessary in the interests of public order or of the local welfare, invest a Revenue-officer acting under this chapter with the following powers or either of them, namely:—

(*a*) power to settle all rents;

(*b*) power, when settling rents, to reduce rents if in the opinion of the officer the maintenance of existing rents would on any ground, whether specified in this Act or not, be unfair or inequitable.

(*2*) The powers given under this section may be made exerciseable within a specified area either generally or with reference to specified cases or classes of cases.

(*3*) When the Local Government takes any action under this section, the settlement-record prepared by the Revenue-officer shall not take effect until it has been finally confirmed by the Governor General in Council.

Bengal Tenancy Act.

(*Chaper XI.—Record of Proprietors' Private Lands.—Secs. 113—120.*)
(*Chapter XII.—Distraint.—Sec. 121.*)

Period for which rents as settled are to remain unaltered.

113. When the rent of a tenure or holding is settled under this chapter, it shall not, except on the ground of a landlord's improvement or of a subsequent alteration in the area of the tenure or holding, be enhanced, in the case of a tenure or an occupancy-holding for fifteen years, and, in the case of a non-occupancy-holding, if the rent is settled in any case under section 112 or on the application of the landlord under section 104, for five years. The periods of fifteen and five years shall be counted from the date of the final publication of the record.

Expenses of proceedings under chapter.

114. Where an order is made under this chapter in any case except under section 101, sub-section (*2*), clause (*d*), the expenses incurred by the Government in carrying out the provisions of this chapter in any local area, or such part of those expenses as the Local Government may direct, shall be defrayed by the landlords and tenants of land in that local area, in such proportions as the Local Government, having regard to all the circumstances of each case, may determine; and the proportion of those expenses so to be defrayed by any person shall be recoverable by the Government from him as if it were an arrear of revenue due by him.

Presumption as to fixity of rent not to apply where record has been prepared.

115. When the particulars mentioned in section 102, clause (*b*), have been recorded under this chapter in respect of any tenancy, the presumption under section 50 shall not thereafter apply to that tenancy.

CHAPTER XI.

RECORD OF PROPRIETORS' PRIVATE LANDS.

Saving as to khámár land.

116. Nothing in Chapter V shall confer a right of occupancy in, and nothing in Chapter VI shall apply to, a proprietor's private lands known in Bengal as khámár, nij or nij-jot, and in Behar as zirát, nij, sír or kamat, where any such land is held under a lease for a term of years or under a lease from year to year.

Power for Government to order survey and record of proprietor's private lands.

117. The Local Government may, from time to time, make an order directing a Revenue-officer to make a survey and record of all the lands in a specified local area which are a proprietor's private lands within the meaning of the last foregoing section.

Power for Revenue-officer to record private land on application of proprietor or tenant.

118. In the case of any land alleged to be a proprietor's private land, on the application of the proprietor or of any tenant of the land, and on his depositing the required amount for expenses, a Revenue-officer may, subject to and in accordance with rules made in this behalf by the Local Government, ascertain and record whether the land is or is not a proprietor's private land.

Procedure for recording private land.

119. When a Revenue-officer proceeds under either of the two last foregoing sections, the provisions of sections 105 to 109, both inclusive, shall apply.

Rules for determination of proprietor's private land.

120. (*1*) The Revenue-officer shall record as a proprietor's private land—

(*a*) land which is proved to have been cultivated as khámár, zirát, sír, nij, nij-jot or kamat by the proprietor himself with his own stock or by his own servants or by hired labour for twelve continuous years immediately before the passing of this Act, and

(*b*) cultivated land which is recognized by village usage as proprietor's khámár, zirát, sír, nij, nij-jot or kamat.

(*2*) In determining whether any other land ought to be recorded as a proprietor's private land, the officer shall have regard to local custom, and to the question whether the land was before the second day of March, 1883, specifically let as proprietor's private land, and to any other evidence that may be produced; but shall presume that land is not a proprietor's private land until the contrary is shown.

(*3*) If any question arises in a Civil Court as to whether land is or is not a proprietor's private land, the Court shall have regard to the rules laid down in this section for the guidance of Revenue-officers.

CHAPTER XII.

DISTRAINT.

Cases in which an application for distraint may be made.

121. Where an arrear of rent is due to the landlord of a raiyát or under-raiyat, and has not been due for more than a year, and no security has been accepted therefor by the landlord, the landlord may, in addition to any other remedy to which he is entitled by law, present an application to the Civil Court requesting the Court to recover the arrear by distraining, while in the possession of the cultivator,—

(*a*) any crops or other products of the earth standing or ungathered on the holding;

(*b*) any crops or other products of the earth which have been grown on the holding and have been reaped or gathered and are deposited on the holding, or on a threshing-floor or place for treading out grain, or the like, whether in the fields or within a homestead:

Provided that an application shall not be made under this section—

(*1*) by a proprietor or manager as defined under the Land Registration Act, 1876, or a mortgagee of such a proprietor or manager, unless his name and the extent of his interest in the land in respect of which the arrear is due have been registered under the provisions of that Act; or

B.C.) of

(*2*) for the recovery of any sum in excess of the rent payable for the holding in the preceding agricultural year, unless that sum is payable under a written contract or in consequence of a proceeding under this Act or an enactment hereby repealed; or

(*3*) in respect of the produce of any part of the holding which the tenant has sub-let with the written consent of the landlord.

122. (*1*) Every application under the last foregoing section shall specify—

Form of application.

(*a*) the holding in respect of which the arrear is claimed, and the boundaries thereof, or such other particulars as may suffice for its identification;

(*b*) the name of the tenant;

(*c*) the period in respect of which the arrear is claimed;

(*d*) the amount of the arrear, with the interest, if any, claimed thereon, and, when an amount in excess of the rent payable by the tenant in the last preceding agricultural year is claimed, the contract, or proceeding, as the case may be, under which that amount is payable;

(*e*) the nature and approximate value of the produce to be distrained;

(*f*) the place where it is to be found, or such other particulars as may suffice for its identification; and

(*g*) if it is standing or ungathered, the time at which it is likely to be cut or gathered.

(*2*) The application shall be signed and verified in the manner prescribed by the Code of Civil Procedure for the signing and verification of plaints.

of 1882.

123. (*1*) The applicant shall, at the time of filing an application under the foregoing sections, file in Court such documentary evidence (if any) as he may consider necessary for the purposes of the application.

Procedure on receipt of application.

(*2*) The Court may, if it thinks fit, examine the applicant, and shall, with as little delay as possible, admit the application or reject it, or permit the applicant to furnish additional evidence in support of it.

(*3*) Where a Court cannot forthwith admit or reject an application under sub-section (*2*), it may, if it thinks fit, make an order prohibiting the removal of the produce specified in the application pending the execution of an order for distraining the same or the rejection of the application.

(*4*) When an order for distraining any produce is made under this section at a considerable time before the produce is likely to be cut or gathered, the Court may suspend the execution of the order for such time as it thinks fit, and may, if it thinks fit, make a further order prohibiting the removal of the produce pending the execution of the order for distraint.

124. If an application is admitted under the last foregoing section, the Court shall depute an officer to distrain the produce specified therein, or such portion of that produce as it thinks fit; and the officer shall proceed to the place where the produce is, and distrain the produce by taking charge of it himself or placing some other person in charge of it in his behalf, and publishing a notification of the distraint in accordance with rules to that effect to be made by the High Court:

Execution of order for distraint.

Provided that produce which from its nature does not admit of being stored shall not be distrained under this section at any time less than twenty days before the time when it would be fit for reaping or gathering.

125. (*1*) The distraining officer shall, at the time of making the distraint, serve on the defaulter a written demand for the arrear due, and the costs incurred in making the distraint, with an account exhibiting the grounds on which the distraint is made.

Service of demand and account.

(*2*) Where the distraining officer has reason to believe that a person other than the defaulter is the owner of the property distrained, he shall serve copies of the demand and account on that person likewise.

(*3*) The demand and account shall, if practicable, be served personally; but if a person on whom they are to be served absconds or conceals himself, or cannot otherwise be found, the officer shall affix copies of the demand and account on a conspicuous part of the outside of the house in which he usually resides.

126. (*1*) A distraint under this chapter shall not prevent any person from reaping, gathering or storing any produce, or doing any other act necessary for its due preservation.

Right to reap, &c., produce.

(*2*) If the person entitled to do so fails to do so at the proper time, the distraining officer shall cause any standing crops or ungathered products

distrained to be reaped or gathered when ripe, and stored in such granaries or other places as are commonly used for the purpose, or in some other convenient place in the neighbourhood, or shall do whatever else may be necessary for the due preservation of the same.

(3) In either case the distrained property shall remain in the charge of the distraining officer, or of some other person appointed by him in this behalf.

Sale proclamation to be issued unless demand is satisfied.

127. (1) Unless the demand, with all costs of the distraint, be immediately satisfied, the distraining officer shall issue a proclamation specifying the particulars of the property distrained and the demand for which it is distrained, and notifying that he will, at a place and on a day specified, not being less than three or more than seven days after the time of making the distraint, sell the distrained property by public auction:

Provided that when the crops or products distrained from their nature admit of being stored but have not yet been stored, the day of the sale shall be so fixed as to admit of their being made ready for storing before its arrival.

(2) The proclamation shall be stuck up on a conspicuous place in the village in which the land is situate for which the arrears of rent are claimed.

Place of sale.

128. The sale shall be held at the place where the distrained property is, or at the nearest place of public resort if the distraining officer is of opinion that it is likely to sell there to better advantage.

When produce may be sold standing.

129. (1) Crops or products which from their nature admit of being stored shall not be sold before they are reaped or gathered and are ready for storing.

(2) Crops or products which from their nature do not admit of being stored may be sold before they are reaped or gathered, and the purchaser shall be entitled to enter on the land by himself, or by any person appointed by him in this behalf, and do all that is necessary for the purpose of tending and reaping or gathering them.

Manner of sale.

130. The property shall be sold by public auction, in one or more lots as the officer holding the sale may think advisable; and if the demand, with the costs of distraint and sale, is satisfied by the sale of a portion of the property, the distraint shall be immediately withdrawn with respect to the remainder.

Postponement of sale.

131. If, on the property being put up for sale, a fair price (in the estimation of the officer holding the sale) is not offered for it, and if the owner of the property, or a person authorised to act in his behalf, applies to have the sale postponed till the next day, or (if a market is held at the place of sale) the next market-day, the sale shall be postponed until that day, and shall be then completed, whatever price may be offered for the property.

Payment of purchase-money.

132. The price of every lot shall be paid at the time of sale, or as soon thereafter as the officer holding the sale directs, and in default of such payment the property shall be put up again and sold.

Certificate to be given to purchaser.

133. When the purchase-money has been paid in full, the officer holding the sale shall give the purchaser a certificate describing the property purchased by him and the price paid.

Proceeds of sale how to be applied.

134. (1) From the proceeds of every sale of distrained property under this chapter, the officer holding the sale shall pay the costs of the distraint and sale, calculated on a scale of charges prescribed by rules to be made, from time to time, by the Local Government in this behalf.

(2) The remainder shall be applied to the discharge of the arrear for which the distress was made, with interest thereon up to the day of sale; and the surplus (if any) shall be paid to the person whose property has been sold.

Certain persons may not purchase.

135. Officers holding sales of property under this Act, and all persons employed by, or subordinate to, such officers, are prohibited from purchasing, either directly or indirectly, any property sold by such officers.

Procedure where demand is paid before the sale.

136. (1) If at any time after a distraint has been made under this chapter, and before the sale of the distrained property, the defaulter, or the owner of the distrained property where he is not the defaulter, deposits in the Court issuing the order of distraint, or in the hands of the distraining officer, the amount specified in the demand served under section 125, with all costs which may have been incurred after the service of the demand, the Court or officer, as the case may be, shall grant a receipt for the same and the distraint shall forthwith be withdrawn.

(2) When the distraining officer receives the deposit, he shall forthwith pay it into the Court.

(3) A receipt granted under this section to an owner of distrained property not being the defaulter shall afford a full protection to him against any subsequent claim for the arrears of rent on account of which the distraint was made.

(4) After the expiration of one month from the date of a deposit being made under this section,

Bengal Tenancy Act.

(*Chapter XII.—Distraint.—Secs. 137-142.*)

(*Chapter XIV.—Judicial Procedure.—Secs. 143-144.*)

the Court shall pay therefrom to the applicant for distraint the amount due to him, unless in the meanwhile the owner of the property distrained has instituted a suit against the applicant contesting the legality of the distraint and claiming compensation in respect of the same.

(5) A landlord shall not be deemed to have consented to his tenant's sub-letting the holding or any part thereof merely by reason of his having received an amount deposited under this section by an inferior tenant.

Amount paid by under-tenant for his lessor may be deducted from rent.

137. (1) When an inferior tenant, on his property being lawfully distrained under this chapter for the default of a superior tenant, makes any payment under the last foregoing section, he shall be entitled to deduct the amount of that payment from any rent payable by him to his immediate landlord, and that landlord, if he is not the defaulter, shall in like manner be entitled to deduct the amount so deducted from any rent payable by him to his immediate landlord, and so on until the defaulter is reached.

(2) Nothing in this section shall affect the right of an inferior tenant making a payment under the last foregoing section to institute a suit for the recovery from the defaulter of any portion of the amount paid which he has not deducted under this section.

Conflict between rights of superior and inferior landlords.

138. When land is sub-let, and any conflict arises under this chapter between the rights of a superior and of an inferior landlord who distrain the same property, the right of the superior landlord shall prevail.

Distraint of property which is under attachment.

139. When any conflict arises between an order for distraint issued under this chapter and an order issued by a Civil Court for the attachment or sale of the property which is the subject of the distraint, the order for distraint shall prevail; but, if the property is sold under that order, the surplus proceeds of the sale shall not be paid under section 134 to the owner of the property without the sanction of the Court by which the order of attachment or sale was issued.

Suit for compensation for wrongful distraint.

140. No appeal shall lie from any order passed by a Civil Court under this chapter; but any person whose property is distrained on an application made under section 121 in any case in which such an application is not permitted by that section may institute a suit against the applicant for the recovery of compensation.

Power for Local Government to authorise distraint in certain cases.

141. (1) When the Local Government is of opinion that in any local area or in any class of cases it would, by reason of the character of the cultivation or the habits of the cultivators, be impracticable for a landlord to realize his rent by an application under this chapter, to the Civil Court, it may, from time to time, by order, authorize the landlord to distrain, by himself or his agent, any produce for the distraint of which he would be entitled to apply under this chapter to the Civil Court:

Provided that every person distraining any produce under such authorization shall proceed in the manner prescribed by section 124, and shall forthwith give notice, in such form as the High Court may, by rule, prescribe, to the Civil Court having jurisdiction to entertain an application for distraining the produce, and that Court shall, with no avoidable delay, depute an officer to take charge of the produce distrained.

(2) When an officer of the Court has taken charge of any distrained produce under this section, the proceedings shall thereafter be conducted in all respects as if he had distrained it under section 124.

(3) The Local Government may at any time rescind any order made by it under this section.

Power for High Court to make rules.

142. The High Court may, from time to time, make rules consistent with this Act for regulating the procedure in all cases under this chapter.

CHAPTER XIII.

JUDICIAL PROCEDURE.

Power to modify Civil Procedure Code in its application to landlord and tenant suits.

143. (1) The High Court may, from time to time, with the approval of the Governor General in Council, make rules consistent with this Act declaring that any portions of the Code of Civil Procedure shall not apply to suits between landlord and tenant as such or to any specified classes of such suits, or shall apply to them subject to modifications specified in the rules.

(2) Subject to any rules so made, and subject also to the other provisions of this Act, the Code of Civil Procedure shall apply to all such suits. XIV of 1882.

Jurisdiction in proceedings under Act.

144. (1) The cause of action in all suits between landlord and tenant as such shall, for the purposes of the Code of Civil Procedure, be deemed to have arisen XIV of 1882. within the local limits of the jurisdiction of the Civil Court which would have jurisdiction to entertain a suit for the possession of the tenure or holding in connection with which the suit is brought.

(2) When under this Act a Civil Court is authorized to make an order on the application of a landlord or a tenant, the application shall be made to the Court which would have jurisdiction to entertain a suit for the possession of the tenure or holding in connection with which the application is brought.

f 1882

Special register of suits.

146. The particulars referred to in section 58 of the Code of Civil Procedure shall, in the case of such suits, instead of being entered in the register of civil suits prescribed by that section, be entered in a special register to be kept by each Civil Court, in such form as the Local Government may, from time to time, prescribe in this behalf.

of 1882.

Successive rent-suits.

147. Subject to the provisions of section 373 of the Code of Civil Procedure, where a landlord has instituted a suit against a raiyat for the recovery of any rent of his holding, the landlord shall not institute another suit against him for the recovery of any rent of that holding until after three months from the date of the institution of the previous suit.

Procedure in rent-suits.

148. The following rules shall apply to suits for the recovery of rent:—

(*a*) sections 121 to 127 (both inclusive), 129, 305, and 320 to 326 (both inclusive) of the Code of Civil Procedure shall not apply to any such suit:

of 1882.

(*b*) the plaint shall contain, in addition to the particulars specified in section 50 of the Code of Civil Procedure, a statement of the situation, designation, extent and boundaries of the land held by the tenant; or, where the plaintiff is unable to give the extent or boundaries, in lieu thereof a description sufficient for identification:

of 1882.

(*c*) the summons shall be for the final disposal of the suit, unless the Court is of opinion that the summons should be for the settlement of issues only:

(*d*) the service of the summons may, if the High Court by rule, either generally, or specially for any local area, so directs, be effected, either in addition to, or in substitution for, any other mode of service, by forwarding the summons by post in a letter addressed to the defendant and registered under Part III of the Indian Post Office Act, 1866;

of 1866.

(*g*) the Court may, when passing the decree, order on the oral application of the decree-holder the execution thereof, unless it is a decree for ejectment for arrears:

(*h*) notwithstanding anything contained in section 232 of the Code of Civil Procedure, an application for the execution of a decree for arrears obtained by a landlord shall not be made by an assignee of the decree unless the landlord's interest in the land has become and is vested in him.

Payment into Court of money admitted to be due to third person.

149. (*1*) When a defendant admits that money is due from him on account of rent, but pleads that it is due not to the plaintiff but to a third person, the Court shall, except for special reasons to be recorded in writing, refuse to take cognizance of the plea unless the defendant pays into Court the amount so admitted to be due.

(*2*) Where such a payment is made, the Court shall forthwith cause notice of the payment to be served on the third person.

(*3*) Unless the third person within three months from the receipt of the notice institutes a suit against the plaintiff and therein obtains an order restraining payment out of the money, it shall be paid out to the plaintiff on his application.

(*4*) Nothing in this section shall affect the right of any person to recover from the plaintiff money paid to him under sub-section (*3*).

Payment into Court of money admitted to be due to landlord.

150. When a defendant admits that money is due from him to the plaintiff on account of rent, but pleads that the amount claimed is in excess of the amount due, the Court shall, except for special reasons to be recorded in writing, refuse to take cognizance of the plea unless the defendant pays into Court the amount so admitted to be due.

Provision as to payment of portion of money.

151. When a defendant is liable to pay money into Court under either of the two last foregoing sections, if the Court thinks that there are sufficient reasons for so ordering, it may take cognizance of the defendant's plea on his paying into Court such reasonable portion of the money as the Court directs.

152. When a defendant pays money into Court under either of the said sections, the Court shall give the defendant a receipt, and the receipt so given shall operate as an acquittance in the same manner and to the same extent as if it had been given by the plaintiff or the third person as the case may be.

Court to grant receipt.

153. An appeal shall not lie from any decree or order passed, whether in the first instance or on appeal, in any suit instituted by a landlord for the recovery of rent where—

Appeals in rent-suits.

(*a*) the decree or order is passed by a District Judge, Additional Judge or Subordinate Judge, and the amount claimed in the suit does not exceed one hundred rupees, or

(*b*) the decree or order is passed by any other judicial officer specially empowered by the Local Government to exercise final jurisdiction under this section, and the amount claimed in the suit does not exceed fifty rupees;

unless in either case the decree or order has decided a question relating to title to land or to some interest in land as between parties having conflicting claims thereto, or a question of a right to enhance or vary the rent of a tenant, or a question of the amount of rent annually payable by a tenant:

Provided that the District Judge may call for the record of any case in which a judicial officer as aforesaid has passed a decree or order to which this section applies, if it appears that the judicial officer has exercised a jurisdiction not vested in him by law, or has failed to exercise a jurisdiction so vested, or has acted in the exercise of his jurisdiction illegally or with material irregularity; and may pass such order as the District Judge thinks fit.

154. A decree for enhancement of rent under this Act, if passed in a suit instituted in the first eight months of an agricultural year, shall ordinarily take effect on the commencement of the agricultural year next following; and, if passed in a suit instituted in the last four months of the agricultural year, shall ordinarily take effect on the commencement of the agricultural year next but one following; but nothing in this section shall prevent the Court from fixing, for special reasons, a later date from which any such decree shall take effect.

Date from which decree for enhancement takes effect.

155. (*1*) A suit for the ejectment of a tenant, on the ground—

Relief against forfeitures.

(*a*) that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or

(*b*) that he has broken a condition on breach of which he is, under the terms of a contract between him and the landlord, liable to ejectment,

shall not be entertained unless the landlord has served, in the prescribed manner, a notice on the tenant specifying the particular misuse or breach complained of, and, where the misuse or breach is capable of remedy, requiring the tenant to remedy the same, and, in any case, to pay reasonable compensation for the misuse or breach, and the tenant has failed to comply within a reasonable time with that request.

(*2*) A decree passed in favour of a landlord in any such suit shall declare the amount of compensation which would reasonably be payable to the plaintiff for the misuse or breach, and whether, in the opinion of the Court, the misuse or breach is capable of remedy, and shall fix a period during which it shall be open to the defendant to pay that amount to the plaintiff, and, where the misuse or breach is declared to be capable of remedy, to remedy the same.

(*3*) The Court may, from time to time, for special reasons, extend a period fixed by it under sub-section (*2*).

(*4*) If the defendant, within the period or extended period (as the case may be) fixed by the Court under this section, pays the compensation mentioned in the decree, and, where the misuse or breach is declared by the Court to be capable of remedy, remedies the misuse or breach to the satisfaction of the Court, the decree shall not be executed.

156. The following rules shall apply in the case of every raiyat ejected from a holding:—

Rights of ejected raiyats in respect of crops and land prepared for sowing.

(*a*) when the raiyat has, before the date of his ejectment, sown or planted crops in any land comprised in the holding, he shall be entitled, at the option of the landlord, either to retain possession of that land and to use it for the purpose of tending and gathering in the crops, or to receive from the landlord the value of the crops as estimated by the Court executing the decree for ejectment;

(*b*) when the raiyat has, before the date of his ejectment, prepared for sowing any land comprised in his holding, but has not sown or planted crops in that land, he shall be entitled to receive from the landlord the value of the labour and capital expended by him in so preparing the land, as estimated by the Court executing the decree for ejectment, together with reasonable interest on that value;

(*c*) but a raiyat shall not be entitled to retain possession of any land or receive any sum in respect thereof under this section where, after the commencement of pro-

ceedings by the landlord for his ejectment, he has cultivated or prepared the land contrary to local usage;

(*d*) if the landlord elects under this section to allow a raiyat to retain possession of the land, the raiyat shall pay to the landlord, for the use and occupation of the land during the period for which he is allowed to retain possession of the same, such rent as the Court executing the decree for ejectment may deem reasonable.

Power for Court to fix fair rent as alternative to ejectment.

157. When a plaintiff institutes a suit for the ejectment of a trespasser he may, if he thinks fit, claim as alternative relief that the defendant be declared liable to pay for the land in his possession a fair and equitable rent to be determined by the Court, and the Court may grant such relief accordingly.

Application to determine incidents of tenancy.

158. (*1*) The Court having jurisdiction to determine a suit for the possession of land may, on the application of either the landlord or the tenant of the land, determine all or any of the following matters, (namely) :—

(*a*) the situation, quantity and boundaries of the land;

(*b*) the name and description of the tenant thereof (if any);

(*c*) the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy-raiyat, non-occupancy-raiyat, or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not and whether his rent is liable to enhancement during the continuance of his tenure; and

(*d*) the rent payable by him at the time of the application.

(*2*) If, in the opinion of the Court, any of these matters cannot be satisfactorily determined without a local inquiry, the Court may direct that a local inquiry be held under Chapter XXV of the Code of Civil Procedure by such Revenue-officer as the Local Government may authorize in that behalf by rule made under section 392 of the said Code.

V of 1882.

(*3*) The order on any application under this section shall have the effect of, and be subject to the like appeal as, a decree.

CHAPTER XIV.

SALE FOR ARREARS UNDER DECREE.

General powers of purchaser as to avoidance of incumbrances.

159. Where a tenure or holding is sold in execution of a decree for arrears due in respect thereof, the purchaser shall take subject to the interests defined in this chapter as "protected interests", but with power to annul the interests defined in this chapter as "incumbrances":

Provided as follows :—

(*a*) a registered and notified incumbrance within the meaning of this chapter shall not be so annulled except in the case hereinafter mentioned in that behalf;

(*b*) the power to annul shall be exercisable only in manner by this chapter directed.

Protected interests.

160. The following shall be deemed to be protected interests within the meaning of this chapter :—

(*a*) any under-tenure existing from the time of the Permanent Settlement;

(*b*) any under-tenure recognized by the settlement-proceedings of any current temporary settlement as a tenure at a rent fixed for the period of that settlement;

(*c*) any lease of land whereon dwelling-houses, manufactories or other permanent buildings have been erected, or permanent gardens, plantations, tanks, canals, places of worship or burning or burying grounds have been made;

(*d*) any right of occupancy;

(*e*) the right of a non-occupancy-raiyat to hold for five years at a rent fixed under Chapter VI by a Court, or under Chapter X by a Revenue-officer;

(*f*) any right conferred on an occupancy-raiyat to hold at a rent which was a fair and reasonable rent at the time the right was conferred; and

(*g*) any right or interest which the landlord at whose instance the tenure or holding is sold, or his predecessor in title, has expressly and in writing given the tenant for the time being permission to create.

Meaning of "incumbrance" and "registered and notified incumbrance."

161. For the purposes of this chapter—

(*a*) the term "incumbrance", used with reference to a tenancy, means any lien, sub-tenancy, easement or other right or interest created by the tenant on his tenure or holding or in limitation of his own interest therein, and not being a protected interest as defined in the last foregoing section;

(*b*) the term "registered and notified incumbrance", used with reference to a tenure or holding sold or liable to sale in execution of a decree for an arrear of rent due in respect thereof, means an incumbrance created by a registered instrument of which a copy has, not less than three months before the accrual of the arrear, been served on the landlord in manner hereinafter provided.

Application for sale of tenure or holding.

162. When a decree has been passed for an arrear of rent due for a tenure or holding, and the decree-holder applies under section 235 of the Code of Civil Procedure for the attach-

ment and sale of the tenure or holding in execution of the decree, he shall produce a statement showing the parganá, estate and village in which the land comprised in the tenure or holding is situate, the yearly rent payable for the same and the total amount recoverable under the decree.

1882. **163.** (*1*) Notwithstanding anything contained in the Code of Civil Procedure, when the decree-holder makes the application mentioned in the last foregoing section, the Court shall, if under section 245 of the said Code it admits the application and orders execution of the decree as applied for, issue simultaneously the order of attachment and the proclamation required by section 287 of the said Code.

Order of attachment and proclamation of sale to be issued simultaneously.

(*2*) The proclamation shall, in addition to stating and specifying the particulars mentioned in section 287 of the said Code, announce—

(*a*) in the case of a tenure or a holding of a raiyat holding at fixed rates, that the tenure or holding will first be put up to auction subject to the registered and notified incumbrances, and will be sold subject to those incumbrances if the sum bid is sufficient to liquidate the amount of the decree and costs, and that otherwise it will, if the decree-holder so desires, be sold on a subsequent day, of which due notice will be given, with power to annul all incumbrances; and

(*b*) in the case of an occupancy-holding, that the holding will be sold with power to annul all incumbrances.

(*3*) The proclamation shall, besides being made in the manner prescribed by section 289 of the said Code, be published by fixing up a copy thereof in a conspicuous place on the land comprised in the tenure or holding ordered to be sold, and shall also be published in such manner as the Local Government may, from time to time, direct in this behalf.

(*4*) Notwithstanding anything contained in section 290 of the said Code, the sale shall not, without the consent in writing of the judgment-debtor, take place until after the expiration of at least thirty days, calculated from the date on which the copy of the proclamation has been fixed up on the land comprised in the tenure or holding ordered to be sold.

164. (*1*) When a tenure or a holding at fixed rates has been advertised for sale under the last foregoing section, it shall be put up to auction, subject to registered and notified incumbrances; and, if the bidding reaches a sum sufficient to liquidate the amount of the decree and costs, including the costs of sale, the tenure or holding shall be sold subject to such incumbrances.

Sale of tenure or holding subject to registered and notified incumbrances, and effect thereof.

(*2*) The purchaser at a sale under this section may, in manner provided by section 167, and not otherwise, annul any incumbrance upon the tenure or holding not being a registered and notified incumbrance.

165. (*1*) If the bidding for a tenure or a holding at fixed rates put up to auction under the last foregoing section does not reach a sum sufficient to liquidate the amount of the decree and costs as aforesaid, and if the decree-holder thereupon desires that the tenure or holding be sold with power to avoid all incumbrances, the officer holding the sale shall adjourn the sale and make a fresh proclamation under section 289 of the Code of Civil Procedure, announcing that the tenure or holding will be put up to auction and sold with power to avoid all incumbrances upon a future day specified therein, not less than fifteen or more than thirty days from the date of the postponement; and upon that day the tenure or holding shall be put up to auction and sold with power to avoid all incumbrances. XIV of 1882.

Sale of tenure or holding with power to avoid all incumbrances, and effect thereof.

(*2*) The purchaser at a sale under this section may, in manner provided by section 167, and not otherwise, annul any incumbrance on the tenure or holding.

166. (*1*) When an occupancy-holding has been advertised for sale under section 163, it shall be put up to auction and sold with power to avoid all incumbrances.

Sale of occupancy-holding with power to avoid all incumbrances, and effect thereof.

(*2*) The purchaser at a sale under this section may, in manner provided by the next following section, and not otherwise, annul any incumbrance on the holding.

167. (*1*) A purchaser having power to annul an incumbrance under any of the foregoing sections and desiring to annul the same, may, within one year from the date of the sale or the date on which he first has notice of the incumbrance, whichever is later, present to the Collector an application in writing, requesting him to serve on the incumbrancer a notice declaring that the incumbrance is annulled.

Procedure for annulling incumbrances under the foregoing sections.

(*2*) Every such application must be accompanied by such fee for the service of the notice as the Board of Revenue may fix in this behalf.

(*3*) When an application for service of a notice is made to the Collector in manner prescribed by this section, he shall cause the notice to be served in compliance therewith, and the incumbrance shall be deemed to be annulled from the date on which it is so served.

(*4*) When a tenure or holding is sold in execution of a decree for arrears due in respect thereof, and there is on the tenure or holding a protected interest of the kind specified in section 160, clause (*c*), the purchaser may, if he has power under this chapter to avoid all incumbrances, sue to enhance the rent of the land which is the subject of the protected interest. On proof that the land is held at a rent which was not at the time the lease was granted a fair rent, the Court may enhance the rent to such amount as appears to be fair and equitable.

This sub-section shall not apply to land which has been held for a term exceeding twelve years at a fixed rent equal to the rent of good arable land.

Bengal Tenancy Act.

(*Chapter XIV.—Sale for Arrears under Decree.—Secs. 168-171.*)

Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.

168. (*1*) The Local Government may, from time to time, by notification in the official Gazette, direct that occupancy-holdings or any specified class of occupancy-holdings in any local area put up for sale in execution of decrees for rent due on them shall, before being put up with power to avoid all incumbrances, be put up subject to registered and notified incumbrances, and may by like notification rescind any such direction.

(*2*) While any such direction remains in force in respect of any local area, all occupancy-holdings, or, as the case may be, occupancy-holdings of the specified class in that local area, shall, for the purposes of sale under the foregoing sections of this chapter, be treated in all respects as if they were tenures.

Rules for disposal of the sale-proceeds.

169. (*1*) In disposing of the proceeds of a sale under this chapter, the following rules, instead of those prescribed by section 295 of the Code of Civil Procedure, shall be observed, that is to say:— XIV of 1882.

(*a*) there shall first be paid to the decree-holder the costs incurred by him in bringing the tenure or holding to sale;

(*b*) there shall, in the next place, be paid to the decree-holder the amount due to him under the decree in execution of which the sale was made;

(*c*) if there remains a balance after these sums have been paid, there shall be paid to the decree-holder therefrom any rent which may have fallen due to him in respect of the tenure or holding between the institution of the suit and the date of the sale;

(*d*) the balance (if any) remaining after the payment of the rent mentioned in clause (*c*) shall, upon the expiration of two months from the confirmation of the sale, be paid to the judgment-debtor upon his application.

(*2*) If the judgment-debtor disputes the decree-holder's right to receive any sum on account of rent under clause (*c*), the Court shall determine the dispute, and the determination shall have the force of a decree.

Tenure or holding to be released from attachment only on payment into Court of amount of decree with costs, or on confession of satisfaction by decree-holder.

170. (*1*) Sections 278 to 283 (both inclusive) of the Code of Civil Procedure shall not apply to a tenure or holding attached in execution of a decree for arrears due thereon. XIV of 1882.

(*2*) When an order for the sale of a tenure or holding in execution of such a decree has been made, the tenure or holding shall not be released from attachment unless, before it is knocked down to the auction-purchaser, the amount of the decree, including the costs decreed, together with the costs incurred in order to the sale, is paid into Court, or the decree-holder makes an application for the release of the tenure or holding on the ground that the decree has been satisfied out of Court.

(*3*) The judgment-debtor or any person having in the tenure or holding any interest voidable on

Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the tenure or holding.

171. (*1*) When any person having, in a tenure or holding advertised for sale under this chapter, an interest which would be avoidable upon the sale, pays into Court the amount requisite to prevent the sale,—

(*a*) the amount so paid by him shall be deemed to be a debt bearing interest at twelve per centum per annum and secured by a mortgage of the tenure or holding to him;

(*b*) his mortgage shall take priority of every other charge on the tenure or holding other than a charge for arrear of rent; and

(*c*) he shall be entitled to possession of the tenure or holding as mortgagee of the tenant, and to retain possession of it as such until the debt, with the interest due thereon, has been discharged.

(*2*) Nothing in this section shall affect any other remedy to which any such person would be entitled.

Inferior tenant paying into Court may deduct from rent.

172. When a tenure or holding is advertised for sale under this chapter in execution of a decree against a superior tenant defaulting, and an inferior tenant, whose interest would be voidable upon the sale, pays money into Court in order to prevent the sale, he may, in addition to any other remedy provided for him by law, deduct the whole or any portion of the amount so paid from any rent payable by him to his immediate landlord; and that landlord, if he is not the defaulter, may in like manner deduct the amount so deducted from any rent payable by him to his immediate landlord, and so on until the defaulter is reached.

Decree-holder may bid at sale; judgment-debtor may not.

173. (*1*) Notwithstanding anything contained in section 294 of the Code of Civil Procedure, the holder of a decree in execution of which a tenure or holding is sold under this chapter may, without the permission of the Court, bid for or purchase the tenure or holding.

(*2*) The judgment-debtor shall not bid for or purchase a tenure or holding so sold.

(*3*) When a judgment-debtor purchases by himself or through another person a tenure or holding so sold, the Court may, if it thinks fit, on the application of the decree-holder or any other person interested in the sale, by order set aside the sale, and the costs of the application and order, and any deficiency of price which may happen on the re-sale and all expenses attending it, shall be paid by the judgment-debtor.

Application by judgment-debtor to set aside sale.

174. (*1*) Where a tenure or holding is sold for an arrear of rent due thereon, then, at any time within thirty days from the date of sale, the judgment-debtor may apply to have the sale set aside, on his depositing in Court, for pay-

under the decree with costs, and, for payment to the purchaser, a sum equal to five per centum of the purchase-money.

(2) If such deposit is made within the thirty days, the Court shall pass an order setting aside the sale, and the provisions of section 315 of the
882. Code of Civil Procedure shall apply in the case of a sale so set aside:

Provided that, if a judgment-debtor applies un-
882. der section 311 of the Code of Civil Procedure to set aside the sale of his tenure or holding, he shall not be entitled to make an application under this section.

882. (3) Section 313 of the Code of Civil Procedure shall not apply to any sale under this chapter.

Registration of certain instruments creating incumbrances.

175. Notwithstanding anything contained in
77. Part IV of the Indian Registration Act, 1877, an instrument creating an incumbrance upon any tenure or holding which has been executed before the commencement of this Act, and is not required by section 17 of the said Registration Act to be registered, shall be accepted for registration under that Act if it is presented for that purpose to the proper officer within one year from the commencement of this Act.

Notification of incumbrances to landlord.

176. Every officer who has, whether before or after the passing of this Act, registered an instrument executed by a tenant of a tenure or holding and creating an incumbrance on the tenure or holding, shall, at the request of the tenant or of the person in whose favour the incumbrance is created, and on payment by him of such fee as the Local Government may fix in this behalf, notify the incumbrance to the landlord by causing a copy of the instrument to be served on him in the prescribed manner.

Power to create incumbrances not extended.

177. Nothing contained in this chapter shall be deemed to enable a person to create an incumbrance which he could not otherwise lawfully create.

CHAPTER XV.

CONTRACT AND CUSTOM.

Restrictions on exclusion of Act by agreement.

178. (1) Nothing in any contract between a landlord and a tenant made before or after the passing of this Act—

(a) shall bar in perpetuity the acquisition of an occupancy-right in land, or

(b) shall take away an occupancy-right in existence at the date of the contract, or

(c) shall entitle a landlord to eject a tenant otherwise than in accordance with the provisions of this Act, or

(d) shall take away or limit the right of a tenant, as provided by this Act, to make improvements and claim compensation for them.

(2) Nothing in any contract made between a landlord and a tenant since the 15th day of July, 1880, and before the passing of this Act shall prevent a raiyat from acquiring in accordance with this Act an occupancy-right in land.

(3) Nothing in any contract made between a landlord and a tenant after the passing of this Act shall—

(a) prevent a raiyat from acquiring in accordance with this Act an occupancy-right in land;

(b) take away or limit the right of an occupancy-raiyat to use land as provided by section 23;

(c) take away the right of a raiyat to surrender his holding in accordance with section 86;

(d) take away the right of a raiyat to transfer or bequeath his holding in accordance with local usage;

(e) take away the right of an occupancy-raiyat to sub-let subject to and in accordance with the provisions of this Act;

(f) take away the right of a raiyat to apply for a reduction of rent under section 38 or section 52;

(g) take away the right of a landlord or a tenant to apply for a commutation of rent under section 40; or

(h) affect the provisions of section 67 relating to interest payable on arrears of rent:

Provided as follows:—

(i) nothing in this section shall affect the terms or conditions of a lease granted *bonâ fide* for the reclamation of waste land, except that, where, on or after the expiration of the term created by the lease, the lessee would under Chapter V be entitled to an occupancy-right in the land comprised in the lease, nothing in the lease shall prevent him from acquiring that right;

(ii) when a landlord has reclaimed waste land by his own servants or hired labourers, and subsequently lets the same or a part thereof to a raiyat, nothing in this Act shall affect the terms of any contract whereby a raiyat is prevented from acquiring an occupancy-right in the land or part during a period of thirty years from the date on which the land or part is first let to a raiyat;

(iii) nothing in this section shall affect the terms or conditions of any contract for the temporary cultivation of orchard land with agricultural crops.

Permanent mukarrarí leases.

179. Nothing in this Act shall be deemed to prevent a proprietor or a holder of a permanent tenure in a permanently-settled area from granting a permanent mukarrarí lease on any terms agreed on between him and his tenant.

Bengal Tenancy Act.

(Chapter XV.—Contract and Custom.—Secs. 180-183.)

(Chapter XVI.—Limitation. Chapter XVII.—Supplemental.—Secs. 184-187.)

Útbandi, chur and dearah lands.

180. (*1*) Notwithstanding anything in this Act, a raiyat—

(*a*) who in any part of the country where the custom of útbandi prevails, holds land ordinarily let under that custom and for the time being let under that custom, or

(*b*) who holds land of the kind known as chur or dearah,

shall not acquire a right of occupancy—

in case (*a*), in land ordinarily held under the custom of útbandi and for the time being held under that custom, or

in case (*b*), in the chur or dearah land,

until he has held the land in question for twelve continuous years; and, until he acquires a right of occupancy in the land, he shall be liable to pay such rent for his holding as may be agreed on between him and his landlord.

(*2*) Chapter VI shall not apply to raiyats holding land under the custom of útbandi in respect of land held by them under that custom.

(*3*) The Collector may, on the application of either the landlord or the tenant or on a reference from the Civil Court, declare that any land has ceased to be chur or dearah land within the meaning of this section, and thereupon all the provisions of this Act shall apply to the land.

Saving as to service-tenures.

181. Nothing in this Act shall affect any incident of a ghátwálí or other service-tenure, or, in particular, shall confer a right to transfer or bequeath a service-tenure which, before the passing of this Act, was not capable of being transferred or bequeathed.

Homesteads.

182. When a raiyat holds his homestead otherwise than as part of his holding as a raiyat, the incidents of his tenancy of the homestead shall be regulated by local custom or usage, and, subject to local custom or usage, by the provisions of this Act applicable to land held by a raiyat.

Saving of custom.

183. Nothing in this Act shall affect any custom, usage or customary right not inconsistent with, or not expressly or by necessary implication modified or abolished by, its provisions.

Illustrations.

(1) A usage under which a raiyat is entitled to sell his holding without the consent of his landlord is not inconsistent with, and is not expressly or by necessary implication modified or abolished by, the provisions of this Act. That usage, accordingly, wherever it may exist, will not be affected by this Act.

(2) The custom or usage that an under-raiyat should, under certain circumstances, acquire a right of occupancy is not inconsistent with, and is not expressly or by necessary implication modified or abolished by, the provisions of this Act. That custom or usage, accordingly, wherever it exists, will not be affected by this Act.

CHAPTER XVI.

LIMITATION.

Limitation in suits, appeals and applications in Schedule III.

184. (*1*) The suits, appeals and applications specified in Schedule III annexed to this Act shall be instituted and made within the time prescribed in that schedule for them respectively; and every such suit or appeal instituted, and application made, after the period of limitation so prescribed, shall be dismissed, although limitation has not been pleaded.

(*2*) Nothing in this section shall revive the right to institute any suit or appeal or make any application which would have been barred by limitation if it had been instituted or made immediately before the commencement of this Act.

Portions of the Indian Limitation Act not applicable to such suits, &c.

185. (*1*) Sections 7, 8 and 9 of the Indian Limitation Act, 1877, shall not apply to the suits and applications mentioned in the last foregoing section.

(*2*) Subject to the provisions of this chapter, the provisions of the Indian Limitation Act, 1877, shall apply to all suits, appeals and applications mentioned in the last foregoing section.

CHAPTER XVII.

SUPPLEMENTAL.

Penalties.

Penalties for illegal interference with produce.

186. (*1*) If any person, otherwise than in accordance with this Act or some other enactment for the time being in force,—

(*a*) distrains or attempts to distrain the produce of a tenant's holding, or

(*b*) resists a distraint duly made under this Act or forcibly or clandestinely removes any property duly distrained under this Act, or

(*c*) except with the authority or consent of the tenant, prevents or attempts to prevent the reaping, gathering, storing, removing or otherwise dealing with any produce of holding,

he shall be deemed to have committed crimin trespass within the meaning of the Indian Pen Code.

(*2*) Any person who abets within the meani of the Indian Penal Code the doing of any mentioned in sub-section (*1*), shall be deemed have abetted the commission of criminal trespa within the meaning of that Code.

Agents and representatives of landlords.

Power for landlord to act through agent.

187. (*1*) Any appearance, application or act, before or to any Court or thority, required or authoried by this Act to be made done by a landlord, may, unless the Court or auth ity otherwise directs, be made or done also by agent empowered in this behalf by a written auth ity under the hand of the landlord.

Bengal Tenancy Act.

(*Chapter XVII.—Supplemental.—Secs. 188-194.*)

and to land-

(*2*) Every notice required by this Act to be served on, or given to, a landlord shall, if served on, or given to, an agent empowered as aforesaid to accept service of or receive the same on behalf of the landlord, be as effectual for the purposes of this Act as if it had been served on, or given to, the landlord in person.

(*3*) Every document required by this Act to be signed or certified by a landlord, except an instrument appointing or authorizing an agent, may be signed or certified by an agent of the landlord authorized in writing in that behalf.

Joint-landlords to act collectively or by common agent.

188. Where two or more persons are joint-landlords, anything which the landlord is under this Act required or authorized to do must be done either by both or all those persons acting together, or by an agent authorized to act on behalf of both or all of them.

Rules under Act.

der

Power to make rules regarding procedure, powers of officers and service of notices.

189. The Local Government may, from time to time, by notification in the official Gazette, make rules consistent with this Act—

(*1*) to regulate the procedure to be followed by Revenue-officers in the discharge of any duty imposed upon them by or under this Act, and may by such rules confer upon any such officer—

(*a*) any power exercised by a Civil Court in the trial of suits;

(*b*) power to enter upon any land, and to survey, demarcate and make a map of the same, and any power exercisable by any officer under the Bengal Survey Act, 1875; and

(*c*) power to cut and thresh the crops on any land and weigh the produce, with a view to estimating the capabilities of the soil; and

(*2*) to prescribe the mode of service of notices under this Act where no mode is prescribed by this or any other Act.

Procedure for making, publication and confirmation of rules.

190. (*1*) Every authority having power to make rules under any section of this Act shall, before making the rules, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

(*2*) The publication shall be made, in the case of rules made by the Local Government or High Court, in such manner as may in its opinion be sufficient for giving information to persons interested, and, in the case of rules made by any other authority, in the prescribed manner:

Provided that every such draft shall be published in the official Gazette.

Rules under Act.

(*3*) There shall be published with the draft a notice specifying a date, not earlier than the expiration of one month after the date of publication, at or after which the draft will be taken into consideration.

(*4*) The authority shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*5*) The publication in the official Gazette of a rule purporting to be made under this Act shall be conclusive evidence that it has been duly made.

(*6*) All rules made under this Act may, from time to time, subject to the sanction (if any) required for making them, be amended, added to or cancelled by the authority having power to make the same.

Provisions as to temporarily-settled districts.

Provisions as to temporarily-settled districts.

Saving as to land held in a district not permanently settled.

191. Where the area comprised in a tenure is situate in an estate which has never been permanently settled, nothing in this Act shall prevent the enhancement of the rent upon the expiration of a temporary settlement of the revenue, unless the right to hold beyond the term of the settlement at a particular rate of rent has been expressly recognized in settlement-proceedings by a Revenue-authority empowered by the Government to make definitively or confirm settlements.

Power to alter rent in case of new assessment of revenue.

192. When a landlord grants a lease, or makes any other contract, purporting to entitle the tenant of land not included in an area permanently settled to hold that land free of rent or at a particular rent, and while the lease or contract is in force—

(*a*) land-revenue is for the first time made payable in respect of the land, or

(*b*) land-revenue having been previously payable in respect of it, a fresh settlement of land-revenue is made,

a Revenue-officer may, notwithstanding anything in the contract between the parties, by order, on the application of the landlord or of the tenant, fix a fair and equitable rent for the land in accordance with the provisions of this Act.

Rights of pasturage, &c.

Rights of pasturage, &

Rights of pasturage, forest-rights, &c.

193. The provisions of this Act applicable to suits for the recovery of arrears of rent shall, as far as may be, apply to suits for the recovery of anything payable or deliverable in respect of any rights of pasturage, forest-rights, rights over fisheries and the like.

Saving for conditions binding on landlords.

Saving for conditions binding on landlords.

Tenant not enabled by Act to violate conditions binding on landlord.

194. Where a proprietor or permanent tenure-holder holds his estate or tenure subject to the observance of any specified rule or condition, nothing in this Act shall entitle

Bengal Tenancy Act.

(*Schedule I.—Repeal of Enactments.*)

any person occupying land within the estate or tenure to do any act which involves a violation of that rule or condition.

Savings for special enactments.

vings for cial en- tments.

Savings for special enactments.

195. Nothing in this Act shall affect—

(*a*) the powers and duties of Settlement-officers as defined by any law not expressly repealed by this Act;

(*b*) any enactment regulating the procedure for the realization of rents in estates belonging to the Government, or under the management of the Court of Wards or of the Revenue-authorities;

(*c*) any enactment relating to the avoidance of tenancies and incumbrances by a sale for arrears of the Government revenue;

(*d*) any enactment relating to the partition of revenue-paying estates;

(*e*) any enactment relating to patní tenures, in so far as it relates to those tenures; or

(*f*) any other special or local law not repealed either expressly or by necessary implication by this Act.

Construction of Act.

nstruction f Act.

Act to be read subject to Acts hereafter passed by Lieutenant-Governor of Bengal in Council.

196. This Act shall be read subject to every Act passed after its commencement by the Lieutenant-Governor of Bengal in Council.

SCHEDULE I.

(*See section 2.*)

REPEAL OF ENACTMENTS.

Regulations of the Bengal Code.

Number and year.	Subject of Regulation.	Extent of repeal.
VIII of 1793	A Regulation for re-enacting with modifications and amendments the rules for the Decennial Settlement of the Public Revenue payable from the lands of the zamíndárs, independent taluqdárs and other actual proprietors of land in Bengal, Behar and Orissa, passed for those Provinces respectively on the 18th September, 1789, the 25th November, 1789, and the 10th February, 1790, and subsequent dates.	Sections 51, 52, 53, 54, 55, 64 and 65.
XII of 1805	A Regulation for the settlement and collection of the Public Revenue in the zila of Cuttack, including the pargunas of Pattáspur, Kummudichour, and Bagrae, at present included in the zila of Midnapur.	Section 7.

SCHEDULE I—*contd.*

Number and year.	Subject of Regulation.	Extent of repeal.
V of 1812	A Regulation for amending some of the rules at present in force for the collection of the Land-revenue.	Sections 2, 3, 4, 26 and 27.
XVIII of 1812	A Regulation for explaining Section 2, Regulation V, 1812, and rescinding Sections 3 and 4, Regulation XLIV, 1793, and Sections 3 and 4, Regulation L, 1795, and enacting other rules in lieu thereof.	The preamble and sections 2 and 3.
XI of 1825	A Regulation for declaring the rules to be observed in determining claims to lands gained by alluvion or by dereliction of a river or the sea.	In clause 1 of section 4, from and including the words "nor if annexed to a subordinate tenure" to the end of the clause.

Acts of the Bengal Council.

Number and year.	Subject of Act.	Extent of repeal.
VI of 1862	An Act to amend Act X of 1859 (to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal).	The whole Act.
IV of 1867	An Act to explain and amend Act VI of 1862, passed by the Lieutenant-Governor of Bengal in Council, and to give validity to certain judgments.	The whole Act.
VIII of 1869	An Act to amend the Procedure in suits between Landlords and Tenants.	The whole Act.
VIII of 1879	An Act to define and limit the powers of Settlement-officers.	The whole Act.

Act of the Governor General in Council.

Number and year.	Subject of Act.	Extent of repeal
X of 1859	An Act to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal.	The whole Act

(Schedule III.—Limitation.)

SCHEDULE III.

LIMITATION.

(See section 184.)

PART I.—*Suits.*

Description of Suit.	Period of Limitation.	Time from which period begins to run.
1. To eject any tenure-holder or raiyat on account of any breach of a condition in respect of which there is a contract expressly providing that ejectment shall be the penalty of such breach.	One year .	The date of the breach.
2. For the recovery of an arrear of rent—		
(a) when the arrear fell due before a deposit was made under section 61 on account of the rent of the same holding.	Six months .	The date of the service of notice of the deposit.
(b) in other cases .	Three years .	The last day of the Bengali year in which the arrear fell due, where that year prevails, and the last day of the month of Jeyt of the Amli or Fasli year in which the arrear fell due, where either of those years prevails.
3. To recover possession of land claimed by the plaintiff as an occupancy-raiyat.	Two years .	The date of dispossession.

PART II.—*Appeals.*

Description of Appeal.	Period of Limitation.	Time from which period begins to run.
From any decree or order under this Act, to the Court of a District Judge or Special Judge.	Thirty days .	The date of the decree or order appealed against.
From any order of a Collector under this Act, to the Commissioner.	Thirty days .	The date of the order appealed against.

PART III.—*Applications.*

Description of Application.	Period of Limitation.	Time from which period begins to run.
6. For the execution of a decree or order made under this Act, or any Act repealed by this Act, and not being a decree for a sum of money exceeding Rs. 500, exclusive of any interest which may have accrued after decree upon the sum decreed, but inclusive of the costs of executing such decree; except where the judgment-debtor has by fraud or force prevented the execution of the decree, in which case the period of limitation shall be governed by the provisions of the Indian Limitation Act, 1877.	Three years .	(1) The date of the decree or order; or XV of 1877. (2) where there has been an appeal, the date of the final decree or order of the Appellate Court; or (3) where there has been a review of judgment, the date of the decision passed on the review.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Third publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 27th February, 1885, and was referred to a Select Committee:—

No. 4 OF 1885.

THE LAND ACQUISITION (MINES) BILL, 1885.

CONTENTS.

SECTIONS.

1. Short title, local extent and commencement.
2. Statement in declaration under section 6 of Act X of 1870 that mines not needed.
3. Notice to be given by owner, &c., before working mines lying under land.
4. Inspection of mines by Local Government.
5. If Local Government offers to pay compensation, mines not to be worked.
6. Amount of compensation to be determined under Act X of 1870.
7. If Local Government does not offer to pay compensation, mines may be worked in a proper manner.
8. Power to officer of Local Government to enter and inspect the working of mines.
9. Penalty for refusal to allow inspection.
10. If mines improperly worked, Local Government may require means to be adopted for safety of land acquired.

A Bill to provide for cases in which Mines or Minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870.

WHEREAS it is expedient to provide for cases in which mines or minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870; It is hereby enacted as follows:— X of 1870

1. (*1*) This Act may be called the Land Acquisition (Mines) Act, 1885.

Short title, local extent and commencement.

(*2*) It extends to the whole of British India; and

(*3*) It shall come into force at once.

2. (*1*) When the Local Government makes a declaration under section 6 of the Land Acquisition Act, 1870, that land is needed for a public purpose or for a Company, it may, if it thinks fit, insert in the declaration a statement that any mines of coal, iron-stone, slate or other minerals lying under the land or any particular portion of the land, except only such parts of the mines or minerals as are necessary to be dug or carried away or used in the construction of the work for the purpose of which the land is being acquired, are not needed. [cf. 8 Vic, c. 20, s. 77.] X of 1870

Statement in declaration under section 6 of Act X of 1870 that mines not needed.

(*2*) If any such statement is inserted in the declaration, any mines of coal, iron-stone, slate or other minerals under the land or portion of the land specified in the declaration, except as aforesaid, shall not, when the Collector takes possession of the land under section 16 or section 17 of the said Act, vest in the Government.

3. If the owner, lessee or occupier of any mines or minerals lying under any land so acquired is desirous of working or getting the same, he shall give the Local Government notice in writing of his intention so to do thirty days before the commencement of working. [cf. 8 Vic., c. 20, s. 78.]

Notice to be given by owner, &c., before working mines lying under land.

4. On the receipt of a notice under the last foregoing section, the Local [cf. 8 Vic., c. 20, s. 78.]

Inspection of mines

3 Vic.,), s. 78.]

If Local Government offers to pay compensation, mines not to be worked.

5. (*1*) If it appears to the Local Government that the working or getting of the mines or minerals, or any part thereof, is likely to cause damage to the surface of the land or any works thereon, the Local Government may at any time before the expiration of thirty days from the receipt of the notice under section 3 offer either—

(*a*) to pay compensation for the mines or minerals or part thereof to the owner, lessee or occupier thereof; or

(*b*) to pay compensation to the owner, lessee or occupier of the mines or minerals, or part thereof, in consideration of his working or getting them in such manner and subject to such restrictions as the Local Government may in its offer specify.

(*2*) If the offer mentioned in case (*a*) is made, then the owner, lessee or occupier shall not work or get the mines or minerals or part thereof;

(*3*) If the offer mentioned in case (*b*) is made, then the owner, lessee or occupier shall not work or get the mines or minerals, or part thereof, save in the manner and subject to the restrictions specified by the Local Government.

8 Vic., c. s. 78.]

Amount of compensation to be determined under Act X of 1870.

6. If the Local Government and the owner, lessee or occupier of any such mines or minerals, do not agree as to the amount of compensation to be paid under the last foregoing section, the same shall be settled in accordance with the procedure prescribed by the Land Acquisition Act, 1870, for determining the amount of compensation.

of 1870

8 Vic., c. s 79.]

If Local Government does not offer to pay compensation, mines may be worked in a proper manner.

7. (*1*) If before the expiration of the said thirty days the Local Government does not offer to pay any compensation to the owner, lessee or occupier of the mines or minerals for any loss he may sustain as provided in section 5, the owner, lessee or occupier may work the mines, or any part thereof, in a manner proper and necessary for the beneficial working thereof, and according to the usual manner of working such mines in the local area where the same are situate.

(*2*) If any damage or obstruction is caused to the surface of the land or any works thereon by improper working of the mines, the owner, lessee or occupier of the mines or minerals shall at once at his own expense repair the damage or remove the obstruction, as the case may require.

(*3*) If the repair or removal is not at once effected, or, if the Local Government so thinks fit, without waiting for the same to be effected by the owner, lessee or occupier, the Local Government may execute the same and recover from the owner, lessee or occupier the expense occasioned thereby.

Power to officer of Local Government to enter and inspect the working of mines.

8. For better ascertaining whether any such mines are being worked or have been worked so as to damage the land acquired or the works thereon, an officer appointed for this purpose by the Local Government may, after giving twenty-four hours' notice in writing, enter on any land in or near which the land acquired is situate, and wherein any such mines are being worked or are supposed to be worked, and enter into and return from any such mines or the works connected therewith; and for that purpose the officer so appointed may make use of any apparatus or machinery belonging to the owner, lessee or occupier of the mines, and use all necessary means for discovering the distance from the land acquired to the parts of the mines which are being worked or about to be worked.

Penalty for refusal to allow inspection.

9. If any owner, lessee or occupier of any such mines refuses to allow any officer appointed by the Local Government for that purpose to enter into and inspect any such mines or works in manner aforesaid, every person so offending shall for every such refusal forfeit to the Local Government a sum not exceeding two hundred rupees.

If mines improperly worked, Local Government may require means to be adopted for safety of land acquired.

10. If it appears that any such mines have been worked contrary to the provisions of this Act, the Local Government may, if it thinks fit, give notice to the owner, lessee or occupier thereof to construct such works and to adopt such means as may be necessary or proper for making safe the land acquired, and preventing injury thereto; and, if after such notice any such owner, lessee or occupier does not forthwith proceed to construct the works necessary for making safe the land acquired, the Local Government may itself construct the works and recover the expense thereof from the owner, lessee or occupier.

Construction of Act when land acquired has been transferred to a Company.

11. When a statement under section 2 has been made regarding any land and the land has been acquired for a Company and has been transferred by the Local Government to the Company, then sections 8 to 10, both inclusive, shall be read as if for the words "the Local Government" wherever they occur in those sections the words "the Company which has acquired the land" were substituted.

Definition of Company.

12. In this Act "Company" means a Company registered under the Indian Companies Act, 1882, or formed in pursuance of an Act of Parliament or by Royal Charter or Letters Patent.

VI o

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to provide for cases in which mines or minerals are situate under land which it is desired to acquire under the Land Acquisition Act, 1870.

2. Act XXII of 1863, which was replaced by the Land Acquisition Act, 1870, contained specific provisions (sections 51 and 52) for cases in which mines and minerals lay under land taken up under that Act. These provisions were not, however, re-enacted in the Act of 1870, which, as the Government is advised, contemplates the acquisition of the underlying minerals as well as the surface of the land.

3. Hitherto this state of the law has caused no inconvenience. Now, however, owing to its being proposed to extend railways across districts where there is a certain amount of coal to be found, notice has been drawn to the inconvenience of the existing law which practically compels the Government either to purchase all the mines and minerals under the land over which it is proposed to construct a line or to abandon the undertaking altogether.

4. Under these circumstances, the present Bill has been prepared. It does not, however, simply re-enact the provisions which Act XXII of 1863 formerly contained, inasmuch as they do not appear to be adapted to the circumstances of the case. It follows rather the rules contained in the English Railway Clauses Consolidation Act, 1845, (8 Vic., c. 20, ss. 77 *et seq.*) which it extends to the acquisition of land for all purposes and not merely for the construction of Railways.

5. It provides, first, (section 2) that when a declaration is made by the Local Government under section 6 of the Land Acquisition Act, the Local Government may, if it thinks fit, insert in the declaration a statement that any mines or minerals lying under the land to be acquired are not needed, and that if any such statement is inserted in the declaration, the mines or minerals lying under the land shall not, when the Collector takes possession of the land under section 16 or section 17 of the Act, vest in the Government.

6. It then (section 3) declares that if the owner, lessee or occupier of any mines or minerals lying under any land so acquired is desirous of working the same, he shall give the local Government notice in writing of his intention so to do thirty days before the commencement of working.

7. Next (section 4), the Bill empowers the local Government to cause the mines or minerals to be inspected by a person appointed by it for the purpose.

8. If it appears (section 5) to the local Government that the working of the mines or minerals is likely to cause damage to the surface of the land or any works thereon, the Local Government may at any time before the expiration of thirty days from the receipt of the notice, offer either—

(*a*) to pay compensation for the mines or minerals to the owner, lessee or occupier;

(*b*) to pay compensation to the owner, lessee or occupier of the mines or minerals in consideration of his working or getting them in such manner and subject to such restrictions, as the Local Government may in its offer specify.

If the offer mentioned in case (*a*) is made, then the owner, lessee or occupier is prohibited from working the mines or minerals, whilst if the offer mentioned in case (*b*) is made, then he may not work or get the mines or minerals, save in the manner and subject to the restrictions specified by the local Government.

9. The Bill next provides (section 6) for the manner in which the amount of compensation to be paid under section 5 is to be determined.

10. Should, however, the local Government not offer to pay any compensation, section 7 permits the owner, lessee or occupier of the mines or minerals to work the mines in a manner proper and necessary for the beneficial working thereof, and according to the usual manner of working such mines in the local area where the same are situate. Should any damage or obstruction be caused by improper working of the mines, the section provides for the repairing of the damage or the removal of the obstruction by or at the cost of the owner, lessee or occupier.

11. Sections 8 and 9 provide for the inspection of mines for the purpose of ascertaining whether they are being worked or have been worked so as to damage the land which has been acquired and section 10 declares that if any mines have been improperly worked, the Local Government may require the owner, lessee or occupier thereof to construct such works and to adopt such means as may be necessary for making safe the land acquired and preventing injury thereto.

12. Lastly, section 11 makes the provisions of sections 8 to 10 applicable to cases where the land acquired has been transferred to a company, and section 12 defines what the term "Company" as used in the Bill means.

The 24th February, 1885.

T. C. HOPE.

R. J. CROSTHWAITE,
Offg. Secretary to the Government of India.

5 *a* 1

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th March 1885, and was referred to a Select Committee :—

No. 5 OF 1885.

A Bill to amend the Petroleum Act, 1881.

WHEREAS it is expedient to amend the Petro-
1. leum Act, 1881, in manner hereinafter appearing; It is hereby enacted as follows :—

Short title and commencement.

1. (*1*) This Act may be called the Petroleum Act, 1885 ; and

(*2*) It shall come into force at once.

1. **2.** In section 3 of the Petroleum Act, 1881, in the *explanation* to the definition of "petroleum," for the last thirteen words the following words shall be substituted, namely :—

Amendment of *explanation* to definition of "petroleum" in section 3 of Act VIII of 1881.

"in accordance with the directions contained in the schedule hereto annexed, with an apparatus which has been stamped and certified as provided by section 17A, within a period of five years immediately preceding the date on which the apparatus is used for the testing, and after the corrections (if any) which the certificate declares are to be applied to the results of the testing have been made."

Amendment of definition of "dangerous petroleum" in section 3 of Act VIII of 1881.

3. In section 3 of the said Act, in the definition of "dangerous petroleum", for the word "seventy-three" the word "seventy-six" shall be substituted; and to the same definition the following words shall be added, namely :—

"Provided that, when all or any of the petroleum on board a ship, or in the possession of any dealer, is declared by the master of the ship, or the consignees of the cargo, or by the dealer, as the case may be, to be of one uniform quality, the petroleum shall not be deemed to be dangerous if the samples selected from such petroleum, when tested as aforesaid, have their flashing points, on an average, at or above seventy-three degrees of Fahrenheit's thermometer and if no one of the said samples has its flashing point below seventy degrees of that thermometer."

Repeal of word 'glass" in section 5 of same Act.

4. In the proviso to section 5 of the said Act, the word "glass" shall be repealed.

Substitution of certain words in section 6 of the same Act.

5. In section 6 of the said Act, for the last seventeen words the following shall be substituted, namely :—

"have attached thereto a label in conspicuous characters stating the description of the petroleum, with the addition of the words 'highly inflammable' and with the addition—

"(*d*) in the case of a vessel kept, of the name and address of the consignee or owner;

"(*e*) in the case of a vessel transported, of the name and address of the sender; and

"(*f*) in the case of a vessel sold or exposed for sale, of the name and address of the vendor."

New sections substituted for section 7 of the same Act.

6. For section 7 of the said Act the following sections shall be substituted :—

Power for Local Government to make rules as to importation of petroleum.

"7. (*1*) The Local Government may, from time to time, make rules consistent with this Act to regulate the importation of petroleum, and in particular—

"(*a*) to determine the ports at which only petroleum may be imported;

"(*b*) to ascertain the quantity and description of any petroleum on board a ship ;

"(*c*) to determine the places at which and the conditions on and subject to which petroleum may be landed, stored or transhipped;

"(*d*) to fix the fees to be paid for the storage of petroleum at such places ;

"(*e*) to provide for the selection by an officer appointed by the Local Government in this behalf, and for the delivery to him by the consignees of samples of all petroleum so landed and stored; and

"(*f*) to provide, in the case of each consignment which is stated to be of one uniform quality, for the averaging of the results of testing the selected samples."

"(*2*) In this section 'ship' includes anything made for the conveyance by water of human beings or property.

Procedure after petroleum has been landed and stored.

"7A. (*1*) Petroleum landed and stored in accordance with rules made under the last foregoing section shall not be removed from the place at which it is stored until the samples selected therefrom in accordance with the said rules have been tested by an officer appointed by the Local Government in this behalf in the manner described in the schedule hereto annexed with an apparatus which has been stamped and certified as provided by section 17 A, and until such officer has given a certificate that the petroleum is not dangerous petroleum.

"(*2*) If the said officer after testing the said samples refuses to give the said certificate in respect of any petroleum, the Local Government may permit the consignee within a time to be fixed by the Local Government in this behalf—

"(*a*) to rectify the petroleum,

"(*b*) to apply for a license to import the petroleum as dangerous petroleum, or

"(*c*) to re-export the petroleum.

"(*3*) If the consignee does not within the time fixed under sub-section (*2*) avail himself of the permission granted under that sub-section, the Local Government may order the petroleum to be destroyed."

New section to be inserted after section 17.

7. After section 17 of the said Act the following section shall be inserted, namely:—

"*Test-apparatus.*

Ref. 42 & 43 Vic., c. 47, s.] Model test-apparatus.

"17A. Whereas a model of the apparatus for testing petroleum under this Act constructed in accordance with the description contained in the schedule hereto annexed has been deposited in the office of the Chemical Examiner to Government, Calcutta, and has been marked with the words 'Model test-apparatus;' It is hereby enacted as follows:—

Ref. 42 & 43 Vic., c. 47 s.] Verification of test-apparatus.

"(*1*) The Chemical Examiner with whom the said model test-apparatus is deposited may, on payment of such fee as the Governor General in Council may, from time to time, by notification in the *Gazette of India*, prescribe, compare with the said model and verify every apparatus for testing petroleum which is submitted to him for the purpose.

"(*2*) If any apparatus for testing petroleum, when compared and verified as provided by this section, is found correct, or correct subject to certain corrections to be applied to the results of the tests, the Chemical Examiner shall stamp the same with a special number, and shall further give a certificate in writing under his hand to the effect that the apparatus has been compared and verified by him and found to be correct, or correct subject to certain specified corrections to be applied to the results of the tests.

"(*3*) Every certificate granted under this section shall, until the contrary is proved, be deemed to be conclusive proof of the matters stated therein.

"(*4*) Subject to the payment of such fees as the Governor General in Council may, by notification in the *Gazette of India*, prescribe in this behalf, the said model test-apparatus shall be at all reasonable times open to inspection by any person desiring to inspect it."

New schedule substituted for the schedule to the same Act.

8. For the Schedule to the said Act the following schedule shall be substituted, namely:—

"THE SCHEDULE.

"*1.—Nature of the Test-apparatus.*

"The apparatus consists of the following parts:—

(1) the oil-cup;

(2) the cover, with slide, test-lamp, and clock-work arrangement for opening and closing the holes in the cover, and for dipping the test-flame;

(3) the water-bath or heating vessel;

(4) the tripod stand, with jacket, and spirit-lamp for heating the water-bath;

(5) the thermometer for indicating the temperature of the oil in the oil-cup;

(6) the thermometer for indicating the temperature of the water in the water-bath;

(7) the thermometer for indicating the temperature of the oil before it is poured into the oil-cup;

(8) the dropping bottle, for replenishing the test-lamp;

(9) the forceps, for adjusting the wick of the test-lamp.

"The oil-cup is a cylindrical flat-bottomed vessel, made of gun-metal or brass, and tinned or silvered inside. A gauge is fixed to the inside of the cup to regulate the height to which it is to be filled with the sample under examination.

"The cup is provided with a close fitting overlapping cover, which carries the thermometer, the test-lamp, and the adjuncts thereto. The test-lamp is suspended upon two supports by means of trunnions, which allow it to be easily inclined to a particular angle and restored to its original position. The socket in the cover, which is to hold a round bulb thermometer for indicating the temperature of the oil during the testing operation, is so adjusted that the bulb of the latter is always inserted in a definite position below the surface of the liquid.

"The cover is provided with three holes, one in the centre and two smaller ones close to the sides. These are closed and opened by means of a pivoted slide. When the slide is moved so as to uncover the holes, the suspended lamp is caught by a projection fixed on the slide, and tilted in such a way as to bring the end of the spout just below the surface of the lid. As the slide moves back so as to cover the holes, the lamp returns to its original position. Upon the cover, in front of and in a line with the nozzle of the lamp, is fixed a white bead, the diameter of which represents the size of the test-flame to be used.

"The water-bath or heating vessel is so constructed that, when the oil-cup is placed in position in it, an air-space or air-chamber intervenes between the two; consequently, in applying the test under ordinary circumstances, the heat is transmitted gradually to the oil from the hot water through the air-space. The water-bath is fitted with a socket for receiving a long bulb thermometer, to indicate the temperature of the water. It is also provided with a funnel, an overflow-pipe and two handles.

"The water-bath rests upon a tripod stand, which is fitted with a copper cylinder or jacket, so that the bath is surrounded by an enclosed air-space, which retains and regulates the heat. One of the legs of the stand serves as a support for a spirit-lamp, which is attached to it by a small swing bracket.

"The clockwork arrangement, by which during the operation of testing the slide is withdrawn, and the test-flame dipped into the cup and raised again as the slide is replaced, is provided with a ratchet key for setting it in action for each test, and with a trigger for starting it each time that the test-flame is applied.

"*II.—Directions for drawing the Sample and preparing it for Testing.*

"1. *Drawing the sample.*—In all cases the testing officer shall personally superintend the drawing of the sample from an original unopened tin.

"An opening sufficiently large to admit of the oil being rapidly poured or syphoned from the tin shall be made.

"Two bottles, each of the capacity of about 40 fluid ounces, are to be filled with the oil. One of these, the contents of which is intended to be preserved for reference in case of need, is to be carefully corked, the cork being well driven home, cut off level with the neck, and melted sealing-wax worked into it. The other bottle may be either stoppered or corked.

"2. *Preparing the sample for testing.*—About ten fluid ounces of the oil, sufficient for three tests, are transferred from the bottle into which the sample has been drawn to a pint flask or bottle, which is to be immersed in water in which ice is floating until a thermometer, introduced into the oil, indicates a temperature not exceeding 50° Fahrenheit.

"*III.—Directions for preparing and using the Test-apparatus.*

"1. *Preparing the water-bath.*—The water-bath is filled by pouring water into the funnel until it begins to flow out at the overflow-pipe. The temperature of the water at the commencement of each test, as indicated by the long bulb thermometer, is to be 130° Fahrenheit, and this is attained in the first instance by mixing hot and cold water, either in the bath or in a vessel from which the bath is filled, until the thermometer, which is provided for testing the temperature of the water, gives the proper indication; or the water is heated by means of the spirit-lamp (which is attached to the stand of the apparatus) until the required temperature is indicated.

"2. *Preparing the test-lamp.*—The test-lamp is fitted with a piece of cylindrical wick of such thickness that it fills the wick-holder, but may readily be moved to and fro for the purpose of adjusting the size of the flame. In the body of the lamp, upon the wick, which is coiled within it, is placed a small tuft of cotton wool, moistened with petroleum, any oil not absorbed by the wool being removed. When the lamp has been lighted, the wick is adjusted by means of a pair of forceps until the flame is of the size of the bead fixed on the cover of the oil-cup; should a particular test occupy so long a time that the flame begins to get smaller, through the supply of oil in the lamp becoming exhausted, three or four drops of petroleum are allowed to fall upon the tuft of wool in the lamp from the small open orifice of the bottle provided for that purpose. This can be safely done without interrupting the test.

"3. *Filling the oil-cup.*—The oil-cup having been previously cooled, by placing it bottom downwards in water at a temperature not exceeding 50° Fahrenheit, is to be rapidly wiped dry, placed on a level surface in a good light, and the oil to be tested is poured in very slowly, without splashing, until its surface is level with the point of the gauge which is fixed in the cup. The round bulb thermometer is inserted into the lid of the cup, care being taken that the projecting rim of the collar touches the edge of the socket; the test-lamp, prepared as already described, is placed in position, and the cover is then put on to the cup and pressed down so that its edge rests on the rim of the cup.

"4. *Application of the test.*—The water-bath, with its thermometer in position, is placed in some locality where it is not exposed to currents of air, and where the light is sufficiently subdued to admit of the size of the entire test-flame being compared with that of the bead on the cover. The cup is carefully lifted without shaking it, and placed in the bath, the test-lamp is lighted, and the clockwork wound up by turning the key. The thermometer in the oil-cup is now watched, and when the temperature has reached 56° Fahrenheit the clockwork is set in motion by pressing the trigger.

"If no flash takes place the clockwork is at once re-wound, and the trigger pressed at 57° Fahrenheit, and so on, at every degree rise of temperature, until the flash occurs, or until a temperature of 95° Fahrenheit has been reached.

"(*f*) to provide, in the case of each consignment which is stated to be of one uniform quality, for the averaging of the results of testing the selected samples."

"(*2*) In this section 'ship' includes anything made for the conveyance by water of human beings or property.

Procedure after petroleum has been landed and stored.

"7A. (*1*) Petroleum landed and stored in accordance with rules made under the last foregoing section shall not be removed from the place at which it is stored until the samples selected therefrom in accordance with the said rules have been tested by an officer appointed by the Local Government in this behalf in the manner described in the schedule hereto annexed with an apparatus which has been stamped and certified as provided by section 17 A, and until such officer has given a certificate that the petroleum is not dangerous petroleum.

"(*2*) If the said officer after testing the said samples refuses to give the said certificate in respect of any petroleum, the Local Government may permit the consignee within a time to be fixed by the Local Government in this behalf—

"(*a*) to rectify the petroleum,

"(*b*) to apply for a license to import the petroleum as dangerous petroleum, or

"(*c*) to re-export the petroleum.

"(*3*) If the consignee does not within the time fixed under sub-section (*2*) avail himself of the permission granted under that sub-section, the Local Government may order the petroleum to be destroyed."

New section to be inserted after section 17.

7. After section 17 of the said Act the following section shall be inserted, namely:—

"*Test-apparatus.*

[cf. 42 & 43 Vic., c. 47, s. 3.]

Model test-apparatus.

"17A. Whereas a model of the apparatus for testing petroleum under this Act constructed in accordance with the description contained in the schedule hereto annexed has been deposited in the office of the Chemical Examiner to Government, Calcutta, and has been marked with the words 'Model test-apparatus;' It is hereby enacted as follows:—

[cf. 42 & 43 Vic., c. 47 s. 3.]

Verification of test-apparatus.

"(*1*) The Chemical Examiner with whom the said model test-apparatus is deposited may, on payment of such fee as the Governor General in Council may, from time to time, by notification in the *Gazette of India*, prescribe, compare with the said model and verify every apparatus for testing petroleum which is submitted to him for the purpose.

"(*2*) If any apparatus for testing petroleum, when compared and verified as provided by this section, is found correct, or correct subject to certain corrections to be applied to the results of the tests, the Chemical Examiner shall stamp the same with a special number, and shall further give a certificate in writing under his hand to the effect that the apparatus has been compared and verified by him and found to be correct, or correct subject to certain specified corrections to be applied to the results of the tests.

"(*3*) Every certificate granted under this section shall, until the contrary is proved, be deemed to be conclusive proof of the matters stated therein.

"(*4*) Subject to the payment of such fees as the Governor General in Council may, by notification in the *Gazette of India*, prescribe in this behalf, the said model test-apparatus shall be at all reasonable times open to inspection by any person desiring to inspect it."

New schedule substituted for the schedule to the same Act.

8. For the Schedule to the said Act the following schedule shall be substituted, namely:—

"THE SCHEDULE.

"*1.—Nature of the Test-apparatus.*

"The apparatus consists of the following parts:—

(1) the oil-cup;

(2) the cover, with slide, test-lamp, and clockwork arrangement for opening and closing the holes in the cover, and for dipping the test-flame;

(3) the water-bath or heating vessel;

(4) the tripod stand, with jacket, and spirit-lamp for heating the water-bath;

(5) the thermometer for indicating the temperature of the oil in the oil-cup;

(6) the thermometer for indicating the temperature of the water in the water-bath;

(7) the thermometer for indicating the temperature of the oil before it is poured into the oil-cup;

(8) the dropping bottle, for replenishing the test-lamp;

(9) the forceps, for adjusting the wick of the test-lamp.

"The oil-cup is a cylindrical flat-bottomed vessel, made of gun-metal or brass, and tinned or silvered inside. A gauge is fixed to the inside of the cup to regulate the height to which it is to be filled with the sample under examination.

"The cup is provided with a close fitting overlapping cover, which carries the thermometer, the test-lamp, and the adjuncts thereto. The test-lamp is suspended upon two supports by means of trunnions, which allow it to be easily inclined to a particular angle and restored to its original position. The socket in the cover, which is to hold a round bulb thermometer for indicating the temperature of the oil during the testing operation, is so adjusted that the bulb of the latter is always inserted in a definite position below the surface of the liquid.

"The cover is provided with three holes, one in the centre and two smaller ones close to the sides. These are closed and opened by means of a pivoted slide. When the slide is moved so as to uncover the holes, the suspended lamp is caught by a projection fixed on the slide, and tilted in such a way as to bring the end of the spout just below the surface of the lid. As the slide moves back so as to cover the holes, the lamp returns to its original position. Upon the cover, in front of and in a line with the nozzle of the lamp, is fixed a white bead, the diameter of which represents the size of the test-flame to be used.

"The water-bath or heating vessel is so constructed that, when the oil-cup is placed in position in it, an air-space or air-chamber intervenes between the two; consequently, in applying the test under ordinary circumstances, the heat is transmitted gradually to the oil from the hot water through the air-space. The water-bath is fitted with a socket for receiving a long bulb thermometer, to indicate the temperature of the water. It is also provided with a funnel, an overflow-pipe and two handles.

"The water-bath rests upon a tripod stand, which is fitted with a copper cylinder or jacket, so that the bath is surrounded by an enclosed air-space, which retains and regulates the heat. One of the legs of the stand serves as a support for a spirit-lamp, which is attached to it by a small swing bracket.

"The clockwork arrangement, by which during the operation of testing the slide is withdrawn, and the test-flame dipped into the cup and raised again as the slide is replaced, is provided with a ratchet key for setting it in action for each test, and with a trigger for starting it each time that the test-flame is applied.

"*II.—Directions for drawing the Sample and preparing it for Testing.*

"1. *Drawing the sample.*—In all cases the testing officer shall personally superintend the drawing of the sample from an original unopened tin.

"An opening sufficiently large to admit of the oil being rapidly poured or syphoned from the tin shall be made.

"Two bottles, each of the capacity of about 40 fluid ounces, are to be filled with the oil. One of these, the contents of which is intended to be preserved for reference in case of need, is to be carefully corked, the cork being well driven home, cut off level with the neck, and melted sealing-wax worked into it. The other bottle may be either stoppered or corked.

"2. *Preparing the sample for testing.*—About ten fluid ounces of the oil, sufficient for three tests, are transferred from the bottle into which the sample has been drawn to a pint flask or bottle, which is to be immersed in water in which ice is floating until a thermometer, introduced into the oil, indicates a temperature not exceeding 50° Fahrenheit.

"*III.—Directions for preparing and using the Test-apparatus.*

"1. *Preparing the water-bath.*—The water-bath is filled by pouring water into the funnel until it begins to flow out at the overflow-pipe. The temperature of the water at the commencement of each test, as indicated by the long bulb thermometer, is to be 130° Fahrenheit, and this is attained in the first instance by mixing hot and cold water, either in the bath or in a vessel from which the bath is filled, until the thermometer, which is provided for testing the temperature of the water, gives the proper indication; or the water is heated by means of the spirit-lamp (which is attached to the stand of the apparatus) until the required temperature is indicated.

"2. *Preparing the test-lamp.*—The test-lamp is fitted with a piece of cylindrical wick of such thickness that it fills the wick-holder, but may readily be moved to and fro for the purpose of adjusting the size of the flame. In the body of the lamp, upon the wick, which is coiled within it, is placed a small tuft of cotton wool, moistened with petroleum, any oil not absorbed by the wool being removed. When the lamp has been lighted, the wick is adjusted by means of a pair of forceps until the flame is of the size of the bead fixed on the cover of the oil-cup; should a particular test occupy so long a time that the flame begins to get smaller, through the supply of oil in the lamp becoming exhausted, three or four drops of petroleum are allowed to fall upon the tuft of wool in the lamp from the small open orifice of the bottle provided for that purpose. This can be safely done without interrupting the test.

"3. *Filling the oil-cup.*—The oil-cup having been previously cooled, by placing it bottom downwards in water at a temperature not exceeding 50° Fahrenheit, is to be rapidly wiped dry, placed on a level surface in a good light, and the oil to be tested is poured in very slowly, without splashing, until its surface is level with the point of the gauge which is fixed in the cup. The round bulb thermometer is inserted into the lid of the cup, care being taken that the projecting rim of the collar touches the edge of the socket; the test-lamp, prepared as already described, is placed in position, and the cover is then put on to the cup and pressed down so that its edge rests on the rim of the cup.

"4. *Application of the test.*—The water-bath, with its thermometer in position, is placed in some locality where it is not exposed to currents of air, and where the light is sufficiently subdued to admit of the size of the entire test-flame being compared with that of the bead on the cover. The cup is carefully lifted without shaking it, and placed in the bath, the test-lamp is lighted, and the clockwork wound up by turning the key. The thermometer in the oil-cup is now watched, and when the temperature has reached 56° Fahrenheit the clockwork is set in motion by pressing the trigger.

"If no flash takes place the clockwork is at once re-wound, and the trigger pressed at 57° Fahrenheit, and so on, at every degree rise of temperature, until the flash occurs, or until a temperature of 95° Fahrenheit has been reached.

"If the flash takes place at any temperature below 77° Fahrenheit the temperature at which it occurs is to be recorded. Two fresh portions of the sample are then to be successively tested in a similar manner and the results recorded. If no greater difference than 2° Fahrenheit exists between any two of the three recorded results, each result is to be corrected for atmospheric pressure, as hereafter described, and the average of the three corrected

results is the flashing point of the sample. In the event of there being a greater difference than 2° Fahrenheit between any two of the results, the series of tests is to be rejected and a fresh series, of three, similarly obtained, and so on until a sufficiently concordant series is furnished, when the results are to be corrected and the average taken in the manner already described.

"If a temperature of 76° Fahrenheit has been reached without a flash occurring, the application of the test-flame is to be continued at every degree rise of temperature until a temperature of 95° Fahrenheit has been reached. If no flash has occurred up to this point, the oil-cup is to be removed from the water-bath, and the temperature of the water in the water-bath is to be reduced to 95° Fahrenheit by pouring cold water into the funnel (the hot water escaping by the overflow-pipe). The air-chamber is then to be filled to a depth of 1½ inches with water at a temperature of about 95° Fahrenheit, the oil-cup is to be replaced in the water-bath and the spirit-lamp attached to the water-bath is to be lighted and placed underneath. The test-flame is then to be again applied, from 96° Fahrenheit, at every degree rise of temperature as indicated by the thermometer in the oil-cup until a flash takes place or until a temperature of 200° Fahrenheit has been reached. If during this operation the test-flame appears to diminish in size, the lamp is to be replenished in the manner prescribed at (2) without interrupting the test.

"If a flash occurs at any temperature between 76° and 200° Fahrenheit the temperature at which it occurs, subject to correction for atmospheric pressure, is the flashing point of the sample.

"In repeating a test, a fresh sample of oil must always be used, the tested sample being thrown away, and the cup must be wiped dry from any adhering oil and cooled, as already described, before receiving the fresh sample.

"5. *Correction for atmospheric pressure.*—As the flashing point of an oil is influenced by changes in atmospheric pressure to an average extent of 1·6° Fahrenheit for every inch of the barometer, a correction of the observed flashing point may become necessary. For this purpose a table is appended to this schedule, giving the flashing points of oils ranging from 65° to 80° Fahrenheit, under pressure ranging from 27 to 31 inches of mercury.

"The table is used in the following manner:—

"*Example.*—An oil has given a flashing point of 71°, the barometer being at 28·6 inches; take the nearest number to 71° in the vertical column headed 28·6. This number is 70·8. Substitute for this the number in the same horizontal line in the column headed 30 (the normal height of the barometer). The substituted number, that is, the true flashing point of the oil, is 73°.

"*Table for correction of Flashing Points indicated by the Test for Variations in Barometric Pressure on either side of Thirty Inches.*

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to amend the Petroleum Act, 1881, in certain points in which experience has shewn that its amendment would be desirable.

2. "Dangerous petroleum" is defined by the Act (section 3) as petroleum having its flashing point below seventy-three degrees of Fahrenheit's thermometer. The Government of India does not see any reason for changing the standard so fixed, but in view of the possibility of variations in the application of the test, which, according to the opinions of the experts, may, even with the utmost care, cause deviations of 2° or 3° in the results, it is of opinion that the nominal legal minimum standard for non-dangerous petroleum may be slightly raised. Accordingly, section 3 of the Bill fixes the standard for dangerous petroleum at 76° instead of 73°, but to this enhanced standard a proviso is added to the effect that a consignment represented to be of one uniform quality shall not be deemed to be dangerous when on an average of tests the oil does not fall below that standard by more than 3°, and no one sample has a flashing point below 70°.

3. Section 5 of the Act permits small quantities of dangerous petroleum to be kept in "glass," among other, vessels, if each vessel does not contain more than a pint and is securely stopped. Looking to the comparatively fragile nature of glass vessels and to the possibility of such vessels, when filled with the highly volatile liquids included under the head of "dangerous petroleum," bursting even if "securely stopped," when exposed to powerful sunlight for a brief period, the prudence of including *glass* vessels among those specified in the section is, as has been pointed out to the Government of India, doubtful. Section 4 of the Bill therefore amends the section by the omission of the word "glass."

4. The object of section 5 of the Bill is to bring the provisions of section 6 of the Act, which relate to the marking of the vessels containing dangerous petroleum, and which declare that all such vessels "shall bear an indelible mark on a label in conspicuous characters, stating the nature of the contents thereof" into accordance with the English law (34 & 35 Vic., cap. 105, section 6), which lays down that the label shall state in conspicuous characters the description of the petroleum with the addition of the words "highly inflammable" and with the addition of the name and address of the consignee or owner or of the sender or vendor.

5. As the Act now stands, not only is the importation of "dangerous" petroleum subjected to a strict system of licensing, but no petroleum may be landed from any ship until samples of the petroleum on board thereof have been delivered for the purpose of the petroleum being tested.

While considering that the importation of dangerous petroleum should continue to be thus regulated, the Government of India is of opinion that the restrictions at present placed on the importation of other petroleum may be somewhat relaxed. It seems to it that, instead of requiring the delivery of samples before any oil is landed, it would be sufficient to give the Local Government power to determine the places at which, and the conditions on and subject to which, petroleum may be landed and stored. The necessary power is conferred by section 6 of the Bill, which substitutes a new section for section 7 of the Act. There would thus be nothing to prevent petroleum, other than dangerous petroleum, being in future landed and stored at once. But, in order to protect the public, no petroleum should be allowed to be removed from the place where it is stored until it has been tested and declared to satisfy the legal standard. Section 7A therefore provides this, and further declares that, when petroleum which has been so landed and stored is found not to come up to the legal standard, the Local Government may direct the consignees either to rectify it or to import it as dangerous petroleum or to re-export within a fixed period, and that, on the consignees failing to do whichever of these things they may be directed to do, the Local Government may order the petroleum to be destroyed.

In addition to re-producing clauses (*a*) and (*c*) of the present section 7, the new section 7 further empowers the Local Government to make rules to fix the fees to be paid for the storage of petroleum at places appointed for the purpose, and to regulate the selection of samples and the averaging the results of testing selected samples.

6. Section 7 of the Bill introduces certain new provisions in the Act as to the test-apparatus to be used. As the Act at present stands, the schedule contains a specification explanatory of the test-apparatus. As it is, however, proposed by this Bill to substitute a new schedule for the present one, in which a new description of the test-apparatus is inserted, it seems desirable, for the convenience of the public, to provide for the deposit of a model test apparatus, which shall be open to inspection, and after which all the instruments to be used under the Act shall be constructed. This is what the new section 17A, which section 7 of the Bill adds to the Act, does. This section also provides for the verification of each test-apparatus which it is proposed to use for the purposes of the Act. Each apparatus when verified is to be marked with a special number, and the officer making the verification is to give a certificate in which shall be noted any corrections which must be applied to the results of the tests made with the apparatus. This last provision is necessary, because it is practically impossible to construct instruments which will not need corrections of this sort. The certificate granted is declared to be conclusive proof of the matters stated therein.

7. Section 8 of the Bill substitutes a new schedule for the schedule at present appended to the Act, the instructions contained in which it is now generally admitted require modification.

This schedule has been prepared mainly by Sir F. Abel in conjunction with Mr. Redwood and Dr. Warden, the Professor of Chemistry in the Medical College, Calcutta, and Chemical Examiner to Government, and Dr. Lyon, the Chemical Analyser in Bombay, and it has also been examined and considered by Professor Pedler of the Presidency College, Calcutta. It embodies very definite directions regarding the sampling and testing of petroleum, and it lays down in a most detailed manner the procedure to be adopted. The Governor General in Council believes that the adoption of this schedule will meet all the difficulties which have been found to occur under the present law in regard to the sampling and testing of petroleum, and that, if the procedure therein described is carefully followed, there is every reason to hope that trustworthy and generally concordant results will be obtained.

9. Lastly, the new provisions as to the deposit of a model test-apparatus and the verification of all other test-apparatus therewith has necessitated the amendment of the *explanation* of the term "flashing point" which is appended to the definition of "petroleum" in section 3. It is necessary that, in order to ascertain the true flashing point, the petroleum should be tested with a verified and certificated apparatus, and after the corrections (if any) to be applied to the results of the testing have been made. Moreover, it would appear to be necessary that every apparatus used for the testing of petroleum should be verified at least once in every five years. All these points are provided for in the amendment made by section 2 of the Bill.

J. GIBBS.

The 10th March, 1885.

R. J. CROSTHWAITE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 13th March 1885, and was referred to a Select Committee:—

No. 6 OF 1885.

A Bill to amend the law relating to Government Securities.

WHEREAS it is expedient to amend the law relating to Government securities in manner hereinafter appearing; It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Act may be called the Indian Securities Act, 1885; and

(*2*) It shall come into force at once.

1 2.] Definitions.

2. In this Act, unless there is something repugnant in the subject or context,

The expression "Government securities" includes promissory notes, debentures, stock-certificates, and all other securities issued by the Government of India or by any Local Government, in respect of any loan issued under notification in the official Gazette, whether before or after the passing of this Act: and

"prescribed" means prescribed by rules made from time to time by the Governor General in Council in this behalf.

2. Right of survivors of joint payees of Government securities.

3. (*1*) Notwithstanding anything contained in the Indian Contract Act, section 45, when a Government security is payable to two or more persons jointly and any of them dies, the security shall be payable to the survivor or survivors of those persons.

(*2*) Nothing herein contained shall affect any claim which the representative of the deceased person may have against the survivor or survivors in respect of the security jointly payable to them and the deceased.

(*3*) This section shall apply whether the death of the person to whom the security was jointly payable occurred or occurs before or after this Act comes into force.

Issue of renewed securities.

4. Any person to whom a Government security is payable may, on payment of the prescribed fee and on delivering the security duly receipted to the prescribed officer, obtain from the officer a renewed security payable to himself. [Cf. sec. 49 of 33 & 34 Vic., cap. 71.]

Issue of duplicate securities.

5. (*1*) When a Government security has been wholly or partly lost or destroyed the person to whom it was payable at the time of the loss or destruction or his representative may, on application to the prescribed officer, and on producing proof to his satisfaction of the loss or destruction, obtain from him an order for:—

(*a*) the payment of interest in respect of the security said to be lost or destroyed pending the issue of a duplicate security; and

(*b*) the issue of a duplicate security payable to such person.

(*2*) An order shall not be passed under sub-section (*1*) until after the issue of the prescribed notification of the loss or destruction and after the expiration of the prescribed period, nor until the applicant has given the prescribed indemnity against the claims of all persons deriving title under the security lost or destroyed.

(*3*) A list of the securities in respect of which an order is passed under sub-section (*1*) shall be published in the *Gazette of India* at such times as the Governor General in Council may, from time to time, direct.

Period after which Government is released from liability in respect of original security.

6. When a renewed security has been issued under section 4, or a duplicate security has been issued under section 5, the Government shall be discharged of all liability in respect of the original security of which such renewed or duplicate security has been issued— [Cf. 33 & 34 Vic., cap. 71, s. 51.]

(*a*) in the case of a renewed security, after the lapse of six years from the date of the issue of the renewed security,

(*b*) in the case of a duplicate security, after the lapse of six years from the date of the publication under section 5, sub-sec-

tion (3), of the list in which the security is first mentioned, or from the date of the last payment of interest on the original security, whichever date is latest.

Power for Governor General in Council to make rules.

7. The Governor General in Council may, from time to time, make rules to prescribe—

(a) the fees to be paid for applications under sections 4 and 5;

(b) the form in which securities delivered for renewal are to be receipted;

(c) the officer who is to exercise all or any of the powers and perform all or any of the duties prescribed by sections 4 and 5;

(d) the proof which is to be produced by persons applying for duplicate securities;

(e) the form and mode of publication of the notification mentioned in section 5 and the period after which interest may be paid or a duplicate security may be issued under that section;

(f) the nature and amount of the indemnity to be given by a person applying under section 5 for the payment of interest or the issue of a duplicate security; and

(g) generally all matters connected with the grant of renewed and duplicate securities.

Publication of drafts and rules.

8. (1) The Governor General in Council shall before making rules under the last foregoing section, publish a draft of the proposed rules in such manner as may, in his opinion, be sufficient for the information of the public.

(2) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(3) The Governor General in Council shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(4) Every rule made under the last foregoing section shall be published in the *Gazette of India*, and the publication in the *Gazette of India* of a rule purporting to be made under that section shall be conclusive evidence that it has been duly made.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to provide for certain matters connected with Government securities as to which legislation appears to be desirable.

2. Under the English law, on the death of one of several joint promisees or creditors, the right to sue on the contract vests in the survivors or survivor, and, on the death of the last of two or more survivors, in his personal representative. But a person receiving money under this right of survivorship may be accountable for it to the representatives of the deceased.

3. This rule has been altered in India by section 45 of the Contract Act, which provides that—

"When a person has made a promise to two or more persons jointly, then, unless a contrary intention appears from the contract, the right to claim performance rests, as between him and them, with them during their joint lives, and, after the death of any of them, with the representative of such deceased person jointly with the survivor or survivors, and, after the death of the last survivor, with the representatives of all jointly."

4. With reference to this section, the Law Commissioners, who prepared the draft of the Act, remarked:—"In regulating the devolution of rights and liabilities, we propose, in accordance with the rule of English Courts of Equity and of the Indian Code of Civil Procedure, that joint liabilities and rights shall, after the death of one of the persons liable or entitled, go to his representative jointly with the survivor, and after the death of the survivor to the representatives of both jointly." So far as can be ascertained, this proposal was accepted without criticism in India.

5. It appears that, both before and since the passing of the Contract Act, the practice of the Indian Public Debt Offices has been to treat the right of suing on, and giving receipts for money payable under, Government promissory notes as vesting in the survivor or survivors of two or more joint holders. But the law officers of the Government have recently given an opinion that, having regard to section 45 of the Contract Act, it is not safe to continue this practice.

6. Under these circumstances, the Government of India think that legislation is desirable both for the purpose of confirming what has been done in the past, and for the purpose of laying down a convenient rule for the future.

7. Accordingly, section 3 of the Bill declares that, notwithstanding anything contained in the Indian Contract Act, 1872, section 45, when a Government security is payable to two or more persons jointly and any of them dies, the security shall be payable to the survivor or survivors of those persons. But to this a clause is added making it clear that the section will not affect the liability of the survivor or survivors to the representative of the deceased holder of the security.

8. Lastly, sections 4 to 6 of the Bill deal with the issue of renewed and duplicate Government securities.

9. With regard to the renewal of Government securities, the holder of a security may, under existing rules, upon payment of the prescribed fee and delivering up his security properly receipted, obtain a clear title in the form of a renewed security in his own favour. This right is affirmed by section 4 of the Bill; but as Government by the renewal becomes liable in respect of the new note independently of any question as to legal completeness of discharge upon the original security, opportunity is taken to fix a term within which claims in respect of the original security must be made. Accordingly, section 6 of the Bill releases Government from liability in respect of the original security after the lapse of six years from the date of the issue of the renewed security.

10. With regard to duplicate securities, the practice has hitherto been, when a Government security has been lost or destroyed, to issue a notification, under the terms of the security, of the discharge of the security upon a given date, and to refuse to issue any duplicate until six years (the period fixed by the law of limitation) has elapsed from the date so fixed for discharge. If, however, the loan is not mature, no such notification of discharge can be issued, and the Government is obliged to refuse to issue any duplicate, in the face of the risk of claims being made in respect of the security alleged to be lost. The Bill adopts the existing practice in respect of the issue of duplicates, but, by applying in every case the period of limitation which under the existing law applies only in the case of securities of loans dischargeable upon notice given at any time, enables the Government to issue duplicates (under the usual safeguard of a bond of indemnity) in every case of a security proved to have been lost or destroyed.

Abstract E.—Statement of Net Revenue and Expenditure 535

FINANCIAL STATEMENT for 1885-86.

Preliminary.

1. The Financial Statement for the ensuing year will present but little of special attraction so far as any new development of our fiscal system is concerned. But on the other hand, to those who have followed with attention the course of Indian finance during the last few years, the year 1885-86 will prove of much interest. As being the fourth year in which a Budget has been framed on the basis of the anticipations embodied in the reforms which culminated in 1882-83, it enables us, when viewed with the three years preceding it, to judge what, in the presence of considerable difficulties and apart from extraordinary emergencies, the outcome of the measures taken in 1882-83 may, on the whole, be said to have been. In a later part of this Statement I shall have occasion to go at greater length into this subject; but this much may be said in these preliminary remarks, that, in my judgment, we now may assume that, very exceptional circumstances apart, the expectations of my predecessors, who believed that the normal and healthy increase of revenues would be found to balance the ordinary expenditure, and in that confidence abolished the import duties and lowered the salt tax, have been fulfilled. In the course of this Statement we shall find that the three years 1882-83, 1883-84, 1884-85 have between them, if we take in the case of the two former years the Accounts, and, in the latter year, the Revised Estimates, given us a surplus of revenue over expenditure of about £1,378,000; that although in any one year its surplus may be abnormally large, or in the succeeding year there may be even some apparent deficit, these are variations largely attributable to irregularities of Land Revenue collection incidental to our fiscal administration, which in no way necessarily indicate uncertainty or irregularity in our sources of receipt, when viewed as a whole; that we can sustain such severe losses as a partial failure of the opium crop, a temporary stagnation of the railway traffic, arising from dullness in our wheat trade, or a serious falling off in our Customs duties, or that we can provide for unforeseen expenditure, such as payments necessitated on an excessive opium crop may produce, but that these losses or requirements leave us, as they found us, with our resources unimpaired, and without any causes of anxiety as to our capability in the future of meeting similar emergent demands. This much will be seen on the brighter side of the subject. On the other, however, attention will be drawn to the consequences of depression in trade, and of a further depreciation in the value of silver. It will be noted that for the first time in our financial history we have been compelled to adopt a rate of exchange no higher than 1*s.* 7*d.*, and if we have not had to add to our estimates the corresponding sum of £440,000 as a gross increase to our loss by exchange, it is only because there will be, for reasons to be presently explained, a very considerable decrease this year in the Secretary of State's Bills, which enables us to shew in 1885-86 an apparent economy under the head of exchange; an economy, however, which must not be taken as indicating any real corresponding improvement. As far as the future is concerned, little or no ground will be found to exist for allaying our apprehensions: and this at a time when we have embarked upon extensive and costly measures for the improvement and development of our communications, and when the course of events beyond our frontiers is raising questions which seem likely

Preliminary.

Sufficiency of revenues provided by the reforms of 1882-83 and preceding years; effect of recent circumstances on those reforms.

to disturb, more or less seriously, the calculations of those who are charged with the financial administration of this country. While, therefore, it will probably be conceded that the measures of reform which I have alluded to have been fully justified by the experience acquired since their introduction, it will possibly be questioned whether the *status* which they established will prove sufficient in view of the further trials which seem to be awaiting us, and of the necessities of our situation, whether connected with the state of our currency, or with the measures necessary for the development and protection of the country. The experience which we shall gain during the ensuing year as to the effect upon our estimates of the several considerations I have indicated will, probably, be invaluable in adding to the means at our disposal for forming a final opinion upon this point; a point which obviously depends, not in the least on the adequacy or otherwise of the financial resources provided us in their relation to the state of affairs which existed at the commencement of the decade, but on the consideration whether affairs are not passing into a new phase which was then, though not unforeseen, less imminent; which could not therefore be taken into immediate consideration; but which, should it now arrive, must be met on the lines of the policy then adopted, and in conformity with the principles by which it was inspired. I hope, in the course of this Statement, so to handle the material before me as to illustrate and to demonstrate the appositeness of the preceding remarks, and to make clear to any one who reads it with moderate attention, what our resources during the three years which it treats of have been, or are likely to be; how far they are capable of meeting the calls which in ordinary course experience shews we must expect; and whether, in view of the further obligations we have undertaken, or which the fall in silver or other circumstances are forcing upon us, our resources may be expected to prove as sufficient in the years immediately ensuing, as in the three years which it will be the business of this Statement to review.

The Accounts of 1883-84.

	£
Revenue	71,727,421
Expenditure	70,339,925
Surplus	1,387,496

2. The appropriation audit report, published in the *Gazette of India* of 14th March 1885, gives in great detail the explanations necessary to arrive at a full understanding of the surplus here exhibited; but as the surplus of the Budget Estimate for that year was taken at £457,000 and that of the Revised Estimate at £271,400 only, it is desirable to add a few remarks explanatory of the great difference between the actual surplus and the several forecasts above enumerated. There was an increase of £1,595,300 under the principal heads of revenue, of which the main item was Land Revenue, about £569,200. This sum was collected in Burmah, Madras, and Bombay in 1883-84, greatly in advance even of the estimates of January and February 1884, at the end of the year, and in ordinary course would have fallen into 1884-85, (an incident, as will be presently seen, which, however favourable to the surplus of 1883-84, has mainly contributed to bring about a deficit in the Revised Estimates of 1884-85). The Opium revenue was £356,500 better than the estimate, and owing to the very short crop of the year, there was a decrease of £310,600 on Expenditure. Excise, Stamps, and Forest revenue, between them, were better by £439,000 than the estimates. Post Office, Telegraph, and Mint gave an improvement of £58,500 owing to short expenditure on capital account of telegraphs, and the absorp-

Large exhibited surplus partly due to collection of land revenue ordinarily falling due in 1885-86; partly to method of accounting for certain sums connected with the Sindh, Panjab, and Delhi Railway.

tion of copper coin bringing a large gain to the Treasury. Under Miscellaneous an arrear of £130,000 was paid on account of interest from the Bombay Port Trust. Productive Public Works shewed a better revenue account by £687,400, due to the prosperous trade of the year, which, however favourable circumstances may have been, it would have been obviously imprudent fully to take credit for in the estimates. Under Public Works not classed as Productive there was a gain of £362,500, arising from the transfer of certain Provincial Railways in Bengal and in the North-Western Provinces from Ordinary to Productive, and the per contra transfer of Madras Harbour Works from Productive to Ordinary. The sum of £325,000, which in the Revised Estimates, as explained in my Budget Statement for last year, was written off against revenue by a credit to capital, being the loss in past years on the Indus Flotilla of the Sindh, Punjab, and Delhi Railway, and which balanced the gain above mentioned, has been since removed from the Revenue Account under instructions from the Secretary of State, thereby relieving the estimates of 1883-84 of that charge. Under Military Estimates there was a saving of £178,600; but, as a million sterling was paid to the English War Office on account of arrears of non-effective charges, the real saving was converted into an excess charge of £821,400, while the exchange rose to £290,700 above the estimates, as the Secretary of State took the occasion of a favourable market to increase the number of bills drawn by him. These explanations cover, generally, the increase of the surplus shewn in the Accounts over that exhibited in the Budget and the Revised Estimates. The difference between the Budget Estimate and the Accounts requires perhaps less explanation; but if it is asked why the Revised Estimates, made at a date comparatively late, and but shortly before the close of the year, were so wide of the mark, the answer is to be found in the accelerated payment of £569,200 Land Revenue above mentioned, and in the orders of the Secretary of State under which, after the close of 1884-85, £325,000 on account of the Indus Flotilla were removed from the debit to Revenue.

Revised Estimates, 1884-85.

3. The Budget and Revised Estimates for 1884-85 are as follows :—

Budget and Revised Estimat 1884-85:

Budget Estimates.,

	£
Total Revenue	70,560,400
Total Expenditure	70,241,100
Surplus	319,300

Revised Estimates.

	£
Total Revenue	69,991,200
Total Expenditure	70,707,400
Deficit	716,200

Deficit of.

4. The past year, so far as can be seen on the Revised Estimates and until its accounts are finally closed, has presented us, not with the surplus of £319,300, but with a deficit of £716,200.

Effect of inclusi in 1883-84 of su ordinarily paya in 1884-85.

5. It has been already mentioned that the unexpected payment in March 1884 of Land Revenue amounting to £569,200 swelled the surplus of 1883-84 to the prejudice of the ensuing year, and that the calculations on which the estimates of 1884-85 were framed have been thrown out to this extent; an extent, approximating to the deficit on the Revised Estimates of that year.

Before the year closes considerable further expenditure will have to be incurred on account of the proposed Camp to be formed at Rawal Pindi for the reception of the Amir of Kabul; and we have provided for this in our Revised Estimates.

6. Apart from this, however, to those who have watched the course of trade during the past year, it will be matter of little surprise that the small surplus of the Budget was not realised. There have been several causes contributant towards this result. They may be grouped under the two main heads of "Trade" and "Revenue and Expenditure." Under the first fall the exports of wheat, and consequently the railway earnings; and the exports of rice, and consequently the Customs duties. Under the latter fall Land Revenue and Opium. The combination of a good harvest in England, and of large stocks in America, depressed the price of wheat during the later part of the year 1884; and early in the second half of the calender year it became obvious that the export trade in wheat, which during the last two years had been continually increasing, must suffer a temporary re-action. The rice trade had begun to shew signs of depression since the commencement of 1884, and never recovered itself during the financial year. I have given, in a later part of this Statement, figures indicating the comparative fall in prices and in the export of wheat and rice, but at present I confine myself to dealing with the financial results which have been brought about by these causes. They may be briefly summed up as follows in a comparative form:—

ional lties in 5.

I.—CUSTOMS.

Net Loss	157,260	343,500	365,400
Net Gain to State	1,079,240	452,800	768,200

7. We have here a total decrease in the Revised, as compared with the Budget Estimate, of £885,940. This loss is wholly derived from the depression

in trade, which could not be foreseen at the time of the Budget. The East Indian Railway gross earnings were £580,000 short of the Budget; those of the Rajputana-Malwa State Railway, £47,500; of the guaranteed lines the Oudh and Rohilkhand Railway Revised Estimate of net receipts is £175,000, against a Budget Estimate of £250,000; the Sindh, Punjab, and Delhi gives £390,000 Revised Estimate, against an estimate on the Budget of £480,000. To the direct losses on the State Railways must be added a temporary decrease in Land Revenue in Madras and in Bombay, brought about by suspension of revenue in certain districts of those Provinces, owing to partial failure of the rains in 1884. These sums are severally estimated at £271,600 for Madras, and £72,300 for Bombay. Credit has been taken for them in 1885-86; but as, on the one hand, the year 1884-85 was mulcted of about £569,200, by which, as above explained, the year antecedent benefited, so, on the other, it has been obliged to resign to the succeeding year, 1885-86, the above amount of £343,900, which ordinarily would have been collected within its term, and placed to the credit of its receipts. Finally, we were called upon to meet the largest expenditure on account of payment for opium which has ever, so far as I know, been incurred in India. The outturn of the crop was large beyond all experience, and we found ourselves compelled to add, in the course of the year, no less than £593,600 to our Budget Estimate on this account. Although, eventually, by the great increase to our opium reserves, which threatened in the commencement of 1884-85 to fall abnormally low, we shall benefit by this extraordinary stock, the benefit will be for future years; the burden is thrown on 1884-85. Adding together the several losses under the several heads above enumerated of Customs, Railways, Land Revenue, and opium, we have a total of £1,823,440. To this, again, must be added the sum of £118,500 which we contributed from revenue towards capital expenditure on account of the construction of the Sindh-Pishin-Sibi Railway. I shall have more to say presently regarding the assignment of grants from revenue for capital expenditure on railways; but I draw attention to this grant here, because the active resumption of work on that Railway had not been proposed, and could not be foreseen at the time the estimates of 1884-85 were framed. If it is permissible in any way to congratulate oneself over the figures of a deficit, we have ground for satisfaction that in spite of these abnormal losses and charges the constant and steady increase in other branches of our revenue has enabled us to compensate in large measure for the disagreeable results which awaited us on the estimates made under the several heads I have specified. Taking, moreover, the years 1883-84 and 1884-85 together, we find, as explained in my 2nd paragraph, that, whatever the one year may have gained at the expense of the other, the revenues proper to either, looked at as a whole, suffice to meet the expenditure. The results of the financial administration have continued, in effect, to justify the conclusions indicated in the opening sentences of my Financial Statement for 1884-85. I have to return to this matter; but enough has been stated already, I think, to make it obvious that, unforeseen difficulties notwithstanding, the normal receipts have been equal to the normal expenditure. Presently, when I take up in detail the results under the minor heads of the estimates, it will be seen where normal growth of revenue has assisted us in meeting abnormal losses, and I reserve any further remarks I have to make on the subject, until I come to deal with those figures. It need only be added here, in general terms, that, on the whole, the season having been a good one, the increase in our Salt, Stamp, and Excise revenues has continued to give the results anticipated; State Railways have done well; there have been considerable economies under "Army" and other heads. On the other hand, it should not escape notice that exchange, which we had taken at £3,538,100, is shewn in the Revised Estimates at £3,253,900, or £285,200 less than

Further effects of suspensions of Land Revenue, and abnormal Opium expenditure.

Compensating effects of increase of revenue under other heads.

ary of State's ngs except- ly small in 5.

the estimated figure. The Secretary of State was enabled to supplement his bills by drawing on resources at his disposal in England. In judging not merely of the budgetary surplus or deficit of any particular year, but of the aspect, in a larger view, of our financial condition during the past year, of the claims which we have to meet, and of the resources which are at our disposal, this fact must be borne in mind; especially at a time when, as we shall presently see, the exchange is assuming proportions which threaten to interfere seriously with the arrangements by which we had secured our equilibrium.

e of trade g 1884-85.

8. Passing from the financial effect of the depression in the wheat and rice trade, and the excessive expenditure in opium, I think it is desirable to gather together here the main figures which illustrate the course of trade during the year, and its present prospects, as well as those indicating the large increase in our opium stores and the cost at which it has been acquired.

9. With the growth of its railway enterprise the Government of India is becoming more and more deeply interested in the progress of Indian trade, and it is not without good reason that the departments of Commerce and of Finance have been linked together in Indian administration. So large a proportion of our revenue is derived from railways, and if the estimates and forecasts which have been framed for the future should be verified, so large an increase from the same source may in the course of time be looked for, while, on the other hand, our obligations in regard to the cost of construction are assuming such grave proportions, that the direct interest of this Government in the development of its export trade, from the point of view of the resources which it derives immediately therefrom, is, to say the least of it, no less than that which it has in the other main branches of its revenue. For this, if for no other reason, some analysis of the returns of trade during the preceding year seems necessarily to form part of a Financial Statement, indicating as they do not only the causes which may have led to any increase or falling off in the estimates of that year, but assisting us in forming a forecast as to what are the probabilities of the year about to ensue. I have given above a résumé of the financial effect produced by the stagnation in trade under which we are now suffering; and the figures which I am about to tabulate, and for which I am indebted to Mr. O'Conor, the Assistant Secretary in the Department of Commerce, whose excellent reports on Indian trade place annually before the public in the clearest form all possible information on the subject, will show how those effects have been brought about; and, I am afraid, will yield for the moment but little ground for hoping that we may expect any speedy return of the period of prosperity with which we were favoured in the years 1882 and 1883, and more especially in the latter year. The annexed table shows for the years 1882-83, 1883-84, and ten months of 1884-85 the quantity and value of exports of some of the principal articles of Indian merchandise.

Decline of trade indicated in above tables.

11. It will be seen that while in tea, hides, skins, jute goods (bags), and seeds, there has been improvement, on the other hand, in most of our important exports, in raw cotton, rice, wheat, sugar, raw jute, the decrease has been steady and serious, and the decline has, in most cases, been coincident with the marked decline in prices in the English markets which commenced in the third quarter of 1884. Prices, indeed, for most of our large staples commenced to shew symptoms of decline from the beginning of 1882, but the decline was interrupted from time to time by temporary upward movements, which gave an immediate impetus to trade, and it is only since the middle of last year that the downward movement has been accelerated, and has continued without interruption to the present time. There seems some indication, however, that the decline in prices has reached its lowest limit. There are some grounds for hoping that for many of the articles enumerated in these tables prices will presently reach a level which may favour a more active resumption of trade. It will be seen that in the several quarters of which a comparative table is given, tea has risen in quantity and in value from 45,850,651lbs., of the value of ₹2,95,76,166, to 52,631,980lbs., of the value of ₹3,34,75,726; hides and skins

from 612,413 cwt. to 660,436 cwt., and from ₹3,11,55,908 to ₹3,30,14,256; raw jute has fallen from 6,895,209 cwt. to 6,307,460 cwt., and from ₹3,94,58,850 to ₹3,54,45,638; jute bags have risen from ₹1,03,10,500, through a year of great depression, to ₹1,11,87,966; seeds from 10,412,302 cwt. to 14,018,021 cwt., and from ₹5,61,95,792 to ₹8,12,24,696; while raw cotton has fallen from 4,161,804 cwt. to 3,818,059 cwt., and from ₹11,04,18,596 to ₹10,08,98,560; and rice has fallen from 17,644,834 cwt. to 11,396,951 cwt. and from ₹4,74,99,946 to ₹3,92,57,416; wheat has risen, though in contrast with the trade of 1883-84 the rise indicates anything but prosperity, from 10,836,705 cwt. to 11,965,436 cwt. and from ₹4,67,15,865 to ₹4,84,73,851; sugar, finally, has fallen from 1,125,514 cwt. to 1,046,942 cwt. and from ₹71,06,031 to ₹52,75,151.

Wheat, sugar, jute, indigo.

Since January there has been some revival in wheat; but supplies are still large, and so long as the prospects of further supplies are fair, it would be, to say the least, sanguine to hope that trade will resume its former activity. At the present price in Calcutta, ₹2-6-6 per maund, with a freight of 35*s.* a ton through the Canal, wheat can be landed in England at about 34*s.* per quarter, exchange being taken at 1*s.* 7*d.* London prices for Indian wheat are about 35*s.* per quarter. But as exports increase freight advances, and prices in England have a tendency to fall; so that although, in fact, a difference of a farthing in exchange makes a difference of a little over 1 per cent. in the prices laid down, these other elements have always to be taken into consideration. The fall in the price of sugar has been due to the enormous extension of the beet crops in Germany and in Austria, caused by the protective laws enforced in those countries; prices have been gradually declining for some considerable time, but the fall was very rapid after the middle of 1884. Exports from Bengal, which had been increasing largely, fell almost to nothing, and large consignments of cane sugar came to the Province from Java, while even some beet sugar was imported. The fact of imports of sugar into Bengal from Java, Austria, and the United Kingdom, illustrates the condition of our sugar market. Jute has reached the lowest price touched during the period for which the tables have been made out. With the diminution in the wheat and rice trade there is a diminished demand for local manufacture, and a larger surplus of jute to export. The great decline in price commenced in the middle of 1884 and has continued steadily down to the present. Jute goods have fallen in value with a diminished local demand for them and surplus stocks remaining over from the heavy outturn of the mills in 1883 have been exported in greatly increased quantities for speculative markets. The price of gunny bags is regulated by the general condition of trade, especially of the grain trade, and these will not give better values until other articles revive. The price of indigo depends mainly upon the quantity and quality of the crop in Bengal and the North-Western Provinces, and fluctuates from year to year with little reference to other considerations; hence indigo has been omitted from these tables.

Comparative table of prices of wheat, rates of exchange on Secretary of State's Bills, and Canal freights from Calcutta.

From the subjoined table of prices will be gathered the great fall in present prices, as compared with 1882, in wheat. The rates of exchange and the freights ruling in the several months specified are added; and viewed in conjunction with the increasing stagnation of trade during that period, they throw some light on the contention of which a good deal has been lately heard that a fall in exchange, inasmuch as it stimulates trade, is in itself a source of increased revenue to the Government of India. It may be, no doubt, in favourable markets, but it certainly does not of itself suffice to sustain trade as against the competition of crowded markets, and in the presence of low prices. Comparing the exchange ruling in 1884 with that of 1883, when the trade was in its greatest activity, we find that for the first 8 months of the former year, when the

decline in exports first made itself felt, exchange was decidedly more favourable. It is, to say the least, very questionable whether, other things remaining equal, for the £440,000 which the loss of ½*d.* in exchange will cost us, we shall derive at present any adequate return in the stimulus of increased exports, and the revival of more active railway traffic.

Great as the falling off has been, the Indian imports into England amounted to 12·8 per cent. of the whole quantity imported, against 10·9 per cent. in 1882 and 13·9 in 1883. Compared with the Russian trade of last year, the Indian imports contrast favourably.

13. The prospects of the rice trade continue to be doubtful; the stocks on hand in London were estimated (*Economist* of January 3, 1885) in the five years closing with 1884 as follows :—

ice trade ; stocks s hand.

	Tons.
December 1880	29,730
,, 1881	52,800
,, 1882	24,840
,, 1883	54,900
,, 1884	33,900

rices of Rice in urope ; competi-on of Saigon ; mparative figures f Saigon exports Europe.

14. Prices have continuously fallen, and were very lately lower than at any former period, prices for Rangoon rice to arrive being quoted in London on February 7 :—

		s.	d.		s.	d.
1882	per cwt.	8	9	to	9	1½
1883	,,	7	9	to	8	3
1884	,,	7	3	to	7	9
1885	,,	7	3	to	7	4½

The effect on rice of the excessively low price of maize, potatoes, and sugar, has been aggravated by the relations at present existing between the Governments of France and of China. Saigon rice, instead of looking for its

market in China, is now diverted to Europe, and the following table shews the increase of exports of Saigon rice to Europe during the last two years. The figures are taken from returns furnished by Her Majesty's Consul at Saigon :—

	1882-83.	1883-84.	1884-85.
	cwt.	cwt.	cwt.
1st Quarter	2,628,900	3,299,100	3,414,520

3rd „	1,965,740	(Not received)	837,140
4th „	2,832,760	3,344,400	...

Competition of Siam and Japan. Prospects of improvement in rice trade.

15. Siam and Japan are also entering the European market and exporting increasing quantities of rice. The temporary depression of the Burmah rice trade is due, unquestionably, however, not to competition, partial failure of corps, or low prices in Europe only, but in a great measure to over-speculation and excessive competition in 1883-84. With a revival of trade in Europe, and with a more sound and less speculative conduct of trade operations, we may hope for material improvement in the rice trade, which, for the moment, however, continues in a state of depression only too faithfully reflected in our returns of Customs duties.

16. Turning from the interest which the Government of India in its capacity of an extensive owner of railways, or as the guarantor of the main Indian lines, is compelled in an extraordinary degree to feel in the development of the trade of the country, I proceed to give a view of another of those relations which, as I pointed out in paragraph 120 of my last year's Statement, it occupies outside the sphere of the ordinary operations of Governments. The following few facts shew how it was that we were called upon to meet the heavy excess expenditure, the figures of which have been given in my paragraph 7 in relation to our opium monopoly. The area under opium in 1883-84 was not, I believe, exceptionally large, but from causes connected with the atmospheric peculiarities of the season, the outturn was quite exceptional. The average yield per beegah in the Behar Agency was 5 seers 15½ chittacks, against 2 seers 12 chittacks in the preceding year, which, however, was a year exceptionally bad, while in the Benares Agency it was 6 seers 7½ chittacks against 4 seers 1½ chittacks. The last estimate of the Behar Agency produce was 47,766 maunds, the gross weight of opium received, at 80-tola weight, was 55,379 maunds. In the Benares Agency, from figures furnished by the Opium Agent, it would seem that the outturn compared with that of the preceding ten years, was as follows :—

Opium crop of 1883-84. Comparison of outturn with that of previous years.

	Maunds.
1873-74	43,000
1874-75	39,201
1875 76	60,113
1876-77	61,561
1877-78	45,380
1878-79	56,636
1879-80	45,475
1880-81	45,505
1881-82	51,449
1882-83	42,213
1883-84	67,037

We had estimated, on account of Opium expenditure, for a sum of £2,352,900, we actually have had to pay a sum of £2,946,500. The storing of this largely increased quantity of opium led to no little difficulty in the Benares Agency,

and after the closing of the season's factory weighments, additional accommodation had to be furnished. The result, however prejudicial to our estimates of 1884-85, will enable us materially to increase our opium reserve. The prospects of the season now drawing to a close are again reported good, but there is no reason to suppose that the return will be equal to that of the preceding year.

t; progressive sumption steady moderate.

17. In paragraph 16 of last year's Financial Statement is given a comparative table of the consumption of salt for the 11 corresponding months of each year from 1874-75 as compared with the previous year, and it was shewn that in the 11 months from 1st March 1882 to 31st January 1883, and from the 1st March 1883 to 31st January 1884 the increased consumption as compared with the corresponding months of 1881-82 amounted to 2,576,000 maunds. The consumption for the corresponding months of last year, namely, from 1st March 1884 to 31st January 1885 is 27,792,000 maunds, or 718,000 maunds in excess of the corresponding period of the preceding year. We have taken for our estimates a figure £72,000 in excess of the Budget Estimate of last year, and £61,700 in excess of the Revised Estimates. The increase of consumption continues to be steady, but not excessively large.

ings Banks; rease in Depositors.

18. On the 31st March 1884 the number of depositors in District and Presidency Savings Banks was 91,981 against 88,836 on the same date of the previous year, or shewing an increase of 3,145 depositors. The increase occurred among the natives :—

	Europeans and Eurasians.	Natives.	Total
	No.	No.	No.
31st March 1883 . . .	20,232	68,604	88,836
„ *1884* . . .	20,037	71,944	91,981
	— 195	+ 3,340	+ 3,145

These figures indicate a growth of the provident habits of the people of this country.

The balance at the credit of the depositors on the 31st March 1884 was £3,028,200 against £3,113,700 on the corresponding date of the previous year, or shewing a decrease of £85,500. This decrease is due, no doubt, to the opening of the Post Office Savings Banks.

ccess of Post ice Savings nks.

19. The Post Office Savings Bank system continues to be a marked success. At the end of March 1883 the total number of Savings Bank Accounts was 39,121, by the end of March 1884 it had risen to 84,848, and now at the close of January 1885 it stands at 116,528. The balance at the credit of depositors at the end of March 1883 was ₹27,96,796; by the end of March 1884 it had risen to ₹75,14,454, and now, at the end of January 1885, it stands at ₹1,26,10,610. Of the 84,848 accounts open at the end of March 1884, 8,410 were accounts in the names of Europeans and Eurasians, while 76,438 were accounts in the names of natives of India. Of the total number of accounts open at the end of January 1885, 12,617 stand in the names of Europeans and Eurasians, and 1,03,911 in the names of natives of India.

Post Office Savings Banks (within the limits of the Presidency towns) were opened at Madras on 1st April 1883, and at Calcutta and Bombay on the 1st May 1883. At the close of March 1884 the number of accounts standing in the books of these Banks was 6,361, and the balance at the credit of depositors ₹4,95,277. At the close of January 1885 the number of accounts is 10,786 and the balance at the credit of depositors ₹10,10,028. There is every reason, therefore, to be satisfied with the results. Out of the total number of depositors

at the end of March 1884, 1,191 were Europeans or Eurasians and 5,170 natives of India. Of the total number now shewn, 1,972 are Europeans and Eurasians and 8,814 natives of India.

The Presidency Savings Banks comprise a certain number of Sub-Savings Banks at small offices in the vicinity of Presidency towns as well as at the various town Sub-Offices, and the figures now given include the accounts at all these Sub-Offices.

Post Office Life Insurance in experimental stage.

20. The Life Insurance scheme for persons in the employ of the Post Office was introduced on the 1st February 1884, and has therefore been in force for a year up to the end of January 1885. The number of such persons who have insured their lives during this period is 339, and the total amount for which their lives have been insured is ₹4,89,675. Of these, 37 were Europeans and Eurasians and 302 natives of India.

During the first year of the scheme only about 3 per cent. of Post Office servants above the grade of postmen have taken advantage of it, and the scheme cannot therefore be said to have been an unqualified success hitherto. But in Madras, Bombay, and especially in Bengal, where English ideas and education are more wide-spread than in the rest of India, there is reason to believe that it is being appreciated. In Bengal 134 natives insured their lives, and in Madras 54. On the other hand, in the whole of the North-Western Provinces, Oudh, and the Punjab there were only 28 natives of the country willing to make use of the scheme.

Imports of gold and silver.

21. The net imports of gold and silver during ten months of 1884-85 and for each year since 1880-81 are given below. Attention was drawn in last year's Financial Statement to the annual absorption of gold by India. The year 1883-84 is the highest point reached since 1869-70.

Year.	Gold.		
	Imports.	Exports.	Net imports.
	₹	₹	₹
1880-81	3,68,10,576	1,68,586	3,66,41,990
1881-82	4,85,63,920	1,24,078	4,84,39,842
1882-83	5,09,51,324	16,42,639	4,93,08,685
1883-84	5,46,94,568	61,412	5,46,33,156
1884-85 (10 months)	4,57,55,811	7,29,476	4,50,26,335

Years.	Silver.		
	Imports.	Exports.	Net Imports.
	₹	₹	₹
1880-81	5,31,61,563	1,42,35,822	3,89,25,741
1881-82	6,46,63,884	1,08,73,390	5,37,90,494
1882-83	8,35,82,318	87,75,849	7,48,06,469
1883-84	7,40,85,065	1,00,23,525	6,40,61,540
1884-85 (10 months)	7,21,77,086	1,59,86,152	5,61,90,934

No improvement in Stock Notes.

22. Stock Notes have shewn no sign of improvement. Up to the end of December 1883 £190,400 worth of Stock Notes had been issued; at the close of 1884 the figure stood at £200,113. The subject has been under the consideration of the Government of India, who are about to address the Secretary of State upon it with a view of taking such measures as may possibly facilitate the use of the notes. It would be premature at present, until we know what the views of the Secretary of State are, to enter into any detailed discussion of this subject, which must be reserved for the ensuing year.

led notes as to ence, above 000, in the et and Revised ates of 85.

23. I proceed now to give the customary explanations under those heads where the receipts and the expenditure of the Revised Estimates shew considerable difference from the estimates taken in the Budget. Where the difference, whether increase or decrease, is not more than £10,000, I think it unnecessary to record here any explanation.

24. *Land Revenue* (*I*); Decrease, £341,900. This is a net decrease, due mainly to Madras (£271,600) and Bombay (£72,300). The large reduction under Madras was owing to the exceptional character of the rainy season in 1884-85. Not only had the south-west monsoon in certain districts failed, but the north-east monsoon was very deficient in the northern part of the Presidency, while, on the other hand, it was accompanied in the south by serious floods. Hence considerable remissions and suspensions of land revenue have been brought about. In Bombay a similar failure of the monsoon in the Southern Mahratta country has led to postponement, in part, of the demand. These are the suspensions of land revenue spoken of in paragraph 7.

25. *Opium* (*II*); Increase, £255,800. This is due in part to the fact that the opium sales having produced an average of ₹1,295-15-11 per chest, against ₹1,250, the figure taken in the estimates; and secondly, to a sale of 198 chests more than it was originally proposed to place on the market. The increased ratio of sales took place from the 1st January in the present year. There were delivered by Mr. Rivett-Carnac's Agency 2,268 maunds of Malwa opium, at a consistence of 90 per cent., being equivalent to the setting free of 1,712 chests of provision opium at 70 per cent. consistence. The amount of reserve at the close of 1885 is estimated at 18,297 chests.

incipal heads of evenue.

26. *Salt* (*III*); Increase, £21,100. This is mainly due to an increase of £85,300 in Bengal, and £20,000 in Bombay, against which, however, has to be put a decrease of £93,200 in Madras. The decrease in Madras is attributed to diminished consumption of east coast salt; secondly, the large extension of sales under the credit system, of which the effect will be to transfer to 1885-86 revenues which would otherwise have been collected in 1884-85; thirdly, the substitution of excise salt for monopoly salt, and the consequent omission from both the expenditure and revenue sides of the accounts, of the cost of manufacture, which under the monopoly system the Government used to pay to manufacturers, recovering it subsequently with the duty; hence the only real decrease is that arising from decrease of consumption of East Coast salt.

27. *Stamps* (*IV*); Increase, £45,000. *Excise* (*V*); Increase, £216,600. The increase under these heads is general and normal, in years of average prosperity, and calls for no particular remarks.

28. *Provincial Rates* (*VI*); Increase, £53,600. This increase is the net result of increases and decreases in the several Provinces. The principal of these are, first, an increase of £66,000 in the Punjab, due to the circumstance that the assets of the Patwari's Fee Fund, (an incorporated Local Fund) have been transferred from under Land Revenue to this head; and, secondly, to a decrease of £22,400 in Madras due to postponement of collection of cesses to that amount till the ensuing year 1885-86.

29. *Customs* (*VII*); Decrease, £259,500. This is the net result of a decrease of £194,500 in British Burmah, £75,000 in Bengal, and an increase of £10,000 in Bombay. The cause of this decrease has been sufficiently explained in previous paragraphs of this Statement.

30. *Registration* (*X*); Increase, £15,200. This is due to the same cause as *Stamps* and *Excise*, namely, to general prosperity throughout the country during the year, and calls for no particular remark.

Post Office, Telegraph, and Mint.

31. *Mint* (*XIV*); Increase, £61,800, due to coinage of a larger quantity of silver than was anticipated, and to a gain arising out of a greater quantity of copper passing into circulation than was expected at the time the Budget was framed.

32. *Law and Justice* (*XV*); Decrease, £53,800, being mainly due to diminished receipts from the sale of jail manufactures, and from Magisterial fees and fines.

Receipts by Civil Departments.

33. *Marine* (*XVII*); Decrease, £28,000. Of this, £20,000 is due to the falling off in Dockyard services and supplies to other Departments. A reduction of £3,700 is also made in the Burma Estimates, owing to short receipts from sale of vessels and stores, freight, passage, tonnage, &c. Under Bengal a reduction of £5,000 is made owing to short pilotage receipts, arising from the slackness of trade.

34. *Scientific and other Minor Departments* (*XX*). The increase is £12,100; it is general and represents larger receipts than originally anticipated under Botanical gardens, experimental farms, sales of cinchona, and the other remaining subordinate heads of revenue.

35. *Interest* (*XXI*); Increase, £47,300. Of this £23,100 occurs in England and £24,200 in India. The increase in England is due to the temporary investment at favourable rates of the surplus cash balances owing to the loan of three millions which was issued in May 1884 not being required for the discharge of debentures till August. The increase in India is due to interest on over-drawals of capital by guaranteed railways.

Miscellaneous.

36. *Miscellaneous* (*XXIV*); Increase, £63,300. This is always an uncertain figure, and the above increase is mainly due to the receipts from lapsed deposits being expected to reach a higher figure than was foreseen in the Budget.

Revenue from Productive Public Works.

37. *State Railways, Gross earnings* (*XXV*); Decrease, exclusive of the East Indian Railway, £7,300. This is the net result of a series of figures of which the chief are, an increase of £10,000 in the Burma State Railways, £10,000 in the Eastern Bengal State Railway, and £97,500 in the Indus Valley State Railway, against a decrease of £47,500 in the Rajputana-Malwa Railway, £7,500 in the Nagpore and Chhatisgarh State Railway, £23,500 in the Northern Bengal State Railway, and £22,600 in the Calcutta and South-Eastern State Railway. The increase in Burma is due to additional mileage opened on the Sittang Railway, on which the receipts also have proved better than was expected. On the Eastern Bengal State Railway the improvement is due to the following causes. After the preparation of the original estimate it was resolved to amalgamate the Calcutta and South-Eastern State Railway and the Poradaha-Damukdia Section of the Northern Bengal State Railway with the Eastern Bengal State Railway; the figures of the Revised Estimates, therefore, represent the transactions of the combined undertakings. This estimate also includes a special credit of £29,500 on account of the estimated share of the assets of the Fire Insurance and Flotilla Reserve fund of the late Eastern Bengal Guaranteed Railway, credited to the Imperial Government. The increase in the Indus Valley State Railway is owing to the development of the wheat and seed traffic on that line. With regard to the decreases, that of the Rajputana Railway is due to loss of traffic in consequence of breaches on the line and on the Bombay, Baroda, and Central India Railway during the monsoon; to slackness of the wheat trade; and to a reduction of the rate of charge against the Rewari-Ferozepore State Railway for hire of rolling-stock. The decrease on the Nagpore-Chhatisgarh Railway is ascribed chiefly to the slackness of the grain market, and to reduction in the rates for carriage of grain and salt. The decrease in the Northern Bengal State Railway is due to the transfer of the Poradaha Section of the line, as already explained, and to the reduction of the charge levied for crossing the Ganges on the opening of the extension of the

same section to the new Ghat at Golabnagar. The decrease in the Calcutta and South-Eastern State Railway is due to its amalgamation with the Eastern Bengal State Railway from the 1st July 1884, and while the Revised Estimate represents receipts only up to the 30th June, the Budget Estimate of 1884-85 was based on a whole year's transactions. On the East Indian Railway there is a decrease of £580,000. This formidable decrease is due to the stagnation in the wheat trade which has formed the subject of preceding remarks.

38. *Guaranteed Railways, Net traffic receipts (XXVI)*; Decrease, £239,000. This is the net outcome of the following figures:—

	Increase.	Decrease.
	£	£
(1) Eastern Bengal Railway	...	73,000
(2) Madras Railway	45,000	...
(3) South Indian Railway	...	6,000
(4) Bombay, Baroda, and Central India Railway .	...	10,000
(5) Great Indian Peninsula Railway	...	30,000
(6) Oudh and Rohilkund Railway . . .	...	75,000
(7) Sindh, Punjab, and Delhi Railway . .	...	90,000

(*1*) *Eastern Bengal Railway.*—The figures are for the three months April to June 1884-85, the line having been taken over by Government from 1st July. The decrease on the Budget resulted from a decline in traffic, and from heavy outlay in excess of Budget provision on establishment and other charges, found necessary in connection with closing the Company's accounts and transactions.

(*2*) *Madras Railway.*—The improvement is due to the traffic being fairly good, and to an expected reduction of £25,000 on account of expenses.

(*3*) *South Indian Railway.*—Disastrous floods along this line caused several breaks in it, and interrupted the traffic for a comparatively long period. The disappointment of Budget expectations is due to these causes.

(*4*) *Bombay, Baroda, and Central India Railway.*—Breaks in the line during the last monsoon have brought about a reduction compared with the Budget Estimate.

(*5*) *Great Indian Peninsula Railway.*—The decrease is due to the Budget provision for expenses being insufficient by £50,000.

(*6*) *Oudh and Rohilkhund Railway.*—The traffic not having proved as good as it was expected it would prove, combined with the circumstance of the line being extended at a later date than was anticipated, has resulted in the Revised Estimates taking a lower figure than the Budget of 1884-85.

(*7*) *Sind, Punjab, and Delhi Railway.*—The Revised Estimate of receipts is £80,000 worse than the Original Estimate of the year. The goods traffic fell off considerably from June to September 1884, owing chiefly to the low price of wheat in Europe. Of the decrease of £80,000 the major part of £50,000 is, however, nominal, and is thus explainable—

1st,—£30,000 is due to a change in the system of accounting for receipts and charges on account of mileage and demurrage by which the *net result* is now shewn on the receipt or charge side of the Account, as the case may be, instead of the gross amounts being shewn on both sides of the Account, as formerly.

2nd,—£15,000 is due to a reduction in the rates for carriage of revenue stores. These changes have led to a corresponding reduction in charges. In the Revised Estimate of expenses £10,000 in excess of the Budget Estimate of 1884-85 have had to be provided to meet the cost of carrying out extensive renewals of permanent way and carriage and wagon stock. These renewals are expected to cost over £80,000, and but for this special and unforeseen expenditure

there would have been a satisfactory reduction over and above the nominal reduction due to the change in system already referred to.

39. *Irrigation and Navigation (direct receipts)* (*XXVII*); Increase £105,500. Compared with the Original Estimate the Revised shews an improvement of £105,500, being the net result of the following differences :—

	Increase.	Decrease.
	£	£
Bengal	...	5,000
N.-W. P. and Oudh	76,400	...
Punjab	36,100	...
Madras	...	2,300
Bombay	300	...

The decrease in Bengal is ascribable to a falling off in the water-rates and Navigation receipts on the Orissa and Midnapur Canals. The increase in the N.-W. P. and Oudh is due to the exceptionally favourable rabbi season of 1883-84 and a good kharif season in 1884-85.

In the case of the Punjab the increase represents the net balance of an increase on the Western Jumna Canal, and of a falling off on the Bari Doab and Sirhind Canal. The increase on the Western Jumna Canal is due to the area of irrigation being increased because of scanty rainfall during the rabbi season of 1883-84, and the early part of the kharif season of 1884; while the falling off on the Bari Doab and Sirhind Canals is the result of irrigation being less than was anticipated. The decrease in Madras is due chiefly to the falling off of Navigation receipts from tolls and license fees. The increase in Bombay is trifling and does not call for any special remarks.

40. *Portion of Land Revenue due to irrigation* (*XXVIII*); Increase £13,600: being the net outcome of figures in which the only notable increase is £16,600 in Madras, caused first by the completed channels of the Sangam Anicut project having been brought into operation for the first time, during the year; secondly, to the extension of irrigation in the Godavery and Kistna Delta systems; and thirdly, to the rate of calculation of charges in the Civil Department having been reduced from 7·2 to 5 per cent.

41. *State Railways* (*XXIX*); Increase £38,200: mainly due to £17,500 under the Rewari-Ferozepore State Railway, arising from the extension of the line to Ferozepore, and to the fact of the Fazilka branch having been opened earlier than was expected; and to £22,500 on the Sind-Peshin State Railway, due to the conveyance of labourers and large quantities of material for the northern section of this line, formerly known as the Candahar State Railway. *Receipts on account of Public Works not classed as Productive.*

42. *Southern Mahratta Railway* (*XXX*); Increase £32,500, due to an extension of traffic.

43. *Interest on Ordinary Debt*; (1) Increase, £241,100. Of this increase £199,400 occurs in England, and is due chiefly to the payment of £184,200 on account of discount on the issue in 1884-85 of India 3 per cent. stock of 3 millions, and to the charge for interest on this loan (estimated at £67,500 in 1884-85). On the other hand, there is (1) a decrease of £31,500 in interest on Debentures, owing to £5,000,000 only having been renewed instead of £6,906,500, as provided in the original estimate; (2) a decrease of £15,000 on temporary loans; and a decrease of £4,000 in the payments of outstanding dividends. The small difference under India calls for no special remark. **Expenditure.** *Interest.*

44. *Opium* (*6*); Increase, £593,600. This occurs principally in Bengal, and is due to the exceptionally large crop of 1883-84. Explanation has already been given in the body of the Statement in regard to this increase. *Direct demands on the Revenue.*

45. *Salt* (7); Decrease £62,100. The saving is due to a reduction in salary, establishment and contingent charges, and in charges for manufacture, purchase, and freight. In Madras the gradual supersession of the monopoly by the Excise system has also resulted in diminished expenditure. In Bombay the saving occurs chiefly in the salt establishment for Portuguese India.

46. *Provincial Rates* (10); Increase £58,400. This arises almost wholly in the Punjab, and is due to the transfer from "5. Land Revenue" to this head of the charges debitable to the Patwaris Fees Fund.

Post Office, Telegraph, and Mint.

47. *Telegraph* (16); Decrease £33,500. The saving occurs in the Indian Telegraph Department, and is due chiefly to restricted outlay on works, and to savings in establishments.

48. *Law and Justice* (19); Decrease £84,900. The decrease occurs in almost all the provinces, and is due principally to cheapness of grain and to limited expenditure on jail manufactures followed by diminished receipts.

Salaries and Expenses of Civil Departments.

49. *Police* (20); Increase £11,900. The Central Provinces, Burma, and Madras shew a saving. The other provinces provide for small increases to meet the growing requirements of the Department. The decrease in the Central Provinces amounts to £17,000, and is chiefly due to the revised scale of salaries sanctioned in re-organising the Police establishment not having been introduced as early as was expected.

50. *Marine* (21); Decrease £29,700. This is made up of decreases in India and increase in England. The decrease in India amounts to £42,700 and occurs chiefly in expenditure on account of dockyard services and supplies, followed by diminished receipts. The increase in England is due to charges on account of repairs of the steamer "Tenasserim."

51. *Education* (22); Decrease £26,400. This occurs in small amounts in almost all the provinces, and is due to excessive provision in the original estimate.

52. *Political* (25); Increase £167,800. The increase is mainly due to the following items:—

	£
Arrear payment of Amir's subsidy	29,800
Afghan Delimitation Commission	120,000

Miscellaneous Civil Charges.

53. *Territorial and Political Pensions* (27); Decrease £26,600. The variations occur in small amounts in all the provinces except the North-Western Provinces and Oudh, where there is a decrease of £10,000 due to the original estimate of the year having been taken at too high a figure.

54. *Stationery and Printing* (30); Decrease £37,100. The charges under this head are expected to fall short of the amount they were originally expected to reach, by £37,100. Of this amount a saving of £14,300 occurs in India, the saving under England being £22,800. In England the saving is due to less outlay on stores.

Famine Relief and Insurance.

55. *Famine Relief* (32); Increase £12,000. This figure is thus distributed—

	£
Bengal	5,000
Madras	2,000
Bombay	5,000
	12,000

No provision was made in the original estimates. But in Bengal, the prevalence of scarcity in the western districts; in Madras, devastating floods in South Arcot and some of the southern districts; and in Bombay expected distress in the Kaladgi district, render the small assignments made, necessary.

56. *Protective Works, Railways* (*33*); Decrease, £240,500. The decrease is due to the refund to the Government of the North-Western Provinces and Oudh of the contribution of £250,000 made from Provincial balances towards the construction of the Jhansi-Manickpur Railway, and the consequent curtailment of expenditure to that extent.

57. *Protective Works, Irrigation* (*34*); Decrease £39,500. This figure is made up thus :—

	£
Bengal, Increase	40,000
India (General and Political) Decrease	55,200
Madras ditto	7,200
Bombay ditto	17,100
Net .	39,500

The increase under Bengal is due to an additional grant sanctioned during the year for expenditure on the Orissa Coast Canal. The decrease under India (General and Political) represents the unutilised portion of the reserve held by the Department of Public Works to meet any applications for additional grants that might be made during the course of the year. The decrease in Madras is due to slow progress of work, for want of labour, on the Rushikulya project. The decrease in Bombay is due to short expenditure on the Nira Canal and the Mhaswad Tank, owing partly to the scarcity of labour and partly to the question of the waste weir of the Mhaswad Tank remaining unsettled till late in the year.

58. *Reduction of Debt* (*35*); Increase, £18,000. This is due to a re-adjustment of the grants under the several heads subordinate to the major head "Famine Relief and Insurance" in order to make up the total grant to £1,500,000.

59. *State Railways* (*working expenses*) (*36*); Increase, £33,600. The increase is due to the following causes: in the Rajputana-Malwa State Railway to the heavy renewals, to repairing the breaches on the line, and to charges now made under contract with the Bombay Baroda and Central India Railway for working this line; in the Nagpur-Chatisgarh Railway, to heavy expenditure incurred in repairing flood damages; in the Burma State Railways, to the transfer to the Revenue Account of the maintenance charges of the new lengths of the Sittang Valley Railway originally included in the Capital Accounts, in the Tirhoot State Railway, to extensive renewals of sleepers and permanent-way; in the Northern Bengal State Railway to extensive renewals of sleepers and ballast and repairs of vessels. There is, however, a large decrease of £17,500 in the working expenses of the Indus Valley State Railway owing to a reduction in the expenditure of the Locomotive Department chiefly under fuel. *Expenditure on Productive P. W. (Revenue Account.)*

60. *East Indian Railway* (*Working expenses*); Decrease, £161,200:—

	£
Working expenses	120,000
Surplus profits, and contribution to the provident fund . .	41,200
TOTAL .	161,200

The reduction in the working expenses is due to reduced traffic and to a curtailment of outlay on renewals, &c., and that in surplus profits to a reduction in the net profits of the line.

61. *Guaranteed Railways* (*Surplus profits, Land and Supervision*) (*37*); Decrease, £34,900. The decrease occurs principally in Bombay and Bengal (£10,800) owing to a larger credit expected from the Southern Mahratta Railway

Company on account of Supervision, and £13,600 to the payment of surplus profits, as the Eastern Bengal Railway did not earn a surplus during the half-year ending 30th June 1884.

62. *Irrigation and Navigation; working expenses* (*38*); Increase £19,700. This occurs as follows:—

	£	£
Imperial Decrease	5,100	
Provincial Increase	24,800	
Net increase .		19,700

The decrease under Imperial is the net result of savings in establishment charges in the Punjab and increases in Madras, where additional expenditure has been incurred for repairing the flood damages on the Godavary and the Cauvery Delta systems.

The increase under Provincial occurs principally in the North-Western Provinces and Oudh, where additional outlay has been necessary for repairing the damages done by heavy floods to the Nadrai Aqueduct on the Lower Ganges Canal.

63. *Charges in respect of Capital* (*39*); (*a*) Interest on debt. Increase £10,400. The increase here is chiefly due to provision on account of interest on the debentures and debenture stock of the Eastern Bengal Railway.

(*b*) *Annuities in purchase of Guaranteed Railways* (*including Sinking Funds.*)—Decrease £34,500. This decrease is nominal, as it is due to the issue of India Stock in redemption of a further portion of the Annuity of the East Indian Railway not provided for in the original estimate, and to change in the date of the payment of the Annuity of the Eastern Bengal Railway.

(*c*) *Guaranteed Railways Interest.*—Decrease, £17,800. This occurs in England, and is due to capital subscribed not having been paid up as early as was expected.

Expenditure on Public Works not classed as Productive.

64. *State Railways* (*Capital Account*) (*40*); Increase, £24,400. This is composed of a decrease of £17,500 under Imperial, and of an increase of £41,950 under Provincial. The saving in Imperial is due to transfer of grant from this head to "43. Frontier Railways" to meet outlay on the Northern Section of the Punjab Northern State Railway. The excess under Provincial is due to transfers sanctioned during the year from "46. Civil Buildings, Roads and Services," to this head.

65. *Southern Mahratta Railway* (*42*). The increase is £58,800, of which £27,800 falls under interest payments and £31,000 under working expenses.

66. *Frontier Railways* (*43*); Increase £211,700. During the year additional grants amounting to £450,000 and transfers from other grants were sanctioned for the vigorous prosecution of these Railways. From the consolidated grant thus arrived at a portion has been transferred to "Expenditure on Productive Public Works, Capital Account."

67. *Irrigation and Navigation* (*44*); Increase £29,900. This occurs principally in the Provincial Section of the estimates, and is due to additional grants having been sanctioned by the Chief Commissioner of British Burma, and by the Government of Madras during the year.

68. *Military Works* (*45*); Increase £50,400. The increase is chiefly due to additional grants sanctioned for the Aden defences, and to the refund of an excess payment on account of the Army Head Quarter Offices, Simla.

69. *Civil Buildings, Roads and Service* (*46*); Increase £103,700. The increase occurs in all the provinces in the Provincial section of the estimates, and is due to additional grants sanctioned during the year.

70. *Army.*—Decrease £128,400. The gross Budget figures were £16,098,600. The Revised Estimate is £15,970,200. The decrease is £128,400. This is due in part to the actual strength of British troops having been below the established strength; to the withdrawal, early in the season, of two regiments of British infantry for service in Egypt, in anticipation of their transfer to England in the ordinary course of relief; to favourable prices; to continued savings in medical supplies and services; and to reduced charges for railway and other transport, the estimate for which was too high. On the other hand the Zhob Valley expedition is estimated to cost £60,000. *Army services.*

71. *Exchange on transactions with London (49).* The amount provided in the Revised Estimate of 1884-85 is below that assigned in the Budget Estimate of 1884-85 by £285,200. The following table compares the original and present figures The + entries represent gain, and the — entries loss by exchange:— *Exchange on transactions with London.*

	Budget, 1884-85.	Revised, 1884-85.
	£	£
Secretary of State's Bills . . .	—3,807,700	—3,337,100
Advances for Suakim Expedition .	...	—75,000
Hong-Kong Bills	—30,000	—50,600
Guaranteed Railways . . .	+147,200	+150,200
East Indian Railway . . .	+135,100	+98,100
Rajputana-Malwa Railway . .	...	+16,800
Southern Mahratta Railway . .	—93,000	—136,700
Military, Public Works, and Civil .	+110,300	+81,400
TOTAL	—3,538,100	—3,252,900

The reduction of exchange under the Secretary of State's Bills is due to the following cause. When the Budget of 1884-85 was framed, the Secretary of State fixed his drawings at £16,500,000 true sterling, the rate of exchange adopted being 1*s.* 7⅛*d.* the rupee. During the course of the year, however, owing to an unexpected receipt of £1,704,400 on account of capital of Southern Mahratta Railway, and owing to the expected recovery of £325,000 true sterling on account of advances now being made in India towards the Suakim expedition, as well as to other causes, the Secretary of State has been able to relieve his drawings on India by £2,704,700. The present estimate of Council Bill drawings is £13,795,300 true sterling, and the rate of exchange at which these drawings have been taken is 1*s.* 7·3*d.* The provision on account of advances towards the Egyptian expedition is the exchange at 1*s.* 7·5*d.* the rupee on the expected recovery in England of 40 lakhs of rupees advanced from the Indian treasuries. *Budget Estimate, 1885-86.*

Budget Estimates, 1885-86.

72. The Budget Estimate for 1885-86 is as follows:—

	£
Revenue	72,090,400
Expenditure	71,582,300
Surplus	508,100

The surplus presented for 1885-86 is, it will be seen, £508,100. To estimate, however, the real significance of this surplus attention must be directed to two points, which are material to a proper comprehension of the significance of the figures here presented.

In paragraph 58 of his Financial Statement for 1880-81, Sir John Strachey spoke as follows:—

"When the serious character of the financial obligations of the State in times of famine had been recognised, it became the duty of the Government of India to make sure that the public resources were adequate to meet the fresh strain imposed upon them. Upon careful enquiry we came to the conclusion that we must contemplate a liability from famine amounting, in loss of revenue and actual expenditure, to, on an average, £15,000,000 in ten years. It was clear that this liability must be included among our ordinary obligations, and that it would have been a fatal error to go on increasing the public debt to meet charges which must periodically occur. To enable us to discharge the liability thus estimated, we determined to aim constantly at a surplus of £1,500,000, supplemented by a further surplus of £500,000 to provide for extraordinary and abnormal demands other than famine, as, for example—to name the most serious of such demands—for war."

Remarks on the nature of the surplus above exhibited.

Happily the most serious of such demands has not been made upon us, but in connection with our military position in India we decided, in the course of last year, to improve our communications, whether by railway or by road, upon our North-Western frontier; and, with the concurrence of the Secretary of State, we have determined to devote annually to capital expenditure a certain amount from our revenues until such time as our railway communications are completed. This year we have so devoted in all, inclusive of £85,000 for harbour defences, a sum of £585,000, besides an addition of £100,000 to the ordinary grant for roads, to be expended on certain frontier roads. This sum we may claim to look upon as equivalent, in its nature, to the surplus indicated in Sir John Strachey's remarks as desirable to have at our disposal for extraordinary and abnormal purposes such as those to which this sum is to be now applied. I mention this here, as it were *in limine,* because otherwise, in exhibiting the estimated surplus, the nature of our proposed transactions during the ensuing year may be misunderstood, and the conclusion may be formed that our revenues have been confined to normal expenditure unconnected with capital charges, such as those I am describing. It appears to me a matter for very great satisfaction that we have been enabled to devote a portion of our revenues to the execution of the policy indicated in the paragraph I have above quoted. All difficulties notwithstanding, we have been enabled to look to our revenue resources to meet demands which are extraordinary and abnormal, and to enable us to devote to them funds which were designed especially for emergencies of this nature. I shall enter presently more into detail on this matter, for it is closely connected with the main feature of the year which I am about to explain; but, for the reasons I have given, I deem it necessary to place these remarks in juxtaposition, as it were, to the balance above indicated. The second point to which attention must be directed is that, if we are to exclude from our surplus the grant from revenue for capital purposes, the surplus actually exhibited does not arise from an increase of revenue over expenditure; but from the fact that our expenditure, so far as it is effected in pounds sterling in England by means of sums made available there to the Secretary of State, is not represented at its exchange value in our accounts. In other words, the loss by exchange on £2,225,000 sterling is not entered in the accounts presented with these statements; and as that figure amounts to £585,000, by this amount are we, in effect, understating what should be regarded as our liabilities of expenditure. If we include on the one hand £585,000, the grant for railways and certain harbour defences, being capital expenditure, in our revenue expenditure, and exclude £585,000 from our surplus as representing the unexhibited loss on exchange, we arrive at about an equilibrium of revenue and expenditure. This much premised, I may go on to examine the nature of the provisions for the coming year.

Four main features of the coming year.

73. The main features of the coming year are four: *first*, that it will give an effect, in the Budget, to the measures recommended, at the instance of the Government of India, by the Parliamentary Committee, for the construction of railways, with such further development as the circumstances of the time render imperative. *Secondly*, that it compels us, owing to the temporary stagnation of the wheat and rice trade, to take estimates for our railway and customs receipts at a considerably lower figure than those which in a normal year we should look for. *Thirdly*, that we have been compelled, owing to the fall in the value of silver, to take so low a rate of exchange as 1*s.* 7*d.* for our exchange. *Finally*, that we have devoted the sum of £500,000 above mentioned from our revenues for the improvement of our railway communications, besides certain further subsidiary sums for frontier roads and the defences of Aden and of certain harbours in India.

Railways.

74. The report of the Parliamentary Committee on Indian Railways has been long since published, and contains a great deal of matter which has no direct bearing upon the financial questions discussed in this Statement. But the Committee have made certain recommendations, which are in part still under the consideration of the Government of India and of the Secretary of State, and which, whatever may be the decision finally arrived at in regard to them, will have a very considerable effect upon our finances. I propose to summarise the recommendations to which I allude, and to point out, so far as can at present be seen, in what direction they will modify the arrangements hitherto existing, and what are the means which we possess to enable us to meet them from our resources. Briefly, the arrangements hitherto existing were these. Railways were divided into two classes, Productive and Protective; capital expenditure on the former, which were of a remunerative character, was from loan; on the latter, which were for protection against famine, and not necessarily remunerative, expenditure was from what is known as the Famine Insurance grant. The annual limit to loan expenditure of all kinds was £2,500,000, fixed by a Parliamentary Committee in 1879, in which was included expenditure on canals; the annual expenditure on Protective lines was £500,000. There was no formally sanctioned programme, whether as to works, or the time within which works were to be executed. These were the arrangements existing when the Parliamentary Committee of 1884 met; it remains to indicate the points on which that Committee proposed modifications. *Firstly*, the Committee recommended that the technical distinction which has been hitherto made between Protective and Productive lines should not be maintained. They proposed, therefore, that railways needed for protection from famine, or for the development of the country, be made as required, whether they be technically considered Protective or Productive. But they were strongly of opinion that the bulk of the lines made should be self-supporting. *Secondly*, they were of opinion that a careful forecast having been made of future requirements for Public Works over a considerable term of years, such a scale of expenditure upon railways should be adopted as could reasonably be maintained. *Thirdly*, they were of opinion that the amount proposed to be spent in railways by the Government of India during the next six years was moderate, and that, looking to the experience of past years and to present prospects there is very fair ground for expecting that an extension of the railway system in India on the scale proposed would have most beneficial effects. *Fourthly*, with regard to the recommendation of the Government of India that interest on the sum of £11,250,000 to be spent on Productive and Protective Railways should be partly provided by hypothecating £200,000 of the annual Famine grant above specified, they were of opinion that any such application of any portion of that grant would be entirely contrary to the purposes for which the fund was created, and they could not

The Parliamentary Committee's recommendations.

concur in this suggestion. *Finally*, while expressing an opinion that the present limit of borrowing fixed by the Committee of 1878-79 at £2,500,000 might safely be enlarged, they thought the full responsibility of deciding upon the amounts to be borrowed from year to year, should rest with the Secretary of State in Council. They wished, in conclusion, most emphatically to endorse the declaration of the Government of India that the proposed extension of railways should not involve additional taxation.

Effect of their recommendations.

75. The practical effect of these conclusions will be somewhat as follows. Railways, whether Protective or Productive, whether, that is to say, railways solely designed as safeguards against the effect of famines, or whether partly or in whole projected with the view of opening up or connecting the centres of production or of trade, will alike be charged, so far as is necessary, to loan expenditure. Hitherto the latter only have been so charged, expenditure on Protective railways having been limited to the £500,000 annually available from the Famine Insurance grant, and to such small sums as could be spared from Revenue. The forecast having been made, it will be necessary to provide funds for its execution; but, so far as concerns capitalising from the Famine grant any portion of the funds necessary for payment of interest to the Companies to whom it was proposed to confide, under a guarantee, certain important railways, the proposal must be abandoned, and the sum of £500,000 hitherto spent in construction of Protective railways, will continue to be contributed from Revenue to Capital expenditure. The interest to be paid on account of the new guaranteed railways, therefore, as well as any additional interest to be paid in consequence of extension of the limits of our annual loans, will be furnished from the general resources at the disposal of the Government of India. The resources to which we had hoped to turn to assist us in part in this obligation, have been, so far as they depended on the partial capitalisation of the Famine Insurance grant, denied us; while, on the other hand, the Parliamentary Committee have endorsed the declaration of the Government of India that the development of its railways is not to be carried out at the expense of further taxation. Apart, however, from the scheme of railways which was laid before the Parliamentary Committee, the Government of India has since thought it necessary to propose, and the Secretary of State has approved, the carrying out of a scheme to strengthen our Railway communications on our North-Western frontier, the cost of which, inclusive of the Sibi-Quetta Railway, will amount to not less than £5,200,000. The cost of the railways remaining at the commencement of 1885-86 to be constructed during the ensuing five years by Government as distinct from those which it is desired to make over to Companies, is estimated, inclusive of extra capital for open lines, at about £19,000,000, the total of the two classes of communications thus amounting to £30,250,000.

To assist us in carrying out our proposed increased Railway expenditure, the recommendations of the Parliamentary Committee that the limit of annual loan should be raised above the limit hitherto prescribed, has, of course, received the attention which it deserved, and the matter is still under reference to the Secretary of State, who has not as yet given a final decision as to the amount which, in the discretion left him, he desires to fix. Besides the sum to be so raised by loan, in respect of capital expenditure, which from its magnitude we may put in the first line, we have further, in the second place, the annual grant of £500,000 above alluded to as hitherto devoted from the Famine Insurance Fund to Protective railways; and in the third place, we are desired by the Secretary of State to estimate in our Budget for such available surplus as it may be possible annually to provide. On this point, again, it has been found necessary to make a further reference to the Secretary of State; and it will be sufficient

for the present to say that in the ensuing year the sum of £500,000, as stated in paragraph 74 of this Statement, has been placed at the disposal of the Public Works Department for Railway capital expenditure. As to the liabilities which these three combined sources of expenditure will throw upon our Budget Estimates, we cannot speak with certainty until the decision of the Secretary of State is received, as to the limit within which the annual loan is to be fixed during the term of the execution of the proposed works. Until that sum is known, it is obviously useless to hazard any forecast as to the annual amount which we shall be called upon to set aside on our estimates to meet the interest on our own loans. Then there will be the annual grant of £500,000 to be provided from the Famine Insurance Fund. Next will come an annual grant from our revenues of such amount as they can provide. Finally, there will still remain, in the fourth line, to be met from our revenues, the interest required on the guarantee to be given to the Companies through whose agency it has been proposed to construct certain important lines. The net interest to be so paid has been calculated by the Accountant General, Public Works Department, as follows:—

	£
1st year	85,000
2nd „	157,500
3rd „	210,000
4th „	250,000
5th „	255,000
6th „	160,000

In his evidence before the Parliamentary Committee, Mr. Westland, Comptroller-General of Accounts, whose judgment on matters connected with Indian finance merits the most respectful attention, estimated that the Government of India, after providing for the interest on its own proposed loans and for the projected guarantees, and for the grant from the Famine Insurance Fund, but exclusive of any other regular grants from revenue for capital expenditure, could estimate for a surplus of £480,000 on a safe calculation of the Revenue and Expenditure, and at a low forecast of opium. He left out of his calculation arrangements with the Civil Funds which might be expected to have the immediate effect of relieving the Revenue Account for many years to come of about £200,000 or £250,000, and arrangements for the payment of non-effective charges to the War Office which would relieve the Revenue Account, for a few years at least, of £400,000 or £500,000. Mr. Westland, as above stated, included in his figures the entire reservation (since endorsed by the Parliamentary Committee) of the £1,500,000 Famine Insurance; and he finally explained that the surplus of £480,000 above stated might be reasonably expected to increase by about £414,000 every year; but he added that every farthing fall of exchange cost Government directly about £220,000, so that if exchange were to fall a farthing every year, the annual amount on the present financial position would be reduced from £414,000 to £194,000. It should be remembered, he added, that a fall of exchange tends in itself to increase revenue, presumably by stimulating the export of our Indian produce, and therefore the receipts of our railways.

76. Since Mr. Westland gave his evidence, the estimate of the exchange has fallen, not one, but two farthings, a sum equivalent, at his calculation, to £440,000, or more than the first year's annual increase which he estimated. There has also been added, as above explained, to the original scheme of the Government of India, an estimate of £5,200,000 for frontier railways, necessitating large grants from revenue; so that on the one hand our requirements have considerably increased, while, on the other, the annual estimated increase of surplus has, for the present year, been absorbed. Should exchange remain stationary, and by the revival of trade and the normal expansion of our revenues, should the annual increment

Effect on Indian revenues of railway proposals subsequent to those submitted to the Parliamentary Committee, and of the fall in exchange.

of the surplus which in the calculation above referred to was anticipated, be realised, our position at the commencement of the ensuing year will be certainly stronger than at present; but if we are further to obtain the indirect benefit from the late fall of exchange which is shadowed in Mr. Westland's remarks, it will be necessary that the price of wheat should so far rise in Europe as to stimulate a return of activity in the export of our wheat, and in the operations of our railways. Should we, on the other hand, be compelled to take, on our estimates, a lower rate of exchange than 1*s.* 7*d.*, and should the stagnation of our export and our rice trade continue, the normal surplus indicated in Mr. Westland's calculations, let alone any possible annual increase thereto, will be matter of extreme doubtfulness. The above calculations, moreover, assume that in other respects the administration of the country will call for no considerably greater expenditure than that which at present is regarded as our normal expenditure. How far this assumption may be verified it is at present impossible to conjecture. We have since judged it necessary, for example, to add to our revenue grants for railway and other capital expenditure. To the criticism that will naturally be made that if, in one direction, increased expenditure is forced upon the Government of India, it should seek to restore the balance by economies in other quarters, the answer must be made that, in urging upon the authorities in England the economies resulting from a study of the Report of the Army Commission, the Government of India, though unhappily with but little success, did, in fact, adopt the course above indicated. The reasonableness and the expediency of its recommendations become more evident at a time when, in regard to the very Military estimates which already weigh so heavily on our resources, there are grounds for apprehending fresh demands for further increase. Apart from this, however, it requires perhaps to be again pointed out that under the system of Provincial contracts in which the several provinces have assigned to them for a term fixed charges and corresponding revenue, there are but few branches of expenditure reserved to the Government of India over which it exercises undivided control. It may, in a time of calamity, insist on temporary reductions; but it would be against the whole spirit of its arrangements, if it sought to acquire for itself increased resources during the term of contract at the expense of the revenues assigned to the Provinces, unless in case of pressing necessity. Such as are the sources of expenditure within the Government of India's direct control, they are of a nature which renders reduction peculiarly difficult; as, like the Post Office and the Telegraphs, they grow with the growth of the necessary requirements of the country, or with the extension of our Railway system; or, like the Mint, are almost beyond the power of Government to check, depending as they do on the ebb and flow of the precious metals; or are, finally, as in the case of works of irrigation or Protective Railways, essential to success in that vital struggle against famine and the financial losses which famine entail to which the Government of India is deliberately committed. What I have now said will, I think, be sufficient to shew that while in circumstances such as those which at this moment exist, and in spite of the recent heavy fall in exchange, there may be no reason to apprehend in the immediate future any insufficiency of our resources as estimated on the basis of the reforms introduced by Sir John Strachey and Sir Evelyn Baring, it would be more than hazardous to affirm that, in view of the possibilities threatening us at the commencement of 1885-86, there is at present no cause for anxiety. The Government of India is constantly called upon to entertain projects of various kinds, tending to reduction of taxation. No one is more anxious than I am to equalise the burden of taxation, and especially to lighten it on the classes—unhappily the large majority in this country—to whom taxation, however light, is necessarily onerous; but we are compelled, both from the necessities and the advantages of our position, to take in the whole financial

horizon, and if difficulties present themselves to us which are invisible to a more restricted survey, we can but deplore, while admitting in the abstract the cogency of much that is urged upon us, our inability to meet the views pressed upon our consideration. We have, indeed, during the present year, as in paragraph 2 of my last year's Statement I promised, taken the question of Court-fees into consideration, and we have consulted the several Local Governments as to modification in the Court-fee duties. We are not yet in possession of all their replies, but it is obvious that when, in the course of the ensuing year, we take up the subject for disposal, we shall have to give weight not only to the merits of this particular question, but to its relation to taxation of other kinds. We shall have, moreover, to consider this, and kindred proposals, in their relation to the necessities of our position, should there be reason to apprehend that we may be called upon to provide upon our estimates for considerably reduced assets resulting from further loss by exchange, or for consideraby increased expenditure. I can at present in no way indicate what our position on this important point is likely to be; it is one of the objects of this Statement to place before the public the materials for forming such an opinion as can be at present formed, so that it may frame its own conclusions; but I think it will at least be apparent, from what I have said, that when we are simultaneously called upon by one to lower the scale of our Court-fees, by another to abolish the License Tax, by a third to abolish the Export Duties upon rice, we cannot but feel that these representations are made without adequate information as to their probable effect on the budgetary equilibrium of the country. I hope that the remarks which I have recorded above, and those which in the course of this Statement I shall have to make, will in some degree assist the public to understand what are the difficulties which await us in dealing with suggestions for reduction of taxation, or even for such redistribution of taxation as sacrifices on the whole any proportion of the resources now at our command. In the course of the ensuing year the final conclusions to be adopted on the Report of the Parliamentary Committee will have been settled. During the course of 1885-86 it may be expected that on the one hand we shall be in a better position to judge as to the prospects of a return of our hitherto active export trade, and of our position in regard to exchange, and on the other, to estimate the full amount of the liabilities which are likely to be entailed by the prosecution of our Railway schemes, as well as to gauge the pressure of exigencies, the final outcome of which it is not at present possible correctly to estimate.

Financial relations of the Government of India with the Provincial Governments and Administrations.

77. While treating of the subject which has been dealt with in the above remarks, it is desirable that I should add a few words in regard to the financial relations of the Government of India with the several Local Governments and Administrations, as regulated by the terms of the Provincial contracts. It was not to be expected that a series of arrangements based, at the best, on the experience of comparatively few years, and on conditions on the whole so uncertain as those which surround the financial administration of India, should have presented no points to criticism, or offered no unforeseen difficulties. All allowance made, however, it may be confidently stated that the several Provincial contracts which are now entering on the fourth year of their quinquennial term, have proved to be equitable, and to have been founded upon calculations which leave the Governments severally concerned a margin of revenue over expenditure sufficient for their wants. The balances temporarily held by the Local Governments during the Afghan War were repaid them, in the course of the year 1881-82, to the amount of £670,000, as explained in my last Financial Statement. In some cases the existence of these balances has led the local authorities to embark upon a scale of expenditure which, as the balances approached exhaustion, it has been found impossible to maintain; and it is conceivable that th e

Provincial finances would have been, on the whole, conducted with greater economy had there not occurred to them this windfall, bringing with it almost inevitably an inducement to increased expenditure in view of the various wants and necessities which never fail to be urged on the several Governments and Administrations. It was mainly with the object of guarding against the possible effects of too sanguine a view of its resources, which the existence of these balances was likely to encourage, that the Government of India, under instructions from the Secretary of State, fixed the minimum of balances for each province indicated in paragraph 109 of last year's Financial Statement. This element of risk notwithstanding, however, the system inaugurated by Lord Mayo, which has now fully taken root and become part of our system of local administration in India, has continued during the last three years to work greatly to the advantage of the several Governments who share in it. Friction has been reduced to a minimum; and if, as was inevitable, questions have from time to time arisen regarding the amount of assistance to be afforded by the Government of India to this or that Local Government in regard to some particular project or some reform involving an increased outlay of funds, they have given evidence of the existence of a spirit of mutual concession, which is in marked contrast to the relations existing in former times between the Supreme and the Provincial Governments under the centralised system of finance. In a few instances the Government of India, in view of its inability to concede all the assistance asked for, or to approve of the reduction of the balances to a sum lower than the amount settled in 1883, has found itself compelled, however reluctantly, to desire that the scale of expenditure should be reduced below the limits which in the opinion of the Local Government or Administration, although inconsistent with the maintenance of its balances, were advisable; or although not wholly refusing to contribute from our own resources to the urgent necessities placed before us, we have been unable to assent to the arguments presented for our consideration,—arguments having for their object such addition to the revenues placed at the disposal of the local authorities as must virtually have led to a revision of the terms of the contract into which, on behalf of their administration, they had entered. The considerations which I have exposed in the preceding pages will, I think, be held to have justified the rule of conduct adopted in these circumstances by the Government of India. They will show that if local authorities find themselves pressed occasionally to meet the expenditure which, in their reasonable desire for improvement, they consider essential, the Government of India has also burdens of its own to bear, which compel it to insist jealously on the maintenance of the relations into which it has entered with them, and which forbid it, even were such a course desirable, to entertain proposals having for their aim a review or revision of the arrangements completed in 1882-83. Nothing can be more true than what my predecessor in his Financial Statement for 1883-84 wrote:—

"The contracts have not been made in any illiberal spirit. . . . . Under these circumstances the Provincial Government must look solely to the gradual development of their own resources, and to economy in their own administration, to provide whatever further funds may be required for services classed as Provincial. . . . It may be, and probably is, the case that in almost every Province of India the funds available are not commensurate with the work which sooner or later will require to be done. This is the normal condition of a country whose necessities are great, while the tax-paying power of its population is small. Under these circumstances, progress in many directions will possibly be comparatively slow; and it is inevitable, under all the conditions of Indian Government, that it should be slow. But what I particularly wish to point out is that the Government of India cannot at present make any further grants from Imperial funds in order to ensure more rapid progress. Indeed in some respects it may be said that the Provincial Governments are in a better position to provide whatever funds may be required than is the case with the

Imperial Government. For the reasons which I have already given an element of stability is imported into Provincial Finance which Imperial Finance cannot at present possess. Not only do the three* points to which I have alluded constitute dangers which are wholly borne by the Imperial Government of India—not only does the fourth danger (famine) materially affect Imperial as well as Provincial Finance, but if any further fiscal reforms are to be made—and there are several which it would be very desirable to make—any loss of money which may accrue from their execution must be borne by the Imperial Treasury.

78. In the economies which the Government of India is itself compelled to exercise will be found, in fact, the justification of its insistence on an economical administration elsewhere; while the uncertainty to which its own sources of supply are subject, no less than its liability to be called upon at one and the same time for increased expenditure in various different directions, compel it to entertain with the utmost reluctance proposals having for their object any further alienation, during the term of the contracts or afterwards, of however small a portion of its own revenues. In my opinion this necessity is not without its advantages; for so long as it may be hoped that the Government of India is in a position to offer further resources, the expectation that it will do so when a sufficient case is put before it, will continue to be entertained. Nothing is more likely to encourage a prudent and economical treatment of their finances by the Provincial Governments than a clear understanding, such as I have endeavoured to convey, as to the position of the central Government itself. As I have already indicated, these remarks, so far as they refer to applications for assistance, must not be held to have any general application to the provincial authorities viewed as a whole; for the Government of India has, on the contrary, just cause to be grateful to them for the judgment with which they have husbanded their resources, and the economy with which their affairs are conducted. Nor, even in the instances which I have more specially in mind in making these remarks, have I the desire to convey the idea that there has been, in the management of local finances, any but the most loyal wish to improve the position of the Province, or to make any criticism other than that this wish has in those cases led to an inclination to work on the lines of the contract with a degree of energy which was beyond the bounds of prudence. My object is rather to explain that, while I am aware that in one or two instances the revenues assigned to the local authorities may have been found to have been less favourable than in the majority of cases, this fact alone, when the circumstances of the Government of India itself are taken, as they must be, into consideration, is not sufficient ground to justify us in acceding to the grant of increased revenues, or in admitting further liability which in truth we are not in a position to assume. If there is one thing more important than another in the conduct of Indian finance, it is that the Government of India, which is always at the best surrounded by uncertainties, should at least have the certainty that for a term of years it has settled its relations with the Local Governments. That is the only condition on which it can with confidence examine its own position, and ascertain the adequacy or otherwise of the resources at its own disposal. This consideration (which I may take this opportunity of saying is, to my mind, all important) must especially be adopted as the guiding principle of our financial administration at a moment when the difficulties which I have been treating of are assuming greater proportions; and when a fall in the exchange, which a few years ago would have been looked upon as absolute ruin to our finances, and which, in truth, is a burden greater than they can continue to bear, is to be met and provided for, concurrently with a stagnation in trade, and the necessities imposed on us by the deliberate resolve to incur, for the protection of our people from famine, and for the greater security of our frontiers, very considerably increased expenditure.

The Government of India compelled to adhere strictly to the terms of the Provincial contracts.

* NOTE.—War—Opium—Exchange.

Decrease in Customs duties in 1885-86.

79. I pass now to the second of the three heads which I have indicated in paragraph 73, namely, the effect upon our estimates of the present stagnation in the rice trade. As I have already dwelt at some length on the prospect of this trade so far as they are at present known to me, I think it will be sufficient to give here a few figures which will show at a glance what is the sacrifice of revenue to which, until that trade returns, we must be content to submit. The receipts from our customs in the Budget Estimates, the Accounts, and the Revised Estimates of the years 1882-83, 1883-84, 1884-85, and 1885-86, have been severally as follows :—

	Budget Estimates.	Accounts.	Revised Estimates.
	£	£	£
1882-83 . . .	1,181,000	1,296,119	
1883-84 . . .	1,255,100	1,187,266	
1884-85 . . .	1,289,500	———	1,030,000
1885-86 . . .	1,175,000		

It will be seen from these figures that in the 1884-85 Revised Estimates there has been taken a figure lower by £151,500 than any hitherto shewn, whether in the Budget or in the Accounts; while, although in the estimate of the ensuing year we have thought ourselves justified in adding considerably to the Revised Estimates of 1884-85, believing the depression of the rice trade to be at its lowest, the figure we have taken is below any which, whether in the Budget or the Accounts of previous years, has hitherto been shewn.

80. I come now to the third of the four points indicated in paragraph 73 as constituting the main features of the coming year, namely *Exchange*. A glance at the following figures, which give the annual result of exchange in transactions with London during the years 1871-72 to 1883-84, with the Revised Estimate of 1884-85 and the estimates of 1885-86, will convey some notion of the burden imposed on our finances by this growing difficulty, and will show what a monstrous cautle exchange cuts out from the resources at our command.

Loss by exchange.

Year.	Loss by exchange.	Average rate of Secretary of State's Bills.
	£	s. d.
1871-72	428,920	1—11·12
1872-73	691,287	1—10·81
1873-74	879,411	1—10·35
1874-75	785,820	1—10·22
1875-76	1,355,861	1— 9·64
1876-77	2,059,311	1— 8·49

81. It is explained, in the course of this Statement, why the loss by exchange in 1884-85 and again in 1885-86 is apparently less than in some of the previous years, namely, that the Secretary of State has been able to furnish himself with funds in England which assisted in keeping down the total amount of his bills. But for this, in the ensuing year 1885-86, we should have had to estimate for loss by exchange at a figure certainly not less than £4,000,000. Unless exchange improves during ensuing years, we must regard ourselves as liable to have to

make provision upon our Budgets for an item of little less than four millions in excess of that which at the commencement of the last decade we were called upon to meet. The highest point reached by the Secretary of State's bills and telegraphic transfers during 1884-85 has been 19·85 in May last, and the lowest 18·92 in February. I append a table shewing the bills drawn each month, with the concurrent produce in sterling, and the rate of exchange, as well as the amount drawn on telegraphic transfers, the sterling equivalent, and the rate at which they were obtained.

Result of Secretary of State's drawings during 1884-85.

Critical position of silver.

82. Since June last, when the rate began to decline, there has been no prospect of recovery. The time is probably approaching when this question of the fall in the value of silver will come more prominently before public attention. The policy of the President of the United States in favour of a temporary suspension of the coinage of silver has been unequivocably pronounced; and although there exists considerable doubt as to how far that policy will be endorsed by the American Legislature, the uncertainty which for the present must continue to hang over the question will maintain the depression of exchange. In the next place, the Conference of the Latin Convention is about to meet, and on the measures taken in consequence of the deliberations of the Conference, the immediate future of silver must greatly depend. Speculation on the subject in a Statement of this nature would be idle; but there seems no reason to hope that we have as yet seen the worst of our difficulties under the head of exchange; and if causes which are operating unfavourably to it, whether connected with trade or with the decision which may be taken by the Latin Convention or the American Legislature, are accentuated, it seems clear that the Government of India, unless it is able to obtain the attention of other Governments to its own views upon the question, may be called upon shortly to choose between deficit, or measures involving some degree of increase in taxation.

Grant from Revenues for railways.

83 The fourth and last item to which I have drawn attention in paragraph 73 is the grant of £500,000 for our railways, provided especially with a view to assistance in so much of our contemplated expenditure as is connected with the improvement of our frontier communications. It has always been hitherto the policy of the Government of India to meet demands of this nature, so far as they can be met, from its revenue: revenue failing, the Government of India is prepared to have recourse to borrowing. The remarks made by Sir John Strachey in paragraph 49 of his Financial Statement for 1880-81, express so entirely and succinctly my own opinion on this subject, that I may be allowed to quote them here. He says,—

"The reasons for which it is right to provide for the charges of the war out of current income apply equally, and indeed with greater force, to the charges for the frontier railways.

Although they will permanently benefit the country, it is plain that we could not construct them with borrowed money on the grounds on which we borrow for productive public works, and that their cost must be included among our ordinary charges. If, however, we could not have paid for them out of our ordinary revenue, it would have been quite right to borrow for their construction. I should have said this because the works are absolutely necessary, and because the political and financial evils of borrowing would be less serious than those involved by fresh taxation. I should not have defended borrowing for these railways on the ground that they will benefit posterity as well as the present generation. That is a matter about which I know nothing; but I know that posterity will have quite enough to do in bearing its own burdens."

rants from evenue for Harbour Defences.

84. The amount of the annual grant from revenue must in future obviously depend on the annual condition of our finances. All that I can say at present is that for my own part I am extremely desirous to devote as much as possible from revenue to the construction of railways, of which the portion which concerns our frontier communications must remain in great part unproductive. To the same class of grants belongs the item of £15,000, which we have devoted to the improvement of the defences of Aden; and a further item of £70,000 which we have placed at the disposal of the Military Department as a first instalment to be expended in the defence of our harbours. That we should have been able, in spite of the second and third of the four considerations which I have enumerated in paragraph 74, to make these additional grants, is evidence of the elastic nature of our revenues; but in view to all that has been said as to our financial prospects, I should be sorry to commit myself to an assurance that our revenues will continue to permit us to devote as much annually to the completion of the several works indicated, although no effort will be spared to enable this to be done. Meanwhile the following figures shew what has been the State or Guaranteed expenditure under the Revised Estimate in 1884-85, and what are our estimates for 1885-86. The Budget Estimate for 1884-85 was ₹6,59,19,000 only; being ₹73,44,100 less than the Revised Estimate of that year, which, again, is ₹1,96,87,100 in excess of the Revised Estimate of 1883-84. The difference between the Revised Estimates of 1883-84 and the Budget Estimate of 1885-86 is therefore no less than £2,701,100 conventional sterling.

Expenditure on Railways during 1884-85 and 1885-86 on State responsibility.

	Revised Estimate, 1884-85.	Budget Estimate, 1885-86.

Explanation of details of difference between Revised Estimate, 1884-85, and Budget Estimate, 1885-86.

85. I think I have given now such a general view of the situation as it presents itself to us in making our estimates for the ensuing year, that it will be unnecessary to dwell further on the subject taken as a whole, and I may pass to the detailed explanations which it is usual to embody in the Budget Statement with regard to the increases and decreases under specific heads. I shall endeavour to make these as short as possible, and indeed, it seems to me that the custom of marshalling these figures in the body of this Statement, is one which, with exception, perhaps, as to figures treating of subjects of unusual interest, will in future be more honoured in the breach than in the observance. Where the amount of increase or decrease is less than £10,000, no explanation will be offered in the following remarks.

Principal Heads of Revenue.

86. *Land Revenue (I)*; Increase, £787,900. Compared with the Revised, the Budget Estimate for 1885-86 shews an increase of £787,900, made up chiefly of £25,400 under British Burmah, £76,900 Punjab, £407,700 Madras, and £270,000 Bombay.

In the case of Burmah increased revenue is expected from capitation tax and from other miscellaneous sources. In the Punjab the increase is due to collection of revenue in suspense, and to revision of settlements. In Bombay and Madras the increase arises to a considerable extent from arrears of collections, suspended owing to the partial failure of crops in 1884-85.

87. *Opium (II)*; Increase, £175,500; due to the expected recovery of our opium revenue from the depression of 1884-85. Of this net difference, an increase of £236,800 occurs under Bengal, and a decrease of £59,400 under Bombay. The number of chests to be sold in the calendar year 1885 is 49,992; due notice will be given of the amount which it is proposed to sell in the year 1886. The price taken for 1885-86 is rather less than 1,250 per chest, the average of the year 1884-85 having been 1,296. The Malwa opium scheme introduced, as explained in last year's Statement, by Mr. H. Rivett-Carnac, continues to work satisfactorily; 2,500 maunds at 90° consistence will be bought this year, against 2,268 in 1884-85.

88. *Salt (III)*; Increase, £50,000.—The Budget for 1885-86 shews an improvement over the Revised of 1884-85 of £50,000. This difference is arrived at as shewn below:—

	Increase.	Decrease.
	£	£
Burmah	...	8,500
Bengal	...	30,000
Madras	88,500	...
	88,500	38,500
Net increase	50,000	

With regard to Burmah it is expected that the large stock that will be laid in, in 1884-85, will render replenishment on an extensive scale unnecessary in 1885-86, and that in that year local manufacture will remain stationary. Hence the reduction in revenue.

In the case of Bengal it is thought better not to place the Budget at as high a figure as the Revised Estimate.

With regard to Madras the larger estimate for 1885-86 is based principally on an anticipated increase of sales of East Coast salt, and on an anticipated increase of consumption generally.

89. *Stamps (IV)*; Increase, £55,400. The increase occurs chiefly in Bengal and in the North-Western Provinces and Oudh. In Bengal it is due to an

expected increase in revenue resulting from the passing of the Bill for the registration of permanent tenures. In the North-Western Provinces and Oudh it is due to the transfer to this head from Land Revenue and Law and Justice of Revenue Record Fund and Criminal Record Fund receipts, which used to be received in cash, but which are now recovered in stamps. In the Punjab, allowance has been made for the further progress in revenue of which the actuals of past years justify the expectation in 1885-86.

90. *Excise* (*V*); Increase, £56,500. This occurs mainly in Madras, where it is anticipated that Toddy farms and Arrack farms in rented districts will yield an augmented revenue.

91. *Provincial Rates* (*VI*); Increase, £62,900.

In the Central Provinces an improvement of £6,800 is expected from the Patwari cess, being the result of administrative reforms that are in progress. In Assam the revenue will, it is anticipated, yield £13,000 more, because of the rates being doubled in Sylhet. Slight increases are also expected in districts where there are waste land grants.

In the North-Western Provinces, owing to a re-arrangement in the Village Watch circles, and to an increase in the number of watchmen in Oudh, higher revenue is expected in 1885-86. Madras and Bombay shew an improvement of £22,500 and £14,200, respectively. As these rates are raised from land, they are affected in the same way, and, generally, to the same extent, as receipts under Land Revenue. The remarks made under "I. Land Revenue" at paragraph 86 against Madras and Bombay apply also to the head Provincial rates.

92. *Customs* (*VII*); An improvement in trade is expected to yield an increase of £145,000, compared with the Revised Estimate. The Revised Estimate of 1884-85 was however taken at a figure considerably below the Budget of that year.

93. *Forest* (*IX*); Increase, £78,700. The increase may be ascribed generally to expected increased demand for timber, and to the development of timber operations.

Post Office, Telegraph, and Mint.

94. *Post Office* (*XII*); Increase, £41,300. This is due to an anticipated increase in the sale of ordinary postage stamps, and to an expected increase in receipts on account of Money Orders, the growth of the revenue under both heads justifying the advance in the estimates.

95. *Mint* (*XIV*); Decrease, £39,000. This is a very uncertain head, and difficult to estimate. A reduction of £39,000 is made because it is not considered safe to expect that silver to the same extent will be coined in 1885-86 as in 1884-85.

Receipts by Civil Departments.

96. *Law and Justice* (*XV*); Increase, £31,200. This head shews an improvement of £31,200 compared with the Revised. Nearly the whole of the increase occurs under Bengal and the North-Western Provinces and Oudh, where larger receipts are expected from sale of Jail manufactures and from the hire of convicts.

97. *Interest* (*XXI*); Decrease, £31,000. Of this £23,100 occurs in England and £7,900 in India. In 1884-85, owing to the favourable state of the money market, the loan of £3,000,000 required for the discharge of debentures in August was issued in England in May, and during the interval the available portion of the abnormally swollen cash balance was invested on terms which were at the time unusually favourable. For 1885-86 only normal receipts have been estimated for. The decrease in India occurs in interest on overdrawals of Railway capital.

98. *Receipts in aid of superannuations, &c.* (*XXII*). The increase is £51,000, and is almost entirely due to credits of subscriptions towards the Bengal

Civil Fund. No final arrangement for the taking over of this Fund has yet been made, but the question is being considered, and the contingency is provided for in the Estimates.

99. *Miscellaneous* (*XXIV*); Decrease, £48,900. This is an uncertain head, and one for which it is difficult to make an estimate a year in advance. In preparing the Revised Estimate of 1884-85 it was found that certain receipts which were expected to fall in would justify the Budget of that year being raised by £63,300. It is not considered safe at present, however, to put the Budget figure of 1885-86 at more than £14,400 above the Budget figure of 1884-85. *Miscellaneous.*

100. *State Railways* (*Gross Earnings*) *XXV.* The Budget Estimate of 1885-86 provides for an improvemet of £682,100 compared with the Revised Estimate of 1884-85. This improvement is in large part nominal, being indebted for £300,000 to the inclusion of the Sindh, Punjab, and Delhi under State Railways for the last quarter of the year. The main results are:— *Revenue from Productive Public Works.*

	Increase.	Decrease.
	£	£
Rajputana-Malwa	172,500	...
Umeria Colliery	13,700	...
Nagpur and Chhattisgarh	10,000	...
Burma	60,000	...
Eastern Bengal	110,000	...
Tirhoot	12,000	...
Naraingunge-Dacca-Mymensingh . . .	18,500	...
Cawnpore-Achneyra	25,000	...
Indus Valley	...	45,000
Sindh, Punjab, and Delhi	300,000	...

Rajputana-Malwa State Railway.—The Budget Estimate for 1885-86, £1,475,000, includes the estimated earnings of the Rewari-Ferozepore State Railway, hitherto shewn under the non-productive head of Account, XXIX. State Railways. The inclusion in the present estimate of the transactions of this line explains the large difference between the Revised Estimate for 1884-85 and Budget Estimate for 1885-86. A small improvement in the traffic has also been allowed for.

Umeria Colliery.—No provision was made in 1884-85. But it is expected that the colliery will earn £13,700 during 1885-86.

Nagpur and Chhattisgarh State Railway.—An increase of £12,500 is allowed for during 1885-86, owing to the better prospects of the grain traffic.

Burma State Railways.—The Budget Estimate for 1885-86 is placed at £60,000 higher than the Revised Estimate for 1884-85, owing to an additional length of 81 miles on the Sittang Railway expected to be opened for traffic on the 1st April next, as well as to provide for development of traffic generally.

Eastern Bengal State Railway.—An increase of £110,000 is provided for during 1885-86. A full year's earnings will accrue instead of the transactions of nine months only. The prospects of the traffic next year are good, and it is hoped that the estimate will be fully realised.

Tirhoot State Railway.—The Budget Estimate provides for an increase of £12,000 during 1885-86, which, it is believed, will be realised, as the Hajeepore extension will be opened for the whole twelve months, against five months in 1884-85. Moreover a further short length of line is likely to be opened during the year.

Naraingunge-Dacca-Mymensingh Railway.—An improvement of £18,500 is provided for during 1885-86 owing to an additional length of 75·62 miles expected to be opened about 1st August next.

Cawnpore-Achneyra State Railway.—The Budget Estimate for 1885-86 provides for an increase of £25,000. This will, in all probability, be realised, as in the previous year the Farakhabad-Hathras and Jumna Bridge sections were only opened from the 1st July 1884, or for nine months of the year only, while in 1885-86 a whole year's earnings of these sections are provided for.

Indus Valley State Railway.—The line altogether is doing remarkable well, and judging from present prospects, the Revised Estimate is placed at £705,000. This figure, it is believed, will be fully realized. It is not considered advisable, at present, owing to the uncertainty of the wheat traffic, to place the receipts of 1885-86 at a higher figure than £660,000.

Sindh, Punjab, and Delhi Railway.—The Budget Estimate for 1885-86 provides for the estimated earnings of the last quarter of that official year under *State Railways*.

East Indian Railway (*gross earnings*). The Budget Estimate for 1885-86 provides for an improvement of £280,000 on the Revised Estimates. It is believed that to this extent trade will revive during next year. The estimate, it will be observed, is £300,000 less than the Budget Estimate of 1884-85.

101. *Guaranteed Railways* (*net traffic receipts*) (*XXVI*). This head shows a decrease of £14,000. Excluding the Eastern Bengal Railway, which became a State Railway from the 1st July 1884, and under which a net issue of £1,300 was provided in the Revised Estimate of 1884-85, the rest of the differences are given below :—

	Increase.	Decrease.
	£	£
Madras Railway	...	25,000
South Indian Railway	25,000	...
Bombay, Baroda, and Central India Railway .	30,000	...
Oudh and Rohilkhund Railway . . .	45,000	...
Sind, Punjab, and Delhi Railway . . .	...	70,000
Great Indian Peninsula Railway . . .	...	20,000

Madras Railway.—The Budget Estimate for 1885-86 is £25,000 worse than the Revised Estimate for 1884-85. The receipts during 1885-86 are entered at the same figure as the Revised Estimate. The expenses, however, are placed at £25,000 more than in the Revised Estimate.

South Indian Railway.—An improvement of £30,000 has been provided for in the Budget Estimate. The estimates for 1885-86 place the gross revenue at £20,000 more than the Revised Estimate which, there is every reason to believe, will be realised, as the traffic is steadily improving. Heavy expenditure in connection with the restoration of the bridges and works damaged by the floods of this year will have to be met in 1885-86.

Bombay, Baroda, and Central India Railway.—In the Budget Estimate for 1885-86, an increase of £30,000 is provided for, as compared with the Revised Estimate for 1884-85. This is due to the additional traffic expected.

Oudh and Rohilkhund Railway.—An improvement in the traffic may reasonably be looked for during 1885-86, and an additional length of line will, it is expected, be opened for traffic during the year. The Budget Estimate shews a net improvement of £45,000 compared with the Revised Estimate of 1884-85.

Sind, Punjab, and Delhi Railway.—The Budget Estimate provides for the transactions of the first nine months of the official year only, *viz.*, from 1st April to 31st December 1885. As the line will very probably be taken up by Government on the 1st January 1886, the transactions for the remainder of the year are allowed for under *State Railways;* and hence a decrease £70,000 compared with the Revised Estimate for 1884-85. The figures entered in the Budget are normal, and do not call for any special remark.

102. *Irrigation and Navigation* (*Direct Receipts*) (*XXXI*). The Budget Estimate for 1885-86 shews a decrease of £173,400 compared with the Revised Estimate for 1884-85 :—

	Increase.	Decrease.
	£	£
Punjab	...	13,100
Madras	300	...
Bombay	1,300	...
Bengal	...	...
North-Western Provinces and Oudh . . .	...	161,900
Total . .	1,600	175,000
	173,400	

The decrease in the Punjab is the net result of a reduction in the estimated receipts by Civil Officers on account of owner's rates on the Western Jumna Canal, counterbalanced to some extent by increase in revenue due to the opening of the Chenab Canal, and of increased irrigation and better rabbi crops expected from the operations of the Bari Doab and Sirhind Canals.

The small increase of £300 in Madras is due chiefly to the increased revenue expected from the Kurnool Canal.

The expected increase in Bombay is due chiefly to anticipated realisation of arrears of previous years on account of certain Canals; to expectation of a sufficient supply of water in the Hathmati Canal; and to extension as well as to the probable increase in the water-supply from the canal furnishing the town of Poona.

The decrease of £161,900 in the North-Western Provinces and Oudh is the result of the failure of the Nadrai Aqueduct, Lower Ganges Canal, as until such time as the new works are completed, only about half the required supply can be passed down from the head works at Narora.

Public Works not classed as Productive.

103. *State Railways* (*XXIX*). The Budget Estimate for 1885-86 shews a decrease of £85,900 as compared with the Revised Estimate for 1884-85, and consists mainly of an item of £87,500, decrease in the Rewari-Ferozepore State Railway. No provision has been made in 1885-86 for this railway, because the estimated earnings of the line for that year are included in those of the Rajputana-Malwa State Railway, under "XXV. State Railways."

104. *Subsidised Railways* (*XXX*) Southern Mahratta Railway. The Budget Estimate for 1885-86 provides for an improvement of £67,500, because the line now open will be worked for 12 months, and an additional length of 103 miles will, it is expected, be opened early in April.

105. *Civil Buildings, Roads and Services* (*XXXIII*). The Budget Estimate for 1885-86 shews a decrease of £68,600. Nearly the whole of the decrease occurs under India, General, and under Bengal. In the case of the former the Revised Estimate of 1884-85 contains an abnormal receipt of £23,100 on account of arrears of previous year's contributions for roads in Scindia's territory realised in 1884-85. With regard to Bengal, where the decrease is £41,300, the Revised Estimate for 1884-85 provides for an abnormal receipt of £46,000 realised from the East Indian Railway Company on account of the value of Railway Offices in Fairlie Place, Calcutta. The remainder of the decrease in Bengal is due to an expected decline in ferry receipts.

Expenditure.

Interest.

106. *Interest on ordinary debt, 1885-86*; (1) Decrease, £388,200. This arises as follows :—

	£
England	166,000
India	222,200
TOTAL .	388,200

of discount which had to be paid in 1884-85 on the three million 3 per cent. stock raised in that year. In 1885-86 £90,000 have been provided representing interest on the 3 per cent. India stock issued in 1884-85 and for which only £67,500 were provided in that year. On the other hand decreases occur under interest on Temporary Loans and Debentures, the former owing to repayment of the loan, and the latter to the conversion of the 4 per cent. Debentures, amounting to 5 millions, into 3½ per cent. Debentures.

The decrease in India amounts to £222,200, and is due principally to the transfer of capital from the ordinary to the productive portion of the Account, on account of the capital expenditure on State Railways and Irrigation.

107. *Interest on other obligations*; Decrease £63,400. Of this £62,600 occur in India and £800 in England. In India a saving £84,000 arises out of new arrangements with the Bengal Civil Fund, and an increased charge of over £20,000 for interest on Savings Bank Balances.

108. *Assignments and Compensations* (4); Increase, £16,400. This occurs principally in Bombay, where provision has been made for the award of compensation to be paid for the closing of salt works in Goa.

Direct demands on the Revenues.

109. *Opium* (6); Decrease, £468,300. The Revised Estimate for 1884-85 includes a provision of £593,600 in excess of the Original Estimate chiefly because of the exceptionally heavy outturn of the opium crop of 1883-84. The estimate of 1885-86 has been fixed for a smaller outturn.

110. *Salt* (7); Increase, £32,700. The increase occurs chiefly under India (General), and Bombay and is due to increased provision on account of establishments, salt purchase, and freight.

111. *Excise* (9); Increase, £20,100. The increase is general, but in Bengal an excess of £10,300 has been provided to give effect to the recommendations of the Excise Commission.

112. *Forest* (13); Increase, £28,100. The increase is general and occurs in all but the North-Western Provinces and Oudh, where there is a decrease of £21,900 on account of charges for the Collection of Timber.

Post Office, Telegraph, and Mint.

113. *Post Office* (15); Increase, £35,100. The increase occurs chiefly in the "conveyance of mails" and is partly due to larger provision on account of the pay of overseers, runners, &c., for the Road establishments.

114. *Telegraph* (16); Increase, £51,300. The increase occurs principally in England, £33,900. The increase is due to a larger amount of stores being necessary to meet the growing requirements of the Department.

Salaries and Expenses of Civil Departments.

115. *Law and Justice* (19); Increase, £145,600. The increase is general, and occurs in all the provinces of British India. The increase in Bengal amounts to £49,300, and is chiefly due to the appointment of three new Judges to the High Court and to expected increased outlay on raw material, &c., for Jail manufactures. The increase in the North-Western Provinces and Oudh, amounting to £22,100, is chiefly due to the formation of a separate office for the Legal Remembrancer; to the transfer of Distrainers (Kurk Amins) charges to this head from the head Personal Deposits; to the transfer of Criminal Court Record Fund Charges from 5 Land Revenue; and to full provision for Jail supplies and services, and for Jail manufactures. In the Punjab the increase is £33,600, and is provided to meet the salaries of the newly appointed Divisional and District Judges with their establishments, and to cover the higher rates of salary to Deputy and Assistant Commissioners under the re-organisation scheme of the Punjab Commission.

116. *Police* (20); Increase, £49,900. The increase is distributed over most of the Provinces. In the North-Western Provinces and Oudh, the increase amounts to £15,100, and is due chiefly to extra provision for Clothing and for

Bombay Dockyard, and repairs to the Hydraulic Lift preparatory to its being made over to a private Company.

118. *Education* (*22*); Increase £81,300. The increase is general, and is due to the spread of education. In the North-Western Provinces and Oudh an increase of £14,800 is provided to meet additional expenditure on Inspection, Normal and Local Schools, Grants-in-aid, &c. In Bombay the increase amounts to £35,000, and for the most part represents new grants to Primary Schools within municipal limits.

119. *Medical* (*24*); Increase £30,100. The increase is general, and is due to the growing requirements of the Department.

120 *Political* (*25*); Decrease £84,200. The decrease is chiefly due to a reduction of £60,000 in the provision for the Afghan Delimitation Commission, and to the absence of arrear payments on account of the Amir's subsidy.

121. *Scientific and other Minor Departments* (*26*); Increase, £45,500. The increase occurs chiefly under India (General), and Bombay. Under India (General) the increase amounts to £20,800, and is due to larger provision for survey charges. Under Bombay the increase of £10,500 is on account of the Indian and Colonial Exhibition of London and the Fine Arts Universal Exhibition of Antwerp.

Miscellaneous Civil Charges.

122. *Superannuations, Allowances and Pensions* (*29*); Increase £106,000. In India a decrease of £23,000 is expected. In England larger payments to the extent of £129,000 are anticipated on account of annuities due to Government taking over the Bengal Civil Fund in 1885-86.

123. *Miscellaneous* (*31*); Decrease £15,000. This occurs chiefly in India, (General) and is due mainly to the absence of provision for special payments made in 1884-85 on account of compensation for damage and detention of Petroleum in Calcutta.

Famine Relief and Insurance.

124. *Protective Works, Railways* (*33*); Decrease £398,100. The Revised Estimate for 1884-85 included £388,100 unappropriated in 1883-84 and re-allotted in 1884-85. No such re-allotment occurs in 1865-66, for which year only the fixed portion of the annual grant has been assigned.

125. *Reduction of Debt* (*35*). The increase of £360,400 is due to the reduction in the grant for Railways, which sets free a corresponding sum for reduction of debt.

Expenditure on Productive Public Works (Revenue Account).

126. *State Railways* (*Working Expenses*) (*36*); Increase £436,700. The increase is the result of a series of figures, of which the following are the principal items :—

	Increase. £
Rajputana-Malwa Railway	147,500
Burma Railway	38,000
Eastern Bengal Railway	52,500
Naraingunge-Dacca-Mymensing Railway	18,500
Cawnpore-Achneyra Railway	12,500
Sindh, Punjab, and Delhi Railway	180,000

Rajputana-Malwa Railway.—The increase is partly nominal, representing the expenses on account of the Rewari-Ferozepore line hitherto shewn under the non-productive head of account, *viz.*, 41. State Railways Revenue Account. An increase of £17,500 occurs on account of the surplus profits for the half-year ending 30th June 1885, payable to the Bombay, Baroda, and Central India Railway for the working of the line. The additional expenditure provided under this Railway will be set off to some extent by credits in the Civil Accounts under Superannuation Allowances and Pensions, Stationery and Printing, Miscellaneous and Police. The credits on these accounts are roughly estimated at £40,000.

Burma Railway.—The additional assignment is due to an additional mileage of 81 miles being expected to be opened on the Sittang Railway from 1st April 1885, and to an anticipated expansion of traffic.

The increase under *Eastern Bengal Railway* amounts to £52,500, and is due to the amalgamation with this line of the Calcutta and South-Eastern Railway and of the Poradaha-Damukdia section of the Northern Bengal State Railway. Increased provision has also been made for expenditure owing to larger estimated traffic.

Naraingunge-Dacca-Mymensing Railway.—An additional length of 75·62 miles is expected to be opened about 1st August next, and the increase in the Budget is to meet outlay on this extension.

Cawnpore-Achneyra Railway.—The increase provides for increased mileage; for sleeper renewals; and for improving the assignment of certain portions of the Cawnpore-Farakhabad section of the line.

Sindh, Punjab, and Delhi Railway.—This line will probably be taken over by Government on the 1st January 1886. The Budget Estimate for 1885-86 provides for the estimated expenses of the last quarter of that year.

East Indian Railway Working expenses.—Decrease, £64,800. The decrease is due to a reduction of expenditure on account of renewals, and to a falling off in the payment on account of surplus profits, due to the falling off in the revenue of the 2nd half of 1884 and the 1st half of 1885.

127. *Guaranteed Railways* (*Surplus profits, Land and Supervision*) (37); Increase, £20,900. The increase is brought about by the necessity for provision in Madras of £15,300 on account of land required for the Beypore-Calicut Extension.

128. *Irrigation and Navigation.*—Increase, £11,300. The increase is due to additional capital outlay on the several projects.

129. *Charges in respect of Capital* (*39*); (*a Interest on Debt; State Railways;* Increase, £137,300. The increase is chiefly due to gradual increase in the capital expenditure on State Railways.

East Indian Railway.—Increase, £18,900. An increased provision is made to cover the charge on account of interest on India stock and interest on Capital, Capital advance, and Stores suspense accounts.

(*b*) *Annuities in purchase of Guaranteed Railways* (including Sinking Funds).—Increase, £96,700. The increase is due to a full year's provision having been made in 1885-86 on account of the annuity for the Eastern Bengal Railway, against provision in the Revised Budget of 1884-85 for only the payment of the proportion of the annuity due on the three months ending 31st October.

130. *State Railways, Capital Account* (*40*); Increase, £206,900. The increase is due to provision being made on account of the Lucknow-Sitapur-Kheri Line, the construction of which has been sanctioned by the Secretary of State.

Expenditure on Public Works not classed as Productive.

131. *State Railways* (*working and maintenance*) (*41*); Decrease, £56,000. The decrease is chiefly due to the expenses of the Rewari-Ferozepur Line having been transferred to 36. State Railways, and included under Rajputana-Malwa Railway.

132. *Subsidised Railways* (*42*); Decrease, £51,200. This is the net result of the following changes:—

	Increase.	Decrease.
	£	£
Guaranteed Interest	...	36,400
Subsidy	6,500	...
Payments for Land	...	21,300

Under guaranteed interest the decrease is due to the cessation of payments on this account to the Bengal Central Railway and to the Rohilkhund-Kumaon Railway from 1st January 1885. The increase under "Subsidy" represents the payments to the Rohilkhund-Kumaon Railway and to the Assam Railway. The decrease under payments for land is the amount by which the requirements under this head in 1885-86 are expected to fall short of the payments in 1884-85.

Southern Mahratta Railway.—Increase, £73,000. Of this £24,000 occurs in interest charges and £49,000 in working expenses. The former is due to additional provision being made to cover the interest on the additional capital raised by debentures, and the latter to provision being made for an additional length of 103 miles which it is expected will be opened for traffic early in April.

133. *Irrigation and Navigation* (*44*). The decrease amounts to £75,000, and occurs as follows:—

	£
Imperial	30,500
Provincial	45,600
	76,100
Local (increase)	1,100
Net decrease	75,000

The decrease is due to the Government of India not being able to provide a larger sum than £525,000 for total outlay in 1885-86, from imperial resources and to a heavy reduction in the grant for Provincial Public Works in Burma. There is an increase of £9,900 in Bengal, due chiefly to an increase of expenditure on the Orissa Coast Canal which is approaching completion.

134. *Military Works.*—Increase, £117,100. The Budget for 1885-86 provides (1) fixed annual grant of one crore of rupees; (2) one and half lakhs in addition for the Aden defences; (3) seven lakhs for Bombay Defences; and (4) the lapse of the current year's grant, ₹55,000.

135. *Civil Buildings, Roads, and Services* (*46*). This is a net increase of £47,500 due to the addition of £100,000 to the estimates, being the grant for frontier roads.

136. *Army* (*47*); Decrease, £204,800.

The net estimated cost of the army in India for the financial year 1885-86 (excluding war charges and receipts) is £14,881,000, or a little below £15,000,000, which may be considered to be about the normal military expenditure in India and in England. The above sum provides for the estimated cost of the British army serving in India, the sanctioned number at the present time being more nearly complete than it was at any time during the five years immediately preceding the Afghan War. Dealing alone with army expenditure in India, there is a net increase of £36,200, which is explained by the fact that under the grant for regimental pay, allowances, and charges there is an increase of £48,600, due to the rate of exchange for the pay of British troops in 1885-86 having been fixed at 1*s.* 7½*d.*, the rate for 1884-85 being 1*s.* 8*d.* There is also a large increase in the purchase of country-brewed beer, which will be supplied to all but three stations in Bengal, and which is slowly superseding English beer in the Madras and Bombay presidencies. The increase is counterbalanced by a corresponding reduction in the Home charges. Under the head of "ordnance establishments, stores, and camp equipage" there is an increase of £22,115, consequent on the outturn of small-arms ammunition at the factories having to be largely increased to replace reserves which it was found necessary to condemn.

Army Se

There is an increase of £36,169 "miscellaneous services," chiefly consequent on the provision of £20,000 for land required in connection with the new redoubts in course of construction at Lucknow. The grant for volunteers, consequent on the growth of the movement, and revised rates of pay for sergeant instructors, shows an increase of £13,975, while on the other hand there is a reduction under the head of commissariat establishments, supplies, and services of £28,532, which is due to favourable prices of supplies, and anticipated saving in railway and transport charges owing to reduced rates and a small relief. As regards the home charges, the gross estimate for 1885-86 is lower than that of any year since 1873-74. This is due partly to a reduction in the pension charges for British troops, and partly to reduced demands for stores. The charges for the Indian troop service are also very low. The estimated charge for stores is lower than it has been for nineteen years. The decrease is due partly to the economical administration of the several departments, and partly to the substitution of country products and manufactures and malt-liquor for stores hitherto imported from England. From both points of view the reduction is satisfactory.

Whatever may be the case in the future, at the close of 1884-85 the total net military charges in India and England were lower than they have been at any time during the past ten years, and this has been effected without prejudice to efficiency or any reduction in the authorised aggregate strength of the army, and notwithstanding that the non-effective and superannuation charges have in recent years largely increased. But for these and additional expenditure caused by changes of organisation in the British army the Government of India are in no way responsible. This fact, however, does not lessen the uncertainty which prevails with regard to what the demands on the above account may amount to, and they are, in consequence, a source of considerable anxiety to those who are responsible for army expenditure in India.

137. The Indian Government will continue to bear the ordinary charges of the troops who have been or who may be sent to the Suakim expedition. All extraordinary charges—all charges, that is to say, other than those which would have been, in ordinary course, incurred had these troops remained in India—will be defrayed by the English Government.

138. *Exchange on Transactions with London* (*49*). Compared with the Revised Estimate of 1884-85, the Budget Estimate of 1885-86 shews an increase of £320,700. The figures of both years are compared below. The entries with + against them represent Gain, and those with — represent Loss.

	Revised Estimates, 1884-85.	Budget Estimates, 1885-86.
	£	£
Secretary of State's Bills . . .	—3,337,100	—3,624,700
Expedition to Suakim	—75,000	—118,800
Hong-Kong Bills	—50,600	—41,900
Guaranteed Railways	+150,200	+136,300
East Indian Railway	+98,100	+121,800
Rajputana-Malwa Railway . . .	+16,800	+25,000
Southern Mahratta Railway . . .	—136,700	—158,600
Military	+7,000	+13,900
Public Works and Civil . . .	+74,400	+73,400
TOTAL .	—3,252,900	—3,573,600

The Secretary of State's drawings have been fixed at £13,773,700 against £13,795,300 in the Revised, the rate of exchange adopted for 1885-86 being 1*s.* 7*d.* against 1*s.* 7·3*d.*, the rate taken in the Revised. The Secretary of State's

drawings have been taken at the figure quoted above on the assumption that £2,225,000 true sterling will be raised in England by way of loan, and that £481,200 (the equivalent of 60 lakhs of rupees at 1*s.* 7·25*d.* the rupee) will be recovered in England on account of sums advanced in India towards the expedition to Suakim.

Concluding remarks on estimates.

139. Having brought the analysis of the financial situation, such as it presents itself, and of the detailed figures explaining variations between the Revised Estimates and Budget Estimates for 1884-85 and the Revised Estimates for 1884-85 and Budget Estimates for 1885-86, to a close, it remains only briefly to sum up our situation. The remarks made in the Preliminary paragraph have been, I trust, sufficiently illustrated in the course of this Statement. The prospects of our revenues, the heavy demands which they have been called upon to bear, and the liabilities to which we may yet be exposed, require no further explanation. The year commences with a surplus which is more less considerable according as the grants for capital expenditure are included in or excluded from our calculations. If during the ensuing year we are not called upon to submit to any material increase of expenditure, the estimates, based as they are on a very low rate of exchange and a very moderate calculation as to the revival of our trade, may, I think, be trusted to bear the test of trial. Should trade revive or exchange become more favourable, we shall have resources ample to meet our estimated expenditure. On the other hand, it is impossible to say whether additional expenditure may not in the course of the year have to be provided for, exceeding the limits of any addition which our revenues may reasonably hope to derive from the strengthening of our railway receipts or from the improvement in our exchange. To put it in other words, heavily as we are weighted from the two causes above indicated, there is no reason why our resources should not fully suffice to meet all normal expenditure during 1885-86. But if abnormal expenditure, whether of a temporary or permanent kind, is forced upon us, our estimates, even should they be strengthened by a more favourable combination of exchange and trade, may very probably prove unequal to meet it. It is to be hoped that the financial prosperity, the good harvests, and the undisturbed peace, which have of late years been accorded to us will continue. But it is necessary to state clearly the position in which, owing to the concurrence of a variety of unfavourable conditions, we find ourselves placed, in order that considerations which inevitably presented themselves when the estimates were being framed may be fully explained to the public, and that we may not be charged, should difficulties increase upon us, with having taken too sanguine a view of our position.

Ways and Means.

140. In the Financial Statement for 1884-85 it was anticipated that the Secretary of State would draw during 1883-84 £17,800,000 true sterling; that the balance in Indian Treasuries on 31st March 1884 would be £12,440,000; that the Secretary of State would draw during 1884-85 £16,500,000 true sterling; that assistance must be obtained during the year to the extent of £2,500,000, either by loan raised in India or by reduction of the drawings of the Secretary of State; and that the year would close on 31st March 1885 with a balance in the Indian Treasury of £11,010,850.

The Secretary of State actually drew in 1883-84 £17,599,805 true sterling, and the year 1884-85 opened with a balance in Indian Treasuries of £13,199,926, being £759,926 in excess of the estimate.

No loan was raised in India during the year, and the Secretary of State reduced the estimated amount of his drawings, so that his total drawings for the year 1884-85 are now taken at £13,795,300 true sterling.

It is expected, if the Secretary of State should draw the amount he proposes to draw, that the year 1885-86 will open with a balance in Indian Treasuries of £11,920,000; that the Secretary of State will require during the year £16,804,900 true sterling; and that if he were to draw the whole amount from India during the year, the amount in the Indian Treasuries would require to be supplemented by a loan of £3,500,000 (350 Lakhs of Rupees). The amount available for reduction of debt under the grant for Famine Relief and Insurance in 1885-86 is, however, in round numbers £680,000, (68 Lakhs of Rupees) and it will obviously be best to take this amount to reduce borrowing, rather than in actual reduction of debt previously incurred. The total amount to be borrowed has for the purposes of the estimates been taken at 282 lakhs of rupees, equivalent to about £2,225,000 true sterling. The Government of India has urged on the Secretary of State the inexpediency of attempting to borrow 282 lakhs of rupees in India this year, and the Secretary of State has accepted this opinion and agreed to find the equivalent sum of £2,225,000 true sterling in England during 1885-86. But while the Government now announces its intention of borrowing in England, and of not borrowing in India this year, it must be distinctly understood that no pledge is given, and that the Government of India does not hold itself precluded by anything now said from borrowing, in case of necessity, in India, or partly in India and partly in England, whatever sums of money may hereafter be found necessary for the service of the year.

The total requirements of the Secretary of State in 1885-86 being £16,804,900 true sterling, and it being anticipated that of this amount £2,225,000 true sterling will be obtained by loan or otherwise in England, there will remain £14,579,900 true sterling to be remitted from India. Of this sum it is estimated that the Secretary of State will receive £806,200 true sterling on account of repayments by Home Government of advances made in 1884-85 and 1885-86 for the Suakim expedition, leaving £13,773,700 true sterling to be drawn by bills and telegraphic transfers during the year. The closing balance of the year in Indian Treasuries on 31st March 1886 is estimated at £10,204,526.

141. The following is a summary of the chief points in the foregoing Statement:—

1. The Accounts of 1883-84 shew a surplus of £1,387,496. An analysis of the surplus shews it to be partly due to revenues collected in anticipation of the following year, 1884-85.

2. The Revised Estimate of 1884-85 shews a deficit of £716,200.

3. The causes of this deficit are, the stagnation of the export wheat and rice trade, the heavy expenditure connected with the extraordinary opium crop of 1883-84, the collection, in anticipation, of Land Revenue, above alluded to, the suspension of a considerable amount of Land Revenue in Bombay and Madras, until the year 1885-86, in consequence of the partial failure of the rains in the year 1883-84, and the grant of a considerable sum from revenue for capital expenditure on frontier Railways.

4. Statistics are given illustrating the great fall in exports in most of the Indian products during the year, and the abnormal expenditure on account of the opium crop.

5. The consumption of salt and progress of Savings Banks continue satisfactory, but Stock Notes shew no sign of improvement.

6. The net import of gold during 1883-84 was ₹5,46,33,156, being the largest import since the year 1869-70. In 10 months of 1884-85 the net import of gold has been ₹4,50,26,000.

7. The Revised Estimates of 1884-85 provided for drawings by the Secretary of State to the amount of £13,795,300, being £2,704,700 true sterling less than the Original Estimates of the year.

8. The surplus of 1885-86 is estimated at £508,100, but the estimates on which this surplus is framed include, on the one hand, a grant of £585,000 from Revenue for Capital Railway Expenditure and for Harbour Defences, and, on the other, they take credit for £585,000, being the nominal saving in exchange on estimated short drawings by the Secretary of State.

9. The net Opium Revenue for 1885-86 has been taken at £6,547,300.

10. The opium crop of 1885 promises well: the reserve on the 31st December 1884 was 2,296 chests. The probable reserve on December 31st, 1885, will be 18,297 chests.

11. Due notice will be given of the amount of opium to be sold during 1886.

12. In the Estimates of 1885-86 the rate of exchange has been taken at 1*s.* 7*d.*, and provision made for drawings by the Secretary of State to the amount of £13,773,700.

13. It is intended that the usual Public Works loan should be raised in England this year, but no pledge on the subject is given.

A. COLVIN.

March 17th, 1885.

* During the year these lines were classed as "Productive Public Works" and the outlay was transferred to that head, hence the minus entries under "Ordinary."

† This apparent excess is due to the stores balance of both the Rangoon and Irrawaddy and Rangoon and Sittang Valley lines being included in the outlay. It is reported that no excess will occur on Final heads.

‡ A Revised Estimate has been submitted for this line.

(a) Estimates have not yet been sanctioned for these lines, hence the outlay is quoted.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF THE WEATHER REPORTS FOR JANUARY AND FEBRUARY 1885.

Dated Calcutta, the 20th March 1885.

RESOLUTION—By the Government of India, Revenue and Agricultural Department.

Read the following :—

Summary of the Weather Reports for January and February 1885.

The exceptional steadiness of the winter-monsoon current, which was noticed in the November-December Meteorological Summary, has also been the principal characteristic of the past two months. The effect of these steady North-Westerly and North-Easterly winds is displayed most clearly by the thermometer, the readings of which shew that, not only has the resultant temperature of the whole period been below the average, but that the weather has been steadily and uniformly cool throughout.

The normal distribution of pressure during the cold weather consists of an area of high readings overlying the Punjab, Rajputana, the Cis-Gangetic portions of the North-Western Provinces, and the northern parts of the Central Provinces, and a low pressure area over the south-west of the Peninsula. To this distribution is due the North-Westerly winds of the Gangetic plain, the Northerly winds over Bengal, and the North-Easterly winds over the Bay of Bengal, the Peninsula and the central parts of the country; and the steadiness with which these winds have prevailed during the past season is attributable to the almost uninterrupted continuance of the normal barometric conditions. Two considerable interruptions did, however, occur during January. On the 7th, the barometer fell rapidly over North-Western India, and a large barometric depression was formed over Sind and the Punjab. Heavy rain fell at the stations in the extreme north-west, and the barometric fall continuing during the 8th, rain extended as far East as Mirat and Delhi. On the 9th, pressure was recovering, and the depression breaking up, but rain continued to fall both on that and the following day in the Punjab, Rajputana and Central and North-West Provinces. In the N. W. Himalaya there was a good deal of snow. Rain again fell in the Punjab, North-West, and Central Provinces, and Behar, on the 16th and 26th. It was not until the 28th that the normal distribution was extensively modified. On this date a distinct depression, apparently containing several small centres of disturbance, was formed over the North-Western Provinces. This occasioned very unsettled weather over North-Western India, and severe thunderstorms occurred in parts of the Punjab and North-Western Provinces. The storms at Delhi and Lucknow were exceptionally severe for the season. During February there was no important interruption to the average distribution of pressure, but local disturbances, with local rain and thunderstorms, occurred in Bengal, Orissa, &c., on the 4th and 5th, again on the 11th and 12th, and again on the 18th.

In January the Punjab, the Trans-Gangetic parts of the North-Western Provinces, Orissa, Rajputana, and Sind, all had more than the average rainfall of the month; but in February the only parts of the country which experienced more than the average were Lower Bengal, Chutia Nagpur, Orissa, and the neighbouring parts of the Northern Circars and Central Provinces.

As mentioned above, the mean temperature of the whole period was below the average, but the deficiency was by no means so general in the first as in the second month, the only exceptions to the general coolness in February being the stations of Goa, Gopalpore, Bellary, Negapatam, Mercara, Bangalore and Colombo. The greatest general departure from the average occured in both months between the dates of the 9th and 16th, when in January the thermometer fell as low as 21° below the average of the month at Quetta, 18° at

Murree, 15° at Multan, 14° at Dera Ismail Khan, 13° at Sirsa, and 12° at Lahore, while in February between the same dates the greatest deficiencies were 16° at Dera Ismail Khan and Rawulpindi, 12° at Simla, and over 10° at Roorkee, Mirat, Allahabad, and over the Central Provinces and Rajputana.

The amount of humidity in the atmosphere showed comparatively little departure from the average, being generally somewhat above it in January and below in February.

The following table shows the total average rainfall of the months of January and February, and the difference from this average of that of the past two months :—

Districts.	Average rainfall, January and February.	Difference from the average in January and February 1885.
	Inches.	Inches.
Punjab, West	2·58	+ 3·55
„ East	2·53	+ 2·80

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE BOMBAY PRESIDENCY (EXCLUDING SIND) FOR THE YEAR 1883-84.

No. 561., dated Fort William, the 13th March, 1885.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, Public Works Department, No. 17 W. I.—40, dated 28th January 1885, forwarding the above Report and the Local Government Resolution reviewing it.

OBSERVATIONS.—The expenditure during the year on Capital Account was R3,65,295, and the total outlay, both direct and indirect, under this head of charge, amounted at the close of the year under review to R1,51,10,680. The balance of unpaid interest is diminished by the abolition of interest accounts for all works not classed as Productive, and for the present year is shown as R47,38,373.

2. The revenue, direct or indirect, was by assessments R2,46,727, and by actual realizations R2,86,755, the maintenance charges, including those for collection of revenue, amounted to R1,70,089. The net profit from the working of the year was therefore R76,638, giving a return of 0·51 per cent. on a Capital outlay of R1,51,10,680.

3. The following table compares the areas irrigated, the revenue assessed and the working expenses for four years.

YEAR.	Acres irrigated.	Assessed revenue, direct and indirect.	Working expenses.	Profit from assessments.
		R	R	R
1880-81	34,495	2,30,652	1,47,995	82,657
1881-82	29,881	2,37,768	1,58,982	78,786
1882-83	28,735	2,79,649	1,66,870	1,12,779
1883-84	32,962	2,46,727	1,70,089	76,638

The decrease in assessed revenue is partly due to the introduction of a revised scale of water-rates; the rates for the different classes of irrigation have been generally reduced in the hope that the cultivators will be encouraged to use the water more freely, and this expectation will doubtless be realized as the new schedules become more generally known. There is a considerable decrease in indirect revenue owing to the cessation of the practice that previously prevailed of taking credit for savings in other Government Departments.

The increase in working expenses is entirely due to larger charges for establishment and collection; the result on the whole is that the incidence of the cost of maintenance on each acre irrigated amounts to R4·4 instead of R4·6 which was the figure for the previous year.

The necessity for the high establishment charges has not been explained in the report; they amount to 50 per cent. on the cost of works and repairs, and their incidence is particularly heavy on some of the individual works, such as the Mutha and Ojhar Canals, and Matoba, Shirsupal and Bhadalwadi Tanks. Continuous efforts should be made to sensibly reduce the maintenance charges which show a tendency to increase year by year.

4. The Government of India would invite attention to the very large balances of revenue that have still to be realized. In paragraph 26 of his report, the Chief Engineer states that the outstandings on the whole of the works amount to ₹52,376 which is 22 per cent. on the assessments for the year. The bulk of the uncollected revenue, ₹37,171, is due to the Mutha canals, and is recorded without any remark or explanation.

5. The rainfall of the year was good; at many of the works a very heavy fall is recorded at the beginning of the monsoon which filled the tanks to over flowing. In some instances the copious rainfall appears to have assisted in the extension of irrigation, and in others it is reported as having rendered artificial irrigation unnecessary. These varying results were doubtless due to the position and circumstances of the different works, but it would be satisfactory if the more important matters connected with individual irrigation works were noticed and explained by the Chief Engineer in his report. The level of the water in nearly all of the tanks is stated to have been higher at the close than at the beginning of the year, and there was therefore a prospect of increased irrigation from these works in the current year.

6. The increase of 4,227 acres in the irrigation of the year was under the following crops :—

Description.	Class I, perennial.	Class II, 8 months' crops.	Class III, 4 months' crops.	Class IV, monsoon dry.	Hot weather crops.
	Acres.	Acres.	Acres.	Acres.	Acres.
Sugarcane	130	...	...	...	...
Wheat	...	827		...	. .
Ground-nut	...	794	...	...	...
Gram	...	...	1,159	...	...
Bajri	...	...	...	1,240	...
Chino, Rala and Wara . .	...	...	...	107	...
Sundries	...	...	...	441	...
Condiments	160				

whilst there was a decrease of 631 acres under other crops principally in rice which accounts for 329 acres. The greater part of the increase appears to be under the lower classes III and IV which are generally rated at ₹1-4 and 4 annas per acre respectively; this points to the necessity which has been urged in previous reviews for a more general provision of storage tanks and in the case of the Mutha canals justifies the increase to the capacity of Lake Fife which has already been approved by the Supreme Government. It would be convenient if in future reports the table of areas of principal crops were made more complete by the addition of information regarding the classes to which the crops belong, and in a separate table the rates that have been charged for the various classes on the different works during the year under report might be given.

7. It is a matter for regret that opportunities could not be found at any time during the year under review for carrying out systematic experiments with the object of gauging the loss of water from canals. It is evident from the results of the rough experiments on the channels of the Palkhed canals and under the Ekruk Tank, which are to be found in the separate reports by the local officers, that a very large percentage of the most valuable water of the year is absolutely lost, and opportunities might well be made for ascertaining definitely whether any and, if so, how much of this waste is preventible. It is not stated why, when opportunities offered in the cases alluded to above, they were not fully taken advantage of to obtain reliable results.

8. A full description of the very useful works which are classed as "Works for which only revenue accounts are kept" was given in a separate publication

of Part II of the Irrigation Revenue Report of the Bombay Government for 1881-82. A complete abstract is promised when the lists which are now being revised and corrected have been finished. The results of their working for two years are shown below :—

Year.	Gross revenue from all sources.	All charges.	Net receipts, direct and indirect.
	₹	₹	₹
1882-83	4,45,843	2,45,530	2,00,313
1883-84	4,97,827	2,04,841	2,92,986

The increase in revenue and decrease in working expenses is very satisfactory.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Department of Finance and Commerce, and to the Revenue and Agricultural Department for information.

Ordered also, that copies of this Resolution be forwarded to the Government of Bombay for information and guidance, and that copies of the Report and of the Resolution be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

The Government of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and British Burma.
The Foreign Department for communication to the Resident at Mysore, and the Chief Commissioner of Coorg.
The Resident at Hyderabad.
The Agents to the Governor-General, Central India and Rajputana.

Ordered further, that this Resolution and the Resolution by the Local Government be published in the Supplement to the *Gazette of India*, and that copies of this Resolution be forwarded to Her Majesty's Secretary of State.

W. S. TREVOR, *Colonel, R.E.,*
Secretary to the Government of India.

No. 17 W. I.—40, dated 28th January 1885.

RESOLUTION—By the Government of Bombay, P. W. Dept., Irrigation Branch.

Read the following :—

Memorandum from the Chief Engineer for Irrigation, No. 3810, dated 28th October 1884. —Forwards the Irrigation Revenue Report of the Bombay Presidency, excluding Sind, for 1883-84, Parts I and II.

RESOLUTION.—This report has been nearly three months in the Press. Endeavour should be made in future to pass it through more expeditiously.

2. The total Capital outlay during the year has been ₹3,65,295, bringing the total Capital outlay up to the end of the year to ₹1,51,10,680.

3. No new works have been brought into operation during the year under review.

4. The total area irrigated under the existing new works is 32,962 acres. This shows an increase of 4,227 acres for the year, and for the most part in the *permanent irrigation* which is satisfactory.

5. The assessed Revenue is ₹2,46,727. This shows a decrease of ₹1,987 for the year, which is due to the reduction of water-rates ordered by the Secretary of State; but as the area of irrigation is certain to increase steadily under

the reduced rates, there will soon be a corresponding increase in the receipts on account of kharif and rabi dry crop irrigation. This falling off may be regarded therefore as temporary only.

6. The total working expenses are R1,70,089 against R1,66,870 in 1882-83.

7. The average rate for maintenance per acre irrigated is R3·80 against R4·37, the average water-rate per acre being R4·60 against R5·61 in 1882-83. It has thus cost R3·80 to maintain an irrigated acre yielding on the average R4·60, which must still be regarded as extremely high: but as explained in para. 5 *ante*, the water-rates this year have been largely reduced in view to the extension of the dry crop irrigation; and this accounts in some measure for the apparently high maintenance charge.

8. The gross area under command of the works is 417,430 acres and the net irrigable is 317,907. Of the latter 32,962 acres or 10·3 per cent. were actually irrigated during 1883-84.

9. The project for a storage reservoir at Tarla for the Krishna Canal should be no longer delayed.

10. Government concur with the Chief Engineer for Irrigation that the reports of the Executive Engineers in regard to the smaller works may advantageously be curtailed.

11. No opportunity should be lost of obtaining accurate information as to the loss of water in the canals by leakage, evaporation and absorption.

12. Under Part II, which deals with works in operation for which only Revenue Accounts are kept, a net revenue of R2,92,986 is exhibited, the gross receipts for the year being R4,97,827 and the working expenses R2,04,841.

13. The irrigated area was 138,468 acres. The average water-rate is thus R3·59 and the cost of maintenance per acre irrigated R1·48.

14. The total revenue credited in the Irrigation Department from *all* works in operation under Parts I and II in 1883-84 amounted to R7,44,554. The working expenses were R3,74,930, leaving a net revenue of R3,69,624.

15. Copies of the Report and of this Resolution thereon should, as usual, be forwarded to the Government of India and the Secretary of State.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Fort William, the 26th March 1885.

No. 8.—Whereas the Secretary of State for India has by Resolution in Council declared the provisions of the Statute 33 Vic., Cap. 3, Section 1, to be, from and after the 1st October 1877, applicable to the territories forming the Chief Commissionership of Coorg;

And whereas the Chief Commissioner of Coorg has proposed to the Governor General in Council a draft of the following Regulation together with the reasons for proposing the same;

And whereas the Governor General in Council has taken such draft and reasons into consideration, and has approved of such draft, and the same has received the Governor General's assent;

In pursuance of the direction contained in the said section, the said Regulation is now published in the *Gazette of India*.

REGULATION No. I OF 1885.

A Regulation to amend the Coorg Courts Regulation, 1881.

WHEREAS it is expedient to amend the Coorg Courts Regulation, 1881; It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Regulation may be called the Coorg Courts Regulation, 1885; and

(*2*) It shall come into force at once.

Repeal of certain words in section 2 of Regulation II of 1881.

2. In section 2 of the Coorg Courts Regulation, II of 1881, the words "and section 586 of the Code of Civil Procedure" shall be repealed, and section 586 of the said Code shall be revived.

Amendment of section 3 of same Regulation.

3. In section 3 of the said Regulation, for the word "four" the word "five" shall be substituted; after the clause "(*1*) The Court of the Súbahdár" the clause "(*2*) The Court of the Munsif" shall be inserted; and the present clauses (*2*), (*3*) and (*4*) shall be re-numbered (*3*), (*4*) and (*5*).

Amendment of section 5 of same Regulation.

4. In section 5 of the said Regulation, after the word "Súbahdárs" the words "and Munsifs" shall be added.

Addition to section 5 of same Regulation.

5. To section 5 of the said Regulation, the following shall be added:—

"Every person appointed by the Chief Commissioner to be a Súbahdár or Munsif shall, in the talúk or other local area to which he may from time to time be posted, have the powers of a Court of a Súbahdár or Munsif, as the case may be."

Amendment of sections 6 and 7 of the same Regulation.

6. In sections 6 and 7 of the said Regulation, after the word "Súbahdárs" the word "Munsifs" shall be added.

Substitution of new clauses for clause (c) of section 9 of same Regulation.

7. In section 9 of the said Regulation, for clause (c) the following clauses shall be substituted :—

"(c) The jurisdiction of a Munsif extends to all original suits in which the amount or value of the subject-matter in dispute does not exceed five hundred rupees."

"(d) The jurisdiction of a Súbahdár extends to all original suits in which the amount or value of the subject-matter in dispute does not exceed one hundred rupees :

"Provided that the Chief Commissioner may, from time to time, by notification in the official Gazette, extend the jurisdiction of any Munsif or Súbahdár to all original suits in which the amount or value of the subject-matter in dispute does not exceed, in the case of a Munsif, one thousand, and in the case of a Súbahdár, two hundred, rupees."

Amendment of section 11 of same Regulation.

8. In section 11, clause (b), of the said Regulation, before the words "Assistant Commissioners" the words "Munsifs and" shall be added.

New sections added after section 12 of same Regulation.

9. After section 12 of the said Regulation the following sections shall be added :—

XIV of 1882.

"12A. To section 585 of the Code of Civil Procedure the following shall be added, namely :—'Provided that in any case in which the decision of the Court of the Commissioner or Assistant Commissioner passed in appeal reverses or modifies the decree or order of the Court of original jurisdiction, and is not declared by any law for the time being in force to be final, the Court of the Judicial Commissioner may admit a second appeal if, on a perusal of the grounds of appeal and of copies of the judgments of the lower Courts, it is of opinion that a further consideration of the case is requisite for the ends of justice.'

Addition to section 585, Act XIV of 1882.

"12B. In section 586 of the same Code, for the word 'five' the word 'three' shall be substituted; and to the same section the following shall be added, namely :—'Provided that the Court of the Judicial Commissioner may admit a second appeal in such suits when the amount or value exceeds one hundred rupees, if, on a perusal of the grounds of appeal and of copies of the judgments of the lower Courts, it is of opinion that a further consideration of the case is requisite for the ends of justice.'"

Amendment of section 586 of Act XIV of 1882.

R. J. CROSTHWAITE,

Offg. Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.—ESTABLISHMENTS.

Calcutta, the 26th March 1885.

No. 111.—Mr. C. G. M. Kennedy, Extra Assistant Commissioner, is appointed to be a Supernumerary Assistant Commissioner of the 3rd Grade in Assam.

MEDICAL.

The 20th March 1885.

No. 116.—The services of Brigade-Surgeon S. M. Shircore, Civil Surgeon of Moorshedabad, are replaced at the disposal of the Military Department, with effect from the 21st instant.

ECCLESIASTICAL.

The 26th March 1885.

No. 46.—The Reverend H. O. Moore, M.A., a Junior Chaplain on the Bengal Establishment, reported his arrival at Calcutta on the forenoon of the 21st March 1885.

Mr. Moore's services are placed at the disposal of the Government of Bengal.

D. FITZPATRICK,

Offg. Secy. to the Govt. of India.

REVENUE AND AGRICULTURAL DEPARTMENT.

NOTIFICATIONS.—GENERAL.

Calcutta, the 26th March 1885.

EXTERNAL.

The 25th March, 1885.

No. 451 *E.*—The Governor-General in Council is pleased to extend the provisions of the Indian Stamp Act (Act I of 1879), so far as the same may be applicable, to the districts within the Biluchistan Agency.

No. 453 *E.*—The Governor-General in Council is pleased to extend the provisions of the Indian Court Fees Act (Act VII of 1870), so far as the same may be applicable, to the districts within the Biluchistan Agency.

The 26th March, 1885.

No. 455 *E.*—In supersession of Notification No. 2778 E. P., dated the 19th December, 1879, published in the *Gazette of India*, dated the 20th December, 1879, the Governor-General in Council is pleased to publish the following Notification :—

In exercise of the power conferred by Section 4 of Act XXI of 1879 (The Foreign Jurisdiction and Extradition Act, 1879) and all other powers enabling him in this behalf, the Governor-General in Council, with the assent of His Highness the Khan of Kelat, is pleased (*a*) to direct that, in the administration of civil justice in the district of Quetta, the Code of Civil Procedure shall be taken as a general guide, and (*b*) to make the following arrangements, that is to say :—

(1) The Political Agent for the time being in charge of the district of Quetta shall have power to try all original suits within the said district, whatever be the amount or value of the subject matter; and for the purposes of all enactments for the time being in force, the Court of the said Political Agent shall be deemed to be the Court of the District Judge.

(2) The Extra Assistant Commissioner of Quetta, for the time being, shall have power to try all original suits within the said District when the amount or value of the subject matter does not exceed ten thousand rupees.

(3) The Munsiff at Quetta (if any), for the time being. shall have power to try all original suits within the said District, when the amount or value of the subject matter does not exceed three hundred rupees.

(4) The Tahsildar of Quetta, for the time being, shall have power to try all original suits within the said District, when the amount or value of the subject matter does not exceed three hundred rupees.

(5) For the purposes of Section 540 of the Code of Civil Procedure—

(I) the Court of the Extra Assistant Commissioner, Quetta, for the time being shall be the Court authorised to hear appeals from the decisions of the said Munsiff and Tahsildar;

(II) the Court of the Political Agent for the time being shall be deemed to be the Court authorised to hear appeals from the decisions in original suits decided by the said Extra Assistant Commissioner;

(III) the Court of the Agent to the Governor-General, for the time being, shall be deemed to be the Court authorised to hear appeals from the decisions of the said Political Agent.

(6) For all the purposes of the said Code the Agent to the Governor-General shall exercise the powers of a High Court.

The 26th March, 1885.

No. 457 *E.*—In exercise of the power conferred by Section 4 of Act XXI of 1879 (The Foreign Jurisdiction and Extradition Act, 1879), and all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct (*a*) that in the administration of civil justice in the District of Pishin the Code of Civil Procedure shall be taken as a general guide; and (*b*) to make the following arrangements, that is to say :—

(1) The Political Agent, for the time being, in charge of the District of Pishin shall have power to try all original suits within any part of the said District whatever be the amount or value of the subject matter; and for the purposes of all enactments for the time being in force, the Court of the said Political Agent shall be deemed to be the Court of the District Judge.

(2) The Tahsildar of Pishin, for the time being, shall have power to try all original suits within the said district when the amount or value of the subject matter does not exceed five hundred rupees.

(3) The Munsiff in Pishin (if any), for the time being, shall have power to try all original suits within the said District when the amount or value of the subject matter does not exceed three hundred rupees.

(4) For the purposes of the Code of Civil Procedure—

(I) the Court of the Political Agent for the time being shall be the court authorised to hear appeals from the decisions of the said Tahsildar and Munsiff;

(II) the Court of the Agent to the Governor General for the time being shall be deemed to be the Court authorised to hear appeals from the decisions of the said Political Agent.

(5) For all the purposes of the said Code the Agent to the Governor-General shall exercise the powers of a High Court.

POST OFFICE.

NOTIFICATIONS.

Calcutta, the 20th March 1885.

POSTAL CIRCLE, BEHAR.

No. 15032.—Mr. J. Hogan is appointed to officiate as Superintendent of Post Offices, Purneah Division.

The 23rd March 1885.

EXCHANGE OF PARCELS WITH VICTORIA.

From the 1st April 1885, parcels may be exchanged between India and the Colony of Victoria (Australia).

2. The conditions governing the limits of size and weight, the contents, and the rates of postage of parcels sent from India to Victoria, will be the same as those laid down in Section IV of the *Postal Guide* for parcels sent from India to the United Kingdom.

3. Parcels sent from India to Victoria may not exceed £50 in value.

4. Each parcel should be accompanied by a declaration of its contents and their value, in the prescribed form.

5. Prepayment of postage on parcels despatched from India will ensure the free conveyance of the parcels only to such places in Victoria as are accessible by rail or coach ; and any charges incurred for the further transmission of parcels to places not so accessible will be recovered from the addressees in Victoria.

A. U. FANSHAWE,

Offg. Director General of the Post Office of India.

HENRY F. BLANFORD,
Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance

For the Complete Series, *including postage* . ℞22 8

	Without postage.	With postage.
For the Calcutta Series . . .	℞10 0	℞12 8
„ each of the Madras, Bombay and Allahabad Series .	„ 6 0	„ 7 0
„ a part of the Calcutta Series purchased separately (*inclusive of postage in India*)		„ 2 0
„ a part of the Madras, Bombay and Allahabad Series purchased separately (*inclusive of postage in India*) . .		„ 1 0

Persons desiring to subscribe for, or purchase, the Reports should apply to—

Messrs. Thacker, Spink & Co., Calcutta.
„ Thacker & Co., Bombay.
„ Higginbotham & Co., Madras.
The Government Central Book Depôt, Bombay.
„ Curator of Government Books, North-Western Provinces and Oudh.

70. Procedure where officer appointed.
71. Rights and liabilities as to possession of crop.

Liability for rent on change of landlord or after transfer of tenure or holding.

72. Tenant not liable to transferee of landlord's interest for rent paid to former landlord without notice of the transfer.
73. Liability for rent after transfer of occupancy-holding.

Illegal cesses, &c.

74. Abwâb, &c., illegal.
75. Penalty for exaction by landlord from tenant of sum in excess of the rent payable.

CHAPTER IX.

MISCELLANEOUS PROVISIONS AS TO LANDLORDS AND TENANTS.

Improvements.

76. Definition of "improvement."
77. Right to make improvements in case of holding at fixed rates and occupancy-holding.
78. Collector to decide question as to right to make improvement, &c.
79. Right to make improvements in case of non-occupancy-holding.
80. Registration of landlords' improvements.
81. Application to record evidence as to improvement.
82. Compensation for raiyats' improvements.
83. Principle on which compensation is to be estimated.

Acquisition of land for building and other purposes.

84. Acquisition of land for building and other purposes.

Sub-letting.

85. Restrictions on sub-letting.

Surrender and abandonment.

86. Surrender.
87. Abandonment.

Sub-division of tenancy.

88. Division of tenancy not binding on landlord without his consent.

Ejectment.

89. No ejectment except in execution of decree.

Measurements.

SECTIONS.

90. Landlord's right to measure land.
91. Power for Court to order tenant to attend and point out boundaries.
92. Standard of measurement.

Managers.

93. Power to call upon co-owners to show cause why they should not appoint a common manager.
94. Power to order them to appoint a manager if cause is not shown.
95. Power to appoint manager if order is not obeyed.
96. Power to nominate person to act in all cases under clause (*b*) of last section.
97. The Court of Wards Act, 1879, applicable to management by Court of Wards.
98. Provisions applicable to manager.
99. Power to restore management to co-owners.
100. Power to make rules.

CHAPTER X.

RECORD-OF-RIGHTS AND SETTLEMENT OF RENTS.

101. Power to order survey and preparation of record-of-rights.
102. Particulars to be recorded.
103. Power for Revenue-officer to record particulars on application of proprietor or tenure-holder.
104. Procedure as to recording or settling rents.
105. Publication of record.
106. Procedure in case of dispute as to entries in record.
107. Procedure to be adopted by Revenue-officer.
108. Appeals from decisions of Revenue-officers.
109. Undisputed entries in record to be presumptive evidence.
110. Time at which settlement of rent is to take effect.
111. Stay of proceedings in Civil Court during preparation of record.
112. Power to authorize a special settlement in special cases.
113. Period for which rents as settled are to remain unaltered.
114. Expenses of proceedings under chapter.
115. Presumption as to fixity of rent not to apply where record has been prepared.

CHAPTER XI.

RECORD OF PROPRIETORS' PRIVATE LANDS.

116. Saving as to khámár land.
117. Power for Government to order survey and record of proprietor's private lands.
118. Power for Revenue-officer to record private land on application of proprietor or tenant.
119. Procedure for recording private land.
120. Rules for determination of proprietor's private land.

CHAPTER XII.

DISTRAINT.

SECTIONS.

121. Cases in which an application for distraint may be made.
122. Form of application.
123. Procedure on receipt of application.
124. Execution of order for distraint.
125. Service of demand and account.
126. Right to reap, &c., produce.
127. Sale proclamation to be issued unless demand is satisfied.
128. Place of sale.
129. When produce may be sold standing.
130. Manner of sale.
131. Postponement of sale.
132. Payment of purchase-money.
133. Certificate to be given to purchaser.
134. Proceeds of sale how to be applied.
135. Certain persons may not purchase.
136. Procedure where demand is paid before the sale.
137. Amount paid by under-tenant for his lessor may be deducted from rent.
138. Conflict between rights of superior and inferior landlords.
139. Distraint of property which is under attachment.
140. Suit for compensation for wrongful distraint.
141. Power for Local Government to authorize distraint in certain cases.
142. Power for High Court to make rules.

CHAPTER XIII.

JUDICIAL PROCEDURE.

143. Power to modify Civil Procedure Code in its application to landlord and tenant suits.
144. Jurisdiction in proceedings under Act.
145. Náibs or gumáshtas to be recognized agents.
146. Special register of suits.
147. Successive rent-suits.
148. Procedure in rent-suits.
149. Payment into Court of money admitted to be due to third person.
150. Payment into Court of money admitted to be due to landlord.
151. Provision as to payment of portion of money.
152. Court to grant receipt.
153. Appeals in rent-suits.
154. Date from which decree for enhancement takes effect.
155. Relief against forfeitures.
156. Rights of ejected raiyats in respect of crops and land prepared for sowing.
157. Power for Court to fix fair rent as alternative to ejectment.
158. Application to determine incidents of tenancy.

CHAPTER XIV.

SALE FOR ARREARS UNDER DECREE.

159. General powers of purchaser as to avoidance of incumbrances.

SECTIONS.
160. Protected interests.
161. Meaning of "incumbrance" and "registered and notified incumbrance".
162. Application for sale of tenure or holding.
163. Order of attachment and proclamation of sale to be issued simultaneously.
164. Sale of tenure or holding subject to registered and notified incumbrances, and effect thereof.
165. Sale of tenure or holding with power to avoid all incumbrances, and effect thereof.
166. Sale of occupancy-holding with power to avoid all incumbrances, and effect thereof.
167. Procedure for annulling incumbrances under the foregoing sections.
168. Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.
169. Rules for disposal of the sale-proceeds.
170. Tenure or holding to be released from attachment only on payment into Court of amount of decree with costs, or on confession of satisfaction by decree-holder.
171. Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the tenure or holding.
172. Inferior tenant paying into Court may deduct from rent.
173. Decree-holder may bid at sale; judgment-debtor may not.
174. Application by judgment-debtor to set aside sale.
175. Registration of certain instruments creating incumbrances.
176. Notification of incumbrances to landlord.
177. Power to create incumbrances not extended.

CHAPTER XV.

CONTRACT AND CUSTOM.

178. Restrictions on exclusion of Act by agreement.
179. Permanent mukarrarí leases.
180. Ùtbandi, chur and dearah lands.
181. Saving as to service-tenures.
182. Homesteads.
183. Saving of custom.

CHAPTER XVI.

LIMITATION.

184. Limitation in suits, appeals and applications in Schedule III.
185. Portions of the Indian Limitation Act not applicable to such suits, &c.

CHAPTER XVII.

SUPPLEMENTAL.

Penalties.

SECTIONS.
186. Penalties for illegal interference with produce.

Agents and representatives of landlords.

187. Power for landlord to act through agent.
188. Joint landlords to act collectively or by common agent.

Rules under Act.

189. Power to make rules regarding procedure, powers of officers and service of notices.
190. Procedure for making, publication and confirmation of rules.

Provisions as to temporarily-settled districts.

191. Saving as to land held in a district not permanently settled.
192. Power to alter rent in case of new assessment of revenue.

Rights of pasturage, &c.

193. Rights of pasturage, forest-rights, &c.

Saving for conditions binding on landlords.

194. Tenant not enabled by Act to violate conditions binding on landlord.

Savings for special enactments.

195. Savings for special enactments.

Construction of Act.

196. Act to be read subject to Acts hereafter passed by Lieutenant-Governor of Bengal in Council.

SCHEDULE I.—REPEAL OF ENACTMENTS.

SCHEDULE II.—FORMS OF RECEIPT AND ACCOUNT.

SCHEDULE III.—LIMITATION.

Bengal Tenancy Act.

(*Chapter I.—Preliminary.—Secs. 1-3.*)

An Act to amend and consolidate certain enactments relating to the Law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal.

WHEREAS it is expedient to amend and consolidate certain enactments relating to the law of Landlord and Tenant within the territories under the administration of the Lieutenant-Governor of Bengal; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Short title.

1. (*1*) This Act may be called the Bengal Tenancy Act, 1885.

Commencement.

(*2*) It shall come into force on such date (hereinafter called the commencement of this Act) as the Local Government, with the previous sanction of the Governor General in Council, may, by notification in the local official Gazette, appoint in this behalf.

Local extent.

(*3*) It shall extend by its own operation to all the territories for the time being under the administration of the Lieutenant-Governor of Bengal, except the Town of Calcutta, the Division of Orissa, and the Scheduled Districts specified in the third Part of the First Schedule of the Scheduled Districts Act, 1874; and the Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, extend the whole or any portion of this Act to the Division of Orissa or any part thereof.

of 1874.

Repeal.

2. (*1*) The enactments specified in Schedule I hereto annexed are repealed in the territories to which this Act extends by its own operation.

(*2*) When this Act is extended to the Division of Orissa or any part thereof, such of those enactments as are in force in that Division or part, or, where a portion only of this Act is so extended, so much of them as is inconsistent with that portion, shall be repealed in that Division or part.

(*3*) Any enactment or document referring to any enactment hereby repealed shall be construed to refer to this Act or to the corresponding portion thereof.

(*4*) The repeal of any enactment by this Act shall not revive any right, privilege, matter or thing not in force or existing at the commencement of this Act.

Definitions.

3. In this Act, unless there is something repugnant in the subject or context:—

(*1*) "Estate" means land included under one entry in any of the general registers of revenue-paying lands and revenue-free lands, prepared and maintained under the law for the time being in force by the Collector of a district, and includes Government khás maháls and revenue-free lands not entered in any register.

(*2*) "Proprietor" means a person owning, whether in trust or for his own benefit, an estate or a part of an estate.

(*3*) "Tenant" means a person who holds land under another person, and is, or but for a special contract would be, liable to pay rent for that land to that person.

(*4*) "Landlord" means a person immediately under whom a tenant holds, and includes the Government.

(*5*) "Rent" means whatever is lawfully payable or deliverable in money or kind by a tenant to his landlord on account of the use or occupation of the land held by the tenant:

In sections 53 to 68, both inclusive, sections 72 to 75, both inclusive, Chapter XII and Schedule III of this Act, "rent" includes also money recoverable under any enactment for the time being in force as if it was rent.

(*6*) "Pay," "payable" and "payment," used with reference to rent, include "deliver," "deliverable" and "delivery."

(*7*) "Tenure" means the interest of a tenure-holder or an under-tenure-holder.

(*8*) "Permanent tenure" means a tenure which is heritable and which is not held for a limited time.

(*9*) "Holding" means a parcel or parcels of land held by a raiyat and forming the subject of a separate tenancy.

(*10*) "Village" means an area included in a village map of the revenue-survey within the same exterior boundary, or, where no such maps have been prepared, such area as any officer appointed by the Local Government in this behalf may determine after local inquiry held on such notice as the Local Government considers sufficient for giving information to all persons interested.

(*11*) "Agricultural year" means, where the Bengalí year prevails, the year commencing on the first day of Bysák, where the Faslí or Amlí year

prevails, the year commencing on the first day of Asin, and, where any other year prevails for agricultural purposes, that year.

(*12*) "Permanent Settlement" means the Permanent Settlement of Bengal, Behar and Orissa, made in the year 1793.

(*13*) "Succession" includes both intestate and testamentary succession.

(*14*) "Signed" includes "marked" when the person making the mark is unable to write his name; it also includes "stamped" with the name of the person referred to.

(*15*) "Prescribed" means prescribed from time to time by the Local Government by notification in the official Gazette.

(*16*) "Collector" means the Collector of a district or any other officer appointed by the Local Government to discharge any of the functions of a Collector under this Act.

(*17*) "Revenue-officer" in any provision of this Act includes any officer whom the Local Government may appoint by name or by virtue of his office to discharge any of the functions of a Revenue-officer under that provision.

(*18*) "Registered" means registered under any Act for the time being in force for the registration of documents.

CHAPTER II.

CLASSES OF TENANTS.

Classes of tenants.

4. There shall be, for the purposes of this Act, the following classes of tenants, (namely) :—

(1) tenure-holders, including under-tenure-holders,

(2) raiyats, and

(3) under-raiyats, that is to say, tenants holding whether immediately or mediately under raiyats;

and the following classes of raiyats, (namely) :—

(*a*) raiyats holding at fixed rates, which expression means raiyats holding either at a rent fixed in perpetuity or at a rate of rent fixed in perpetuity,

(*b*) occupancy-raiyats, that is to say, raiyats having a right of occupancy in the land held by them, and

(*c*) non-occupancy-raiyats, that is to say, raiyats not having such a right of occupancy.

Meaning of "tenure-holder" and "raiyat".

5. (*1*) "Tenure-holder" means primarily a person who has acquired from a proprietor or from another tenure-holder a right to hold land for the purpose of collecting rents or bringing it under cultivation by establishing tenants on it, and includes also the successors in interest of persons who have acquired such a right.

(*2*) "Raiyat" means primarily a person who has acquired a right to hold land for the purpose of cultivating it by himself, or by members of his family, or by hired servants, or with the aid of partners, and includes also the successors in interest of persons who have acquired such a right.

Explanation.—Where a tenant of land has the right to bring it under cultivation, he shall be deemed to have acquired a right to hold it for the purpose of cultivation notwithstanding that he uses it for the purpose of gathering the produce of it or of grazing cattle on it.

(*3*) A person shall not be deemed to be a raiyat unless he holds land either immediately under a proprietor or immediately under a tenure-holder.

(*4*) In determining whether a tenant is a tenure-holder or a raiyat, the Court shall have regard to—

(*a*) local custom; and

(*b*) the purpose for which the right of tenancy was originally acquired.

(*5*) Where the area held by a tenant exceeds one hundred standard bighás, the tenant shall be presumed to be a tenure-holder until the contrary is shewn.

CHAPTER III.

TENURE-HOLDERS.

Enhancement of rent.

Tenure held since Permanent Settlement liable to enhancement only in certain cases.

6. Where a tenure has been held from the time of the Permanent Settlement, its rent shall not be liable to enhancement except on proof—

(*a*) that the landlord under whom it is held is entitled to enhance the rent thereof either by local custom or by the conditions under which the tenure is held, or

(*b*) that the tenure-holder, by receiving reductions of his rent, otherwise than on account of a diminution of the area of the tenure, has subjected himself to the payment of the increase demanded, and that the lands are capable of affording it.

Limits of enhancement of rent of tenures.

7. (*1*) Where the rent of a tenure-holder is liable to enhancement, it may, subject to any contract between the parties, be enhanced up to the limit of the customary rate payable by persons holding similar tenures in the vicinity.

(*2*) Where no such customary rate exists, it may, subject as aforesaid, be enhanced up to such limit as the Court thinks fair and equitable.

Bengal Tenancy Act.

(*Chapter III.—Tenure-holders.—Secs. 8-15.*)

Enhancement of rent.

(3) In determining what is fair and equitable, the Court shall not leave to the tenure-holder as profit less than ten per centum of the balance which remains after deducting from the gross rents payable to him the expenses of collecting them, and shall have regard to—

(*a*) the circumstances under which the tenure was created, for instance, whether the land comprised in the tenure, or a great portion of it, was first brought under cultivation by the agency or at the expense of the tenure-holder or his predecessors in interest, whether any fine or premium was paid on the creation of the tenure, and whether the tenure was originally created at a specially low rent for the purpose of reclamation; and

(*b*) the improvements, if any, made by the tenure-holder or his predecessors in interest.

(4) If the tenure-holder himself occupies any portion of the land included in the area of his tenure, or has made a grant of any portion of the land either rent-free or at a beneficial rent, a fair and equitable rent shall be calculated for that portion and included in the gross rents aforesaid.

Power to order gradual enhancement.

8. The Court may, if it thinks that an immediate increase of rent would produce hardship, direct that the enhancement shall be gradual; that is to say, that the rent shall increase yearly by degrees, for any number of years not exceeding five, until the limit of the enhancement allowed has been reached.

Rent once enhanced may not be altered for fifteen years.

9. When the rent of a tenure-holder has been enhanced by the Court or by contract, it shall not be again enhanced by the Court during the fifteen years next following the date on which it has been so enhanced.

Other incidents of tenures.

Other incidents of tenures.

Permanent tenure-holder not liable to ejectment.

10. A holder of a permanent tenure shall not be ejected by his landlord except on the ground that he has broken a condition on breach of which he is, under the terms of a contract between him and his landlord, liable to be ejected:

Provided that where the contract is made after the commencement of this Act, the condition is consistent with the provisions of this Act.

Transfer and transmission of permanent tenure.

11. Every permanent tenure shall, subject to the provisions of this Act, be capable of being transferred and bequeathed in the same manner and to the same extent as other immoveable property.

Other incidents of tenures.

Voluntary transfer of permanent tenure.

12. (1) A transfer of a permanent tenure by sale, gift or mortgage (other than a transfer by sale in execution of a decree or by summary sale under any law relating to patní or other tenures) can be made only by a registered instrument.

(2) A registering officer shall not register any instrument purporting or operating to transfer by sale, gift or mortgage a permanent tenure unless there is paid to him, in addition to any fees payable under the Act for the time being in force for the registration of documents, a process-fee of the prescribed amount and a fee (hereinafter called "the landlord's fee") of the following amount, namely:—

(*a*) when rent is payable in respect of the tenure, a fee of two per centum on the annual rent of the tenure: provided that no such fee shall be less than one rupee or more than one hundred rupees; and

(*b*) when rent is not payable in respect of the tenure, a fee of two rupees.

(3) When the registration of any such instrument is complete, the registering officer shall send to the Collector the landlord's fee and a notice of the transfer and registration in the prescribed form, and the Collector shall cause the fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Transfer of permanent tenure by sale in execution of decree other than decree for rent.

13. (1) When a permanent tenure is sold in execution of a decree other than a decree for arrears of rent due in respect thereof, the Court shall, before confirming the sale under section 312 of the Code of Civil Procedure, require the purchaser to pay into Court the landlord's fee prescribed by the last foregoing section and such further fee for service of notice of the sale on the landlord as may be prescribed. XIV of 1882

(2) When the sale has been confirmed, the Court shall send to the Collector the landlord's fee and a notice of the sale in the prescribed form, and the Collector shall cause the fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Transfer of permanent tenure by sale in execution of decree for rent.

14. When a permanent tenure is transferred by sale in execution of a decree for arrears of rent due in respect thereof, the Court shall send to the Collector a notice of the sale in the prescribed form.

Succession to permanent tenure.

15. When a succession to a permanent tenure takes place, the person succeeding shall give notice of the succession to the Collector in the prescribed form, and shall pay to the Collector the prescribed fee for the service of the notice on the landlord and the landlord's fee

Other incidents of tenures.

prescribed by section 12, and the Collector shall cause the landlord's fee to be paid to, and the notice to be served on, the landlord in the prescribed manner.

Bar to recovery of rent pending notice of succession.

16. A person becoming entitled to a permanent tenure by succession shall not be entitled to recover by suit, distraint or other proceeding any rent payable to him as the holder of the tenure, until the Collector has received the notice and fees referred to in the last foregoing section.

Transfer of, and succession to, share in permanent tenure.

17. Subject to the provisions of section 88, the foregoing sections shall apply to the transfer of, or succession to, a share in a permanent tenure.

CHAPTER IV.

RAIYATS HOLDING AT FIXED RATES.

Incidents of holding at fixed rates.

18. A raiyat holding at a rent, or rate of rent, fixed in perpetuity—

(*a*) shall be subject to the same provisions with respect to the transfer of, and succession to, his holding as the holder of a permanent tenure, and

(*b*) shall not be ejected by his landlord except on the ground that he has broken a condition consistent with this Act, and on breach of which he is, under the terms of a contract between him and his landlord, liable to be ejected.

CHAPTER V.

OCCUPANCY-RAIYATS.

General.

General.

Continuance of existing occupancy-rights.

19. Every raiyat who immediately before the commencement of this Act has, by the operation of any enactment, by custom or otherwise, a right of occupancy in any land shall, when this Act comes into force, have a right of occupancy in that land.

Definition of "settled raiyat".

20. (*1*) Every person who for a period of twelve years, whether wholly or partly before or after the commencement of this Act, has continuously held as a raiyat land situate in any village, whether under a lease or otherwise, shall be deemed to have become, on the expiration of that period, a settled raiyat of that village.

(*2*) A person shall be deemed for the purposes of this section to have continuously held land in a village notwithstanding that the particular land held by him has been different at different times. *General.*

(*3*) A person shall be deemed, for the purposes of this section, to have held as a raiyat any land held as a raiyat by a person whose heir he is.

(*4*) Land held by two or more co-sharers as a raiyatí holding shall be deemed, for the purposes of this section, to have been held as a raiyat by each such co-sharer.

(*5*) A person shall continue to be a settled raiyat of a village as long as he holds any land as a raiyat in that village and for one year thereafter.

(*6*) If a raiyat recovers possession of land under section 87, he shall be deemed to have continued to be a settled raiyat notwithstanding his having been out of possession more than a year.

(*7*) If, in any proceeding under this Act, it is proved or admitted that a person holds any land as a raiyat, it shall, as between him and the landlord under whom he holds the land, be presumed for the purposes of this section, until the contrary is proved or admitted, that he has for twelve years continuously held that land or some part of it as a raiyat.

Settled raiyats to have occupancy-rights.

21. (*1*) Every person who is a settled raiyat of a village within the meaning of the last foregoing section shall have a right of occupancy in all land for the time being held by him as a raiyat in that village.

(*2*) Every person who, being a settled raiyat of a village within the meaning of the last foregoing section, held land as a raiyat in that village at any time between the second day of March, 1883, and the commencement of this Act, shall be deemed to have acquired a right of occupancy in that land under the law then in force; but nothing in this sub-section shall affect any decree or order passed by a Court before the commencement of this Act.

Effect of acquisition of occupancy-right by landlord.

22. (*1*) When the immediate landlord of an occupancy-holding is a proprietor or permanent tenure-holder, and the entire interests of the landlord and the raiyat in the holding become united in the same person by transfer, succession or otherwise, the occupancy-right shall cease to exist; but nothing in this sub-section shall prejudicially affect the rights of any third person.

(*2*) If the occupancy-right in land is transferred to a person jointly interested in the land as proprietor or permanent tenure-holder, it shall cease to exist; but nothing in this sub-section shall prejudicially affect the rights of any third person.

(*3*) A person holding land as an ijárádár or farmer of rents shall not, while so holding, acquire a right of occupancy in any land comprised in his ijárá or farm.

Bengal Tenancy Act.

(*Chapter V.—Occupancy-raiyats.—Secs. 23-30.*)

Explanation.—A person having a right of occupancy in land does not lose it by subsequently becoming jointly interested in the land as proprietor or permanent tenure-holder, or by subsequently holding the land in ijárá or farm.

Incidents of occupancy-right.

Rights of raiyat in respect of use of land.

23. When a raiyat has a right of occupancy in respect of any land, he may use the land in any manner which does not materially impair the value of the land or render it unfit for the purposes of the tenancy; but shall not be entitled to cut down trees in contravention of any local custom.

Obligation of raiyat to pay rent.

24. An occupancy-raiyat shall pay rent for his holding at fair and equitable rates.

Protection from eviction except on specified grounds.

25. An occupancy-raiyat shall not be ejected by his landlord from his holding, except in execution of a decree for ejectment passed on the ground—

(*a*) that he has used the land comprised in his holding in a manner which renders it unfit for the purposes of the tenancy, or

(*b*) that he has broken a condition consistent with the provisions of this Act, and on breach of which he is, under the terms of a contract between himself and his landlord, liable to be ejected.

Devolution of occupancy-right on death.

26. If a raiyat dies intestate in respect of a right of occupancy, it shall, subject to any custom to the contrary, descend in the same manner as other immoveable property: provided that, in any case in which under the law of inheritance to which the raiyat is subject his other property goes to the Crown, his right of occupancy shall be extinguished.

Enhancement of rent.

hancement rent.

Presumption as to fair and equitable rent.

27. The rent for the time being payable by an occupancy-raiyat shall be presumed to be fair and equitable until the contrary is proved.

Restriction on enhancement of money-rents.

28. Where an occupancy-raiyat pays his rent in money, his rent shall not be enhanced except as provided by this Act.

Enhancement of rent by contract.

29. The money-rent of an occupancy-raiyat may be enhanced by contract, subject to the following conditions:—

(*a*) the contract must be in writing and registered;

(*b*) the rent must not be enhanced so as to exceed by more than two annas in the rupee the rent previously payable by the raiyat;

(*c*) the rent fixed by the contract shall not be liable to enhancement during a term of fifteen years from the date of the contract; Enhance of rent.

Provided as follows—

(i) Nothing in clause (*a*) shall prevent a landlord from recovering rent at the rate at which it has been actually paid for a continuous period of not less than three years immediately preceding the period for which the rent is claimed.

(ii) Nothing in clause (*b*) shall apply to a contract by which a raiyat binds himself to pay an enhanced rent in consideration of an improvement which has been or is to be effected in respect of the holding by, or at the expense of, his landlord, and to the benefit of which the raiyat is not otherwise entitled; but an enhanced rent fixed by such a contract shall be payable only when the improvement has been effected, and, except when the raiyat is chargeable with default in respect of the improvement, only so long as the improvement exists and substantially produces its estimated effect in respect of the holding.

(iii) When a raiyat has held his land at a specially low rate of rent in consideration of cultivating a particular crop for the convenience of the landlord, nothing in clause (*b*) shall prevent the raiyat from agreeing, in consideration of his being released from the obligation of cultivating that crop, to pay such rent as he may deem fair and equitable.

Enhancement of rent by suit.

30. The landlord of a holding held at a money-rent by an occupancy-raiyat may, subject to the provisions of this Act, institute a suit to enhance the rent on one or more of the following grounds, (namely):—

(*a*) that the rate of rent paid by the raiyat is below the prevailing rate paid by occupancy-raiyats for land of a similar description and with similar advantages in the same village, and that there is no sufficient reason for his holding at so low a rate;

(*b*) that there has been a rise in the average local prices of staple food-crops during the currency of the present rent;

(*c*) that the productive powers of the land held by the raiyat have been increased by an improvement effected by, or at the expense of, the landlord during the currency of the present rent;

Bengal Tenancy Act.

(*Chapter V.—Occupancy-raiyats.—Secs. 31-36.*)

Enhancement of rent.

(*d*) that the productive powers of the land held by the raiyat have been increased by fluvial action.

Explanation.—"Fluvial action" includes a change in the course of a river rendering irrigation from the river practicable when it was not previously practicable.

Rules as to enhancement on ground of prevailing rate.

31. Where an enhancement is claimed on the ground that the rate of rent paid is below the prevailing rate—

(*a*) in determining what is the prevailing rate the Court shall have regard to the rates generally paid during a period of not less than three years before the institution of the suit, and shall not decree an enhancement unless there is a substantial difference between the rate paid by the raiyat and the prevailing rate found by the Court;

(*b*) if in the opinion of the Court the prevailing rate of rent cannot be satisfactorily ascertained without a local inquiry, the Court may direct that a local inquiry be held under Chapter XXV of the Code of Civil Procedure by such Revenue-officer as the Local Government may authorize in that behalf by rules made under section 392 of the said Code;

XIV of 1882.

(*c*) in determining under this section the rate of rent payable by a raiyat his caste shall not be taken into consideration, unless it is proved that by local custom caste is taken into account in determining the rate; and whenever it is found that by local custom any description of raiyats hold land at favourable rates of rent, the rate shall be determined in accordance with that custom;

(*d*) in ascertaining the prevailing rate of rent the amount of any enhancement authorized on account of a landlord's improvement shall not be taken into consideration.

Rules as to enhancement on ground of rise in prices.

32. Where an enhancement is claimed on the ground of a rise in prices—

(*a*) the Court shall compare the average prices during the decennial period immediately preceding the institution of the suit with the average prices during such other decennial period as it may appear equitable and practicable to take for comparison;

(*b*) the enhanced rent shall bear to the previous rent the same proportion as the average prices during the last decennial period bear to the average prices during the previous decennial period taken for purposes of comparison: provided that, in calculating this proportion, the average prices during the later period shall be reduced by one-third of their excess over the average prices during the earlier period;

(*c*) if in the opinion of the Court it is not practicable to take the decennial periods prescribed in clause (*a*), the Court may, in its discretion, substitute any shorter periods therefor.

Rules as to enhancement on ground of landlord's improvement.

33. (*1*) Where an enhancement is claimed on the ground of a landlord's improvement—

(*a*) the Court shall not grant an enhancement unless the improvement has been registered in accordance with this Act;

(*b*) in determining the amount of enhancement the Court shall have regard to—

(i) the increase in the productive powers of the land caused or likely to be caused by the improvement,

(ii) the cost of the improvement,

(iii) the cost of the cultivation required for utilizing the improvement, and

(iv) the existing rent and the ability of the land to bear a higher rent.

(*2*) A decree under this section shall, on the application of the tenant or his successor in interest, be subject to re-consideration in the event of the improvement not producing or ceasing to produce the estimated effect.

Rules as to enhancement on ground of increase in productive powers due to fluvial action.

34. Where an enhancement is claimed on the ground of an increase in productive powers due to fluvial action—

(*a*) the Court shall not take into account any increase which is merely temporary or casual;

(*b*) the Court may enhance the rent to such an amount as it may deem fair and equitable, but not so as to give the landlord more than one-half of the value of the net increase in the produce of the land.

Enhancement by suit to be fair and equitable.

35. Notwithstanding anything in the foregoing sections, the Court shall not in any case decree any enhancement which is under the circumstances of the case unfair or inequitable.

Power to order progressive enhancement.

36. If the Court passing a decree for enhancement considers that the immediate enforcement of the decree in its full extent will be attended with hardship to the raiyat, it may direct that the enhancement shall be gradual; that is to say, that the rent shall increase

ancement ent. yearly by degrees for any number of years not exceeding five until the limit of the enhancement decreed has been reached.

Limitation of right to bring successive enhancement-suits.

37. (*1*) A suit instituted for the enhancement of the rent of a holding on the ground that the rate of rent paid is below the prevailing rate, or on the ground of a rise in prices, shall not be entertained if within the fifteen years next preceding its institution the rent of the holding has been enhanced by a contract made after the second day of March, 1883, or if within the said period of fifteen years the rent has been commuted under section 40, or a decree has been passed under this Act or any enactment repealed by this Act enhancing the rent on either of the grounds aforesaid or on any ground corresponding thereto or dismissing the suit on the merits.

(*2*) Nothing in this section shall affect the provisions of section 373 of the Code of Civil Procedure.

of 1882.

Reduction of rent.

tion of

Reduction of rent.

38. (*1*) An occupancy-raiyat holding at a money-rent may institute a suit for the reduction of his rent on the following grounds, and, except as hereinafter provided in the case of a diminution of the area of the holding, not otherwise, (namely) :—

(*a*) on the ground that the soil of the holding has without the fault of the raiyat become permanently deteriorated by a deposit of sand or other specific cause, sudden or gradual, or

(*b*) on the ground that there has been a fall, not due to a temporary cause, in the average local prices of staple food-crops during the currency of the present rent.

(*2*) In any suit instituted under this section, the Court may direct such reduction of the rent as it thinks fair and equitable.

Price-lists.

Price-lists of staple food-crops.

39. (*1*) The Collector of every district shall prepare, monthly, or at shorter intervals, periodical lists of the market-prices of staple food-crops grown in such local areas as the Local Government may from time to time direct, and shall submit them to the Board of Revenue for approval or revision.

(*2*) The Collector may, if so directed by the Local Government, prepare for any local area like price-lists relating to such past times as the Local Government thinks fit, and shall submit the lists so prepared to the Board of Revenue for approval or revision.

(*3*) The Collector shall, one month before submitting a price-list to the Board of Revenue under this section, publish it in the prescribed manner within the local area to which it relates, and if any landlord or tenant of land within the local area, within the said period of one month, presents to him in writing any objection to the list, he shall submit the same to the Board of Revenue with the list. *Price-list*

(*4*) The price-lists shall, when approved or revised by the Board of Revenue, be published in the official Gazette; and any manifest error in any such list discovered after its publication may be corrected by the Collector with the sanction of the Board of Revenue.

(*5*) The Local Government shall cause to be compiled from the periodical lists prepared under this section lists of the average prices prevailing throughout each year, and shall cause them to be published annually in the official Gazette.

(*6*) In any proceedings under this chapter for an enhancement or reduction of rent on the ground of a rise or fall in prices, the Court shall refer to the lists published under this section, and shall presume that the prices shown in the lists prepared for any year subsequent to the passing of this Act are correct, unless and until it is proved that they are incorrect.

(*7*) The Local Government, subject to the control of the Governor General in Council, shall make rules for determining what are to be deemed staple food-crops in any local area and for the guidance of officers preparing price-lists under this section.

Commutation.

Commutation of rent payable in kind. *Commutati*

40. (*1*) Where an occupancy-raiyat pays for a holding rent in kind, or on the estimated value of a portion of the crop, or at rates varying with the crop, or partly in one of those ways and partly in another, either the raiyat or his landlord may apply to have the rent commuted to a money-rent.

(*2*) The application may be made to the Collector or Sub-divisional Officer, or to an officer making a settlement of rents under Chapter X, or to any other officer specially authorized in this behalf by the Local Government.

(*3*) On the receipt of the application the officer may determine the sum to be paid as money-rent, and may order that the raiyat shall, in lieu of paying his rent in kind, or otherwise as aforesaid, pay the sum so determined.

(*4*) In making the determination the officer shall have regard to—

(*a*) the average money-rent payable by occupancy-raiyats for land of a similar description and with similar advantages in the vicinity;

Commutation.

(*b*) the average value of the rent actually received by the landlord during the preceding ten years or during any shorter period for which evidence may be available; and

(*c*) the charges incurred by the landlord in respect of irrigation under the system of rent in kind, and the arrangements made on commutation for continuing those charges.

(*5*) The order shall be in writing, shall state the grounds on which it is made, and the time from which it is to take effect, and shall be subject to appeal in like manner as if it were an order made in an ordinary revenue proceeding.

(*6*) If the application is opposed, the officer shall consider whether under all the circumstances of the case it is reasonable to grant it, and shall grant or refuse it accordingly. If he refuses it, he shall record in writing the reasons for the refusal.

CHAPTER VI.

NON-OCCUPANCY-RAIYATS.

Application of chapter.

41. This chapter shall apply to raiyats not having a right of occupancy, who are in this Act referred to as non-occupancy-raiyats.

Initial rent of non-occupancy-raiyat.

42. When a non-occupancy-raiyat is admitted to the occupation of land, he shall become liable to pay such rent as may be agreed on between himself and his landlord at the time of his admission.

Conditions of enhancement of rent.

43. The rent of a non-occupancy-raiyat shall not be enhanced except by registered agreement or by agreement under section 46:

Provided that nothing in this section shall prevent a landlord from recovering rent at the rate at which it has been actually paid for a continuous period of not less than three years immediately preceding the period for which the rent is claimed.

Grounds on which non-occupancy-raiyat may be ejected.

44. A non-occupancy-raiyat shall, subject to the provisions of this Act, be liable to ejectment on one or more of the following grounds, and not otherwise (namely):—

(*a*) on the ground that he has failed to pay an arrear of rent;

(*b*) on the ground that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or that he has broken a condition consistent with this Act and on breach of which he is, under the terms of a contract between himself and his landlord, liable to be ejected;

(*c*) where he has been admitted to occupation of the land under a registered lease, on the ground that the term of the lease has expired;

(*d*) on the ground that he has refused to agree to pay a fair and equitable rent determined under section 46, or that the term for which he is entitled to hold at such a rent has expired.

Conditions of ejectment on ground of expiration of lease.

45. A suit for ejectment on the ground of the expiration of the term of a lease shall not be instituted against a non-occupancy-raiyat unless notice to quit has been served on the raiyat not less than six months before the expiration of the term, and shall not be instituted after six months from the expiration of the term.

Conditions of ejectment on ground of refusal to agree to enhancement.

46. (*1*) A suit for ejectment on the ground of refusal to agree to an enhancement of rent shall not be instituted against a non-occupancy-raiyat unless the landlord has tendered to the raiyat an agreement to pay the enhanced rent, and the raiyat has within three months before the institution of the suit refused to execute the agreement.

(*2*) A landlord desiring to tender an agreement to a raiyat under this section may file it in the office of such Court or officer as the Local Government appoints in this behalf for service on the raiyat. The Court or officer shall forthwith cause it to be served on the raiyat in the prescribed manner, and when it has been so served it shall for the purposes of this section be deemed to have been tendered.

(*3*) If a raiyat on whom an agreement has been served under sub-section (*2*) executes it, and within one month from the date of service files it in the office from which it issued, it shall take effect from the commencement of the agricultural year next following.

(*4*) When an agreement has been executed and filed by a raiyat under sub-section (*3*), the Court or officer in whose office it is so filed shall forthwith cause a notice of its being so executed and filed to be served on the landlord in the prescribed manner.

(*5*) If the raiyat does not execute the agreement and file it under sub-section (*3*), he shall be deemed for the purposes of this section to have refused to execute it.

(*6*) If a raiyat refuses to execute an agreement tendered to him under this section, and the landlord thereupon institutes a suit to eject him, the Court shall determine what rent is fair and equitable for the holding.

(*7*) If the raiyat agrees to pay the rent so determined, he shall be entitled to remain in occupation of his holding at that rent for a term of five years from the date of the agreement, but on the expiration of that term shall be liable to ejectment under the conditions mentioned in the last foregoing section, unless he has acquired a right of occupancy.

(8) If the raiyat does not agree to pay the rent so determined, the Court shall pass a decree for ejectment.

(9) In determining what rent is fair and equitable, the Court shall have regard to the rents generally paid by raiyats for land of a similar description and with like advantages in the same village.

(10) A decree for ejectment passed under this section shall take effect from the end of the agricultural year in which it is passed.

Explanation of "admitted to occupation."

47. Where a raiyat has been in occupation of land and a lease is executed with a view to a continuance of his occupation, he is not to be deemed to be admitted to occupation by that lease for the purposes of this chapter, notwithstanding that the lease may purport to admit him to occupation.

CHAPTER VII.

UNDER-RAIYATS.

Limit of rent recoverable from under-raiyats.

48. The landlord of an under-raiyat holding at a money-rent shall not be entitled to recover rent exceeding the rent which he himself pays by more than the following percentage of the same, (namely):—

(a) when the rent payable by the under-raiyat is payable under a registered lease or agreement—fifty per cent.; and

(b) in any other case—twenty-five per cent.

Restriction on ejectment of under-raiyats.

49. An under-raiyat shall not be liable to be ejected by his landlord, except—

(a) on the expiration of the term of a written lease;

(b) when holding otherwise than under a written lease, at the end of the agricultural year next following the year in which a notice to quit is served upon him by his landlord.

CHAPTER VIII.

GENERAL PROVISIONS AS TO RENT.

Rules and presumptions as to amount of rent.

Rules and presumptions as to fixity of rent.

50. (1) Where a tenure-holder or raiyat and his predecessors in interest have held at a rent or rate of rent which has not been changed from the time of the Permanent Settlement, the rent or rate of rent shall not be liable to be increased except on the ground of an alteration in the area of the tenure or holding.

Rules as to presumption as to amount of rent.

(2) If it is proved in any suit or other proceeding under this Act that either a tenure-holder or raiyat and his predecessors in interest have held at a rent or rate of rent which has not been changed during the twenty years immediately before the institution of the suit or proceeding, it shall be presumed, until the contrary is shown, that they have held at that rent or rate of rent from the time of the Permanent Settlement:

Provided that if it is required by or under any enactment that in any local area tenancies, or any classes of tenancies, at fixed rents or rates of rent shall be registered as such on, or before, a date specified by or under the enactment, the foregoing presumption shall not after that date apply to any tenancy or, as the case may be, to any tenancy of that class in that local area unless the tenancy has been so registered.

(3) The operation of this section, so far as it relates to land held by a raiyat, shall not be affected by the fact of the land having been separated from other land which formed with it a single holding, or amalgamated with other land into one holding.

(4) Nothing in this section shall apply to a tenure held for a term of years or determinable at the will of the landlord.

Presumption as to amount of rent and conditions of holding.

51. If a question arises as to the amount of a tenant's rent or the conditions under which he holds in any agricultural year, he shall be presumed, until the contrary is shown, to hold at the same rent and under the same conditions as in the last preceding agricultural year.

Alteration of rent on alteration of area.

Alteration of rent in respect of alteration in area.

52. (1) Every tenant shall—

Alteration of rent on alteration of a

(a) be liable to pay additional rent for all land proved by measurement to be in excess of the area for which rent has been previously paid by him, unless it is proved that the excess is due to the addition to the tenure or holding of land which having previously belonged to the tenure or holding was lost by diluvion or otherwise without any reduction of the rent being made, and

(b) be entitled to a reduction of rent in respect of any deficiency proved by measurement to exist in the area of his tenure or holding as compared with the area for which rent has been previously paid by him, unless it is proved that the deficiency is due to the loss of land which was added to the area of the tenure or holding by alluvion or otherwise, and that an addition has not been made to the rent in respect of the addition to the area.

(2) In determining the area for which rent has been previously paid, the Court shall, if so required by any party to the suit, have regard to—

(a) the origin and conditions of the tenancy, for instance, whether the rent was a consolidated rent for the entire tenure or holding;

(b) whether the tenant has been allowed to hold additional land in consideration of an addition to his total rent or otherwise with the knowledge and consent of the landlord;

(c) the length of time during which the tenancy has lasted without dispute as to rent or area; and

(d) the length of the measure used or in local use at the time of the origin of the tenancy as compared with that used or in local use at the time of the institution of the suit.

(3) In determining the amount to be added to the rent, the Court shall have regard to the rates payable by tenants of the same class for lands of a similar description and with similar advantages in the vicinity, and, in the case of a tenure-holder, to the profits to which he is entitled in respect of the rent of his tenure, and shall not in any case fix any rent which under the circumstances of the case is unfair or inequitable.

(4) The amount abated from the rent shall bear the same proportion to the rent previously payable as the diminution of the total yearly value of the tenure or holding bears to the previous total yearly value thereof, or, in default of satisfactory proof of the yearly value of the land lost, shall bear to the rent previously payable the same proportion as the diminution of area bears to the previous area of the tenure or holding.

Payment of rent.

53. Subject to agreement or established usage, a money-rent payable by a tenant shall be paid in four equal instalments falling due on the last day of each quarter of the agricultural year.

Instalments of rent.

54. (1) Every tenant shall pay each instalment of rent before sunset of the day on which it falls due.

Time and place for payment of rent.

(2) The payment shall, except in cases where a tenant is allowed under this Act to deposit his rent, be made at the landlord's village-office, or at such other convenient place as may be appointed in that behalf by the landlord:

Provided that the Local Government may from time to time make rules, either generally or for any specified local area, authorizing a tenant to pay his rent by postal money-order.

(3) Any instalment or part of an instalment of rent not duly paid at or before the time when it falls due shall be deemed an arrear.

Payment of rent.

55. (1) When a tenant makes a payment on account of rent, he may declare the year or the year and instalment to which he wishes the payment to be credited, and the payment shall be credited accordingly.

Appropriation of payments.

(2) If he does not make any such declaration, the payment may be credited to the account of such year and instalment as the landlord thinks fit.

Receipts and accounts.

56. (1) Every tenant who makes a payment on account of rent to his landlord shall be entitled to obtain forthwith from the landlord a written receipt for the amount paid by him, signed by the landlord.

Receipts & accounts.

Tenant making payment to his landlord entitled to a receipt.

(2) The landlord shall prepare and retain a counterfoil of the receipt.

(3) The receipt and counterfoil shall specify such of the several particulars shown in the form of receipt given in Schedule II to this Act as can be specified by the landlord at the time of payment:

Provided that the Local Government may, from time to time, prescribe or sanction a modified form either generally or for any particular local area or class of cases.

(4) If a receipt does not contain substantially the particulars required by this section, it shall be presumed, until the contrary is shown, to be an acquittance in full of all demands for rent up to the date on which the receipt was given.

57. (1) Where a landlord admits that all rent payable by a tenant to the end of the agricultural year has been paid, the tenant shall be entitled to receive from the landlord, free of charge, within three months after the end of the year, a receipt in full discharge of all rent falling due to the end of the year, signed by the landlord.

Tenant entitled to full discharge or statement of account at close of year.

(2) Where the landlord does not so admit, the tenant shall be entitled, on paying a fee of four annas, to receive within three months after the end of the year a statement of account specifying the several particulars shown in the form of account given in Schedule II to this Act, or in such other form as may from time to time be prescribed by the Local Government either generally or for any particular local area or class of cases.

(3) The landlord shall prepare and retain a copy of the statement containing similar particulars.

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 58—63.*)

Penalties and fine for withholding receipts and statements of account and failing to keep counterparts.

58. (*1*) If a landlord without reasonable cause refuses or neglects to deliver to a tenant a receipt containing the particulars prescribed by section 56 for any rent paid by the tenant, the tenant may, within three months from the date of payment, institute a suit to recover from him such penalty, not exceeding double the amount or value of that rent, as the Court thinks fit.

(*2*) If a landlord without reasonable cause refuses or neglects to deliver to a tenant demanding the same either the receipt in full discharge or, if the tenant is not entitled to such a receipt, the statement of account for any year prescribed in section 57, the tenant may, within the next ensuing agricultural year, institute a suit to recover from him such penalty as the Court thinks fit, not exceeding double the aggregate amount or value of all rent paid by the tenant to the landlord during the year for which the receipt or account should have been delivered.

(*3*) If a landlord without reasonable cause fails to prepare and retain a counterfoil or copy of a receipt or statement as required by either of the said sections, he shall be punished with fine which may extend to fifty rupees.

Local Government to prepare forms of receipt and account.

59. (*1*) The Local Government shall cause to be prepared and kept for sale to landlords at all sub-divisional offices forms of receipts with counterfoils and of statements of account suitable for use under the foregoing sections.

(*2*) The forms may be sold in books with the leaves consecutively numbered or otherwise as the Local Government thinks fit.

Effect of receipt by registered proprietor, manager or mortgagee.

60. Where rent is due to the proprietor, manager or mortgagee of an estate, the receipt of the person registered under the Land Registration Act, 1876, as proprietor, manager or mortgagee of that estate, or of his agent authorized in that behalf, shall be a sufficient discharge for the rent; and the person liable for the rent shall not be entitled to plead in defence to a claim by the person so registered that the rent is due to any third person.

But nothing in this section shall affect any remedy which any such third person may have against the registered proprietor, manager or mortgagee.

Deposit of rent.

Application to deposit rent in Court.

61. (*1*) In any of the following cases, namely :—

(*a*) when a tenant tenders money on account of rent and the landlord refuses to receive it or refuses to grant a receipt for it;

(*b*) when a tenant bound to pay money on account of rent has reason to believe, owing to a tender having been refused or a receipt withheld on a previous occasion, that the person to whom his rent is payable will not be willing to receive it and to grant him a receipt for it; *Deposit of rent.*

(*c*) when the rent is payable to co-sharers jointly, and the tenant is unable to obtain the joint receipt of the co-sharers for the money, and no person has been empowered to receive the rent on their behalf; or

(*d*) when the tenant entertains a *bonâ fide* doubt as to who is entitled to receive the rent,

the tenant may present to the Court having jurisdiction to entertain a suit for the rent of his tenure or holding an application in writing for permission to deposit in the Court the full amount of the money then due.

(*2*) The application shall contain a statement of the grounds on which it is made; shall state—

in cases (*a*) and (*b*), the name of the person to whose credit the deposit is to be entered,

in case (*c*), the names of the sharers to whom the rent is due, or of so many of them as the tenant may be able to specify, and

in case (*d*), the names of the person to whom the rent was last paid and of the person or persons now claiming it;

shall be signed and verified, in the manner prescribed in section 52 of the Code of Civil Procedure, by the tenant, or, where he is not personally cognizant of the facts of the case, by some person so cognizant; and shall be accompanied by a fee of such amount as the Local Government, from time to time, by rule, directs. XIV of 1882.

Receipt granted by Court for rent deposited to be a valid acquittance.

62. (*1*) If it appears to the Court to which an application is made under the last foregoing section that the applicant is entitled under that section to deposit the rent, it shall receive the rent and give a receipt for it under the seal of the Court.

(*2*) A receipt given under this section shall operate as an acquittance for the amount of the rent payable by the tenant and deposited as aforesaid, in the same manner and to the same extent as if that amount of rent had been received—

in cases (*a*) and (*b*) of the last foregoing section, by the person specified in the application as the person to whose credit the deposit was to be entered;

in case (*c*) of that section, by the co-sharers to whom the rent is due; and

in case (*d*) of that section, by the person entitled to the rent.

Notification of receipt of deposit.

63. (*1*) The Court receiving the deposit shall forthwith cause to be affixed in a conspicuous place at the Court-house a notification of the receipt thereof, containing a statement of all material particulars.

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 64-69.*)

nit of

(*2*) If the amount of the deposit is not paid away under the next following section, within the period of fifteen days next following the date on which the notification is so affixed, the Court shall forthwith—

in cases (*a*) and (*b*) of section 61, cause a notice of the receipt of the deposit to be served, free of charge, on the person specified in the application as the person to whose credit the deposit was to be entered;

in case (*c*) of that section, cause a notice of the receipt of the deposit to be posted at the landlord's village-office or in some conspicuous place in the village in which the holding is situate; and

in case (*d*) of that section, cause a like notice to be served, free of charge, on every person who it has reason to believe claims or is entitled to the deposit.

Payment or refund of deposit.

64. (*1*) The Court may pay the amount of the deposit to any person appearing to it to be entitled to the same, or may, if it thinks fit, retain the amount pending the decision of a Civil Court as to the person so entitled.

(*2*) The payment may, if the Local Government so direct, be made by postal money-order.

(*3*) If no payment is made under this section before the expiration of three years from the date on which a deposit is made, the amount deposited may, in the absence of any order of a Civil Court to the contrary, be repaid to the depositor upon his application and on his returning the receipt given by the Court with which the rent was deposited.

(*4*) No suit or other proceeding shall be instituted against the Secretary of State for India in Council, or against any officer of the Government, in respect of anything done by a Court receiving a deposit under the foregoing sections; but nothing in this section shall prevent any person entitled to receive the amount of any such deposit from recovering the same from a person to whom it has been paid under this section.

Arrears of rent.

ears of

Liability to sale for arrears in case of permanent tenure, holding at fixed rates or occupancy-holding.

65. Where a tenant is a permanent tenure-holder, a raiyat holding at fixed rates or an occupancy-raiyat, he shall not be liable to ejectment for arrears of rent, but his tenure or holding shall be liable to sale in execution of a decree for the rent thereof, and the rent shall be a first charge thereon.

Ejectment for arrears in other cases.

66. (*1*) When an arrear of rent remains due from a tenant not being a permanent tenure-holder, a raiyat holding at fixed rates or an occupancy-raiyat, at the end of the Bengali year where that year prevails, or at the end of the month of Jeyt where the Fasli or Amli year prevails, the landlord may, whether he has obtained a decree for the recovery of the arrear or not, and whether he is entitled by the terms of any contract to eject the tenant for arrears or not, institute a suit to eject the tenant. *Arrears of rent.*

(*2*) In a suit for ejectment for an arrear of rent a decree passed in favour of the plaintiff shall specify the amount of the arrear and of the interest (if any) due thereon, and the decree shall not be executed if that amount and the costs of the suit are paid into Court within fifteen days from the date of the decree, or, when the Court is closed on the fifteenth day, on the day upon which the Court reopens.

(*3*) The Court may for special reasons extend the period of fifteen days mentioned in this section.

Interest on arrears.

67. An arrear of rent shall bear simple interest at the rate of twelve per centum per annum from the expiration of that quarter of the agricultural year in which the instalment falls due to the institution of the suit.

Power to award damages on rent withheld without reasonable cause, or to defendant improperly sued for rent.

68. (*1*) If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the defendant has, without reasonable or probable cause, neglected or refused to pay the amount of rent due by him, the Court may award to the plaintiff, in addition to the amount decreed for rent and costs, such damages, not exceeding twenty-five per centum on the amount of rent decreed, as it thinks fit:

Provided that interest shall not be decreed when damages are awarded under this section.

(*2*) If, in any suit brought for the recovery of arrears of rent, it appears to the Court that the plaintiff has instituted the suit without reasonable or probable cause, the Court may award to the defendant, by way of damages, such sum, not exceeding twenty-five per centum on the whole amount claimed by the plaintiff, as it thinks fit.

Produce-rents.

Order for appraising or dividing produce.

69. (*1*) Where rent is taken by appraisement or division of the produce,— *Produce-rents.*

(*a*) if either the landlord or the tenant neglects to attend, either personally or by agent, at the proper time for making the appraisement or division, or

(*b*) if there is a dispute about the quantity, value or division of the produce,

Bengal Tenancy Act.

(*Chapter VIII.—General Provisions as to Rent.—Secs. 70-75.*)

the Collector may, on the application of either party, and on his depositing such sum on account of expenses as the Collector may require, make an order appointing such officer as he thinks fit to appraise or divide the produce.

(*2*) The Collector may, without such an application, make the like order in any case where in the opinion of the District or Sub-divisional Magistrate the making of the order would be likely to prevent a breach of the peace.

(*3*) Where a Collector makes an order under this section, he may, by order, prohibit the removal of the produce until the appraisement or division has been effected.

Procedure where officer appointed.

70. (*1*) When a Collector appoints an officer under the last foregoing section, the Collector may, in his discretion, direct the officer to associate with himself any other persons as assessors, and may give him instructions regarding the number, qualifications and mode of selection of those assessors (if any), and the procedure to be followed in making the appraisement or division; and the officer shall conform to the instructions so given.

(*2*) The officer shall, before making an appraisement or division, give notice to the landlord and tenant of the time and place at which the appraisement or division will be made; but if either the landlord or the tenant fails to attend either personally or by agent, he may proceed *ex parte*.

(*3*) When the officer has made the appraisement or division, he shall submit a report of his proceedings to the Collector.

(*4*) The Collector shall consider the report, and, after giving the parties an opportunity of being heard and making such enquiry (if any) as he may think necessary, shall pass such order thereon as he thinks just.

(*5*) The Collector may, if he thinks fit, refer any question in dispute between the parties for the decision of a Civil Court, but, subject as aforesaid, his order shall be final and shall, on application to a Civil Court by the landlord or the tenant, be enforceable as a decree.

(*6*) Where the officer makes an appraisement, the appraisement papers shall be filed in the Collector's office.

Rights and liabilities as to possession of crop.

71. (*1*) Where rent is taken by appraisement of the produce, the tenant shall be entitled to the exclusive possession of the produce.

(*2*) Where rent is taken by division of the produce, the tenant shall be entitled to the exclusive possession of the whole produce until it is divided, but shall not be entitled to remove any portion of the produce from the threshing-floor at such a time or in such a manner as to prevent the due division thereof at the proper time. *Produce-rents.*

(*3*) In either case the tenant shall be entitled to cut and harvest the produce in due course of husbandry without any interference on the part of the landlord.

(*4*) If the tenant removes any portion of the produce at such a time or in such a manner as to prevent the due appraisement or division thereof at the proper time, the produce shall be deemed to have been as full as the fullest crop of the same description appraised in the neighbourhood on similar land for that harvest.

Liability for rent on change of landlord or after transfer of tenure or holding.

Tenant not liable to transferee of landlord's interest for rent paid to former landlord, without notice of the transfer.

72. (*1*) A tenant shall not, when his landlord's interest is transferred, be liable to the transferee for rent which became due after the transfer and was paid to the landlord whose interest was so transferred, unless the transferee has before the payment given notice of the transfer to the tenant. *Liability for rent on change of landlord or after transfer of tenure or holding.*

(*2*) Where there is more than one tenant paying rent to the landlord whose interest is transferred, a general notice from the transferee to the tenants published in the prescribed manner shall be a sufficient notice for the purposes of this section.

Liability for rent after transfer of occupancy-holding.

73. When an occupancy-raiyat transfers his holding without the consent of the landlord, the transferor and transferee shall be jointly and severally liable to the landlord for arrears of rent accruing due after the transfer, unless and until notice of the transfer is given to the landlord in the prescribed manner.

Illegal Cesses, &c.

Abwáb, &c., illegal.

74. All impositions upon tenants under the denomination of *abwáb*, *mahtut*, or other like appellations, in addition to the actual rent, shall be illegal, and all stipulations and reservations for the payment of such shall be void. *Illegal cesses, &c.*

Penalty for exaction by landlord from tenant of sum in excess of the rent payable.

75. Every tenant from whom, except under any special enactment for the time being in force, any sum of money or any portion of the produce of his land is exacted by his landlord in excess of the rent lawfully payable, may, within six months from the date of the exaction, institute a suit to recover from the landlord, in addition to the amount or value of what is so exacted, such sum by way of penalty as the Court thinks fit, not exceeding

two hundred rupees; or, when double the amount or value of what is so exacted exceeds two hundred rupees, not exceeding double that amount or value.

CHAPTER IX.

MISCELLANEOUS PROVISIONS AS TO LANDLORDS AND TENANTS.

Improvements.

vements. **76.** (*1*) For the purposes of this Act, the term "improvement," used with reference to a raiyat's holding, shall mean any work which adds to the value of the holding, which is suitable to the holding and consistent with the purpose for which it was let, and which, if not executed on the holding, is either executed directly for its benefit, or is, after execution, made directly beneficial to it.

Definition of "improvement."

(*2*) Until the contrary is shown, the following shall be presumed to be improvements within the meaning of this section:—

(*a*) the construction of wells, tanks, water-channels and other works for the storage, supply or distribution of water for the purposes of agriculture, or for the use of men and cattle employed in agriculture;

(*b*) the preparation of land for irrigation;

(*c*) the drainage, reclamation from rivers or other waters, or protection from floods, or from erosion or other damage by water, of land used for agricultural purposes, or waste-land which is culturable;

(*d*) the reclamation, clearance, enclosure or permanent improvement of land for agricultural purposes;

(*e*) the renewal or re-construction of any of the foregoing works, or alterations therein, or additions thereto; and

(*f*) the erection of a suitable dwelling-house for the raiyat and his family, together with all necessary out-offices.

(*3*) But no work executed by the raiyat of a holding shall be deemed to be an improvement for the purposes of this Act if it substantially diminishes the value of his landlord's property.

77. (*1*) Where a raiyat holds at fixed rates or has an occupancy-right in his holding, neither the raiyat nor his landlord shall, as such, be entitled to prevent the other from making an improvement in respect of the holding, except on the ground that he is willing to make it himself.

Right to make improvements in case of holding at fixed rates and occupancy-holding.

(*2*) If both the raiyat and his landlord wish to make the same improvement, the raiyat shall have the prior right to make it, unless it affects another holding or other holdings under the same landlord.

Im

Collector to decide question as to right to make improvement, &c.

78. If a question arises between the raiyat and his landlord—

(*a*) as to the right to make an improvement, or

(*b*) as to whether a particular work is an improvement,

the Collector may, on the application of either party, decide the question, and his decision shall be final.

79. (*1*) A non-occupancy-raiyat shall be entitled to construct, maintain and repair a well for the irrigation of his holding, with all works incidental thereto, and to erect a suitable dwelling-house for himself and his family, with all necessary out-offices; but shall not, except as aforesaid and as next hereinafter provided, be entitled to make any other improvement in respect of his holding without his landlord's permission.

Right to make improvements in case of non-occupancy-holding.

(*2*) A non-occupancy-raiyat who would, but for the want of his landlord's permission, be entitled to make an improvement in respect of his holding, may, if he desires that the improvement be made, deliver, or cause to be delivered, to his landlord a request in writing calling upon him to make the improvement within a reasonable time; and, if the landlord is unable or neglects to comply with that request, may make the improvement himself.

80. (*1*) A landlord may, by application to such Revenue-officer as the Local Government may appoint, register any improvement which he has lawfully made or which has been lawfully made at his expense or which he has assisted a tenant in making.

Registration of landlords' improvements.

(*2*) The application shall be in such form, shall contain such information, and shall be verified in such manner, by local inquiry or otherwise, as the Local Government from time to time by rule directs.

(*3*) The officer receiving the application may reject it if it has not been made within twelve months—

(*a*) in the case of improvements made before the commencement of this Act—from the commencement of this Act;

(*b*) in the case of improvements made after the commencement of this Act—from the date of the completion of the work.

Bengal Tenancy Act.

(*Chapter IX.—Miscellaneous Provisions as to Landlords and Tenants.—Secs. 81—86.*)

81. (*1*) If any landlord or tenant of a holding desires that evidence relating to any improvement made in respect thereof be recorded, he may apply to a Revenue-officer, who shall thereupon, at a time and place of which notice shall be given to the parties, record the evidence, unless he considers that there are no reasonable grounds for making the application, or it is made to appear that the subject-matter thereof is under inquiry in a Civil Court.

Application to record evidence as to improvement.

(*2*) When any matter has been recorded under this section, the record thereof shall be admissible in evidence in any subsequent proceedings between the landlord and tenant or any persons claiming under them.

82. (*1*) Every raiyat who is ejected from his holding shall be entitled to compensation for improvements which have been made in respect thereof in accordance with this Act by him, or by his predecessor in interest, and for which compensation has not already been paid.

Compensation for raiyats' improvements.

(*2*) Whenever a Court makes a decree or order for the ejectment of a raiyat, it shall determine the amount of compensation (if any) due under this section to the raiyat for improvements, and shall make the decree or order of ejectment conditional on the payment of that amount to the raiyat.

(*3*) No compensation under this section for an improvement shall be claimable where the raiyat has made the improvement in pursuance of a contract or under a lease binding him, in consideration of some substantial advantage to be obtained by him, to make the improvement without compensation, and he has obtained that advantage.

(*4*) Improvements made by a raiyat between the 2nd day of March, 1883, and the commencement of this Act shall be deemed to have been made in accordance with this Act.

(*5*) The Local Government may, from time to time, by notification in the official Gazette, make rules requiring the Court to associate with itself, for the purpose of estimating the compensation to be awarded under this section for an improvement, such number of assessors as the Local Government thinks fit, and determining the qualifications of those assessors and the mode of selecting them.

83. (*1*) In estimating the compensation to be awarded under the last foregoing section for an improvement, regard shall be had—

Principle on which compensation is to be estimated.

(*a*) to the amount by which the value, or the produce, of the holding, or the value of that produce, is increased by the improvement;

(*b*) to the condition of the improvement, and the probable duration of its effects

(*c*) to the labour and capital required for the making of such an improvement; *Improvements.*

(*d*) to any reduction or remission of rent or any other advantage given by the landlord to the raiyat in consideration of the improvement; and

(*e*) in the case of a reclamation or of the conversion of unirrigated into irrigated land, to the length of time during which the raiyat has had the benefit of the improvement at an unenhanced rent.

(*2*) When the amount of the compensation has been assessed, the Court may, if the landlord and raiyat agree, direct that, instead of being paid wholly in money, it shall be made wholly or partly in some other way.

Acquisition of land for building and other purposes.

84. A Civil Court may, on the application of the landlord of a holding, and on being satisfied that he is desirous of acquiring the holding or part thereof for some reasonable and sufficient purpose having relation to the good of the holding or of the estate in which it is comprised, including the use of the ground as building ground, or for any religious, educational or charitable purpose, *Acquisition of land for building and other purposes.*

Acquisition of land for building and other purposes.

and on being satisfied on the certificate of the Collector that the purpose is reasonable and sufficient,

authorise the acquisition thereof by the landlord upon such conditions as the Court may think fit, and require the tenant to sell his interest in the whole or such part of the holding to the landlord upon such terms as may be approved by the Court, including full compensation to the tenant.

Sub-letting.

85. (*1*) If a raiyat sub-lets otherwise than by a registered instrument, the sub-lease shall not be valid against his landlord unless made with the landlord's consent. *Sub-letting.*

Restrictions on sub-letting.

(*2*) A sub-lease by a raiyat shall not be admitted to registration if it purports to create a term exceeding nine years.

(*3*) Where a raiyat has, without the consent of his landlord, granted a sub-lease by an instrument registered before the commencement of this Act, the sub-lease shall not be valid for more than nine years from the commencement of this Act.

Surrender and abandonment.

86. (*1*) A raiyat not bound by a lease or other agreement for a fixed period may, at the end of any agricultural year, surrender his holding. *Surrender and abandonment.*

Surrender.

nder bandon-

(*2*) But, notwithstanding the surrender, the raiyat shall be liable to indemnify the landlord against any loss of the rent of the holding for the agricultural year next following the date of the surrender, unless he gives to his landlord, at least three months before he surrenders, notice of his intention to surrender.

(*3*) When a raiyat has surrendered his holding, the Court shall in the following cases for the purposes of sub-section (*2*) presume, until the contrary is shown, that such notice was so given, namely :—

(*a*) if the raiyat takes a new holding in the same village from the same landlord during the agricultural year next following the surrender ;

(*b*) if the raiyat ceases, at least three months before the end of the agricultural year at the end of which the surrender is made, to reside in the village in which the surrendered holding is situate.

(*4*) The raiyat may, if he thinks fit, cause the notice to be served through the Civil Court within the jurisdiction of which the holding or any portion of it is situate.

(*5*) When a raiyat has surrendered his holding, the landlord may enter on the holding and either let it to another tenant or take it into cultivation himself.

(*6*) When a holding is subject to an incumbrance secured by a registered instrument, the surrender of the holding shall not be valid unless it is made with the consent of the landlord and the incumbrancer.

(*7*) Save as provided in the last foregoing sub-section, nothing in this section shall affect any arrangement by which a raiyat and his landlord may arrange for a surrender of the whole or a part of the holding.

Abandonment.

87. (*1*) If a raiyat voluntarily abandons his residence without notice to his landlord and without arranging for payment of his rent as it falls due, and ceases to cultivate his holding either by himself or by some other person, the landlord may, at any time after the expiration of the agricultural year in which the raiyat so abandons and ceases to cultivate, enter on the holding and let it to another tenant or take it into cultivation himself.

(*2*) Before a landlord enters under this section, he shall file a notice in the prescribed form in the Collector's office stating that he has treated the holding as abandoned and is about to enter on it accordingly ; and the Collector shall cause the notice to be published in such manner as the Local Government, by rule, directs.

(*3*) When a landlord enters under this section, the raiyat shall be entitled to institute a suit for recovery of possession of the land at any time not later than the expiration of two years, or, in the case of a non-occupancy-raiyat, six months, from the date of the publication of the notice ; and thereupon the Court may, on being satisfied that the raiyat did not voluntarily abandon his holding, order recovery of possession on such terms, if any, with respect to compensation to persons injured and payment of arrears of rent as to the Court may seem just.

Surre and a ment.

(*4*) Where the whole or part of a holding has been sub-let by a registered instrument, the landlord shall, before entering under this section on the holding, offer the whole holding to the sub-lessee for the remainder of the term of the sub-lease at the rent paid by the raiyat who has ceased to cultivate the holding, and on condition of the sub-lessee paying up all arrears due from that raiyat. If the sub-lessee refuses or neglects within a reasonable time to accept the offer, the landlord may avoid the sub-lease and may enter on the holding and let it to another tenant or cultivate it himself as provided in sub-sections (*1*) and (*2*).

Sub-division of tenancy.

Division of tenancy not binding on landlord without his consent.

88. A division of a tenure or holding, or distribution of the rent payable in respect thereof, shall not be binding on the landlord unless it is made with his consent in writing.

Sub-i of te

Ejectment.

No ejectment except in execution of decree.

89. No tenant shall be ejected from his tenure or holding except in execution of a decree.

Ejec

Measurements.

Landlord's right to measure land.

90. (*1*) Subject to the provisions of this section and any contract, a landlord may, by himself, or by any person authorized by him in this behalf, enter on and measure all land comprised in his estate or tenure, other than land exempt from the payment of revenue.

Mea ment

(*2*) A landlord shall not, without the consent of the tenant, or the written permission of the Collector, be entitled to measure land more than once in ten years, except in the following cases (namely) :—

(*a*) where the area of the tenure or holding is liable, by reason of alluvion or diluvion, to vary from year to year, and the rent payable depends on the area ;

(*b*) where the area under cultivation is liable to vary from year to year and the rent payable depends on the area under cultivation ;

(*c*) where the landlord is a purchaser otherwise than by voluntary transfer and not more than two years have elapsed since the date of his entry under the purchase.

Bengal Tenancy Act.

(*Chapter IX.—Miscellaneous Provisions as to Landlords and Tenants.—Secs. 91-98.*)

nts. (3) The ten years shall be computed from the date of the last measurement, whether made before or after the commencement of this Act.

Power for Court to order tenant to attend and point out boundaries.

91. (1) Where a landlord desires to measure any land which he is entitled to measure under the last foregoing section, the Civil Court may, on the application of the landlord, make an order requiring the tenant to attend and point out the boundaries of the land.

(2) If the tenant refuses or neglects to comply with the order, a map or other record of the boundaries and measurements of the land, prepared under the direction of the landlord at the time when the tenant was directed to attend, shall be presumed to be correct until the contrary is shown.

Standard of measurement.

92. (1) Every measurement of land made by order of a Civil Court, or of a Revenue-officer, in any suit or proceeding between a landlord and tenant, shall be made by the acre, unless the Court or Revenue-officer directs that it be made by any other specified standard.

(2) If the rights of the parties are regulated by any local measure other than the acre, the acre shall be converted into the local measure for the purposes of the suit or proceeding.

(3) The Local Government may, after local enquiry, make rules declaring for any local area the standard or standards of measurement locally in use in that area, and every declaration so made shall be presumed to be correct until the contrary is shown.

Managers.

Power to call upon co-owners to show cause why they should not appoint a common manager.

93. When any dispute exists between co-owners of an estate or tenure as to the management thereof, and in consequence there has ensued, or is likely to ensue,

(*a*) inconvenience to the public, or

(*b*) injury to private rights,

the District Judge may, on the application in case (*a*) of the Collector, and in case (*b*) of any one having an interest in the estate or tenure, direct a notice to be served on all the co-owners, calling on them to show cause why they should not appoint a common manager:

Provided that a co-owner of an estate or tenure shall not be entitled to apply under this section unless he is actually in possession of the interest he claims, and, if he is a co-owner of an estate, unless of his name and the extent of his interest are registered under the Land Registration Act, 1876.

Power to order them to appoint a manager if cause is not shown.

94. If the co-owners fail to show cause as aforesaid within one month after service of a notice under the last foregoing section, the District Judge may make an order directing them to appoint a common manager, and a copy of the order shall be served on any co-owner who did not appear before it was made. *Managers.*

Power to appoint manager if order is not obeyed.

95. If the co-owners do not, within such period, not being less than one month after the making of an order under the last foregoing section, as the District Judge may fix in this behalf, or, where the order has been served as directed by that section, within a like period after such service, appoint a common manager and report the appointment for the information of the District Judge, the District Judge may, unless it is shown to his satisfaction that there is a prospect of a satisfactory arrangement being made within a reasonable time,—

(*a*) direct that the estate or tenure be managed by the Court of Wards in any case in which the Court of Wards consents to undertake the management thereof; or

(*b*) in any case appoint a manager.

Power to nominate person to act in all cases under clause (*b*) of last section.

96. The Local Government may nominate a person for any local area to manage all estates and tenures within that local area for which it may be necessary to appoint a manager under clause (*b*) of the last foregoing section; and, when any person has been so nominated, no other person shall be appointed manager under that clause by the District Judge, unless in the case of any estate the Judge thinks fit to appoint one of the co-owners themselves as manager.

The Court of Wards Act, 1879, applicable to management by Court of Wards.

97. In any case in which the Court of Wards undertakes under section 95 the management of an estate or tenure, so much of the provisions of the Court of Wards Act, 1879, as relates to the management of immoveable property shall apply to the management. IX (B.C) of 1879.

Provisions applicable to manager.

98. (1) A manager appointed under section 95 may, if the District Judge thinks fit, be remunerated by a fixed salary or percentage of the money collected by him as manager, or partly in one way and partly in the other, as the District Judge from time to time directs.

(2) He shall give such security for the proper discharge of his duties as the District Judge directs.

(3) He shall, subject to the control of the District Judge, have, for the purposes of management, the same powers as the co-owners jointly might but for his appointment have exercised, and the co-owners shall not exercise any such power

(4) He shall deal with and distribute the profits in accordance with the orders of the District Judge.

(5) He shall keep regular accounts, and allow the co-owners or any of them to inspect and take copies of those accounts.

(6) He shall pass his accounts at such period and in such form as the District Judge may direct.

(7) He may make any application which the proprietors could make under section 103.

(8) He shall be removable by the order of the District Judge, and not otherwise.

Power to restore management to co-owners.

99. When an estate or tenure has been placed under the management of the Court of Wards, or a manager has been appointed for the same under section 95, the District Judge may at any time direct that the management of it be restored to the co-owners, if he is satisfied that the management will be conducted by them without inconvenience to the public or injury to private rights.

Power to make rules.

100. The High Court may, from time to time, make rules defining the powers and duties of managers under the foregoing sections.

CHAPTER X.

RECORD-OF-RIGHTS AND SETTLEMENT OF RENTS.

Power to order survey and preparation of record-of-rights.

101. (1) The Local Government may, in any case with the previous sanction of the Governor General in Council, and may, if it thinks fit, without such sanction in any of the cases next hereinafter mentioned, make an order directing that a survey be made, and a record-of-rights be prepared, in respect of the lands in a local area by a Revenue-officer.

(2) The cases in which an order may be made under this section without the previous sanction of the Governor General in Council are the following (namely):—

(a) where the landlord or a large proportion of the landlords or of the tenants applies for such an order and deposits, or gives security for, such amount, for the payment of expenses, as the Local Government directs;

(b) where the preparation of such a record is calculated to settle or avert a serious dispute existing or likely to arise between the tenants and their landlords generally;

(c) where the local area is comprised in an estate or tenure which belongs to or is managed by the Government or the Court of Wards; and

(d) where a settlement of revenue is being made in respect of the local area.

(3) A notification in the official Gazette of an order under this section shall be conclusive evidence that the order has been duly made.

Particulars to be recorded.

102. Where an order is made under the last foregoing section, the particulars to be recorded shall be specified in the order, and may include, either without or in addition to other particulars, some or all of the following, namely:—

(a) the name of each tenant;

(b) the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy-raiyat, non-occupancy-raiyat or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure;

(c) the situation, quantity and boundaries of the land held by him;

(d) the name of his landlord;

(e) the rent payable;

(f) the mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise;

(g) if the rent is a gradually increasing rent, the time at which, and the steps by which, it increases;

(h) the special conditions and incidents, if any, of the tenancy.

Power for Revenue-officer to record particulars on application of proprietor or tenure-holder.

103. On the application of a proprietor or tenure-holder, and on his depositing or giving security for the required amount for expenses, a Revenue-officer may, subject to and in accordance with rules made in this behalf by the Local Government, ascertain and record the particulars specified in the last foregoing section with respect to the estate or tenure or any part thereof.

Procedure as to recording or settling rents.

104. (1) When, in any proceeding under this chapter, it does not appear that the tenant is holding land in excess of or less than that for which he is paying rent, and neither the landlord nor the tenant applies for a settlement of rent, the officer shall record the rent payable by the tenant, and the land in respect of which the rent is payable.

(2) When it appears that a tenant is holding land in excess of, or less than, that for which he is

Bengal Tenancy Act.

(*Chapter X.—Record-of-rights and Settlement of Rents.—Secs. 105-112.*)

paying rent, or either the landlord or the tenant applies for a settlement of rent, or in any case under section 101, sub-section (*2*), clause (*d*), the officer shall settle a fair and equitable rent in respect of the land held by the tenant.

(*3*) In settling rents under this section, the officer shall presume, until the contrary is proved, that the existing rent is fair and equitable, and shall have regard to the rules laid down in this Act for the guidance of the Civil Court in increasing or reducing rents, as the case may be.

Publication of record.

105. (*1*) When the Revenue-officer has completed a record made under this chapter, he shall cause a draft thereof to be locally published in the prescribed manner and for the prescribed period, and shall receive and consider any objection which may be made to any entry therein during the period of publication.

(*2*) After the expiration of this period the Revenue-officer shall finally frame the record, and shall cause it to be locally published in the prescribed manner, and the publication shall be conclusive evidence that the record has been duly made under this chapter.

Procedure in case of dispute as to entries in record.

106. If at any time before the final publication of the record under the last foregoing section a dispute arises as to the correctness of any entry (not being an entry of a rent settled under this chapter), or as to the propriety of any omission, which the Revenue-officer proposes to make or has made therein or therefrom, the Revenue-officer shall hear and decide the dispute.

Procedure to be adopted by Revenue-officer.

107. In all proceedings for the settlement of rents under this chapter, and in all proceedings under the last foregoing section, the Revenue-officer shall, subject to rules made by the Local Government under this Act, adopt the procedure laid down in the Code of Civil Procedure for the trial of suits, and his decision in every such proceeding shall have the force of a decree.

Appeals from decisions of Revenue-officers.

108. (*1*) The Local Government shall appoint one or more persons to be a Special Judge or Special Judges for the purpose of hearing appeals from the decisions of Revenue-officers under this chapter.

(*2*) An appeal shall lie to the Special Judge from the decision of a Revenue-officer under this chapter, and the provisions of the Code of Civil Procedure relating to appeals shall, as nearly as may be, apply to all such appeals.

(*3*) Subject to the provisions of Chapter XLII of the Code of Civil Procedure, an appeal shall lie to the High Court from the decision of a Special Judge in any case under section 106 as if he were a Court subordinate to the High Court within the meaning of the first section of that chapter:

Provided that, if in a second appeal the High Court alters the decision of the Special Judge in respect of any of the particulars with reference to which the rent of any tenure or holding has been settled, the Court may settle a new rent for the tenure or holding, but in so doing shall be guided by the rents of the other tenures or holdings of the same class comprised in the same record as ascertained or settled under section 104.

Undisputed entries in record to be presumptive evidence.

109. (*1*) Every record made under this chapter shall distinguish between the disputed and the undisputed entries therein.

(*2*) Every undisputed entry in the record shall be presumed to be correct until the contrary is proved.

Time at which settlement of rent is to take effect.

110. When any rent is settled under this chapter, the settlement shall take effect from the beginning of the agricultural year next after the final publication of the record.

Stay of proceedings in Civil Court during preparation of record.

111. When an order has been made under section 101,—

(*a*) a Civil Court shall not, until the final publication of the record, entertain a suit or application for the alteration of the rent or the determination of the status of any tenant in the area to which the order applies; and

(*b*) the High Court may, if it thinks fit, transfer to the Revenue-officer any proceedings pending in a Civil Court for the alteration of any such rent or for the determination of any of the matters specified or referred to in section 102.

Power to authorize a special settlement in special cases.

112. (*1*) The Local Government, with the previous sanction of the Governor General in Council, may, on being satisfied that the exercise of the powers hereinafter mentioned is necessary in the interests of public order or of the local welfare, invest a Revenue-officer acting under this chapter with the following powers or either of them, namely:—

(*a*) power to settle all rents;

(*b*) power, when settling rents, to reduce rents if in the opinion of the officer the maintenance of existing rents would on any ground, whether specified in this Act or not, be unfair or inequitable.

(*2*) The powers given under this section may be made exercisable within a specified area either generally or with reference to specified cases or classes of cases.

(*3*) When the Local Government takes any action under this section, the settlement-record prepared by the Revenue-officer shall not take effect until it has been finally confirmed by the Governor General in Council.

Bengal Tenancy Act.

(*Chaper XI.—Record of Proprietors' Private Lands.—Secs. 113—120.*)
(*Chapter XII.—Distraint.—Sec. 121.*)

Period for which rents as settled are to remain unaltered.

113. When the rent of a tenure or holding is settled under this chapter, it shall not, except on the ground of a landlord's improvement or of a subsequent alteration in the area of the tenure or holding, be enhanced, in the case of a tenure or an occupancy-holding for fifteen years, and, in the case of a non-occupancy-holding, if the rent is settled in any case under section 112 or on the application of the landlord under section 104, for five years. The periods of fifteen and five years shall be counted from the date of the final publication of the record.

Expenses of proceedings under chapter.

114. Where an order is made under this chapter in any case except under section 101, sub-section (*2*), clause (*d*), the expenses incurred by the Government in carrying out the provisions of this chapter in any local area, or such part of those expenses as the Local Government may direct, shall be defrayed by the landlords and tenants of land in that local area, in such proportions as the Local Government, having regard to all the circumstances of each case, may determine; and the proportion of those expenses so to be defrayed by any person shall be recoverable by the Government from him as if it were an arrear of revenue due by him.

Presumption as to fixity of rent not to apply, where record has been prepared.

115. When the particulars mentioned in section 102, clause (*b*), have been recorded under this chapter in respect of any tenancy, the presumption under section 50 shall not thereafter apply to that tenancy.

CHAPTER XI.

RECORD OF PROPRIETORS' PRIVATE LANDS.

Saving as to khámár land.

116. Nothing in Chapter V shall confer a right of occupancy in, and nothing in Chapter VI shall apply to, a proprietor's private lands known in Bengal as khámár, nij or nij-jot, and in Behar as zirát, nij, sír or kamat, where any such land is held under a lease for a term of years or under a lease from year to year.

Power for Government to order survey and record of proprietor's private lands.

117. The Local Government may, from time to time, make an order directing a Revenue-officer to make a survey and record of all the lands in a specified local area which are a proprietor's private lands within the meaning of the last foregoing section.

Power for Revenue-officer to record private land on application of proprietor or tenant.

118. In the case of any land alleged to be a proprietor's private land, on the application of the proprietor or of any tenant of the land, and on his depositing the required amount for expenses, a Revenue-officer may, subject to and in accordance with rules made in this behalf by the Local Government, ascertain and record whether the land is or is not a proprietor's private land.

Procedure for recording private land.

119. When a Revenue-officer proceeds under either of the two last foregoing sections, the provisions of sections 105 to 109, both inclusive, shall apply.

Rules for determination of proprietor's private land.

120. (*1*) The Revenue-officer shall record as a proprietor's private land—

(*a*) land which is proved to have been cultivated as khámár, zirát, sír, nij, nij-jot or kamat by the proprietor himself with his own stock or by his own servants or by hired labour for twelve continuous years immediately before the passing of this Act, and

(*b*) cultivated land which is recognized by village usage as proprietor's khámár, zirát, sír, nij, nij-jot or kamat.

(*2*) In determining whether any other land ought to be recorded as a proprietor's private land, the officer shall have regard to local custom, and to the question whether the land was before the second day of March, 1883, specifically let as proprietor's private land, and to any other evidence that may be produced; but shall presume that land is not a proprietor's private land until the contrary is shown.

(*3*) If any question arises in a Civil Court as to whether land is or is not a proprietor's private land, the Court shall have regard to the rules laid down in this section for the guidance of Revenue-officers.

CHAPTER XII.

DISTRAINT.

Cases in which an application for distraint may be made.

121. Where an arrear of rent is due to the landlord of a raiyat or under-raiyat, and has not been due for more than a year, and no security has been accepted therefor by the landlord, the landlord may, in addition to any other remedy to which he is entitled by law, present an application to the Civil Court requesting the Court to recover the arrear by distraining, while in the possession of the cultivator,—

(*a*) any crops or other products of the earth standing or ungathered on the holding;

(*b*) any crops or other products of the earth which have been grown on the holding and have been reaped or gathered and are deposited on the holding, or on a threshing-floor or place for treading out grain, or the like, whether in the fields or within a homestead:

Bengal Tenancy Act.

(*Chapter XII.—Distraint.—Secs. 122-126.*)

Provided that an application shall not be made under this section—

(*1*) by a proprietor or manager as defined under the Land Registration Act, 1876, or a mortgagee of such a proprietor or manager, unless his name and the extent of his interest in the land in respect of which the arrear is due have been registered under the provisions of that Act; or

(*2*) for the recovery of any sum in excess of the rent payable for the holding in the preceding agricultural year, unless that sum is payable under a written contract or in consequence of a proceeding under this Act or an enactment hereby repealed; or

(*3*) in respect of the produce of any part of the holding which the tenant has sub-let with the written consent of the landlord.

Form of application.

122. (*1*) Every application under the last foregoing section shall specify—

(*a*) the holding in respect of which the arrear is claimed, and the boundaries thereof, or such other particulars as may suffice for its identification;

(*b*) the name of the tenant;

(*c*) the period in respect of which the arrear is claimed;

(*d*) the amount of the arrear, with the interest, if any, claimed thereon, and, when an amount in excess of the rent payable by the tenant in the last preceding agricultural year is claimed, the contract, or proceeding, as the case may be, under which that amount is payable;

(*e*) the nature and approximate value of the produce to be distrained;

(*f*) the place where it is to be found, or such other particulars as may suffice for its identification; and

(*g*) if it is standing or ungathered, the time at which it is likely to be cut or gathered.

(*2*) The application shall be signed and verified in the manner prescribed by the Code of Civil Procedure for the signing and verification of plaints.

Procedure on receipt of application.

123. (*1*) The applicant shall, at the time of filing an application under the foregoing sections, file in Court such documentary evidence (if any) as he may consider necessary for the purposes of the application.

(*2*) The Court may, if it thinks fit, examine the applicant, and shall, with as little delay as possible, admit the application or reject it, or permit the applicant to furnish additional evidence in support of it.

(*3*) Where a Court cannot forthwith admit or reject an application under sub-section (*2*), it may, if it thinks fit, make an order prohibiting the removal of the produce specified in the application pending the execution of an order for distraining the same or the rejection of the application.

(*4*) When an order for distraining any produce is made under this section at a considerable time before the produce is likely to be cut or gathered, the Court may suspend the execution of the order for such time as it thinks fit, and may, if it thinks fit, make a further order prohibiting the removal of the produce pending the execution of the order for distraint.

Execution of order for distraint.

124. If an application is admitted under the last foregoing section, the Court shall depute an officer to distrain the produce specified therein, or such portion of that produce as it thinks fit; and the officer shall proceed to the place where the produce is, and distrain the produce by taking charge of it himself or placing some other person in charge of it in his behalf, and publishing a notification of the distraint in accordance with rules to that effect to be made by the High Court:

Provided that produce which from its nature does not admit of being stored shall not be distrained under this section at any time less than twenty days before the time when it would be fit for reaping or gathering.

Service of demand and account.

125. (*1*) The distraining officer shall, at the time of making the distraint, serve on the defaulter a written demand for the arrear due, and the costs incurred in making the distraint, with an account exhibiting the grounds on which the distraint is made.

(*2*) Where the distraining officer has reason to believe that a person other than the defaulter is the owner of the property distrained, he shall serve copies of the demand and account on that person likewise.

(*3*) The demand and account shall, if practicable, be served personally; but if a person on whom they are to be served absconds or conceals himself, or cannot otherwise be found, the officer shall affix copies of the demand and account on a conspicuous part of the outside of the house in which he usually resides.

Right to reap, &c., produce.

126. (*1*) A distraint under this chapter shall not prevent any person from reaping, gathering or storing any produce, or doing any other act necessary for its due preservation.

(*2*) If the person entitled to do so fails to do so at the proper time, the distraining officer shall cause any standing crops or ungathered products

distrained to be reaped or gathered when ripe, and stored in such granaries or other places as are commonly used for the purpose, or in some other convenient place in the neighbourhood, or shall do whatever else may be necessary for the due preservation of the same.

(*3*) In either case the distrained property shall remain in the charge of the distraining officer, or of some other person appointed by him in this behalf.

Sale proclamation to be issued unless demand is satisfied.

127. (*1*) Unless the demand, with all costs of the distraint, be immediately satisfied, the distraining officer shall issue a proclamation specifying the particulars of the property distrained and the demand for which it is distrained, and notifying that he will, at a place and on a day specified, not being less than three or more than seven days after the time of making the distraint, sell the distrained property by public auction:

Provided that when the crops or products distrained from their nature admit of being stored but have not yet been stored, the day of the sale shall be so fixed as to admit of their being made ready for storing before its arrival.

(*2*) The proclamation shall be stuck up on a conspicuous place in the village in which the land is situate for which the arrears of rent are claimed.

Place of sale.

128. The sale shall be held at the place where the distrained property is, or at the nearest place of public resort if the distraining officer is of opinion that it is likely to sell there to better advantage.

When produce may be sold standing.

129. (*1*) Crops or products which from their nature admit of being stored shall not be sold before they are reaped or gathered and are ready for storing.

(*2*) Crops or products which from their nature do not admit of being stored may be sold before they are reaped or gathered, and the purchaser shall be entitled to enter on the land by himself, or by any person appointed by him in this behalf, and do all that is necessary for the purpose of tending and reaping or gathering them.

Manner of sale.

130. The property shall be sold by public auction, in one or more lots as the officer holding the sale may think advisable; and if the demand, with the costs of distraint and sale, is satisfied by the sale of a portion of the property, the distraint shall be immediately withdrawn with respect to the remainder.

Postponement of sale.

131. If, on the property being put up for sale, a fair price (in the estimation of the officer holding the sale) is not offered for it, and if the owner of the property, or a person authorised to act in his behalf, applies to have the sale postponed till the next day, or (if a market is held at the place of sale) the next market-day, the sale shall be postponed until that day, and shall be then completed, whatever price may be offered for the property.

Payment of purchase-money.

132. The price of every lot shall be paid at the time of sale, or as soon thereafter as the officer holding the sale directs, and in default of such payment the property shall be put up again and sold.

Certificate to be given to purchaser.

133. When the purchase-money has been paid in full, the officer holding the sale shall give the purchaser a certificate describing the property purchased by him and the price paid.

Proceeds of sale how to be applied.

134. (*1*) From the proceeds of every sale of distrained property under this chapter, the officer holding the sale shall pay the costs of the distraint and sale, calculated on a scale of charges prescribed by rules to be made, from time to time, by the Local Government in this behalf.

(*2*) The remainder shall be applied to the discharge of the arrear for which the distress was made, with interest thereon up to the day of sale; and the surplus (if any) shall be paid to the person whose property has been sold.

Certain persons may not purchase.

135. Officers holding sales of property under this Act, and all persons employed by, or subordinate to, such officers, are prohibited from purchasing, either directly or indirectly, any property sold by such officers.

Procedure where demand is paid before the sale.

136. (*1*) If at any time after a distraint has been made under this chapter, and before the sale of the distrained property, the defaulter, or the owner of the distrained property where he is not the defaulter, deposits in the Court issuing the order of distraint, or in the hands of the distraining officer, the amount specified in the demand served under section 125, with all costs which may have been incurred after the service of the demand, the Court or officer, as the case may be, shall grant a receipt for the same and the distraint shall forthwith be withdrawn.

(*2*) When the distraining officer receives the deposit, he shall forthwith pay it into the Court.

(*3*) A receipt granted under this section to an owner of distrained property not being the defaulter shall afford a full protection to him against any subsequent claim for the arrears of rent on account of which the distraint was made.

(*4*) After the expiration of one month from the date of a deposit being made under this section,

Bengal Tenancy Act.

(Chapter XII.—Distraint.—Secs. 137-142.)

(Chapter XIV.—Judicial Procedure.—Secs. 143-144.)

e Court shall pay therefrom to the applicant for straint the amount due to him, unless in the eanwhile the owner of the property distrained has stituted a suit against the applicant contesting e legality of the distraint and claiming compention in respect of the same.

(5) A landlord shall not be deemed to have nsented to his tenant's sub-letting the holding or y part thereof merely by reason of his having ceived an amount deposited under this section an inferior tenant.

mount paid by under-ant for his lessor may deducted from rent.

137. (1) When an inferior tenant, on his property being lawfully distrained under this chapter for the default of a superior tenant, makes any payment der the last foregoing section, he shall be entitled deduct the amount of that payment from any rent yable by him to his immediate landlord, and at landlord, if he is not the defaulter, shall in like nner be entitled to deduct the amount so deducted from any rent payable by him to his immediate ndlord, and so on until the defaulter is reached.

(2) Nothing in this section shall affect the right an inferior tenant making a payment under the t foregoing section to institute a suit for the overy from the defaulter of any portion of the ount paid which he has not deducted under this tion.

onflict between rights superior and inferior ilords.

138. When land is sub-let, and any conflict arises under this chapter between the rights of a superior and of an inferior landlord who train the same property, the right of the super-r landlord shall prevail.

Distraint of property ich is under attach-nt.

139. When any conflict arises between an order for distraint issued under this chapter and an order issued by a Civil Court for attachment or sale of the property which is the ject of the distraint, the order for distraint ll prevail; but, if the property is sold under t order, the surplus proceeds of the sale shall be paid under section 134 to the owner of the perty without the sanction of the Court by ich the order of attachment or sale was issued.

uit for compensa-n for wrongful dis-nt.

140. No appeal shall lie from any order passed by a Civil Court under this chapter; but any person whose property is distrained an application made under section 121 in any e in which such an application is not permitted that section may institute a suit against the plicant for the recovery of compensation.

Power for Local Gov-ment to authorise dis-at in certain cases.

141. (1) When the Local Government is of opinion that in any local area or in any class of cases it would, by reason of the character of cultivation or the habits of the cultivators, be impracticable for a landlord to realize his rent by an application under this chapter, to the Civil Court, it may, from time to time, by order, authorize the landlord to distrain, by himself or his agent, any produce for the distraint of which he would be entitled to apply under this chapter to the Civil Court:

Provided that every person distraining any produce under such authorization shall proceed in the manner prescribed by section 124, and shall forthwith give notice, in such form as the High Court may, by rule, prescribe, to the Civil Court having jurisdiction to entertain an application for distraining the produce, and that Court shall, with no avoidable delay, depute an officer to take charge of the produce distrained.

(2) When an officer of the Court has taken charge of any distrained produce under this section, the proceedings shall thereafter be conducted in all respects as if he had distrained it under section 124.

(3) The Local Government may at any time rescind any order made by it under this section.

Power for High Court to make rules.

142. The High Court may, from time to time, make rules consistent with this Act for regulating the procedure in all cases under this chapter.

CHAPTER XIII.

JUDICIAL PROCEDURE.

Power to modify Civil Procedure Code in its application to landlord and tenant suits.

143. (1) The High Court may, from time to time, with the approval of the Governor General in Council, make rules consistent with this Act declaring that any portions of the Code of Civil Procedure shall not apply to suits between landlord and tenant as such or to any specified classes of such suits, or shall apply to them subject to modifications specified in the rules.

(2) Subject to any rules so made, and subject also to the other provisions of this Act, the Code of Civil Procedure shall apply to all such suits. XIV of 1882.

Jurisdiction in proceedings under Act.

144. (1) The cause of action in all suits between landlord and tenant as such shall, for the purposes of the Code of Civil Procedure, be deemed to have arisen XIV of 1882. within the local limits of the jurisdiction of the Civil Court which would have jurisdiction to entertain a suit for the possession of the tenure or holding in connection with which the suit is brought.

(2) When under this Act a Civil Court is authorized to make an order on the application of a landlord or a tenant, the application shall be made to the Court which would have jurisdiction to entertain a suit for the possession of the tenure or holding in connection with which the application is brought.

Bengal Tenancy Act.

(*Chapter XIII.—Judicial Procedure.—Secs. 145-151.*)

145. Every náib or gumáshta of a landlord empowered in this behalf by a written authority under the hand of the landlord shall, for the purposes of every such suit or application, be deemed to be the recognized agent of the landlord within the meaning of the Code of Civil Procedure, notwithstanding that the landlord may reside within the local limits of the jurisdiction of the Court in which the suit is to be instituted or is pending, or in which the application is made.

Náibs or gumáshtas to be recognized agents.

IV of 1882.

146. The particulars referred to in section 58 of the Code of Civil Procedure shall, in the case of such suits, instead of being entered in the register of civil suits prescribed by that section, be entered in a special register to be kept by each Civil Court, in such form as the Local Government may, from time to time, prescribe in this behalf.

IV of 1882.

Special register of suits.

147. Subject to the provisions of section 373 of the Code of Civil Procedure, where a landlord has instituted a suit against a raiyat for the recovery of any rent of his holding, the landlord shall not institute another suit against him for the recovery of any rent of that holding until after three months from the date of the institution of the previous suit.

IV of 1882.

Successive rent-suits.

148. The following rules shall apply to suits for the recovery of rent:—

Procedure in rent-suits.

(*a*) sections 121 to 127 (both inclusive), 129, 305, and 320 to 326 (both inclusive) of the Code of Civil Procedure shall not apply to any such suit:

V of 1882.

(*b*) the plaint shall contain, in addition to the particulars specified in section 50 of the Code of Civil Procedure, a statement of the situation, designation, extent and boundaries of the land held by the tenant; or, where the plaintiff is unable to give the extent or boundaries, in lieu thereof a description sufficient for identification:

V of 1882.

(*c*) the summons shall be for the final disposal of the suit, unless the Court is of opinion that the summons should be for the settlement of issues only:

(*d*) the service of the summons may, if the High Court by rule, either generally, or specially for any local area, so directs, be effected, either in addition to, or in substitution for, any other mode of service, by forwarding the summons by post in a letter addressed to the defendant and registered under Part III of the Indian Post Office Act, 1866; when a summons is so forwarded in a letter, and it is proved that the letter was duly posted and registered, the Court may presume that the summons has been duly served:

IV of 1866

(*e*) a written statement shall not be filed without the leave of the Court:

(*f*) the rules for recording the evidence of witnesses prescribed by section 189 of the Code of Civil Procedure shall apply, whether an appeal is allowed or not:

(*g*) the Court may, when passing the decree, order on the oral application of the decree-holder the execution thereof, unless it is a decree for ejectment for arrears:

(*h*) notwithstanding anything contained in section 232 of the Code of Civil Procedure, an application for the execution of a decree for arrears obtained by a landlord shall not be made by an assignee of the decree unless the landlord's interest in the land has become and is vested in him.

149. (*1*) When a defendant admits that money is due from him on account of rent, but pleads that it is due not to the plaintiff but to a third person, the Court shall, except for special reasons to be recorded in writing, refuse to take cognizance of the plea unless the defendant pays into Court the amount so admitted to be due.

Payment into Court of money admitted to be due to third person.

(*2*) Where such a payment is made, the Court shall forthwith cause notice of the payment to be served on the third person.

(*3*) Unless the third person within three months from the receipt of the notice institutes a suit against the plaintiff and therein obtains an order restraining payment out of the money, it shall be paid out to the plaintiff on his application.

(*4*) Nothing in this section shall affect the right of any person to recover from the plaintiff money paid to him under sub-section (*3*).

150. When a defendant admits that money is due from him to the plaintiff on account of rent, but pleads that the amount claimed is in excess of the amount due, the Court shall, except for special reasons to be recorded in writing, refuse to take cognizance of the plea unless the defendant pays into Court the amount so admitted to be due.

Payment into Court of money admitted to be due to landlord.

151. When a defendant is liable to pay money into Court under either of the two last foregoing sections, if the Court thinks that there are sufficient reasons for so ordering, it may take cognizance of the defendant's plea on his paying into Court such reasonable portion of the money as the Court directs.

Provision as to payment of portion of money.

Bengal Tenancy Act.

(Chapter XIII.—Judicial Procedure.—Secs. 152-156.)

Court to grant receipt.

152. When a defendant pays money into Court under either of the said sections, the Court shall give the defendant a receipt, and the receipt so given shall operate as an acquittance in the same manner and to the same extent as if it had been given by the plaintiff or the third person as the case may be.

Appeals in rent-suits.

153. An appeal shall not lie from any decree or order passed, whether in the first instance or on appeal, in any suit instituted by a landlord for the recovery of rent where—

(*a*) the decree or order is passed by a District Judge, Additional Judge or Subordinate Judge, and the amount claimed in the suit does not exceed one hundred rupees, or

(*b*) the decree or order is passed by any other judicial officer specially empowered by the Local Government to exercise final jurisdiction under this section, and the amount claimed in the suit does not exceed fifty rupees;

unless in either case the decree or order has decided a question relating to title to land or to some interest in land as between parties having conflicting claims thereto, or a question of a right to enhance or vary the rent of a tenant, or a question of the amount of rent annually payable by a tenant:

Provided that the District Judge may call for the record of any case in which a judicial officer as aforesaid has passed a decree or order to which this section applies, if it appears that the judicial officer has exercised a jurisdiction not vested in him by law, or has failed to exercise a jurisdiction so vested, or has acted in the exercise of his jurisdiction illegally or with material irregularity; and may pass such order as the District Judge thinks fit.

Date from which decree for enhancement takes effect.

154. A decree for enhancement of rent under this Act, if passed in a suit instituted in the first eight months of an agricultural year, shall ordinarily take effect on the commencement of the agricultural year next following; and, if passed in a suit instituted in the last four months of the agricultural year, shall ordinarily take effect on the commencement of the agricultural year next but one following; but nothing in this section shall prevent the Court from fixing, for special reasons, a later date from which any such decree shall take effect.

Relief against forfeitures.

155. (*1*) A suit for the ejectment of a tenant, on the ground—

(*a*) that he has used the land in a manner which renders it unfit for the purposes of the tenancy, or

(*b*) that he has broken a condition on breach of which he is, under the terms of a contract between him and the landlord, liable to ejectment,

shall not be entertained unless the landlord has served, in the prescribed manner, a notice on the tenant specifying the particular misuse or breach complained of, and, where the misuse or breach is capable of remedy, requiring the tenant to remedy the same, and, in any case, to pay reasonable compensation for the misuse or breach, and the tenant has failed to comply within a reasonable time with that request.

(*2*) A decree passed in favour of a landlord in any such suit shall declare the amount of compensation which would reasonably be payable to the plaintiff for the misuse or breach, and whether, in the opinion of the Court, the misuse or breach is capable of remedy, and shall fix a period during which it shall be open to the defendant to pay that amount to the plaintiff, and, where the misuse or breach is declared to be capable of remedy, to remedy the same.

(*3*) The Court may, from time to time, for special reasons, extend a period fixed by it under sub-section (*2*).

(*4*) If the defendant, within the period or extended period (as the case may be) fixed by the Court under this section, pays the compensation mentioned in the decree, and, where the misuse or breach is declared by the Court to be capable of remedy, remedies the misuse or breach to the satisfaction of the Court, the decree shall not be executed.

Rights of ejected raiyats in respect of crops and land prepared for sowing.

156. The following rules shall apply in the case of every raiyat ejected from a holding:—

(*a*) when the raiyat has, before the date of his ejectment, sown or planted crops in any land comprised in the holding, he shall be entitled, at the option of the landlord, either to retain possession of that land and to use it for the purpose of tending and gathering in the crops, or to receive from the landlord the value of the crops as estimated by the Court executing the decree for ejectment;

(*b*) when the raiyat has, before the date of his ejectment, prepared for sowing any land comprised in his holding, but has not sown or planted crops in that land, he shall be entitled to receive from the landlord the value of the labour and capital expended by him in so preparing the land, as estimated by the Court executing the decree for ejectment, together with reasonable interest on that value;

(*c*) but a raiyat shall not be entitled to retain possession of any land or receive any sum in respect thereof under this section where, after the commencement of pro-

ceedings by the landlord for his ejectment, he has cultivated or prepared the land contrary to local usage;

(*d*) if the landlord elects under this section to allow a raiyat to retain possession of the land, the raiyat shall pay to the landlord, for the use and occupation of the land during the period for which he is allowed to retain possession of the same, such rent as the Court executing the decree for ejectment may deem reasonable.

Power for Court to fix fair rent as alternative to ejectment.

157. When a plaintiff institutes a suit for the ejectment of a trespasser he may, if he thinks fit, claim as alternative relief that the defendant be declared liable to pay for the land in his possession a fair and equitable rent to be determined by the Court, and the Court may grant such relief accordingly.

Application to determine incidents of tenancy.

158. (*1*) The Court having jurisdiction to determine a suit for the possession of land may, on the application of either the landlord or the tenant of the land, determine all or any of the following matters, (namely) :—

(*a*) the situation, quantity and boundaries of the land;

(*b*) the name and description of the tenant thereof (if any) ;

(*c*) the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy-raiyat, non-occupancy-raiyat, or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not and whether his rent is liable to enhancement during the continuance of his tenure; and

(*d*) the rent payable by him at the time of the application.

(*2*) If, in the opinion of the Court, any of these matters cannot be satisfactorily determined without a local inquiry, the Court may direct that a local inquiry be held under Chapter XXV of the Code of Civil Procedure by such Revenue-officer as the Local Government may authorize in that behalf by rule made under section 392 of the said Code.

(*3*) The order on any application under this section shall have the effect of, and be subject to the like appeal as, a decree.

CHAPTER XIV.

SALE FOR ARREARS UNDER DECREE.

General powers of purchaser as to avoidance of incumbrances.

159. Where a tenure or holding is sold in execution of a decree for arrears due in respect thereof, the purchaser shall take subject to the interests defined in this chapter as "protected interests", but with power to annul the interests defined in this chapter as "incumbrances": Provided as follows :—

(*a*) a registered and notified incumbrance within the meaning of this chapter shall not be so annulled except in the case hereinafter mentioned in that behalf;

(*b*) the power to annul shall be exercisable only in manner by this chapter directed.

Protected interests.

160. The following shall be deemed to be protected interests within the meaning of this chapter :—

(*a*) any under-tenure existing from the time of the Permanent Settlement;

(*b*) any under-tenure recognized by the settlement-proceedings of any current temporary settlement as a tenure at a rent fixed for the period of that settlement;

(*c*) any lease of land whereon dwelling-houses, manufactories or other permanent buildings have been erected, or permanent gardens, plantations, tanks, canals, places of worship or burning or burying grounds have been made;

(*d*) any right of occupancy;

(*e*) the right of a non-occupancy-raiyat to hold for five years at a rent fixed under Chapter VI by a Court, or under Chapter X by a Revenue-officer;

(*f*) any right conferred on an occupancy-raiyat to hold at a rent which was a fair and reasonable rent at the time the right was conferred; and

(*g*) any right or interest which the landlord at whose instance the tenure or holding is sold, or his predecessor in title, has expressly and in writing given the tenant for the time being permission to create.

Meaning of "incumbrance" and "registered and notified incumbrance."

161. For the purposes of this chapter—

(*a*) the term "incumbrance", used with reference to a tenancy, means any lien, sub-tenancy, easement or other right or interest created by the tenant on his tenure or holding or in limitation of his own interest therein, and not being a protected interest as defined in the last foregoing section;

(*b*) the term "registered and notified incumbrance", used with reference to a tenure or holding sold or liable to sale in execution of a decree for an arrear of rent due in respect thereof, means an incumbrance created by a registered instrument of which a copy has, not less than three months before the accrual of the arrear, been served on the landlord in manner hereinafter provided.

Application for sale of tenure or holding.

162. When a decree has been passed for an arrear of rent due for a tenure or holding, and the decree-holder applies under section 235 of the Code of Civil Procedure for the attach-

Bengal Tenancy Act.

(*Chapter XIV.—Sale for Arrears under Decree.—Secs. 163-167.*)

ment and sale of the tenure or holding in execution of the decree, he shall produce a statement showing the parganá, estate and village in which the land comprised in the tenure or holding is situate, the yearly rent payable for the same and the total amount recoverable under the decree.

182. **163.** (*1*) Notwithstanding anything contained in the Code of Civil Procedure, when the decree-holder makes the application mentioned in the last foregoing section, the Court shall, if under section 245 of the said Code it admits the application and orders execution of the decree as applied for, issue simultaneously the order of attachment and the proclamation required by section 287 of the said Code.

Order of attachment and proclamation of sale to be issued simultaneously.

(*2*) The proclamation shall, in addition to stating and specifying the particulars mentioned in section 287 of the said Code, announce—

(*a*) in the case of a tenure or a holding of a raiyat holding at fixed rates, that the tenure or holding will first be put up to auction subject to the registered and notified incumbrances, and will be sold subject to those incumbrances if the sum bid is sufficient to liquidate the amount of the decree and costs, and that otherwise it will, if the decree-holder so desires, be sold on a subsequent day, of which due notice will be given, with power to annul all incumbrances; and

(*b*) in the case of an occupancy-holding, that the holding will be sold with power to annul all incumbrances.

(*3*) The proclamation shall, besides being made in the manner prescribed by section 289 of the said Code, be published by fixing up a copy thereof in a conspicuous place on the land comprised in the tenure or holding ordered to be sold, and shall also be published in such manner as the Local Government may, from time to time, direct in this behalf.

(*4*) Notwithstanding anything contained in section 290 of the said Code, the sale shall not, without the consent in writing of the judgment-debtor, take place until after the expiration of at least thirty days, calculated from the date on which the copy of the proclamation has been fixed up on the land comprised in the tenure or holding ordered to be sold.

164. (*1*) When a tenure or a holding at fixed rates has been advertised for sale under the last foregoing section, it shall be put up to auction, subject to registered and notified incumbrances; and, if the bidding reaches a sum sufficient to liquidate the amount of the decree and costs, including the costs of sale, the tenure or holding shall be sold subject to such incumbrances.

Sale of tenure or holding subject to registered and notified incumbrances, and effect thereof.

(*2*) The purchaser at a sale under this section may, in manner provided by section 167, and not otherwise, annul any incumbrance upon the tenure or holding not being a registered and notified incumbrance.

165. (*1*) If the bidding for a tenure or a holding at fixed rates put up to auction under the last foregoing section does not reach a sum sufficient to liquidate the amount of the decree and costs as aforesaid, and if the decree-holder thereupon desires that the tenure or holding be sold with power to avoid all incumbrances, the officer holding the sale shall adjourn the sale and make a fresh proclamation under section 289 of the Code of Civil Procedure, announcing that the tenure or holding will be put up to auction and sold with power to avoid all incumbrances upon XIV c a future day specified therein, not less than fifteen or more than thirty days from the date of the postponement; and upon that day the tenure or holding shall be put up to auction and sold with power to avoid all incumbrances.

Sale of tenure or holding with power to avoid all incumbrances, and effect thereof.

(*2*) The purchaser at a sale under this section may, in manner provided by section 167, and not otherwise, annul any incumbrance on the tenure or holding.

166. (*1*) When an occupancy-holding has been advertised for sale under section 163, it shall be put up to auction and sold with power to avoid all incumbrances.

Sale of occupancy-holding with power to avoid all incumbrances, and effect thereof.

(*2*) The purchaser at a sale under this section may, in manner provided by the next following section, and not otherwise, annul any incumbrance on the holding.

167. (*1*) A purchaser having power to annul an incumbrance under any of the foregoing sections and desiring to annul the same, may, within one year from the date of the sale or the date on which he first has notice of the incumbrance, whichever is later, present to the Collector an application in writing, requesting him to serve on the incumbrancer a notice declaring that the incumbrance is annulled.

Procedure for annulling incumbrances under the foregoing sections.

(*2*) Every such application must be accompanied by such fee for the service of the notice as the Board of Revenue may fix in this behalf.

(*3*) When an application for service of a notice is made to the Collector in manner prescribed by this section, he shall cause the notice to be served in compliance therewith, and the incumbrance shall be deemed to be annulled from the date on which it is so served.

(*4*) When a tenure or holding is sold in execution of a decree for arrears due in respect thereof, and there is on the tenure or holding a protected interest of the kind specified in section 160, clause (*c*), the purchaser may, if he has power under this chapter to avoid all incumbrances, sue to enhance the rent of the land which is the subject of the protected interest. On proof that the land is held at a rent which was not at the time the lease was granted a fair rent, the Court may enhance the rent to such amount as appears to be fair and equitable.

This sub-section shall not apply to land which has been held for a term exceeding twelve years at a fixed rent equal to the rent of good arable land.

Bengal Tenancy Act.

(*Chapter XIV.—Sale for Arrears under Decree.—Secs. 168-174.*)

168. (*1*) The Local Government may, from time to time, by notification in the official Gazette, direct that occupancy-holdings or any specified class of occupancy-holdings in any local area put up for sale in execution of decrees for rent due on them shall, before being put up with power to avoid all incumbrances, be put up subject to registered and notified incumbrances, and may by like notification rescind any such direction.

Power to direct that occupancy-holdings be dealt with under foregoing sections as tenures.

(*2*) While any such direction remains in force in respect of any local area, all occupancy-holdings, or, as the case may be, occupancy-holdings of the specified class in that local area, shall, for the purposes of sale under the foregoing sections of this chapter, be treated in all respects as if they were tenures.

169. (*1*) In disposing of the proceeds of a sale under this chapter, the following rules, instead of those prescribed by section 295 of the Code of Civil Procedure, shall be observed, that is to say:—

Rules for disposal of the sale-proceeds.

(*a*) there shall first be paid to the decree-holder the costs incurred by him in bringing the tenure or holding to sale;

(*b*) there shall, in the next place, be paid to the decree-holder the amount due to him under the decree in execution of which the sale was made;

(*c*) if there remains a balance after these sums have been paid, there shall be paid to the decree-holder therefrom any rent which may have fallen due to him in respect of the tenure or holding between the institution of the suit and the date of the sale;

(*d*) the balance (if any) remaining after the payment of the rent mentioned in clause (*c*) shall, upon the expiration of two months from the confirmation of the sale, be paid to the judgment-debtor upon his application.

(*2*) If the judgment debtor disputes the decree-holder's right to receive any sum on account of rent under clause (*c*), the Court shall determine the dispute, and the determination shall have the force of a decree.

170. (*1*) Sections 278 to 283 (both inclusive) of the Code of Civil Procedure shall not apply to a tenure or holding attached in execution of a decree for arrears due thereon.

Tenure or holding to be released from attachment only on payment into Court of amount of decree with costs, or on confession of satisfaction by decree-holder.

(*2*) When an order for the sale of a tenure or holding in execution of such a decree has been made, the tenure or holding shall not be released from attachment unless, before it is knocked down to the auction-purchaser, the amount of the decree, including the costs decreed, together with the costs incurred in order to the sale, is paid into Court, or the decree-holder makes an application for the release of the tenure or holding on the ground that the decree has been satisfied out of Court.

(*3*) The judgment-debtor or any person having in the tenure or holding any interest voidable on the sale may pay money into Court under this section.

171. (*1*) When any person having, in a tenure or holding advertised for sale under this chapter, an interest which would be avoidable upon the sale, pays into Court the amount requisite to prevent the sale,—

Amount paid into Court to prevent sale to be in certain cases a mortgage-debt on the tenure or holding.

(*a*) the amount so paid by him shall be deemed to be a debt bearing interest at twelve per centum per annum and secured by a mortgage of the tenure or holding to him;

(*b*) his mortgage shall take priority of every other charge on the tenure or holding other than a charge for arrear of rent; and

(*c*) he shall be entitled to possession of the tenure or holding as mortgagee of the tenant, and to retain possession of it as such until the debt, with the interest due thereon, has been discharged.

(*2*) Nothing in this section shall affect any other remedy to which any such person would be entitled.

172. When a tenure or holding is advertised for sale under this chapter in execution of a decree against a superior tenant defaulting, and an inferior tenant, whose interest would be voidable upon the sale, pays money into Court in order to prevent the sale, he may, in addition to any other remedy provided for him by law, deduct the whole or any portion of the amount so paid from any rent payable by him to his immediate landlord; and that landlord, if he is not the defaulter, may in like manner deduct the amount so deducted from any rent payable by him to his immediate landlord, and so on until the defaulter is reached.

Inferior tenant paying into Court may deduct from rent.

173. (*1*) Notwithstanding anything contained in section 294 of the Code of Civil Procedure, the holder of a decree in execution of which a tenure or holding is sold under this chapter may, without the permission of the Court, bid for or purchase the tenure or holding. XIV of 1882

Decree-holder may bid at sale; judgment-debtor may not.

(*2*) The judgment-debtor shall not bid for or purchase a tenure or holding so sold.

(*3*) When a judgment-debtor purchases by himself or through another person a tenure or holding so sold, the Court may, if it thinks fit, on the application of the decree-holder or any other person interested in the sale, by order set aside the sale, and the costs of the application and order, and any deficiency of price which may happen on the re-sale, and all expenses attending it, shall be paid by the judgment-debtor.

174. (*1*) Where a tenure or holding is sold for an arrear of rent due thereon, then, at any time within thirty days from the date of sale, the judgment-debtor may apply to have the sale set aside, on his depositing in Court, for payment to the decree-holder, the amount recoverable

Application by judgment-debtor to set aside sale.

under the decree with costs, and, for payment to the purchaser, a sum equal to five per centum of the purchase-money.

(2) If such deposit is made within the thirty days, the Court shall pass an order setting aside the sale, and the provisions of section 315 of the Code of Civil Procedure shall apply in the case of a sale so set aside:

Provided that, if a judgment-debtor applies under section 311 of the Code of Civil Procedure to set aside the sale of his tenure or holding, he shall not be entitled to make an application under this section.

(3) Section 313 of the Code of Civil Procedure shall not apply to any sale under this chapter.

Registration of certain instruments creating incumbrances.

175. Notwithstanding anything contained in Part IV of the Indian Registration Act, 1877, an instrument creating an incumbrance upon any tenure or holding which has been executed before the commencement of this Act, and is not required by section 17 of the said Registration Act to be registered, shall be accepted for registration under that Act if it is presented for that purpose to the proper officer within one year from the commencement of this Act.

Notification of incumbrances to landlord.

176. Every officer who has, whether before or after the passing of this Act, registered an instrument executed by a tenant of a tenure or holding and creating an incumbrance on the tenure or holding, shall, at the request of the tenant or of the person in whose favour the incumbrance is created, and on payment by him of such fee as the Local Government may fix in this behalf, notify the incumbrance to the landlord by causing a copy of the instrument to be served on him in the prescribed manner.

Power to create incumbrances not extended.

177. Nothing contained in this chapter shall be deemed to enable a person to create an incumbrance which he could not otherwise lawfully create.

CHAPTER XV.

CONTRACT AND CUSTOM.

Restrictions on exclusion of Act by agreement.

178. (1) Nothing in any contract between a landlord and a tenant made before or after the passing of this Act—

(a) shall bar in perpetuity the acquisition of an occupancy-right in land, or

(b) shall take away an occupancy-right in existence at the date of the contract, or

(c) shall entitle a landlord to eject a tenant otherwise than in accordance with the provisions of this Act, or

(d) shall take away or limit the right of a tenant, as provided by this Act, to make improvements and claim compensation for them.

(2) Nothing in any contract made between a landlord and a tenant since the 15th day of July, 1880, and before the passing of this Act shall prevent a raiyat from acquiring in accordance with this Act an occupancy-right in land.

(3) Nothing in any contract made between a landlord and a tenant after the passing of this Act shall—

(a) prevent a raiyat from acquiring in accordance with this Act an occupancy-right in land;

(b) take away or limit the right of an occupancy-raiyat to use land as provided by section 23;

(c) take away the right of a raiyat to surrender his holding in accordance with section 86;

(d) take away the right of a raiyat to transfer or bequeath his holding in accordance with local usage;

(e) take away the right of an occupancy-raiyat to sub-let subject to and in accordance with the provisions of this Act;

(f) take away the right of a raiyat to apply for a reduction of rent under section 38 or section 52;

(g) take away the right of a landlord or a tenant to apply for a commutation of rent under section 40; or

(h) affect the provisions of section 67 relating to interest payable on arrears of rent:

Provided as follows:—

(i) nothing in this section shall affect the terms or conditions of a lease granted *bonâ fide* for the reclamation of waste land, except that, where, on or after the expiration of the term created by the lease, the lessee would under Chapter V be entitled to an occupancy-right in the land comprised in the lease, nothing in the lease shall prevent him from acquiring that right;

(ii) when a landlord has reclaimed waste land by his own servants or hired labourers, and subsequently lets the same or a part thereof to a raiyat, nothing in this Act shall affect the terms of any contract whereby a raiyat is prevented from acquiring an occupancy-right in the land or part during a period of thirty years from the date on which the land or part is first let to a raiyat;

(iii) nothing in this section shall affect the terms or conditions of any contract for the temporary cultivation of orchard land with agricultural crops.

Permanent mukarrarí leases.

179. Nothing in this Act shall be deemed to prevent a proprietor or a holder of a permanent tenure in a permanently-settled area from granting a permanent mukarrarí lease on any terms agreed on between him and his tenant.

Bengal Tenancy Act.

(Chapter XV.—Contract and Custom.—Secs. 180-183.)

(Chapter XVI.—Limitation. Chapter XVII.—Supplemental.—Secs. 184-187.)

Útbandi, chur and dearah lands.

180. (*1*) Notwithstanding anything in this Act, a raiyat—

(*a*) who in any part of the country where the custom of útbandi prevails, holds land ordinarily let under that custom and for the time being let under that custom, or

(*b*) who holds land of the kind known as chur or dearah,

shall not acquire a right of occupancy—

in case (*a*), in land ordinarily held under the custom of útbandi and for the time being held under that custom, or

in case (*b*), in the chur or dearah land,

until he has held the land in question for twelve continuous years; and, until he acquires a right of occupancy in the land, he shall be liable to pay such rent for his holding as may be agreed on between him and his landlord.

(*2*) Chapter VI shall not apply to raiyats holding land under the custom of útbandi in respect of land held by them under that custom.

(*3*) The Collector may, on the application of either the landlord or the tenant or on a reference from the Civil Court, declare that any land has ceased to be chur or dearah land within the meaning of this section, and thereupon all the provisions of this Act shall apply to the land.

Saving as to service-tenures.

181. Nothing in this Act shall affect any incident of a ghátwálí or other service-tenure, or, in particular, shall confer a right to transfer or bequeath a service-tenure which, before the passing of this Act, was not capable of being transferred or bequeathed.

Homesteads.

182. When a raiyat holds his homestead otherwise than as part of his holding as a raiyat, the incidents of his tenancy of the homestead shall be regulated by local custom or usage, and, subject to local custom or usage, by the provisions of this Act applicable to land held by a raiyat.

Saving of custom.

183. Nothing in this Act shall affect any custom, usage or customary right not inconsistent with, or not expressly or by necessary implication modified or abolished by, its provisions.

Illustrations.

(1) A usage under which a raiyat is entitled to sell his holding without the consent of his landlord, is not inconsistent with, and is not expressly or by necessary implication modified or abolished by, the provisions of this Act. That usage, accordingly, wherever it may exist, will not be affected by this Act.

(2) The custom or usage that an under-raiyat should, under certain circumstances, acquire a right of occupancy is not inconsistent with, and is not expressly or by necessary implication modified or abolished by, the provisions of this Act. That custom or usage, accordingly, wherever it exists, will not be affected by this Act.

CHAPTER XVI.

LIMITATION.

Limitation in suits, appeals and applications in Schedule III.

184. (*1*) The suits, appeals and applications specified in Schedule III annexed to this Act shall be instituted and made within the time prescribed in that schedule for them respectively; and every such suit or appeal instituted, and application made, after the period of limitation so prescribed, shall be dismissed, although limitation has not been pleaded.

(*2*) Nothing in this section shall revive the right to institute any suit or appeal or make any application which would have been barred by limitation if it had been instituted or made immediately before the commencement of this Act.

Portions of the Indian Limitation Act not applicable to such suits, &c.

185. (*1*) Sections 7, 8 and 9 of the Indian Limitation Act, 1877, shall not apply to the suits and applications mentioned in the last foregoing section. XV of

(*2*) Subject to the provisions of this chapter, the provisions of the Indian Limitation Act, 1877, shall apply to all suits, appeals and applications mentioned in the last foregoing section. XV o

CHAPTER XVII.

SUPPLEMENTAL.

Penalties.

Penalties for illegal interference with produce.

186. (*1*) If any person, otherwise than in accordance with this Act or some other enactment for the time being in force,— Pena

(*a*) distrains or attempts to distrain the produce of a tenant's holding, or

(*b*) resists a distraint duly made under this Act, or forcibly or clandestinely removes any property duly distrained under this Act, or

(*c*) except with the authority or consent of the tenant, prevents or attempts to prevent the reaping, gathering, storing, removing or otherwise dealing with any produce of a holding,

he shall be deemed to have committed criminal trespass within the meaning of the Indian Penal Code. XLV

(*2*) Any person who abets within the meaning of the Indian Penal Code the doing of any act mentioned in sub-section (*1*), shall be deemed to have abetted the commission of criminal trespass within the meaning of that Code. XLV

Agents and representatives of landlords.

Power for landlord to act through agent.

187. (*1*) Any appearance, application or act, in, before or to any Court or authority, required or authorised by this Act to be made or done by a landlord, may, unless the Court or authority otherwise directs, be made or done also by an agent empowered in this behalf by a written authority under the hand of the landlord. Agen repre tativ landl

(*2*) Every notice required by this Act to be served on, or given to, a landlord shall, if served on, or given to, an agent empowered as aforesaid to accept service of or receive the same on behalf of the landlord, be as effectual for the purposes of this Act as if it had been served on, or given to, the landlord in person.

(*3*) Every document required by this Act to be signed or certified by a landlord, except an instrument appointing or authorizing an agent, may be signed or certified by an agent of the landlord authorized in writing in that behalf.

Joint-landlords to act collectively or by common agent.

188. Where two or more persons are joint-landlords, anything which the landlord is under this Act required or authorized to do must be done either by both or all those persons acting together, or by an agent authorized to act on behalf of both or all of them.

Rules under Act.

Power to make rules regarding procedure, powers of officers and service of notices.

189. The Local Government may, from time to time, by notification in the official Gazette, make rules consistent with this Act—

(*1*) to regulate the procedure to be followed by Revenue-officers in the discharge of any duty imposed upon them by or under this Act, and may by such rules confer upon any such officer—

(*a*) any power exercised by a Civil Court in the trial of suits;

(*b*) power to enter upon any land, and to survey, demarcate and make a map of the same, and any power exercisable by any officer under the Bengal Survey Act, 1875; and

(*c*) power to cut and thresh the crops on any land and weigh the produce, with a view to estimating the capabilities of the soil; and

(*2*) to prescribe the mode of service of notices under this Act where no mode is prescribed by this or any other Act.

Procedure for making, publication and confirmation of rules.

190. (*1*) Every authority having power to make rules under any section of this Act shall, before making the rules, publish a draft of the proposed rules for the information of persons likely to be affected thereby.

(*2*) The publication shall be made, in the case of rules made by the Local Government or High Court, in such manner as may in its opinion be sufficient for giving information to persons interested, and, in the case of rules made by any other authority, in the prescribed manner:

Provided that every such draft shall be published in the official Gazette.

(*3*) There shall be published with the draft a notice specifying a date, not earlier than the expiration of one month after the date of publication, at or after which the draft will be taken into consideration. *Rules under Act.*

(*4*) The authority shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(*5*) The publication in the official Gazette of a rule purporting to be made under this Act shall be conclusive evidence that it has been duly made.

(*6*) All rules made under this Act may, from time to time, subject to the sanction (if any) required for making them, be amended, added to or cancelled by the authority having power to make the same.

Provisions as to temporarily-settled districts.

Saving as to land held in a district not permanently settled.

191. Where the area comprised in a tenure is situate in an estate which has never been permanently settled, nothing in this Act shall prevent the enhancement of the rent upon the expiration of a temporary settlement of the revenue, unless the right to hold beyond the term of the settlement at a particular rate of rent has been expressly recognized in settlement-proceedings by a Revenue-authority empowered by the Government to make definitively or confirm settlements. *Provisions as to temporarily-settled districts.*

Power to alter rent in case of new assessment of revenue.

192. When a landlord grants a lease, or makes any other contract, purporting to entitle the tenant of land not included in an area permanently settled to hold that land free of rent or at a particular rent, and while the lease or contract is in force—

(*a*) land-revenue is for the first time made payable in respect of the land, or

(*b*) land-revenue having been previously payable in respect of it, a fresh settlement of land-revenue is made,

a Revenue-officer may, notwithstanding anything in the contract between the parties, by order, on the application of the landlord or of the tenant, fix a fair and equitable rent for the land in accordance with the provisions of this Act.

Rights of pasturage, &c.

Rights of pasturage, forest-rights, &c.

193. The provisions of this Act applicable to suits for the recovery of arrears of rent shall, as far as may be, apply to suits for the recovery of anything payable or deliverable in respect of any rights of pasturage, forest-rights, rights over fisheries and the like. *Rights of pasturage, &c.*

Saving for conditions binding on landlords.

Tenant not enabled by Act to violate conditions binding on landlord.

194. Where a proprietor or permanent tenure-holder holds his estate or tenure subject to the observance of any specified rule or condition, nothing in this Act shall entitle *Saving for conditions binding on landlords.*

any person occupying land within the estate or tenure to do any act which involves a violation of that rule or condition.

Savings for special enactments.

s for en- ts.

Savings for special enactments.

195. Nothing in this Act shall affect—

(*a*) the powers and duties of Settlement-officers as defined by any law not expressly repealed by this Act;

(*b*) any enactment regulating the procedure for the realization of rents in estates belonging to the Government, or under the management of the Court of Wards or of the Revenue-authorities;

(*c*) any enactment relating to the avoidance of tenancies and incumbrances by a sale for arrears of the Government revenue;

(*d*) any enactment relating to the partition of revenue-paying estates;

(*e*) any enactment relating to patní tenures, in so far as it relates to those tenures; or

(*f*) any other special or local law not repealed either expressly or by necessary implication by this Act.

Construction of Act.

uction

Act to be read subject to Acts hereafter passed by Lieutenant-Governor of Bengal in Council.

196. This Act shall be read subject to every Act passed after its commencement by the Lieutenant-Governor of Bengal in Council.

SCHEDULE I.

(*See section 2.*)

REPEAL OF ENACTMENTS.

Regulations of the Bengal Code.

Number and year.	Subject of Regulation.	Extent of repeal.
VIII of 1793	A Regulation for re-enacting with modifications and amendments the rules for the Decennial Settlement of the Public Revenue payable from the lands of the zamíndárs, independent taluqdárs and other actual proprietors of land in Bengal, Behar and Orissa, passed for those Provinces respectively on the 18th September, 1789, the 25th November, 1789, and the 10th February, 1790, and subsequent dates.	Sections 51, 52, 53, 54, 55, 64 and 65.
XII of 1805	A Regulation for the settlement and collection of the Public Revenue in the zila of Cuttack, including the pargunas of Pattáspur, Kummudichour, and Bagrae, at present included in the zila of Midnapur.	Section 7.

SCHEDULE I—*contd.*

Number and year.	Subject of Regulation.	Extent of repeal.
V of 1812	A Regulation for amending some of the rules at present in force for the collection of the Land-revenue.	Sections 2, 3, 4, 26 and 27.
XVIII of 1812	A Regulation for explaining Section 2, Regulation V, 1812, and rescinding Sections 3 and 4, Regulation XLIV, 1793, and Sections 3 and 4, Regulation L, 1795, and enacting other rules in lieu thereof.	The preamble and sections 2 and 3.
XI of 1825	A Regulation for declaring the rules to be observed in determining claims to lands gained by alluvion or by dereliction of a river or the sea.	In clause 1 of section 4, from and including the words "nor if annexed to a subordinate tenure" to the end of the clause.

Acts of the Bengal Council.

Number and year.	Subject of Act.	Extent of repeal.
VI of 1862	An Act to amend Act X of 1859 (to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal).	The whole Act.
IV of 1867	An Act to explain and amend Act VI of 1862, passed by the Lieutenant-Governor of Bengal in Council, and to give validity to certain judgments.	The whole Act.
VIII of 1869	An Act to amend the Procedure in suits between Landlords and Tenants.	The whole Act.
VIII of 1879	An Act to define and limit the powers of Settlement-officers.	The whole Act.

Act of the Governor General in Council.

Number and year.	Subject of Act.	Extent of repeal.
X of 1859	An Act to amend the law relating to the recovery of rent in the Presidency of Fort William in Bengal.	The whole Act.

Bengal Tenancy Act.

(Schedule III.—Limitation.)

SCHEDULE III.

LIMITATION.

(See section 184.)

PART I.—*Suits.*

Description of Suit.	Period of Limitation.	Time from which period begins to run.
1. To eject any tenure-holder or raiyat on account of any breach of a condition in respect of which there is a contract expressly providing that ejectment shall be the penalty of such breach.	One year .	The date of the breach.
2. For the recovery of an arrear of rent—		
(*a*) when the arrear fell due before a deposit was made under section 61 on account of the rent of the same holding.	Six months .	The date of the service of notice of the deposit.
(*b*) in other cases .	Three years .	The last day of the Bengali year in which the arrear fell due, where that year prevails, and the last day of the month of Jeyt of the Amli or Fasli year in which the arrear fell due, where either of those years prevails.
3. To recover possession of land claimed by the plaintiff as an occupancy-raiyat.	Two years .	The date of dispossession.

PART II.—*Appeals.*

Description of Appeal.	Period of Limitation.	Time from which period begins to run.
From any decree or order under this Act, to the Court of a District Judge or Special Judge.	Thirty days .	The date of the decree or order appealed against.
From any order of a Collector under this Act, to the Commissioner.	Thirty days .	The date of the order appealed against.

PART III.—*Applications.*

Description of Application.	Period of Limitation.	Time from which period begins to run.
6. For the execution of a decree or order made under this Act, or any Act repealed by this Act, and not being a decree for a sum of money exceeding Rs. 500, exclusive of any interest which may have accrued after decree upon the sum decreed, but inclusive of the costs of executing such decree; except where the judgment-debtor has by fraud or force prevented the execution of the decree, in which case the period of limitation shall be governed by the provisions of the Indian Limitation Act, 1877.	Three years .	(1) The date of the decree of order; or XV of 1877. (2) where there has been an appeal, the date of the final decree or order of the Appellate Court; or (3) where there has been a review of judgment, the date of the decision passed on the review.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 13th March 1885, and was referred to a Select Committee :—

No. 5 of 1885.

A Bill to amend the Petroleum Act, 1881.

WHEREAS it is expedient to amend the Petroleum Act, 1881, in manner hereinafter appearing; It is hereby enacted as follows :—

Short title and commencement.

1. (*1*) This Act may be called the Petroleum Act, 1885; and

(*2*) It shall come into force at once.

Amendment of *explanation* to definition of "petroleum" in section 3 of Act VIII of 1881.

2. In section 3 of the Petroleum Act, 1881, in the *explanation* to the definition of "petroleum," for the last thirteen words the following words shall be substituted, namely :—

"in accordance with the directions contained in the schedule hereto annexed, with an apparatus which has been stamped and certified as provided by section 17A, within a period of five years immediately preceding the date on which the apparatus is used for the testing, and after the corrections (if any) which the certificate declares are to be applied to the results of the testing have been made."

Amendment of definition of "dangerous petroleum" in section 3 of Act VIII of 1881.

3. In section 3 of the said Act, in the definition of "dangerous petroleum", for the word "seventy-three" the word "seventy-six" shall be substituted; and to the same definition the following words shall be added, namely :—

"Provided that, when all or any of the petroleum on board a ship, or in the possession of any dealer, is declared by the master of the ship, or the consignees of the cargo, or by the dealer, as the case may be, to be of one uniform quality, the petroleum shall not be deemed to be dangerous if [illegible] tested as aforesaid, have their flashing points, on an average, at or above seventy-three degrees of Fahrenheit's thermometer and if no one of the said samples has its flashing point below seventy degrees of that thermometer."

Repeal of word "glass" in section 5 of same Act.

4. In the proviso to section 5 of the said Act, the word "glass" shall be repealed.

Substitution of certain words in section 6 of the same Act.

5. In section 6 of the said Act, for the last seventeen words the following shall be substituted, namely :—

"have attached thereto a label in conspicuous characters stating the description of the petroleum, with the addition of the words 'highly inflammable' and with the addition—

"(*d*) in the case of a vessel kept, of the name and address of the consignee or owner;

"(*e*) in the case of a vessel transported, of the name and address of the sender; and

"(*f*) in the case of a vessel sold or exposed for sale, of the name and address of the vendor."

New sections substituted for section 7 of the same Act.

6. For section 7 of the said Act the following sections shall be substituted :—

Power for Local Government to make rules as to importation of petroleum.

"7. (*1*) The Local Government may, from time to time, make rules consistent with this Act to regulate the importation of petroleum, and in particular—

"(*a*) to determine the ports at which only petroleum may be imported;

"(*b*) to ascertain the quantity and description of any petroleum on board a ship;

"(*c*) to determine the places at which and the conditions on and subject to which petroleum may be landed, stored or transhipped;

"(*d*) to fix the fees to be paid for the storage of petroleum at such places;

"(*e*) to provide for the selection by an officer appointed by the Local Government in this behalf, and for the delivery to him by the consignees of samples of all

"(*f*) to provide, in the case of each consignment which is stated to be of one uniform quality, for the averaging of the results of testing the selected samples."

"(2) In this section 'ship' includes anything made for the conveyance by water of human beings or property.

Procedure after petroleum has been landed and stored.

"7A. (1) Petroleum landed and stored in accordance with rules made under the last foregoing section shall not be removed from the place at which it is stored until the samples selected therefrom in accordance with the said rules have been tested by an officer appointed by the Local Government in this behalf in the manner described in the schedule hereto annexed with an apparatus which has been stamped and certified as provided by section 17 A, and until such officer has given a certificate that the petroleum is not dangerous petroleum.

"(2) If the said officer after testing the said samples refuses to give the said certificate in respect of any petroleum, the Local Government may permit the consignee within a time to be fixed by the Local Government in this behalf—

"(*a*) to rectify the petroleum,

"(*b*) to apply for a license to import the petroleum as dangerous petroleum, or

"(*c*) to re-export the petroleum.

"(3) If the consignee does not within the time fixed under sub-section (2) avail himself of the permission granted under that sub-section, the Local Government may order the petroleum to be destroyed."

New section to be inserted after section 17.

7. After section 17 of the said Act the following section shall be inserted, namely:—

"*Test-apparatus.*

Model test-apparatus.

"17A. Whereas a model of the apparatus for testing petroleum under this Act constructed in accordance with the description contained in the schedule hereto annexed has been deposited in the office of the Chemical Examiner to Government, Calcutta, and has been marked with the words 'Model test-apparatus;' It is hereby enacted as follows:—

Verification of test-apparatus.

"(1) The Chemical Examiner with whom the said model test-apparatus is deposited may, on payment of such fee as the Governor General in Council may, from time to time, by notification in the *Gazette of India*, prescribe, compare with the said model and verify every apparatus for testing petroleum which is submitted to him for the purpose.

"(2) If any apparatus for testing petroleum, when compared and verified as provided by this section, is found correct, or correct subject to certain corrections to be applied to the results of the tests, the Chemical Examiner shall stamp the same with a special number, and shall further give a certificate in writing under his hand to the effect that the apparatus has been compared and verified by him and found to be correct, or correct subject to certain specified corrections to be applied to the results of the tests.

"(3) Every certificate granted under this section shall, until the contrary is proved, be deemed to be conclusive proof of the matters stated therein.

"(4) Subject to the payment of such fees as the Governor General in Council may, by notification in the *Gazette of India*, prescribe in this behalf, the said model test-apparatus shall be at all reasonable times open to inspection by any person desiring to inspect it."

New schedule substituted for the schedule to the same Act.

8. For the Schedule to the said Act the following schedule shall be substituted, namely:—

"THE SCHEDULE.

"*I.—Nature of the Test-apparatus.*

"The apparatus consists of the following parts:—

(1) the oil-cup;

(2) the cover, with slide, test-lamp, and clockwork arrangement for opening and closing the holes in the cover, and for dipping the test-flame;

(3) the water-bath or heating vessel;

(4) the tripod stand, with jacket, and spirit-lamp for heating the water-bath;

(5) the thermometer for indicating the temperature of the oil in the oil-cup;

(6) the thermometer for indicating the temperature of the water in the water-bath;

(7) the thermometer for indicating the temperature of the oil before it is poured into the oil-cup;

(8) the dropping bottle, for replenishing the test-lamp;

(9) the forceps, for adjusting the wick of the test-lamp.

"The oil-cup is a cylindrical flat-bottomed vessel, made of gun-metal or brass, and tinned or silvered inside. A gauge is fixed to the inside of the cup to regulate the height to which it is to be filled with the sample under examination.

"The cup is provided with a close fitting overlapping cover, which carries the thermometer, the test-lamp, and the adjuncts thereto. The test-lamp is suspended upon two supports by means of trunnions, which allow it to be easily inclined to a particular angle and restored to its original position. The socket in the cover, which is to hold a round bulb thermometer for indicating the temperature of the oil during the testing operation, is so adjusted that the bulb of the latter is always inserted in a definite position below the surface of the liquid.

"The cover is provided with three holes, one in the centre and two smaller ones close to the sides. These are closed and opened by means of a pivoted slide. When the slide is moved so as to uncover the holes, the suspended lamp is caught by a projection fixed on the slide, and tilted in such a way as to bring the end of the spout just below the surface of the lid. As the slide moves back so as to cover the holes, the lamp returns to its original position. Upon the cover, in front of and in a line with the nozzle of the lamp, is fixed a white bead, the diameter of which represents the size of the test-flame to be used.

"The water-bath or heating vessel is so constructed that, when the oil-cup is placed in position in it, an air-space or air-chamber intervenes between the two; consequently, in applying the test under ordinary circumstances, the heat is transmitted gradually to the oil from the hot water through the air-space. The water-bath is fitted with a socket for receiving a long bulb thermometer, to indicate the temperature of the water. It is also provided with a funnel, an overflow-pipe and two handles.

"The water-bath rests upon a tripod stand, which is fitted with a copper cylinder or jacket, so that the bath is surrounded by an enclosed air-space, which retains and regulates the heat. One of the legs of the stand serves as a support for a spirit-lamp, which is attached to it by a small swing bracket.

"The clockwork arrangement, by which during the operation of testing the slide is withdrawn, and the test-flame dipped into the cup and raised again as the slide is replaced, is provided with a ratchet key for setting it in action for each test, and with a trigger for starting it each time that the test-flame is applied.

"*II.—Directions for drawing the Sample and preparing it for Testing.*

"1. *Drawing the sample.*—In all cases the testing officer shall personally superintend the drawing of the sample from an original unopened tin.

"An opening sufficiently large to admit of the oil being rapidly poured or syphoned from the tin shall be made.

"Two bottles, each of the capacity of about 40 fluid ounces, are to be filled with the oil. One of these, the contents of which is intended to be preserved for reference in case of need, is to be carefully corked, the cork being well driven home, cut off level with the neck, and melted sealing-wax worked into it. The other bottle may be either stoppered or corked.

"2. *Preparing the sample for testing.*—About ten fluid ounces of the oil, sufficient for three tests, are transferred from the bottle into which the sample has been drawn to a pint flask or bottle, which is to be immersed in water in which ice is floating until a thermometer, introduced into the oil, indicates a temperature not exceeding 50° Fahrenheit.

"*III.—Directions for preparing and using the Test-apparatus.*

"1. *Preparing the water-bath.*—The water-bath is filled by pouring water into the funnel until it begins to flow out at the overflow-pipe. The temperature of the water at the commencement of each test, as indicated by the long bulb thermometer, is to be 180° Fahrenheit, and this is attained in the first instance by mixing hot and cold water, either in the bath or in a vessel from which the bath is filled, until the thermometer, which is provided for testing the temperature of the water, gives the proper indication; or the water is heated by means of the spirit-lamp (which is attached to the stand of the apparatus) until the required temperature is indicated.

"2. *Preparing the test-lamp.*—The test-lamp is fitted with a piece of cylindrical wick of such thickness that it fills the wick-holder, but may readily be moved to and fro for the purpose of adjusting the size of the flame. In the body of the lamp, upon the wick, which is coiled within it, is placed a small tuft of cotton wool, moistened with petroleum, any oil not absorbed by the wool being removed. When the lamp has been lighted, the wick is adjusted by means of a pair of forceps until the flame is of the size of the bead fixed on the cover of the oil-cup; should a particular test occupy so long a time that the flame begins to get smaller, through the supply of oil in the lamp becoming exhausted, three or four drops of petroleum are allowed to fall upon the tuft of wool in the lamp from the small open orifice of the bottle provided for that purpose. This can be safely done without interrupting the test.

"3. *Filling the oil-cup.*—The oil-cup having been previously cooled, by placing it bottom downwards in water at a temperature not exceeding 50° Fahrenheit, is to be rapidly wiped dry, placed on a level surface in a good light, and the oil to be tested is poured in very slowly, without splashing, until its surface is level with the point of the gauge which is fixed in the cup. The round bulb thermometer is inserted into the lid of the cup, care being taken that the projecting rim of the collar touches the edge of the socket; the test-lamp, prepared as already described, is placed in position, and the cover is then put on to the cup and pressed down so that its edge rests on the rim of the cup.

"4. *Application of the test.*—The water-bath, with its thermometer in position, is placed in some locality where it is not exposed to currents of air, and where the light is sufficiently subdued to admit of the size of the entire test-flame being compared with that of the bead on the cover. The cup is carefully lifted without shaking it, and placed in the bath, the test-lamp is lighted, and the clockwork wound up by turning the key. The thermometer in the oil-cup is now watched, and when the temperature has reached 56° Fahrenheit the clockwork is set in motion by pressing the trigger.

"If no flash takes place the clockwork is at once re-wound, and the trigger pressed at 57° Fahrenheit, and so on, at every degree rise of temperature, until the flash occurs, or until a temperature of 95° Fahrenheit has been reached.

"If the flash takes place at any temperature below 77° Fahrenheit the temperature at which it occurs is to be recorded. Two fresh portions of the sample are then to be successively tested in a similar manner and the results recorded. If no greater difference than 2° Fahrenheit exists between any two of the three recorded results, each result is to be corrected for atmospheric pressure, as hereafter described, and the average of the three corrected

results is the flashing point of the sample. In the event of there being a greater difference than 2° Fahrenheit between any two of the results, the series of tests is to be rejected and a fresh series, of three, similarly obtained, and so on until a sufficiently concordant series is furnished, when the results are to be corrected and the average taken in the manner already described.

"If a temperature of 76° Fahrenheit has been reached without a flash occurring, the application of the test-flame is to be continued at every degree rise of temperature until a temperature of 95° Fahrenheit has been reached. If no flash has occurred up to this point, the oil-cup is to be removed from the water-bath, and the temperature of the water in the water-bath is to be reduced to 95° Fahrenheit by pouring cold water into the funnel (the hot water escaping by the overflow-pipe). The air-chamber is then to be filled to a depth of 1½ inches with water at a temperature of about 95° Fahrenheit, the oil-cup is to be replaced in the water-bath and the spirit-lamp attached to the water-bath is to be lighted and placed underneath. The test-flame is then to be again applied, from 96° Fahrenheit, at every degree rise of temperature as indicated by the thermometer in the oil-cup until a flash takes place or until a temperature of 200° Fahrenheit has been reached. If during this operation the test-flame appears to diminish in size, the lamp is to be replenished in the manner prescribed at (2) without interrupting the test.

"If a flash occurs at any temperature between 76° and 200° Fahrenheit the temperature at which it occurs, subject to correction for atmospheric pressure, is the flashing point of the sample.

"In repeating a test, a fresh sample of oil must always be used, the tested sample being thrown away, and the cup must be wiped dry from any adhering oil and cooled, as already described, before receiving the fresh sample.

"5. *Correction for atmospheric pressure.*—As the flashing point of an oil is influenced by changes in atmospheric pressure to an average extent of 1·6° Fahrenheit for every inch of the barometer, a correction of the observed flashing point may become necessary. For this purpose a table is appended to this schedule, giving the flashing points of oils ranging from 65° to 80° Fahrenheit, under pressure ranging from 27 to 31 inches of mercury.

"The table is used in the following manner :—

"*Example.*—An oil has given a flashing point of 71°, the barometer being at 28·6 inches; take the nearest number to 71° in the vertical column headed 28·6. This number is 70·8. Substitute for this the number in the same horizontal line in the column headed 30 (the normal height of the barometer). The substituted number, that is, the true flashing point of the oil, is 73°.

"Table for correction of Flashing Points indicated by the Test for Variations in Barometric Pressure on either side of Thirty Inches.

Barometer in Inches.	Flashing Point in Degrees Fahrenheit.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to amend the Petroleum Act, 1881, in certain points in which experience has shewn that its amendment would be desirable.

2. "Dangerous petroleum" is defined by the Act (section 3) as petroleum having its flashing-point below seventy-three degrees of Fahrenheit's thermometer. The Government of India does not see any reason for changing the standard so fixed, but in view of the possibility of variations in the application of the test, which, according to the opinions of the experts, may, even with the utmost care, cause deviations of 2° or 3° in the results, it is of opinion that the nominal legal minimum standard for non-dangerous petroleum may be slightly raised. Accordingly, section 3 of the Bill fixes the standard for dangerous petroleum at 76° instead of 73°, but to this enhanced standard a proviso is added to the effect that a consignment represented to be of one uniform quality shall not be deemed to be dangerous when on an average of tests the oil does not fall below that standard by more than 3°, and no one sample has a flashing point below 70°.

3. Section 5 of the Act permits small quantities of dangerous petroleum to be kept in "glass," among other, vessels, if each vessel does not contain more than a pint and is securely stopped. Looking to the comparatively fragile nature of glass vessels and to the possibility of such vessels, when filled with the highly volatile liquids included under the head of "dangerous petroleum," bursting even if "securely stopped," when exposed to powerful sunlight for a brief period, the prudence of including *glass* vessels among those specified in the section is, as has been pointed out to the Government of India, doubtful. Section 4 of the Bill therefore amends the section by the omission of the word "glass."

4. The object of section 5 of the Bill is to bring the provisions of section 6 of the Act, which relate to the marking of the vessels containing dangerous petroleum, and which declare that all such vessels "shall bear an indelible mark on a label in conspicuous characters, stating the nature of the contents thereof" into accordance with the English law (34 & 35 Vic., cap. 105, section 6), which lays down that the label shall state in conspicuous characters the description of the petroleum with the addition of the words "highly inflammable" and with the addition of the name and address of the consignee or owner or of the sender or vendor.

5. As the Act now stands, not only is the importation of "dangerous" petroleum subjected to a strict system of licensing, but no petroleum may be landed from any ship until samples of the petroleum on board thereof have been delivered for the purpose of the petroleum being tested.

While considering that the importation of dangerous petroleum should continue to be thus regulated, the Government of India is of opinion that the restrictions at present placed on the importation of other petroleum may be somewhat relaxed. It seems to it that, instead of requiring the delivery of samples before any oil is landed, it would be sufficient to give the Local Government power to determine the places at which, and the conditions on and subject to which, petroleum may be landed and stored. The necessary power is conferred by section 6 of the Bill, which substitutes a new section for section 7 of the Act. There would thus be nothing to prevent petroleum, other than dangerous petroleum, being in future landed and stored at once. But, in order to protect the public, no petroleum should be allowed to be removed from the place where it is stored until it has been tested and declared to satisfy the legal standard. Section 7A therefore provides this, and further declares that, when petroleum which has been so landed and stored is found not to come up to the legal standard, the Local Government may direct the consignees either to rectify it or to import it as dangerous petroleum or to re-export within a fixed period, and that, on the consignees failing to do whichever of these things they may be directed to do, the Local Government may order the petroleum to be destroyed.

In addition to re-producing clauses (*a*) and (*c*) of the present section 7, the new section 7 further empowers the Local Government to make rules to fix the fees to be paid for the storage of petroleum at places appointed for the purpose, and to regulate the selection of samples and the averaging the results of testing selected samples.

6. Section 7 of the Bill introduces certain new provisions in the Act as to the test-apparatus to be used. As the Act at present stands, the schedule contains a specification explanatory of the test-apparatus. As it is, however, proposed by this Bill to substitute a new schedule for the present one, in which a new description of the test-apparatus is inserted, it seems desirable, for the convenience of the public, to provide for the deposit of a model test-apparatus, which shall be open to inspection, and after which all the instruments to be used under the Act shall be constructed. This is what the new section 17 A, which section 7 of the Bill adds to the Act, does. This section also provides for the verification of each test-apparatus which it is proposed to use for the purposes of the Act. Each apparatus when verified is to be marked with a special number, and the officer making the verification is to give a certificate in which shall be noted any corrections which must be applied to the results of the tests made with the apparatus. This last provision is necessary, because it is practically impossible to construct instruments which will not need corrections of this sort. The certificate granted is declared to be conclusive proof of the matters stated therein.

7. Section 8 of the Bill substitutes a new schedule for the schedule at present appended to the Act, the instructions contained in which it is now generally admitted require modification.

This schedule has been prepared mainly by Sir F. Abel in conjunction with Mr. Redwood and Dr. Warden, the Professor of Chemistry in the Medical College, Calcutta, and Chemical Examiner to Government, and Dr. Lyon, the Chemical Analyser in Bombay, and it has also been examined and considered by Professor Pedler of the Presidency College, Calcutta. It embodies very definite directions regarding the sampling and testing of petroleum, and it lays down in a most detailed manner the procedure to be adopted. The Governor General in Council believes that the adoption of this schedule will meet all the difficulties which have been found to occur under the present law in regard to the sampling and testing of petroleum, and that, if the procedure therein described is carefully followed, there is every reason to hope that trustworthy and generally concordant results will be obtained.

9. Lastly, the new provisions as to the deposit of a model test-apparatus and the verification of all other test-apparatus therewith has necessitated the amendment of the *explanation* of the term "flashing point" which is appended to the definition of "petroleum" in section 3. It is necessary that, in order to ascertain the true flashing point, the petroleum should be tested with a verified and certificated apparatus, and after the corrections (if any) to be applied to the results of the testing have been made. Moreover, it would appear to be necessary that every apparatus used for the testing of petroleum should be verified at least once in every five years. All these points are provided for in the amendment made by section 2 of the Bill.

J. GIBBS.

The 10th March, 1885.

R. J. CROSTHWAITE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 13th March 1885, and was referred to a Select Committee:—

No. 6 OF 1885.

A Bill to amend the law relating to Government Securities.

WHEREAS it is expedient to amend the law relating to Government securities in manner hereinafter appearing; It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Act may be called the Indian Securities Act, 1885; and

(*2*) It shall come into force at once.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,

The expression "Government securities" includes promissory notes, debentures, stock certificates, and all other securities issued by the Government of India or by any Local Government, in respect of any loan issued under notification in the official Gazette, whether before or after the passing of this Act: and

"prescribed" means prescribed by rules made from time to time by the Governor General in Council in this behalf.

Right of survivors of joint payees of Government securities.

3. (*1*) Notwithstanding anything contained in the Indian Contract Act, section 45, when a Government security is payable to two or more persons jointly and any of them dies, the security shall be payable to the survivor or survivors of those persons.

(*2*) Nothing herein contained shall affect any claim which the representative of the deceased person may have against the survivor or survivors in respect of the security jointly payable to them and the deceased.

(*3*) This section shall apply whether the death of the person to whom the security was jointly payable occurred or occurs before or after this Act comes into force.

Issue of renewed securities.

4. Any person to whom a Government security is payable may, on payment of the prescribed fee and on delivering the security duly receipted to the prescribed officer, obtain from the officer a renewed security payable to himself. [Cf. sec. 49 of 33 & 34 Vic., cap. 71.]

Issue of duplicate securities.

5. (*1*) When a Government security has been wholly or partly lost or destroyed the person to whom it was payable at the time of the loss or destruction or his representative may, on application to the prescribed officer, and on producing proof to his satisfaction of the loss or destruction, obtain from him an order for:—

(*a*) the payment of interest in respect of the security said to be lost or destroyed pending the issue of a duplicate security; and

(*b*) the issue of a duplicate security payable to such person.

(*2*) An order shall not be passed under sub-section (*1*) until after the issue of the prescribed notification of the loss or destruction and after the expiration of the prescribed period, nor until the applicant has given the prescribed indemnity against the claims of all persons deriving title under the security lost or destroyed.

(*3*) A list of the securities in respect of which an order is passed under sub-section (*1*) shall be published in the *Gazette of India* at such times as the Governor General in Council may, from time to time, direct.

Period after which Government is released from liability in respect of original security.

6. When a renewed security has been issued under section 4, or a duplicate security has been issued under section 5, the Government shall be discharged of all liability in respect of the original security of which such renewed or duplicate security has been issued— [Cf. 33 & 34 Vic., cap. 71, s. 51.]

(*a*) in the case of a renewed security, after the lapse of six years from the date of the issue of the renewed security,

(*b*) in the case of a duplicate security, after the lapse of six years from the date of the publication under section 5, sub-sec-

tion (3), of the list in which the security is first mentioned, or from the date of the last payment of interest on the original security, whichever date is latest.

Power for Governor General in Council to make rules.

7. The Governor General in Council may, from time to time, make rules to prescribe—

(a) the fees to be paid for applications under sections 4 and 5;

(b) the form in which securities delivered for renewal are to be receipted;

(c) the officer who is to exercise all or any of the powers and perform all or any of the duties prescribed by sections 4 and 5;

(d) the proof which is to be produced by persons applying for duplicate securities;

(e) the form and mode of publication of the notification mentioned in section 5 and the period after which interest may be paid or a duplicate security may be issued under that section;

(f) the nature and amount of the indemnity to be given by a person applying under section 5 for the payment of interest or the issue of a duplicate security; and

(g) generally all matters connected with the grant of renewed and duplicate securities.

Publication of drafts and rules.

8. (1) The Governor General in Council shall before making rules under the last foregoing section, publish a draft of the proposed rules in such manner as may, in his opinion, be sufficient for the information of the public.

(2) There shall be published with the draft a notice specifying a date at or after which the draft will be taken into consideration.

(3) The Governor General in Council shall receive and consider any objection or suggestion which may be made by any person with respect to the draft before the date so specified.

(4) Every rule made under the last foregoing section shall be published in the *Gazette of India*, and the publication in the *Gazette of India* of a rule purporting to be made under that section shall be conclusive evidence that it has been duly made.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to provide for certain matters connected with Government securities as to which legislation appears to be desirable.

2. Under the English law, on the death of one of several joint promisees or creditors, the right to sue on the contract vests in the survivors or survivor, and, on the death of the last of two or more survivors, in his personal representative. But a person receiving money under this right of survivorship may be accountable for it to the representatives of the deceased.

3. This rule has been altered in India by section 45 of the Contract Act, which provides that—

"When a person has made a promise to two or more persons jointly, then, unless a contrary intention appears from the contract, the right to claim performance rests, as between him and them, with them during their joint lives, and, after the death of any of them, with the representative of such deceased person jointly with the survivor or survivors, and, after the death of the last survivor, with the representatives of all jointly."

4. With reference to this section, the Law Commissioners, who prepared the draft of the Act, remarked :—"In regulating the devolution of rights and liabilities, we propose, in accordance with the rule of English Courts of Equity and of the Indian Code of Civil Procedure, that joint liabilities and rights shall, after the death of one of the persons liable or entitled, go to his representative jointly with the survivor, and after the death of the survivor to the representatives of both jointly." So far as can be ascertained, this proposal was accepted without criticism in India.

5. It appears that, both before and since the passing of the Contract Act, the practice of the Indian Public Debt Offices has been to treat the right of suing on, and giving receipts for money payable under, Government promissory notes as vesting in the survivor or survivors of two or more joint holders. But the law officers of the Government have recently given an opinion that, having regard to section 45 of the Contract Act, it is not safe to continue this practice.

6. Under these circumstances, the Government of India think that legislation is desirable both for the purpose of confirming what has been done in the past, and for the purpose of laying down a convenient rule for the future.

7. Accordingly, section 3 of the Bill declares that, notwithstanding anything contained in the Indian Contract Act, 1872, section 45, when a Government security is payable to two or more persons jointly and any of them dies, the security shall be payable to the survivor or survivors of those persons. But to this a clause is added making it clear that the section will not affect the liability of the survivor or survivors to the representative of the deceased holder of the security.

8. Lastly, sections 4 to 6 of the Bill deal with the issue of renewed and duplicate Government securities.

9. With regard to the renewal of Government securities, the holder of a security may, under existing rules, upon payment of the prescribed fee and delivering up his security properly receipted, obtain a clear title in the form of a renewed security in his own favour. This right is affirmed by section 4 of the Bill; but as Government by the renewal becomes liable in respect of the new note independently of any question as to legal completeness of discharge upon the original security, opportunity is taken to fix a term within which claims in respect of the original security must be made. Accordingly, section 6 of the Bill releases Government from liability in respect of the original security after the lapse of six years from the date of the issue of the renewed security.

10. With regard to duplicate securities, the practice has hitherto been, when a Government security has been lost or destroyed, to issue a notification, under the terms of the security, of the discharge of the security upon a given date, and to refuse to issue any duplicate until six years (the period fixed by the law of limitation) has elapsed from the date so fixed for discharge. If, however, the loan is not mature, no such notification of discharge can be issued, and the Government is obliged to refuse to issue any duplicate, in the face of the risk of claims being made in respect of the security alleged to be lost. The Bill adopts the existing practice in respect of the issue of duplicates, but, by applying in every case the period of limitation which under the existing law applies only in the case of securities of loans dischargeable upon notice given at any time, enables the Government to issue duplicates (under the usual safeguard of a bond of indemnity) in every case of a security proved to have been lost or destroyed.

Telegraph.

REPORT ON SCHEME FOR UTILIZING THE AGENCY OF THE POST OFFICE IN THE OPERATIONS OF THE TELEGRAPH DEPARTMENT.

No. 50 T., dated Fort William, the 17th March 1885.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Report of the Director General of Telegraphs, No. 558 T., dated 1st February 1885, showing the progress made from the 1st December 1883 to the close of the year 1884 in giving effect to the scheme, sanctioned by the Government of India in October 1883, for utilizing the agency of the Post Office in the operations of the Telegraph Department.

RESOLUTION.—The Government of India regards the progress made in the scheme for utilising the agency of the Post Office in the operations of the Telegraph Department as most satisfactory and encouraging. In publishing the report of the Director General of Telegraphs for public information the Government of India wishes to record its appreciation of the joint services rendered by the Postal and Telegraph Departments in this matter.

ORDERED, that a copy of this Resolution be communicated to the Department of Finance, and to the Director General of Telegraphs.

Also that a copy be published in the *Gazette of India*.

W. S. TREVOR, *Colonel, R.E.,*
Secretary to the Government of India.

No. 558 T., dated Calcutta, the 1st February 1885.

From—A. J. LEPPOC CAPPEL, Esq., Director General of Telegraphs in India,

To—The Secretary to the Government of India, Public Works Department.

As considerable progress has been already made in giving effect to the scheme sanctioned by the Government of India, in Public Works Department Resolution No. 287T. of the 9th October 1883, for utilising the agency of the Post Office in the operations of the Telegraph Department, I think it may prove interesting if I briefly report what has been accomplished from the

1st December 1883, the date of actual commencement of operations, to the close of the year 1884.

2. I will notice the various points of interest in the following order :—

I.—The reciprocal free transmission of telegrams and letters on the service of the Postal and Telegraph Departments.

II.—Postal Telegraph Receiving Offices.

III.—Telegraphic Money-orders.

IV.—The training of Postal Employés as Telegraph Signallers.

V.—Telegraph extensions to Post Offices and the combination of postal and telegraph duties at small stations.

I.—The reciprocal free transmission of telegrams and letters on the service of the Postal and Telegraph Departments.

3. This measure, as a whole, has been decidedly beneficial in removing friction and facilitating combined working.

In the interests of the public stringent rules are observed in the Telegraph Department to prevent departmental telegrams occupying the lines to the prejudice of paid traffic: such messages are reduced to the lowest possible limit both in number and length, and, except in cases of extreme urgency, are despatched only when the lines are clear.

Similar precautions have been introduced in respect of postal messages, and the present Officiating Director General of the Post Office has it in contemplation to adopt a system of codifying all words and expressions of usual occurrence in postal telegrams to reduce still further their length.

4. Some of the licensed telegraph systems protested at first against carrying, free of charge, messages on the service of the Postal Department, and some absolutely refused to do so. It will be of no interest to reproduce here the arguments brought to bear in the protracted correspondence that resulted. It is sufficient to say that, with the assistance of the Consulting Engineers to Government, the objecting companies were brought to see that the orders of Government on the subject were not unreasonable and must be complied with.

II.—Postal Telegraph Receiving Offices.

5. Rules for the treatment of telegrams received by Post Offices for transmission by post to the nearest Telegraph Office, and the necessary forms, were drawn up in this department and accepted by the Director General of the Post Office. Messages so tendered are Prepaid by means of postage labels, the discount on sale of which constitutes the remuneration of the Post Master, who, in the case of vernacular messages, is required to transcribe the telegram in Roman characters on a message form, or to translate it into English as preferred by the sender.

6. The amount collected by Post Masters is affixed in postage labels to the original telegrams, which are posted to the nearest Telegraph Office, whether Government or licensed, and no account-keeping is involved, except that the Check Office of this Department debits the Postal Department with the telegraph revenue prepaid in postage labels, less the usual discount of 3½ per cent.

7. The Check Office similarly effects the necessary adjustment of the value of postage labels accepted in payment for telegrams by licensed telegraph systems.

8. Owing to an oversight which I regret, statistics of the number and value of messages tendered at Postal Telegraph Receiving Offices have not been compiled prior to the 1st April 1884, and I have as yet only received the figures from April to September. They show a total for the half year of 11,623 messages of the value of Rs. 12,611.

9. The traffic has doubtless been affected by a misunderstanding, which is about to be remedied. It was arranged at the outset to distribute notices in the vernacular, as well as in English, calling attention to the facilities afforded for the despatch of telegrams from Post Offices, but this notice was issued only in English. Steps have now been taken to translate it into native languages and to distribute it freely throughout the country; but the scheme for the collection of telegrams at outstations has, I consider, made a promising start, and the facilities so offered may be expected, as they become more widely

III.—Telegraphic Money-orders.

10. In my letter No. 471T. of the 16th August last, I informed the Government that I had concluded arrangements with the Director General of the Post Office for the introduction of a system of telegraph money orders, the existing machinery of the Postal Department for remitting money being combined with telegraphic advices. This scheme came into force on the 1st October 1884.

11. As the system is fully described in the Postal Guide, it is unnecessary to enter into details here in respect of the postal procedure, and its incidence as regards the public.

12. The following are the charges which have been fixed for the telegraph portion of the business :—

(1) The original advice (containing on the average 16 words) is charged for at the fixed rate of Rs. 2, being "ordinary" rate, although treated as an "urgent" message.

(2) Any private matter added by the remitter is also charged for at the "ordinary" rate, 2 annas per word, although signalled as "urgent."

(3) The re-addressed telegraphic advices requisite where the Post Office of origin or of destination, or both, are sub-post offices, are carried free of charge.

(4) A fixed charge of one rupee, or "ordinary" rate, is made for an acknowledgment of receipt of the remittance, if sent, although such acknowledgment is transmitted as an "urgent" message.

13. From the date of the introduction of telegraphic money orders, this Department ceased to undertake money remittances under the "reply paid" rule for sums above Rs. 2.

14. During the first two months of the working of the telegraphic money order system, the number and value of telegraphic advices were as follows :—

	Number.	Value. Rs.
October 1884	777	1,747
November „	759	1,707

being at the rate of about Rs. 20,000 per annum. The estimated average earnings in the Telegraph Department on remittances of sums exceeding Rs. 2 had previously been Rs. 40,000 per annum. The result so far therefore entails a loss; but this result is, it is believed, in some measure due to insufficient advertisement of the advantages offered, and steps have been taken to remedy this. As the system becomes better known, the increased transactions will doubtless bring up the receipts of this Department to at least the amount of its earnings under the old system, while the benefit of the change to the public is very considerable.

IV.—Training Postal Employés in Signalling and Signal Office Procedure.

15. Immediately on receipt of the sanction of the Government to the scheme, I arranged with the Director General of the Post Office to depute a large number of postal employés to training classes, established by this Department at numerous centres throughout India. The standard of qualification fixed for these men was ability to send and receive Morse signals at the rate of 10 words per minute, (which is only half the rate required from Departmental signallers), and to gain sufficient knowledge of simple instruments, batteries and signal office routine to enable them to keep up telegraphic communication on short lines; it has been found that from three to four months' tuition usually suffices to communicate the necessary elementary knowledge of telegraphy to the postal employés, although in some cases a much longer time had to be allowed, while in numerous instances men have displayed an absolute inability to master the subject and have had to be removed from the classes. On the whole, the facility with which they have picked up the needful knowledge is very remarkable, and bears testimony to their general intelligence and enterprize.

16. Up to the 31st December 1884, certificates of qualification had been given to 354 men, and on that date 99 were still under tuition. As a rule, the supply of qualified signallers has kept pace with the demand caused by opening up extensions.

17. Whenever it has been found necessary for the Postal Department to employ substitutes for the men deputed to learn telegraphy, the Telegraph Department has borne the extra cost entailed, as well as the travelling charges necessitated by such moves. The average expenditure under this head has been about Rs. 50 for each man trained.

18. In many places, however, the existing postal establishments are fully worked and unable without assistance to undertake telegraph work: to meet such cases the Postal Department has engaged, and sent for training, probationary clerks who receive no pay during tuition, and in such cases the only debit to this department is the amount of travelling charges (if any) incurred by the probationers in joining the training classes.

V.—The development of the telegraph service by short extensions connecting "combined offices," with the existing telegraph lines and the making over, as a measure of economy, of certain unimportant departmental offices to postal agency.

19. After the necessary rules* and forms for "combined offices" had been drawn up in this Department and accepted by the Director General of the Post Office, the rules for the guidance of the public were revised, and published in the *Gazette of India*, and the requisite modifications of the Departmental and Licensed Telegraph Codes were made. Simple instructions for the use of the several descriptions of instruments that might be required were also drawn up, and a scale of equipment for "combined offices" was prepared. The object and scope of the scheme were fully explained to Chief Superintendents of Divisions, who were invited to lose no time in submitting recommendations for extensions which local circumstances seemed to justify and which promised a traffic sufficient to pay expenses.

20. In this direction I was greatly assisted by the Director General of the Post Office, who forwarded to me numerous lists of places which his principal officers desired to see made telegraph stations. The claims of every place named, whether by postal or telegraph officials, were carefully considered by me, and I am glad to be able to report that the care taken in this selection has been amply repaid by the results.

21. At the same time a selection was made of existing telegraph offices at which the experiment of working by postal agency might, it was thought, be tried; and the result, briefly stated, is that by the end of 1884, 65 departmental offices were converted into "combined" offices, by which measure a saving of approximately Rs. 71,000 per annum has been effected, and 170† new combined offices were opened, which, so far as data are available, show a profit on working of nearly Rs. 40,000 per annum.

22. I annex (Appendix A.) a detailed list of all combined offices opened up to the 31st December 1884, showing whether new offices or offices which were previously worked by departmental agency, whether connected to departmental offices or to licensed telegraph offices, and the cost of working and average monthly revenue.

23. A detailed statement of the cost of constructing the connecting lines is also attached (Appendix B). Of these, 59 are permanent lines, and 95 lines of temporary supports, which will be replaced by more permanent material as the success of the different offices becomes assured. The length of lines involved in these connections has been—

Miles.	
481	of new wire suspended on existing supports.
1,100	of new posts and wires.

* These have been modified and added to from time to time, and they are now incorporated in the new edition of the departmental Traffic Code.

† The number of new offices opened during the previous 10 years was only 89.

24. The cost of making these lines has been approximately Rs. 2,34,000. The cost of fitting up the offices may be put down at Rs. 250 for each connection, or Rs. 42,500 for the 170, so that for a total capital expenditure to the end of the year of Rs. 2,76,500 (or less than three lakhs even if the cost of training be included), a net revenue of nearly Rs. 40,000 per annum is even now being obtained.

25. These results have far exceeded my anticipations. The indirect advantages of extending telegraph facilities into native town centres appeared to me sufficient to justify an initial direct loss, and when I made my proposals to Government, the utmost I could allow myself to hope for was a balance of receipts and current expenditure for some years to come. It is, I venture to submit, a matter for unmixed gratification that the Government has been able to extend telegraph facilities in what may be described as almost a wholesale manner, not only without loss, but with every prospect of an assured financial gain.

26. The progress made month by month in establishing combined offices is shown in the following abstract :—

Month.	No. of combined offices.	
	Transferred.	New.
December 1883	17	..
January 1884	3	1
February „	1	4
March „	6	23
April „	6	20
May „	8	17
June „	2	16
July „	8	16
August „	4	11
September „	5	14
October „	2	17
November „	1	15
December „	2	16
Total	65	170

A total of 235 offices, of which 166 are connected to Government and 69 to licensed telegraph offices.

In addition to the above, arrangements were in progress at the end of the year 1884 to open 49 additional offices, and a large number of further extensions are in progress and under consideration.

27. It may be convenient to state here the arrangement come to with the Postal Department regarding the cost of combined offices. The broad principle is that the Telegraph Department shall pay the actual additional expense entailed by the assumption of telegraph work, and while the Postal Department gains by the attraction of the higher pay it is enabled to offer to a number of poorly paid employés, the Telegraph Department has just cause for congratulation at the liberal and catholic spirit with which the Director General of the Post Office has met its demands.

28. In a few instances, where the postal work is very light, the Post Master is required to undertake telegraph work without additional remuneration, and in such cases no debit is made to the Telegraph Department. In other cases, the Post Master receives an allowance for the telegraph duties, and where the postal or telegraph work is too heavy to admit of the latter being undertaken by the ordinary postal staff, special clerks are engaged at the expense of this department. Similarly, in the few cases where the available Post Office accommodation is too small to admit of telegraph work being undertaken, the Telegraph Department bears the expense involved in obtaining additional room. In a few instances postal peons deliver the few telegrams that are received, and in those cases no charge is made for their services; but where

this is impracticable, the cost of special messengers is borne by the Telegraph Department. Finally, a small fixed allowance is usually given for telegraph contingencies, such as stationery, other than forms, lighting, &c., and the Telegraph Department is debited with the actual cost of telegraph forms printed in the postal press for use in combined offices.

29. In the few cases in which it has been found convenient to establish "telegraph combined offices," *i.e.*, offices at which the postal work is performed by telegraph officials, the Postal Department is debited only with the actual extra cost incurred. There are at present only ten such offices, named in the margin.

Biaora.	Ghuna.
Dewas.	Kaliabar.
Dhunsiri Mukh.	Myanaung.
Diamond Island.	Shajapur.
Dimapore (Assam).	Sipri.

30. It will be observed that many of the new combined offices have been open only a month or two, yet the average monthly earnings of the 140 new* offices for which any data are available amount to Rs. 55 against an average working cost of Rs. 36, and these results are the more gratifying as, owing to the universal depression of trade, the experiment has been commenced under very unfavourable conditions.

31. The establishment of so large a number of combined offices, managed entirely by comparatively inexperienced men, has of course not been effected without throwing a large amount of extra work on the Telegraph Check Office. The want of arrangement and neatness in the packets of messages from combined offices, the careless filling in of invoices and other returns, irregularity in submitting returns and message drafts, and mistakes through ignorance or misunderstanding of rules, have all contributed to add largely to the work of that office. This will be readily understood when it is remembered that every combined office forwards its message drafts daily, that a letter has to be written regarding every missing message or return, and that rapid pairing or sorting of messages is largely dependent on the observance, by the offices, of the rules for arranging and despatching their documents.

32. Again the use of large numbers of postage stamps on messages instead of one or two telegraph stamps has much added to the labour of defacing the stamps and of scrutinising them when under audit. Postage stamps, more or less imperfectly defaced, are so easily obtainable that great vigilance is essential in the Check Office to prevent the fraudulent use of previously used stamps, mixed up, perhaps, with a number of good stamps. Such of the postage stamps as are affixed to messages tendered at railway telegraph offices reach the Check Office undefaced, and the counting and defacement of these under the immediate supervision of the Chief Superintendent of the Office adds considerably to the work.

33. It is satisfactory to find that, partly no doubt owing to those who use the telegraph at out-stations being less exacting than those at the large centres of trade, complaints from the public in respect of combined offices are infrequent. The service is necessarily not nearly so perfect as that on the main lines; but it has succeeded in giving satisfaction to those concerned, and has unquestionably met a public want.

34. By persistently calling attention, by means of printed memoranda, to every case of petty breach of rules, the Check Office is doing much to bring the combined offices up to the standard of exactness and smartness required in departmental offices.

35. It will be seen that the programme sketched out in my letter No. 480T. of the 29th August 1883, and approved by Government in its Resolution No. 287T. of the 9th October 1883, has been almost exactly followed, and I venture to hope that the gratification I feel at the result of the first year's operations may in some degree be shared by the Government of India.

36. Primarily the success is of course entirely due to the cordial co-operation I have received from the Director General of the Post Office, but it would be ungracious of me to omit to mention the loyal active help I have received from my own officers. The rapidity with which the scheme has been developed, and the numerous extensions provided, has involved a considerable increase of work, but it has been cheerfully undertaken by all, and to all my best thanks are due.

* The average earnings, if transferred offices be included, are Rs. 74 monthly against an average monthly

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE 3rd QUARTER OF 1884.

No. 200 R. T., dated Fort William, the 10th March 1885.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 172 R. T., dated 25th February 1884.
" " " " " 39 R. T., " 13th " 1885.

Read also—

Returns of Accidents to trains, &c., on the open lines of Railway in India for the quarter ended 30th September 1884.

OBSERVATIONS—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling-stock, permanent-way, &c., shows a decrease of 86, or 11·73 per cent., against an increase of 600 miles, or 5·76 per cent., in the mean mileage open, and a decrease of 362,746 miles, or 3·96 per cent., in the train mileage. The following are the Railways on which the numbers chiefly vary :—

	Increase.	Decrease.
East Indian	...	30
Sind, Punjab and Delhi	...	30
Darjeeling-Himalayan	...	23
Eastern Bengal	36	...
Indus Valley	...	60
Northern Bengal	11	...

2. On the East Indian Railway, the decrease chiefly took place under "Trains running over cattle on the line," the number of accidents of this description being 16 against 33.

3. On the Sind, Punjab and Delhi Railway, the number of accidents under "Goods trains, or parts of goods trains, engines, &c., leaving the rails" decreased from 10 to 3, "The failures of couplings" from 7 to 1, and "Other accidents" from 20 to 1. Under "Flooding of portions of permanent-way," the number of cases was *nil* against 8; while 5 cases of "Slips in cuttings or embankments" and 3 of "Fire in trains" occurred during the quarter against *nil* in the corresponding period of 1883.

4. Of the decrease of 23 accidents on the Darjeeling-Himalayan Railway, 18 took place under "Goods trains, or parts of goods trains, engines, &c., leaving the rails" alone.

5. On the Eastern Bengal State Railway, the number of cattle accidents shows the largest increase, being 31 against 6.

6. On the Indus Valley Railway, there was a decrease of 27 accidents under "Trains running over cattle on the line" 7 under "Failure of machinery, springs, &c., of engines," and 6 under each of the heads "Fire in trains" and "Other accidents."

7. The total number of accidents on the Northern Bengal State Railway was 26 against 15; but there does not appear to be any noteworthy increase under any particular head.

8. The casualties resulting from accidents to trains, &c., were among passengers, 7 injured against 2 killed and 20 injured, and among servants, 1 killed against 1 injured. It is observed that all the casualties to passengers were due to a collision which took place on the Madras Railway between a passenger train and some loaded wagons while being shunted at Guntakal on the 16th August 1884. These passengers are reported to have received slight injury only. Of the 2 passengers killed and 20 injured during the 3rd quarter of 1883, 1 was killed and 14 injured owing to the wrecking of a special passenger train on the East Indian Railway, and 1 killed and 5 injured by a collision on the Indus Valley Railway, as noted in para. 8 of Public Works Department Resolution, No. 172 R. T., dated 25th February 1884.

9. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby :—

Description.	Number of accidents.	Number of passengers and others.		Number of servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains and goods or mineral trains, engines, and vehicles, standing foul of the line	8	...	7	...	...	...	7
Collisions between goods trains or parts of goods trains	9	...	...	...	...	...	...
Collisions between light engines	3	...	...	...	...	...	...
Passenger trains, or parts of passenger trains, leaving the rails	18	...	...	...	...	...	...
Goods trains, or parts of goods trains, engines, &c., leaving the rails	50	...	...	...	...	...	...
Trains or engines, travelling in the wrong direction through points	10	...	...	...	...	...	...
Trains running over cattle on the line	280	...	...	...	...	...	...
Trains running over obstructions on the line	24	...	1	...	...	...	1
Trains running through gates at level-crossings	14	...	...	...	...	...	...
The bursting of boilers or tubes, &c., of engines	15	...	...	...	...	...	...
The failure of machinery, springs, &c., of engines	51	...	...	...	...	...	...
Ditto of wheels	1	...	...	...	...	...	...
Ditto of axles	7	...	...	...	...	...	...
Ditto of brake apparatus	1	...	...	...	...	...	...
Ditto of couplings	18	...	...	...	...	...	...
Broken rails	5	...	...	...	...	...	...
The flooding of portions of permanent-way	43	...	...	...	...	...	...
Slips in cuttings or embankments	30	...	...	...	...	...	...
Fire in trains	25	...	...	...	...	...	...
Fire at stations, or involving injury to bridges or viaducts	1	...	...	...	...	...	...
Other accidents	34	...	...	1	...	1	...
Total	647	...	8	1	...	1	8

10. The number of cases of "Goods trains, or parts of goods trains, engines, &c., leaving the rails" decreased from 73 to 50, owing chiefly to there having been only 5 accidents on the Darjeeling-Himalayan Railway against 23 in the corresponding quarter of the previous year.

11. The total number of cattle accidents does not show much variation, being 280 against 291; but, as already noted, there were decreases of 17 and

27 accidents on the East Indian and Indus Valley State Railways respectively, and an increase of 25 on the Eastern Bengal Railway. It was on the South Indian and Rajputana-Malwa Railways that the accidents of this class were most numerous, viz., 42 and 59, or 15 and 21 per cent. respectively of the total. Almost the whole of the accidents on the Rajputana-Malwa Railway occurred on the unfenced portion of the line.

12. The failures of axles numbered 7, of which 5 were on the Darjeeling-Himalayan Railway and 2 on the Rajputana-Malwa Railway.

13. The number of "Failures of couplings" diminished from 29 to 18, the cases of "Flooding of portions of permanent-way" from 66 to 43, and the number of accidents classed as "Other accidents" from 59 to 34. Of the 43 accidents under the second head, 14 took place on the Great Indian Peninsula Railway and 11 on the Punjab Northern Railway.

14. The number of "Slips in cuttings or embankments" rose from 16 to 30, of which 16 occurred on the Great Indian Peninsula Railway and 6 on the Darjeeling-Himalayan Railway.

15. There were 15 cases of "The bursting of boilers or tubes, &c., of engines," of which 9 were on the Rajputana-Malwa Railway alone.

16. The casualties to passengers from causes other than accidents to trains, &c., were:—

	Killed.	Injured.
Falling on to the platform, ballast, &c., when getting into or out of trains	2	2
Falling out of carriages during the travelling of trains	4	24
Other accidents	...	2
TOTAL	6	8

17. And the accidents to servants in the employ of Railways, or of contractors, whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., were:—

	Killed.	Injured.
During shunting operations	1	9
Falling off engines, vans, wagons, &c.	2	7
Coming in contact with overbridges, &c., during the travelling of trains	...	1
Coming in contact while shunting, with vehicles, &c., standing in adjoining lines	...	1
Getting on or off trains, engines, &c.	3	4
Whilst loading, unloading or sheeting	...	9
Whilst working at cranes or capstans	...	2
Whilst working on the permanent-way or in sidings	4	3
Whilst walking along the line on the way home or to work	...	3
Whilst walking, crossing, or standing on the line	8	7
Whilst passing between vehicles	...	1
Whilst attending to the machinery of engines, cleaning them, &c.	...	5
Falling of ladders, scaffolds, platforms, &c.	...	2
By falling of lamps, wagon doors, timber, weights, &c.	...	3
Whilst coupling or uncoupling wagons	1	2
Miscellaneous	3	29
TOTAL	22	88

18. Of other persons killed and injured by running trains, &c., 3 were killed and 3 injured whilst passing over the line at level-crossings; 30 were

killed and 8 injured whilst trespassing on the line; 13 committed suicide; and 5 were killed and 2 injured from miscellaneous causes.

19. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1883:—

	3RD QUARTER OF 1883.		3RD QUARTER OF 1884.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control . . .	2	21	1	11
„ misconduct or want of caution . . .	9	21	5	24
Servants.				
From causes beyond their own control . . .	1	17	3	9
„ misconduct or want of caution . . .	34	101	20	79
Others.				
Whilst passing at level-crossings	2	3	3	3
Trespassers, including suicides	33	13	43	8
Other persons	7	8	5	2
TOTAL .	88	184	80	156

20. In addition to the above, 9 persons are reported to have been killed and 68 injured in yards, workshops, &c., and 80 persons to have met death in carriages and at stations from causes unconnected with the working of trains.

RESOLUTION.—The attention of the authorities concerned should be invited to the large number of accidents under "Trains running over cattle on the line" on the South Indian and Rajputana-Malwa Railways, and the increase under this head on the Eastern Bengal State Railway, and under "The bursting of boilers or tubes, &c., of engines" on the Rajputana-Malwa Railway.

ORDER.—Ordered, that this Resolution, together with the Abstract Returns compiled by the Government of India, be communicated to the Governments, Administrations and Officers noted in the margin, for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Assam, and British Burma.
The Residents, Hyderabad and Mysore.
The Agents to the Governor General for Rajputana, Central India and Biluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

FRED. FIREBRACE, *Major, R.E.*,
Under-Secretary.
